TO LADIES:

BROWN'S IRON BITTERS is peculiarly adapted as a thorough tonic for females. Iron to the physical composition is a necessity. In this connection we would add, that a leading Medical Professor recently speaking of the preparations of Iron said :

"The preparations of *Iron* which are termed in medicine as *Ferruginous* or *Chalybeate*, are by far the *most important of all tonics*—in fact, there is no tonic, either mineral or vegetable, which meets so many requirements of man.

Besides the local *tonic* effect that *Iron* is bound to produce, and the general corroborant action on the cerebro-spinal system which it possesses, it exercises a *restorative influence on the state of the blood* by increasing the number of its coloring particles and the amount of the solid constituents.

Iron is, in fact, a *natural* constituent of the blood, and is to be considered *as a necessity* in enlivening this the stream of life.

The effects of *Iron* are best seen in conditions of the system in which there is a *relative want of activity* in the *nerves* and *muscles*. Under its use the *blood becomes richer*, the *digestive organs* are promoted, the *pulse becomes fuller and stronger*, the *skin assumes a healthy tint*, the *lips and cheeks grow more florid*, the *temperature of the body is increased*, and the *muscular strength greatly invigorated*.

The red *corpuscles* of the *blood*, which are increased by the use of *Iron*, act as garners of *Oxygen*, which they take up from the inspired air of the lungs; and it is now generally conceded that *Iron* taken up in the blood corpuscles converts *Oxygen* into *Ozone*, a much more active power than *Oxygen*, and one that is considered as the *greatest* destroyer of poisons in the system.

The diseases in which *Iron* is especially serviceable are those which come from want of richness in the blood, strength in the muscles and tone in the nerves, such as *Weakness*, *Inactivity*, *Depression*, *Loss of Appetite*, *Dyspepsia*, *Indigestion*, *Neuralgia*, *Hysteria*, and all other diseases so distressing to ladies."

With such medical authority the use of *Iron* cannot be too strongly urged. Physicians for a long time have conceded that *Iron* was absolutely necessary, but the trouble has been that it seemed impossible to prepare it so that it would have no injurious effects. Each new discovery was received with delight by the medical profession, only to be thrown aside some time as a failure, and it was not until the discovery of **BROWN'S IRON BITTERS**, that *Iron* was so prepared that it would readily and thoroughly assimilate with the blood and would not blacken the teeth, cause headache, constipation or other evil effects caused by every other iron preparation. **BROWN'S IRON BITTERS** is made only by the Brown Chemical Company, of Baltimore, Md., and contains no whiskey or other injurious ingredients.

Get the genuine, which is for sale by all respectable dealers in medicines, price, \$1.00 a bottle.
