PLAN BIG FLYING STATION NEAR CITY

Negotiations On for Equipment of the Largest Aeronautic Grounds in the World.

OPTION ON 265 ACRES

Plant To Be Used for Manufacture and Testing of All Kinds of Craft in Air Navigation.

FOR BALLOONING PARTIES

Provisions Will Be Made for Persons Seeking Pleasure in Excursions Aloft.

Plans have been practically completed for the equipment near New York city of the largest and most complete aeronautic grounds in the world. Details of the plan were tentatively agreed upon last Saturday at the Waldorf-Astoria, when a dozen aeronautic experts of national prominence met and went over the entire proposition. Unless some unlooked for development occurs the final papers in the deal will be signed within a week or ten days and the actual work of clearing a 265 acre plot, on which a half option has been obtained, will be begun.

It is understood that Charles J. Glidden, of Boston, who has recently developed into an enthusiastic balloonist, and Leo Stevens, an aeronautic expert and a manufacturer of balloons, will be prominently associated with the corporation, which will have the backing of millions. No estimate on the amount of money to be invested in the construction of the several buildings would be made by the men interested in the plan, but it was stated that the investment will be heavy. It is the belief of the men back of the scheme that within several years it will place America in a position to take front rank in aeronautic achievements.

There will be buildings for the manufacture of balloons of all kinds, for the manufacture of motors, for the manufacture and storage of gas, tracks over which to make experiments with aeroplanes and buildings in which to manufacture all kinds of aerial devices.

The plant will be as complete as it is possible to make it, and if the plans are carried out America will have a sort of aeronautic paradise which will be the envy of aerial experts the world over. Several big balloons will be kept ready at all times to make ascensions. Italian, French and German, as well as American pilots, will be kept on duty.

Those associated with the project declare that there are thousands who would avail themselves of an opportunity to make ascensions if they knew where they could do it in safety. It is proposed to make it just as easy to organize a ballooning party after the new grounds are completed as it is now to get up an automobile or a theatre party. The plant will be of such capacity that it will be possible to fill a 60,000 cubic foot balloon in thirty minutes.

While the promoters of the enterprise expect to charge to make ascensions, they declare that their principal purpose in conducting the business will be to stimulate interest in aeronautic sports.

No specific information has been made public concerning the location of the 265 acre plot. It is known, however, that it is accessible to New York and could be reached by a short train ride. It is not expected, however, that the buildings will be completed and in full operation before the early summer of 1910.

AIRSHIPS TO FLY FROM THE ASTOR

Station for Aerial Craft Will Be Provided on the Roof of the Hotel.

The first permanent station for airships to be opened in this city is to be built on the roof of the Hotel Astor, according to an announcement made last night by William C. Muschenheim, proprietor of that hotel. Mr. Muschenheim said he was prepared to spend $20,000 in devoting 60,000 square feet on the roof of the building to the airship station, which is to be in readiness for aeroplanes, dirigible balloons and other craft of the air before May 1.

A part of the roof of the building which faces Broadway and all of the space on the addition to the hotel will also be utilized for this purpose. To each of three contractors who have been asked to make estimates on the cost of the new station the hotel proprietor has stipulated that in the station there must be provided tanks from which dirigible balloons may get all the gas needed and that there must be shelter sheds, rails and starting apparatus to be used in setting aeroplanes in motion. One feature of the station is to be a set of six capstans. These are to be placed in position in order that airships may be anchored there.

Fred Muschenheim, a brother of William C. Muschenheim, and associated with him in the management of the hotel, is a graduate of Stevens Institute and is an electrical engineer of reputation. Many of his devices are now in use in the Hotel Astor and he is at work on others which will be used on the roof.

FIRE SCARE AT HOTEL CADILLAC

Everybody at the Hotel Cadillac, at the corner of Forty-third street and Broadway, was aroused from slumber early yesterday morning by the ringing of the bells in their rooms and as fast as they answered the calls they were told that there was a fire in the basement and that they would do well to prepare to leave the building at a few moments' notice in case the blaze spread.

The engineer was repairing the boiler when a sheet of flame burst from the furnace. Manager Reid sounded an automatic alarm and the firemen quickly extinguished the blaze.

Yesterday's Fires.

Fires yesterday were:—

12:25 A. M., No. 1,621 Madison avenue, J. Fearlman; $5.

12:45 A. M., 122d street and Eighth avenue, Interborough; slight.

2:55 A. M., No. 110 East Tenth street, Matthew Callahan; $20.

3:40 A. M., No. 2,370 Second avenue, Samuel Goldstein; $150.

5:20 A. M., northeast corner of Forty-third street and Broadway, Hotel Cadillac; $50.

10:20 A. M., No. 535 Sixth street, Jacob Epra; $10.

11:45 A. M., No. 336 East Forty-eighth street, owner unknown; trifling.

12:10 P. M., No. 227 East 102d street, Public School No. 121; slight.

3:55 P. M., No. 56 Goerck street, Andrew Erco; slight.

4:30 P. M., No. 607 East Twenty-fifth street, Baltimore and Ohio Railroad; $125.

6:10 P. M., No. 109 Goerck street, Samuel Found; $2.

7:30 P. M., No. 603 First avenue; Thomas Decanto; $200.

7:50 P. M., No. 140 East Thirty-fourth street; Lohise Tartar; $50.

8:50 P. M., No. 231 West Thirty-sixth street; J. J. Beans; $200.

8:20 P. M., No. 116 Second street; Sam Sing; $100.

8:50 P. M., No. 414 East Seventy-eighth street; John Geiltz; $1,000.

9:20 P. M., No. 315 East Twenty-fourth street; Charles Hibson; $100.

9:50 P. M., No. 162 West Fifty-fourth street; Mrs. Anna Evans; $100.

Wright Brothers Soon to Return Home

WILBUR WRIGHT RELATING HIS EXPERIENCES TO KING EDWARD VII PHOTO COPYRIGHT BY BRANGER, LONDON.

Wilbur Goes to Rome to Make Demonstration Before Italian Military Authorities and Instruct an Army Officer—Coming Here to Take Up Work at Fort Myer.

[SPECIAL DESPATCH TO THE HERALD VIA COMMERCIAL CABLE COMPANY'S SYSTEM.]

HERALD BUREAU, No. 49 AVENUE DE L'OPERA, PARIS, Sunday.

Mr. Wilbur Wright left Paris to-day for Rome, where Hart O. Berg is awaiting him. To a HERALD correspondent Mr. Wright said:—

"I expect to remain in Rome about a month in order to make some demonstrations of flying before the Italian military authorities, and also to instruct an Italian army officer in handling the machine. When this work is completed my brother and I intend to return to America by way of England.

"Once back in America we shall take up our work at Fort Myer. Again in late summer either Orville or myself will go to Berlin for the purpose of presenting our machine to the German government."

This is a definite statement of the Wright programme, and should set at rest all the false rumors.

The Swiss Aero Club has decided that the Coupe Internationale des Aéronautes will be contested October 3, Zurich being the starting point. The club announces the attention to organize an international landing competition. This will be decided a few days before the great race, probably October 1.

SLAYER GARROTES HIMSELF IN TOMBS

James Vango, Who Confessed Killing Hotel Clerk, Uses Handkerchief in Committing Suicide.

JESTS IN NOTE TO POLICE

Flippant Farewell to His Captor and Brief Letter to His Wife Written by Prisoner.

Doomed by his own confession of murder, James Vango, a young West Indian negro, who was accused of slaying a clerk in the Eastern Hotel, at South Ferry, wrote a flippant jest to his captor, a sentimental farewell to his wife and calmly strangled himself in the Tombs Prison yesterday morning. Death cost him more than the agony of swift legal execution by electricity, but the nature that had prompted him to attempt murder twice before he actually killed a man supported him without flinching.

From a coarse cotton handkerchief he tore the centre, leaving the deep hem of its edges for a cord, which he tied about his throat. That he might not tumble from his cot and reveal his purpose, Vango hooked up the chain supporting it so that the bed tilted toward the wall. Then he pulled the coverlet over his head, put a pencil through the cord about his neck and twisted it. His improvised garrote quickly cut off his breathing. While still conscious he put an end of the pencil under his jaw to prevent it loosening.

Keepers bringing his breakfast thought Vango was lazy or exhibiting the ugly spirit he had shown ever since his incarceration in the prison last Tuesday. They soon discovered the garrote and cut it, but Vango died before a surgeon could reach him.

He had addressed a note to Detective James Murphy, the Central Office policeman who arrested him in Chicago. "Say, Jim," he wrote, "I think I will take this way out for mine. This will save you a bit of trouble. You brought me in. I will try to make some one else fetch me out. All's well that ends well, you know. J. V."

To his wife he left a note reading:—

"Death is but an eternal sleep. Why should I stay and suffer? Forgive me. Jim."

De Vallant was found dead in the pantry of the Eastern Hotel March 15. His head had been smashed and his throat cut. From the office desk $78 had disappeared and $150 he had been saving with which to buy his wife a jewelled ornament was missing from his pocket. Inspector McCafferty sent James Murphy of his staff to investigate and the latter learned that Vango, employed in the hotel as a bell boy, had been discharged ten days previous to the murder. Murphy traced Vango to Chicago and by means of a photograph found him there. As soon as Vango was brought here he confessed the murder, implicating two other men.

MR. ROOSEVELT TO HAVE 'TAME SPORT'

Dana Estes, Back from Africa, Says Some of Shooting Will Be "Like Killing Cows."

WAS NEAR HUNTING GROUNDS

Boston Publisher Believes Former President "Will Have a Fine Time Deeper in the Jungles."

That Mr. Roosevelt would find shooting of some of the game in Africa "as tame as killing cows in a back yard" was stated by Dana Estes, a former Boston publisher and friend of the former President, who returned yesterday from an eight months' trip in Europe, Africa and Asia. He travelled over the Uganda Railway, visited the Victoria Falls, went around Lake Nyanza and finally left Cape Town for New York by the way of Southampton, reaching here on the St. Louis, of the American line, in thirty-one days.

During the eight months Mr. Estes, a gray haired man of perhaps sixty years, journeyed more than twenty-five thousand miles. After passing through the Balkan States Mr. Estes went to Constantinople and was there when the first Turkish Parliament was elected. "It was the most interesting and soul moving sight to me since the outbreak of the civil war," he said.

"Before I went away I talked with President Roosevelt about his proposed trip," said Mr. Estes, "and at Mombassa I began the journey which will be made soon by him. Through the tropical regions of the coast, through desert lands and fertile plains and past the grand snow capped Kilimanjaro I went to Narobi, near which Mr. Roosevelt will find his first great hunting ground.

"On my way I saw thousands of wild animals, more than fifty varieties of antelopes, zebras, ostriches and small animals, all as fearless of the puffing locomotive as ordinary herds of cattle and sheep. Occasionally a younger animal would kick up its heels and run away for a short distance, but no more so than a frisky colt in a country pasture.

"Killing this game will be no more difficult a task than shooting cows in the back yard of a country farmhouse, but I know that Mr. Roosevelt will have a fine time and deeper in the jungles will meet other conditions. Everywhere I heard of his coming, for which much preparation has been made.

"The trip from Narobi to Victoria Nyanza is through a beautiful and picturesque region. After visiting Uganda I went to the native capital, Campella, at the falls at the head of the River Nile, and returning to Mombassa made a trip south to the famous slave trade centres of Zanzibar and Mozambique. I went inland to Rhodesia and to the Upper Zambesi and the Victoria Falls, which are twice as high as Niagara. Before embarking at Cape Town I visited the mining fields and diamond mines."

DEMAND $1,000 OR LEG; GET THE LEG

Black Hand Threat Didn't Alarm St. Louis Man, for His Wooden Limb Was Detachable.

LEFT OLD ONE AT THAT

Worn Out Member, Well Wrapped Up, Placed Where Society Told Him to Leave Money.

[SPECIAL DESPATCH TO THE HERALD.]

ST. LOUIS, Mo., Sunday.—Threatened the loss of a leg unless he left $1,000 in a designated spot, Edward Tucker, No. 3,113 North Twelfth street, is the latest victim of the Black Hand. Unlike the usual run of Black Hand victims, Tucker is not frightened, for he has taken the black handers at their word, and believing they would appreciate the leg as much as they money, he left his wooden limb in the place designated.

"Leave $1,000 at the northwest corner of Twelfth and Plum streets, Saturday, between eight and nine o'clock. If you fail to do this you will lose a leg before Sunday night," the letter ran. It was written in red ink and the only signature was a black hand with the word "Society," written when he went to the trysting place.

Though only a few know it, Tucker lost his right leg many years ago and wears a mechanical wooden device that when he walks, looks like the real thing. At eight o'clock Tucker left his home, which is near the corner specified in the note, carrying a bundle under his arm. He walked to a vacant house on the corner and deposited the bundle on the porch. When he agai nvisited the spot this morning the bundle was gone. Besides saving his money, Tucker played it down right shabby on the Black Hand, for he substituted an old worn out wooden leg in place of his good one.

THREE STORY FALL LEAVES HER UNHURT

Two Clotheslines Detain Girl Momentarily Before She Plunges on to a Mattress in Yard.

To fall from a third floor window, thirty-five feet above the ground, rest for a moment in the downward flight on a clothes line at the second floor, hesitate for a fraction of a second on another clothes line at the first floor, turn several times in the air and finally land on a nice soft mattress, escaping injury, was what happened to Rebecca Kopatz, sixteen years old, yesterday afternoon in the rear of her home, No. 233 East 110th street.

Rebecca was very much interested in watching several boys who were pole vaulting in the rear yard of the building in which she lives. While she was looking out of the window she lost her balance. The mattress was being used by the athletes as a cushion.

Little Nemo fell out of bed again. The cause, of course, was a prank, the details of which are told in the SUNDAY HERALD.

BREAKING ICE ENDS 50 LIVES.

Winter's Record in New England and Canadian Waters Remarkable for Double Fatalities.

BOSTON, Mass., Sunday.—Through the ice on the inland ponds, lakes and rivers of New England and the maritime provinces of Canada, more than half a hundred persons lost their lives during the winter season just closed.

Although this figure does not exceed that of past years, the list of accidents of the last winter is remarkable for the large number of double fatalities. In eight cases, two persons met their death through the ice at the same time. In still another accident, four children were drowned, and a fifth varely saved.

Of the fifty deaths reported, twenty-eight were those of children of fifteen years or under.

SPECIAL NOTICES.

BAD COMPLEXION.—Beauty, they say, is only skin deep. Nature made beauty the visible symptom of health. If the digestive tract is clogged, the stomach overloaded, the liver asleep—it will show immediately in the complexion.

FRANZ JOSEF NATURAL APERIENT WATER will help your body get rid of its impurities. By eradicating the impurities of the blood it will assist Nature to bring the bloom of roses back to your cheeks and the blush of health to the complexion. It is palatable, prompt and permanent.

Club Rooms for Trolley Car Men

Third Avenue and Union Companies Provide Games for Employes in New Building.

Billiard, pool and card tables for the use of motormen and conductors between runs are some of the innovations in the new executive building of the Third Avenue Railroad Company and the Union Railroad Company, which will be opened to-day at 130th street and Third avenue. The offices, which will be used jointly by the two systems, have been erected at a cost of $150,000 and henceforth will be the headquarters of Frederick W. Whitridge, the receiver.

The rear of the first floor has been fitted up as club rooms for the use of the employes while off duty and contains paraphernalia for all kinds of indoor recreation. A large and well equipped library has also been installed. These rooms will be open twenty-four hours of the day so the day and night shifts can share in the benefits.

Shower and needle baths for the men who have completed an exhausting period of work form another feature of the building, with which it is asserted no other traction company in the country has anything to compare. The announced purpose of the present administration of the companies in including these improvements is to promote a better understanding between the officers and the employes.

Office room is provided for the new mutual benefit association, which was organized in January and which counts eighty per cent of the employes among its members. Each man who joins this association and pays monthly dues of fifty cents is entitled to $1.50 a day during illness, and in event of death is insured for $150.

The building is five stories high, with a frontage of 100 feet in Third avenue and 150 feet in 130th street. It is fireproof, with tiled and cement floors. The executive offices are on the second floor, where is also the office of the company physician, who is in attendance for consultation by employes every day. The claim, auditor's, cashier's and drafting departments also have quarters in the structure. A handsomely decorated hall has been provided for meetings of the directors.

Little Nemo fell out of bed again.. The cause, of course, was a prank, the details of which are told in the SUNDAY HERALD.

Carlisle Commencement Opens.

[SPECIAL DESPATCH TO THE HERALD.]

CARLISLE, Pa., Sunday.—The Carlisle Indian School commencement opened here to-day with Baccalaureate services in the school auditorium. The address was delivered by M. E. Gates, secretary of the Indian Commissioner's Board, Washington.

A dress rehearsal of the opera, which will be given entirely by Indian students, will be held to-morrow night.

MURDERED ITALIAN FOUND IN FLATBUSH

Salvatore Mellare Mysteriously Attacked and Left Dead at Street Corner.

THREE BULLETS IN HEAD

Neighbors Report Having Heard Shots but Neither Slayers Nor Their Motive Are Known.

REVENGE THEORY ADVANCED

Police Believe Victim Might Have Been Lured to His Death by Countryman Whom He Had Duped.

With three bullet wounds in the back of his head indicating that he had been murdered, the body of an Italian, who was afterward identified as Salvatore Mellare, believed by the police to have been a friend of the men who laid the plot for the killing of Lieutenant Petrosino, was found yesterday morning lying in a pool at Brooklyn avenue and Malbone street, Brooklyn.

After a day spent in the most rigid investigation, the police declared at night that the case was one of the most mysterious with whcih they had ever had to contend. Several pistol shots had been heard by persons living in the neighborhood late on Saturday night, but the slayers left absolutely no clew either to their iddenity or to the motives which actuated the crime.

Mellare himself was mysterious. He looked to be about thirty years old, but no one has been found who can tell where he made his home or whether he had any relatives. The police say that he was a skilful confidence operator, and that he had been in the habit of meeting many Calarians and Sicilians when they landed in this country. Based on this information a theory has been framed that he was lured to Flatbush by compatriots whom he had swindled, and was there shot down. The place where the body was found is in the centre of an Italian settlement.

Antonio Mungo, who lives in the neighborhood, discovered the body at nine o'clock in the morning, while he was unloading a truck of refuse. Captain Dulfer, of the Flatbush avenue station, began an investigation with a squad of his men. Subsequently Policemen Mealli, Santoro, Fassulo and Puciano, of the Italian Branch Detective Bureau, made an exhaustive search of the entire settlement. Several letters in the slain man's pockets, addressed to a house in East Thirty-second street, Manhattan, conveyed the information that he had been having his mail delivered at a small Italian bank at No. 174 Hester street, and there the police found Genaro Martello, who is employed in the bank. He was taken to the morgue in Brooklyn, whence the body had been removed, and there identified it as that of Mellare. He asserted that he knew nothing of the man's affairs.

Many Italians said Mellare was known to Calabrians not only here, but in Stamford, Conn., Troy, N. Y., and other cities.

SHOOTS BROTHER'S WIFE AND HIMSELF

Robert Schneider, of Newark, Quarrels with Woman Who Left Her Husband's Home.

Having taken upon himself the settlement of his brother's domestic troubles, Robert Schneider, of No. 369 Springfield avenue, Newark, became involved in a quarrel with his sister-in-law, Mrs. Carl Schneider, yesterday, and after shooting her turned the revolver upon himself and fired. Physicians at the City Hospital say both will die.

Robert and Carl Schneider lived together at the Springfield avenue address. Frequent differences between Carl Schneider and his wife came to a head early last week, when the woman left, declaring that she would never return. She obtained temporary quarters with Herman Schneider, another brother of her husband, and his wife, at No. 291 Runyon street, Newark, intending to find employment.

Her husband made no effort to come to an agreement with her, but Robert Schneider called two days later and pleaded with her to return. At that time he made threats, describing the uncomfortable conditions under which the two brothers were forced to live without a housekeeper, but apologized when she started to notify the police. He called again on the same errand Saturday night and remained at Herman Schneider's home. After dinner yesterday he went to the cellar, where, it is supposed, he drank heavily from a flask which he carried.

When he returned to the front room Mrs. Carl Schneider was there alone. A moment after he entered the woman was heard to call:—

"Stop! Go away! Don't touch me!"

Four shots followed, three of them striking Mrs. Carl Schneider, while the last the man sent into his own side. It is thought that he tried once more to induce her to return to her husband and that her reply angered him. Carl Schneider expressed surprise when informed of the shooting and said that he had not delegated his brother to attend to his affairs.

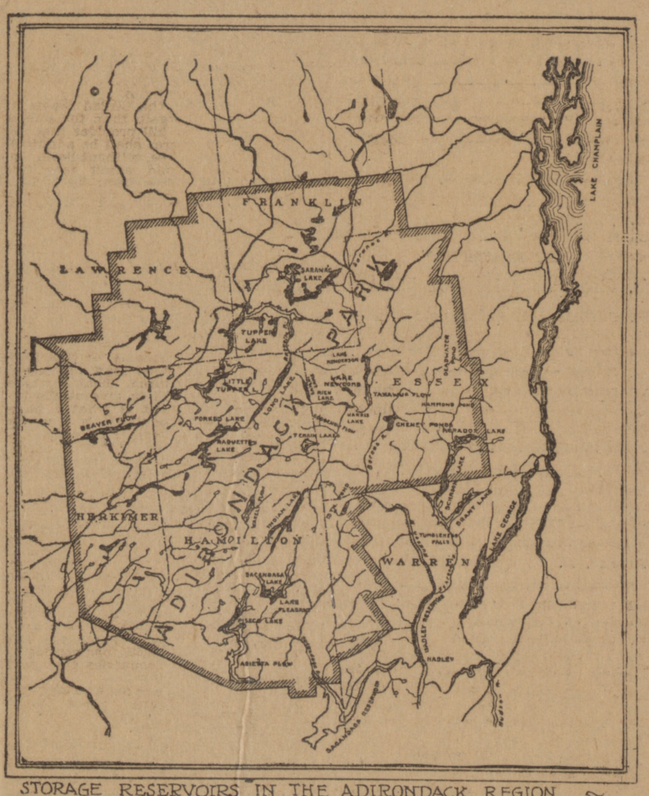
TO STUDY WATERWAYS TREATY

[SPECIAL DESPATCH TO THE HERALD.]

OTTAWA, Ontario, Sunday.—Hon. A. B. Aylesworth, Minister of Justice, and Chairman Gibbons, of the Canadian section of the International Waterways Commission, have gone to Washington on treaty business. They plan to make a study of the Senate rider to the waterways treaty and will discuss its provisions with the United States Secretary of State and Ambassador Bryce.

Their object is to ascertain its exact purpose and probable effect. Upon their report will depend whether Canada will assent to the treaty in its amended form.

SEE PROFIT FOR STATE IN VAST WATER PROJECT



STORAGE RESERVOIRS IN THE ADIRONDACK REGION

Commission Will Report to Legislature Next Week After Two Years' Investigation—Estimated Cost of Conserving the Supply Is $25,000,000.

Total number of plants in New York State using water for power.	1,824
Horse power capacity...	830,000
Actual horse power used because of inadequate water supply.....	619,000
Possible power available by the storage of water now running to waste..	1,000,000
Acres of land in the Adirondack Park owned by the State	1,322,776
Acres required for storing the flood water of the mountain streams.	20,000
Estimated cost (unofficial) of storage and power reservoirs, dams and condemned lands..	$25,000,000
Estimated (unofficial) annual revenue to the State from sale of power to manufacturing plants	$700,000

After more than two years' labor, requiring the services of one hundred and forty engineers and surveyors, the State Water Supply Commission, created in 1905, will next week submit to the Legislature the final conclusions of its engineers on the stupendous project of conserving the flood waters of the State, which will require an amendment to the constitution to become effective.

The plan involves an expenditure of about $25,000,000 for the saving and utilization of waters that go to waste annually in the Adirondack region. It is proposed that this expense shall be borne in whole or part by property owners, who will be benefited by the use of water stored by the building of dams and reservoirs, and that the State shall derive a revenue by going into the business of selling power to manufacturing plants. The plan contemplates the changing of the face of nature in an area covering 1,600 square miles, the wiping out of entire villages and the creation of artificial waterways.

To carry out the plans for the building of dams and reservoirs and transforming dry land into miniature fresh water seas it will be necessary to take possession of about twenty thousand acres, which is 1.6 per cent of the Adirondack tract. Viewed broadly, the amendment to the State constitution which is necessary to combat the opposition to appropriating State lands for State revenue means that if the floods of wasted water are conserved in storage reservoirs there will be:—

First—An equalization of stream flow by storing water during the wet season and using it to increase the volume during the dry season.

Second—The decreasing of the frequency of freshets and reducing the loss by floods, and

Third—Increasing the low water flow of polluted rivers, and by this dilution of sewage improving the sanitary conditions on the streams.

There are 1,824 plants in the State of New York operated by water power. The exhaustive investigation and calculation of the experts engaged by the State Water Supply Commission is that a conservative estimate this horse power could be increased to at least 2,000,000 by the construction of storage and power reservoirs, and that the State could profitably go into the business of encouraging industrial enterprise by selling power. An expert not connected with the commission has estimated that a revenue of $700,000 per annum can be derived by the State from the sale of power.

CARS FOR WOMEN IN HUDSON TUNNEL

William G. McAdoo Decides to Try Them During "Rush" Hours as an Experiment.

Although the idea of having separate subway cars for women doesn't seem to meet with the approval of the Interborough Rapid Transit Company, a decisive test of the plan will be made on the Hudson tunnel system beginning next Wednesday morning. If it is found to work satisfactorily in adding to the accommodations for passengers or facilitating the movement of trains, it will be made a permanent feature of the line.

William G. McAdoo, president of the Hudson and Manhattan Railroad Company, in announcing his plan yesterday, said that when the idea was suggested first it did not seem feasible, but after studying the problem he decided it well worth a test.

The special cars for women will be run only in "rush" hours to begin. They will be attached to all trains leaving Hoboken between seven and nine o'clock in the morning and those leaving Manhattan between half-past four and seven o'clock in the evening. The porters now at each station will pay particular attention to the last cars and their women passengers.

Discussing the subject yesterday, Mr. McAdoo said:—

"We believe progressive railroad management demands that new problems as they arise should be met and solved rather than be disregarded or postponed. When the suggestion about separate cars for women was first made we doubted its practicability. After careful consideration, however, we have become convinced that it ought to be tried in actual practice.

"We are in favor of anything which will make it more comfortable for women and children, particularly, who have to use crowded public utilities, and we hope that the result of our experiment will demonstrate that the plan is not only practicable but that it will accomplish the desired purpose."

Two weeks ago a committee asked the Interborough company to reserve the last car of each train for women, and after failing to get a decisive answer appealed to the Public Service Commission, which will hear argument next month.

Taximeturtles, pecangaroos and pecannibals conspired to bestir the Tiny Tads. That they succeeded is told in the SUNDAY HERALD.

WOMAN KILLED BY FALL.

Plunges from Window on Fifth Floor of a Tenement House.

Mrs. Margaret Glarvey, sixty years old, was killed by falling from a window of her home on the fifth floor of a tenement, at No. 220 West Sixtieth street, early yesterday morning. She lost her balance while leaning over to see something in the yard below.

The police first reported the case to the Coroner as suicide, but said later that there was nothing suspicious in her death.
