

Warrenton n. c.

May 12<sup>th</sup> 1891

Mr E. C. Caw

Dear Sir

Knowing you  
had some experience with ensilage  
I take the liberty of writing to ask you  
please to do me the kindness to write  
me and give me a description of what  
you find to be the best plan for the  
construction of a silo, whether above  
ground or partly in the ground. What shape  
and best size. I have six head of cows and  
six horses. Does it do well for horses?  
I have an Ice House which does not keep ice. I  
thought of putting the silo partly in this house  
below the surface. Your prompt reply in full  
will greatly oblige.

Most Respectfully R. D. Fleming
