CENTRAL NERVOUS SYSTEM.

BRAIN-No. 12.

PATHOLOGICAL SPECIMEN-HYDROCEPHALUS.

Ventricles of the brain greatly distended by fluid. Foramina of Monro much expanded and fornix stretched. The septum lucidum has in great part disappeared, so that the fifth ventricle is thrown into the ventricular system, and the lateral ventricles are brought into direct communication with each other. Looking down into the third ventricle, the infundibular recess in the floor is seen.

- 1. Anterior pillar of fornix.
 - 2. Foramen of Monro.
 - 3. Caudate nucleus.
 - 4. Vein of corpus striatum.
 - 5. Fornix (body).

- 6. Choroid Plexus.
- 7. Optic thalamus.
- 8. Eminentia collateralis.
- 9. Calcar avis.
