Mathematics 219i: Teaching Elementary Mathematics (3)  
2 hours lecture and 2 hours laboratory per week  
Prerequisites: Math 127, 128, 129, and at least junior standing  
Catalog description: Presents modern techniques and methods of teaching mathematics in grades 4-9. Laboratory work provides deeper understanding of mathematical concepts and experiences with materials and methods appropriate for classroom use.

Mathematics 200: Introduction to Digital Computation (4)  
3 hours lecture and 2 hours laboratory per week  
Prerequisite: Math 65 or 165  
Catalog description: Includes analysis, automatic programming, and coding. Elementary problems will be written and actually run on the machine by all students. These problems may be related to the student's major, but a multitude of simple mathematical problems is available, which could serve to reinforce the students' general education in mathematics. (Mathematics majors cannot receive credit for this course and Business 151)

Attached is the General Education proposal as presented and passed by the committee.

January 7, 1970

Memo to: Vice President Robert L. Holt and members of  
the University Curriculum Committee

From: Special General Education Committee

This is a report of a committee appointed on September 26 by Vice President Holt to review the General Education requirements and to recommend any changes needed to the Curriculum Committee.

The Committee unanimously presents and recommends the following proposed General Education course requirements as a program of study for all baccalaureate candidates. The Committee has made an effort not to include any courses as a requirement specifically for the purpose of particular major or professional preparation. The number of hours of general education has been so reduced that schools and departments may make specific supportive or cognate requirements and still allow the student some free electives.

The Committee makes its recommendations with the following assumed conditions: (1) that there be no additional hours added to current course totals in the major or minor; (2) that departments will recommend to the Curriculum Committee particular supportive and cognate requirements for their degree programs and make an effort to afford as many free elective hours as possible to the student. (The History Department may, for example, specify completion of Language 4 as a cognate requirement for the B.S. in history where it previously was a general education requirement, but such cognate requirements must be submitted to the Curriculum Committee.) (3) Mathematics 127, 128, 129 and Science 38, 39, and 239 are open only to those intending to major in elementary and special education.

Respectfully submitted,

Dr. Donald Bailey, Chairman  
Dr. James Bearden  
Dr. Richard Capwell  
Dr. Thomas Chambliss  
Dr. John Davis  
Dr. Thomas Miller  
Dr. Robert Williams
