

Office of the
Vice Chancellor for
Academic Affairs
106 Spilman

919-757-6241

MEMORANDUM

TO: Faculty Senate
Educational Policies and Planning Committee

FROM: Marlene Springer *Marlene Springer*

DATE: November 8, 1990

Enclosed you will find an itemized, ranked list of all the new program proposals submitted by the individual units in Academic Affairs, and a list of the doctoral programs the Chancellor, Dr. Hallock, and I are recommending be sent to General Administration. We have selected 12 doctoral programs, thinking that this number will clearly state our desire to be a doctoral granting institution, while underlining the idea that our movement into doctoral education will be realistic and selective. We will also forward, in list form, the suggested incentives in Masters' and Bachelors' programs, so that our commitment to these levels will also be obvious.

When you look at the lists, you will see that some suggested doctoral programs have not been included. We made our selection with the understanding that several of the remaining programs could possibly be incorporated later as part of the degrees submitted (e.g., the Economics track of Coastal Resource Management, or one of the degrees in Social Work), or that our facilities and staffing precluded a realistic promise of doctoral work at this time (e.g., Chemistry), or that a second doctoral degree in a department would put an untenable drain on resources. We have also placed Ed.D.'s in a separate category, since history tells us that is appropriate.

Please note, however, that not being on this list does not preclude future additions. Clearly, it is impossible to define fully what university programs will look like in the 21st century; what we hope to do here is give an informed opinion of what this university hopes to look like in the year 2000--with the understanding that nothing is unchangeable except change itself.

Faculty Senate
Educational Policies and Planning Committee
Page two
November 8, 1990

Please look over the material, discuss it thoroughly, and let us know your ideas. The very bulk of the material forwarded prohibited copying all of it for everyone. As a compromise, Jim Joyce, Ken Wilson, and I agreed that all the program descriptions be available in the Senate office, the Library, the Graduate School, the SACS Office, and Dr. Hallock's office in Brody. It is an impressive stack. I wish to thank all of you for the time and thought you have put into this project. I think we have done an exceptionally fine job in outlining the academic potential of East Carolina University. I think the rest of the university system will be also be impressed.

MS/bg

cc: Chancellor Eakin
Jim Joyce
Vice Chancellors

EAST CAROLINA UNIVERSITY
Academic Program Development 1990-2000
Summary by Unit

COLLEGE OF
ARTS & SCIENCES

The program development plans for the College of Arts and Sciences are divided into three groups: those to be established in the first half of the 1990s; those to be established in the second half of the 1990s; and those that for various reasons do not require ranking. The highest priority are those designated for earliest implementation beginning with the most advanced degree programs in each group.

PROPOSED PROGRAM CHANGES
1990/91-1994/95

DEPT.	LEVEL	PROGRAM	YEAR
Biology	D	Coastal Resource Management	1991
