Hi Mark,

As usual, Lori is right on top of this. I have added my notes in red.

Issues for Chancellor

- University Fiscal Sustainability Committee
- Strategic Planning Steering Committee
- ECU Mission Statement-What are the priority initiatives the AC has identified, maybe a bit about process
- Administrator evaluation procedures-How he feels about the process and the long overdue revisitation

Issues for Provost

- Arts and Sciences Dean Search-Particularly germane considering the CF that the current process has become
- Part-time positions being filled in Spring 2014 with NO benefits-Particular concern is the transfer of currently FT six month positions to PT (apparently driven by ACA)

Issue for Chair of the Faculty

PPC activities and how it relates to University Fiscal Sustainability Committee's activities – would like for you to provide examples of things changed or completed as an outcome of PPC's efforts

The Agenda Committee also was thinking you should consider giving specific examples of how faculty input has resulted in changes to administrative decision making processes during your remarks (addressing a pattern of low response rates partly due to faculty feeling disenfranchised)

Lori Lee
