

P.S. Patricia told me last night that Senator Kerr Scott had written the Embassy here concerning her going to the States. She seems to be enjoying her visit. Says she is going ~~stay~~ two weeks.

Kashimig, Formosa.  
Oct. 23, 1955.

Dear Ruth,

Your letter didn't come yesterday, Saturday, as they often do, but am sure it will be coming in a day or two.

Last Sunday met a lady from Martha's town, <sup>ms. moves</sup> Warwick Va. She had just arrived three days before to teach the M.A & G. children. Her husband is <sup>a commander</sup> in the Navy. She is very friendly and we plan to call on her this afternoon.

One morning <sup>this week</sup> we called on three of our foreign neighbors. One was from S.C. the home state as Clifford. The Taiwan bank has put up many new concrete houses in this section that they rent to American families so Americans in this section.

You spoke about needing dental work done. You know the old proverb, "A stitch in time saves nine" - a little filling might save a tooth which would make a vast difference in chewing your food. Clifford has lost grinders and has a time masticating her food.

Speaking of teeth I saw in "The China Post" that Kashimig is to have fluoridate water. When I was at home papers were continually giving the opinions of dentists as to whether fluoridated water is beneficial or not. I don't know their final decisions, but we are to have it, according to the paper and

it will be beneficial to teeth, they say

Did I ever write you about housecleaning days in our city? The health <sup>or sanitatio</sup> department twice a year set aside several days for clean-up. Loud speakers are sent around calling out, "Clean up your house, even your clothing, beds, etc. Disinfection is no such and such a day." Then you see sidewalks and yards filled with clothes, and furniture and people scrubbing windows and woodwork. Then inspectors come around and puts up a sign - ~~to some~~ "Very clean", and to others "Clean". I'm glad they don't inspect foreign homes for I can see a spider web in the corner of my room - The wooden floors in the Japanese style houses are clean like faat laama used to have the kitchen on the farm. you remember?

My love to Chyn. With a chyn jr.  
Devotedly yours,
