30 November 1960

Captain K. M. Tebo, USN  
Room 3110  
Munitions Building  
Washington, D. C.

Dear Captain Tebo:

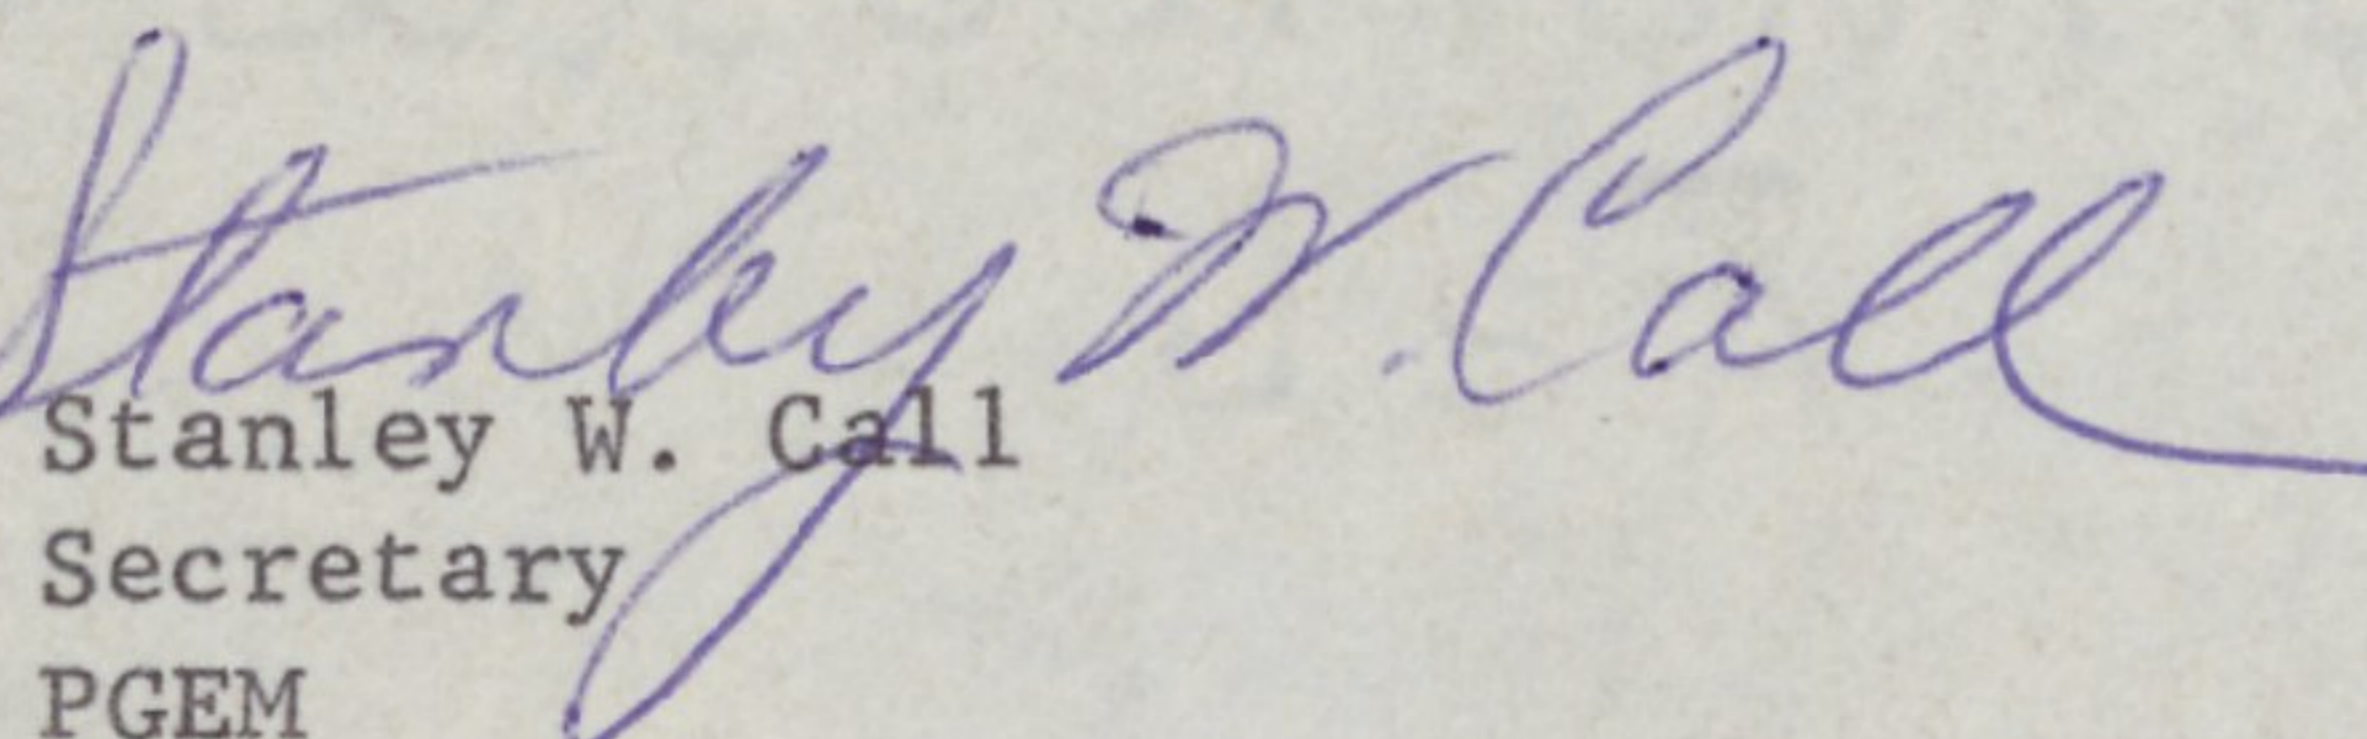

The Professional Group on Engineering Management wishes to express our thanks to you for your recent visit to Dayton to present "PERT" to our professional group. It was an extremely interesting meeting and we all feel much richer in knowledge.

One hundred and sixteen persons attended your speech. Incidentally, we could not have gotten one more person in the room.

Enclosed are copies of some photography taken at the meeting that I thought you might like to have.

Thank you again for the most important substance in life "knowledge".

Sincerely,

  
Stanley W. Call  
Secretary  
PGEM
