Mr. Dealer

If some one came to you and said, "I can increase your business"—and he had the universal endorsement of the men, women and children of your locality—you would be interested to know his proposition, wouldn't you?

That's exactly the way we come to you.

Pepsi-Cola **can** increase your sales and profits in soft drinks, because it has the most enthusiastic endorsement of men, women and children in every locality. The result of unique merit and effective advertising.

Time was when Soda "Pop" was the favorite among bottled drinks. But it's not so to-day. Bottled Pepsi-Cola has the preference. People prefer it because they can be sure of what they are drinking. They are sure it is pure—healthful—free from adulteration or harmful ingredients. They can keep a supply in their homes in place of a home-made drink.

Bottled Pepsi-Cola makes the most profitable and satisfactory summer-drink business you can handle. No large investment—no wastes—no spoiled goods—no inconvenience—guaranteed uniform quality. It's simply a matter of putting a few cases in your ice box—telling your customers it's there—and Pepsi-Cola does the rest.

Here's the whole matter in a nutshell. There's a big established demand for Pepsi-Cola. It is meeting with phenomenal success everywhere. By force of advertising the demand is growing daily. If you are not getting your share you are losing good money. Every day's delay mean sales lost. A very little effort on your part will get the steadily growing demand coming your way. The merits of Pepsi-Cola will hold the business for you.

Better grasp your opportunity **now,** before some progressive neighbor gets this business that should be yours.

This Company, in distributing the premiums listed in this catalogue, are prompted by one thought only—a desire

to show appreciation of your patronage. This patronage we have endeavored to build around two words—Quality and Service.

Regarding quality, we can say without fear of contradiction that we use only the purest and highest grade products obtainable on the market today in the manufacture of PEPSI-COLA. We pride ourselves on the quality of our product.

Every safeguard known to science is thrown around the production of PEPSI-COLA, so as to deliver same to the consumer in all of its wholesome and health-giving qualities; consequently, for your health's sake, demand PEPSI-COLA. Why overlook the conditions under which your beverage is produced?

Service—here is one of the most complex problems confronting the public today—service from manufacturer to dealer; service from dealer to consumer. We are endeavoring, as far as humanly possible, to preserve the strength of this feature of our business and to supply not only the dealer, but the consumer as well, with PEPSI-COLA whenever and wherever they are moved by the pangs of thirst to demand this healthful and exhilarating beverage.

All articles in this premium catalogue, when stated to be guaranteed, are guaranteed to us by the manufacturers. Our guarantee does not extend beyond this.

458	**No. 1600 Series, The New Wiggler, Deep Diving**—When cast upon the water this bait will float, until retrieved, when it dives under the water from three to four feet and has a wabbling motion closely resembling the movements of a live fish. The floating feature, while the bait is at rest, is especially valuable to beginners, as the bait will not sink into the weeds when picking out a backlash, going under the water only when in motion. Length, 4¼ inches; weight ¾ ounce; finished in the following colors:	
	No. 1600—Fancy Mottled Green Back, White Belly	3,216
	No. 1600S—White body with Red and Green Spotted Effect	3,216

459	**Heddon's "Dowagiac" Crab Wiggler, No. 1800 Series**—The above illustration shows our new Crab Wiggler, a record-breaker on Bass wherever tested, equally deadly on Muskellunge, Pike, Pickerel and other fresh water game fishes. This bait is painted in close resemblance to a fresh water Crab or Crawfish, floats when not in motion, dives under water when retrieved, the movement being a pronounced wiggle, simulating the movement of a Crab when moving backwards, away from danger. This novel, new bait is drawn through the water tail first and the movement so closely resembles that of the live crab that it is irresistible to game fishes. Every angler well knows the crab to be the favorite food of the black bass and other game fishes. Furnished in the following beautifully blended colors:
