

# greenville Energy program

---

October 21, 1980

Ms. Mary Williams  
East Carolina University  
Joyner Library  
Greenville, NC 27834

Dear Ms. Williams:

On Friday, October 31, and Saturday, November 1, ENERGY FAIR '80 will happen. The Fair will once again be held at the Willis Building (First and Reade Streets, near the Town Commons). Hours are scheduled for 10:00 a.m. to 4:00 p.m. each day.

Sponsored by The Greenville Energy Program, Greenville Utilities Commission, and other community organizations, this event will feature many ideas for energy conservation and alternative energy use. Special attractions for school groups, including an Energy Film Festival, are scheduled for Friday. Seminars on efficiency in conventional heating systems (oil, gas and heat pump) and on using solar or wood as heat sources will be held on Saturday. Dealers in commercial energy-related products will display (but not sell) their wares. Lots of information, fun, entertainment and refreshments will be available to all who come.

Since the first ENERGY FAIR was held last January, The Greenville Energy Program has progressed in its efforts of establishing an energy management program for the Greenville area. Energy use and supplies--both conventional and alternative--have been inventoried; goals for energy management and community education have been established; and programs to accomplish those goals are being planned. Early 1981 should see the completion of our Energy Action Plan and its submission to the City Council for consideration of implementation as a planning/action document.

The Greenville Energy Program's booth at the ENERGY FAIR '80 will present information about the progress that has been made with our work over the past two years. Included will be photographs from some of our activities and information about how people can have input into the process of planning for Greenville's energy future.

If you will be able to attend ENERGY FAIR '80, I would appreciate your assistance at the Greenville Energy Program's booth for an hour or two. Your participation would give people visiting the Fair a favorable impression of other concerned citizens working in The Greenville Energy Program.

Their realization that others are working to improve our community's energy future might encourage them to become more active in conservation efforts and to support such actions in our area.

By helping with the hosting of the booth, you would not be expected to explain all aspects of the program. It would primarily be an opportunity for people to discuss energy issues and have their comments channelled into our program. Literature and other program materials will be available for distribution.

I would greatly appreciate your assisting in this capacity and feel it would present a very positive concept to the public about the work that is being done to address energy problems in our community. If you will help at the booth, please call my office at 752-7166 and let me know what hour(s) would be most convenient for you. The Fair will be open at 10:00 a.m. to 4:00 p.m., both Friday and Saturday.

See you at ENERGY FAIR '80!

Sincerely yours,

A handwritten signature in cursive script, reading "Linda G. Hix".
