E. GEO. KEITT, M. D.

City Hospital Dispensary,

N. W. Cor. Calvert and Saratoga Sts.

This Institution is under immediate control of the Professors of the College of Physicians and Surgeons. One or more of the Professors are present during the hours of 12 M. and 2 P. M., to prescribe, free of charge, for the Poor as may present themselves for treatment and advice. Competent druggists are constantly on hand to fill prescriptions. From these sources abundant material is derived for clinical instruction in Practical Medicine and Surgery.

COLLEGE OF PHYSICIANS AND SURGEONS.

BALTIMORE.

BALTIMORE:

ISAAC FRIEDENWALD, PRINTER,

103 W. Fayette Street.

College of Physicians and Surgeons.

FACULTY OF PHYSIC.

THOMAS OPIE, M. D.,

Professor of Obstetrics.

JOHN S. LYNCH, M. D.,

Prof. of Principles and Practice of Medicine, and Clinical Prof. of Heart, Throat and Lungs.

E. LLOYD HOWARD, M. D.,

Professor of Materia Medica, Therapeutics, and Medical Jurisprudence.

THOMAS S. LATIMER, M. D.,

Professor of Physiology and Diseases of Children.

AUGUSTUS F. ERICH, M. D.,

Professor of Diseases of Women.

AARON FRIEDENWALD, M. D.,

Professor of Diseases of the Eye and Ear.

CHARLES F. BEVAN, M. D.,

Professor of Anatomy, Genito-Urinary and Orthopedic Surgery.

OSCAR J. COSKERY, M. D.,

Professor of Surgery.

ABRAM B. ARNOLD, M. D.,

Professor of Clinical Medicine and Diseases of the Nervous System.

WM. SIMON, M. D., Ph. D.,

Professor of Chemistry.

GEORGE H. ROHÉ, M. D.,

Clinical Professor of Dermatology.

RICHARD GUNDRY, M. D.,

SUPERINTENDENT OF SPRING GROVE INSANE ASYLUM,

Professor of Mental Diseases.

J. W. CHAMBERS, M. D.,

Demonstrator of Anatomy.

J. ANHAM, M. D.,

et. Demonstrator.

W. D. BOOKER, M. D.,

Demonstrator of Physiology.

ANNUAL ANNOUNCEMENT.

1881.

The College of Physicians and Surgeons was organized in 1872. It has year by year added to the size of its classes and extended its facilities, so that now it is the largest medical school that has ever been in this State.

The General Assembly of Maryland, by an act passed in 1877, consolidated the Washington University School of Medicine and the College of Physicians and Surgeons, under the latter name, giving this school all the rights, powers and property of both institutions.

It is a standing rule of the Faculty to lay aside every session a part of the net earnings of the school, to increase its material advantages.

Last year new, capacious and well equipped lecture halls were erected, and the property adjoining the City Hospital on Saratoga Street was purchased out of this fund, for the purposes of the Woman's Hospital.

This year a Physiological Laboratory has been established. An out-door obstetrical clinic has been organized in connection with the Maternité Hospital, and the whole clinical work of the College has been remodeled and systematized.

The possession by the College of a General Hospital in operation, constantly filled with patients, affords students ample opportunity for bedside instruction and experience.

The Maryland Lying-in Asylum furnishes abundance of material for clinical teaching in obstetrics.

The Woman's Hospital gives rare opportunities for the clinical study of gynæcology.

The City Hospital Dispensary is in most successful operation, furnishing over twenty thousand patients in one year.

All of the above-named institutions are under the exclusive charge of the College of Physicians and Surgeons.

Nothing has been left undone to perfect the clinical feature of our school, and the Faculty is now prepared to give the student superior advantages to any college in this country.

The control of the above-named hospitals and dispensary enables us to confer upon the graduating class a number of positions as Resident Physicians, in addition to the incalculable advantages offered to resident students.

The deep and continued interest of former patrons, the almost invariable return of students who have taken one course, the activity and excellent standing of her graduates, further attest the merits of the school.

These evidences of appreciation are highly gratifying, and are incentives to the Faculty to renew their exertions and still further add to the facilities of the college.

It is the aim of the Faculty to give this school a high rank for sound medical acquirement in all departments. To attain this end, the student will be thoroughly grounded in the principles of medicine, and shown how to apply them in the treatment of disease. The plan of dividing the course among a large number of competent teachers, has been adopted as the best to assist the student in traversing the vast area of recent medicine, and to give him a complete medical education.

COURSE OF INSTRUCTION.

Two courses of Lectures are given during the year, a Winter and a Spring course. The degree of Doctor of Medicine will only be conferred at the end of the Winter Session, which begins October 1st and ends March 1st. The preliminary course will commence September 15th. The regular session will consist of five or six Lectures daily, didactic and clinical. They will be so arranged and blended as to be eminently practical as well as scientific. At least two clinical lectures will be delivered every day, at which ample opportunity will be afforded for witnessing surgical operations, the treatment of disease and modes of investigating pathological phenomena. Special pains will be taken to instruct students in the art of bandaging, applying splints, dressing wounds, conducting post-mortems and compounding medicines—lessons of incalculable value, especially to those who propose to practice medicine in the country.

The absolute control enjoyed by this school over the City Hospital, the Maryland Lying-in Asylum and the Maryland Woman's

Hospital, gives the best opportunities for teaching practical medicine in all its branches.

COLLEGE BUILDINGS.

The College Buildings are situated at the N. W. Corner of Calvert and Saratoga Streets, No. 51 Saratoga, and No. 161 W. Lombard Streets. Here all the lectures on Medicine, Surgery, and Gynæcology will be delivered. As the New Lecture Halls have been erected adjoining the wards of the City Hospital, which is under the same roof and connected with the Woman's Hospital by a covered way, admirable facilities are afforded for clinical lectures.

PRACTICAL ANATOMY.

The Dissecting Rooms are spacious, well lighted and ventilated, and furnished with all conveniences for dissections. They are open daily, and under the control of the Professor of Anatomy, assisted by two able demonstrators. Parties desiring to operate or dissect privately, can readily do so.

THE CITY HOSPITAL.

This Hospital, N. W. Corner Calvert and Saratoga Streets, is under the exclusive charge of the College of Physicians and Surgeons. It is efficiently and carefully managed by the Sisters of Mercy. Being centrally situated, most cases of accident in the city are sent to it. To favor this, an ambulance is provided for the removal of injured persons from all parts of the city to the Hospital, on notification, without cost to the city or individual. Its connection with the various police-stations by telegraph and telephone, enables them to promptly summon the ambulance and attendants at all times. The advantages and conveniences of a well filled General Hospital, the wards of which communicate directly with the lecture halls, are very great.

OBSTETRIC CLINIC.

The Maryland Lying-in Asylum, situated at 161 West Lombard Street, offers the medical student special clinical advantages in the study of Midwifery. The clinics are held in the Lying-in chamber. The establishment of an obstetrical clinic in connection with the

College has introduced a much needed reform in the system of medical education in this country.

The young graduate in medicine, if forced to rely upon theoretical knowledge solely, must necessarily assume the responsibility of this department with especial embarrassment, for it is a well established fact that in no branch of medicine do bad results affect the patient or practitioner so injuriously as those occurring in Midwifery.

This institution enables the Professor of Obstetrics to teach Midwifery after the practical method adopted by European schools. Students are divided into classes of six each, accordingly as their names appear upon the matriculation-book. The names and residences of the students composing the several classes are placed in a box at the office of the American District Telegraph Company. There is telegraphic communication between the Hospital and the office, so that as soon as a case of labor occurs, the House Physician can notify the office at any hour of the day or night, and without loss of time the Professor of Obstetrics and each member of the class are summoned. Students are thoroughly instructed how to diagnose presentations, to judge as to the stage of labor, and are enabled to watch step by step its mechanism. They have frequent opportunities to witness the application of forceps, turning, and all other measures which science has devised for the relief of difficult and unnatural labors.

Not only are they made familiar with all those physiological and healthy changes which the maternal system undergoes during the puerperal period, but they are taught the hygiene of the lying-in chamber, and the management of the infant, as well as the rationale and treatment of all diseases which materially influence the results of child-birth. The colored wards, which were opened last year, are in successful operation, and recently an Out-door Obstetrical Department has been established, which will be a material addition to the obstetrical facilities of the school.

GYNECOLOGICAL CLINIC.

The Maryland Woman's Hospital is situated in the same block, immediately adjoining the City Hospital, and, like the latter, is under the exclusive control of the College of Physicians and Surgeons. Its wards communicate by a covered way with the Lecture Halls, so that even the most serious cases may be brought upon their beds before the class. These halls being provided, in addition

to an excellent sky-light, gas and water, with a condensing illuminator, operations upon the interior of the vagina and uterus may be performed with equal facility in cloudy as in bright weather, and witnessed by the students with a distinctness we believe not attained elsewhere. All the free patients of the in-door and all the patients of the out-door department are available as "clinical material"; and the number of cases for this purpose during the past session has been so large that not more than half of them could be utilized. Frequent opportunities for witnessing every recognized surgical operation upon the female are here furnished, and the student will be taught to diagnose and treat all the disorders of the female generative organs.

GENERAL CLINICS.

During the sessions clinical lectures are delivered daily. The material is utilized systematically by the Professors in illustration of their respective branches. After the close of the session, the clinics are attentively kept up, and such students as remain in the city are granted the benefit of them. The following order is observed, viz:

Monday—Clinical instruction is given in diseases of the eye and ear. The various surgical operations are performed on these organs, and students made familiar with the uses of the ophthalmoscope and otoscope by Prof. Friedenwald.

Tuesday—Practical instruction in the diagnosis and treatment of general diseases and diseases of the nervous system, including the use of electricity in practical medicine, is given by Prof. Arnold. Prof. Lynch gives special instruction in the diagnosis and treatment of diseases of the heart, throat and lungs. The rules for percussion and auscultation are clearly pointed out, and the use of the laryngoscope illustrated.

Wednesday—The special arrangements provided to prevent identification of female patients, attract abundant material for illustrating the various operations of Gynæcology, thus affording the student the opportunity to witness such procedures. The uses of the uterine speculum, probes, tents and pessaries, are illustrated by Professor Erich.

Thursday—Instruction is given in the diagnosis and treatment of diseases of children by Prof. Latimer.

There will also be a clinical and didactic lecture on Orthopedic and Genito-Urinary Surgery by Prof. Bevan.

Friday—The student is afforded an opportunity to listen to the sounds of the foetal heart, to practice ballottement, to realize the active movements of the foetus, and the other signs of pregnancy, in the wards of the Lying-in Hospital. He is made familiar with the sequelæ of labor, and is instructed in the laws to be observed in the lying-in chamber, by Prof. Opie.

Practical instruction in the diagnosis and treatment of diseases of the skin, is given by Prof. Rohé.

Saturday—Surgical clinic by Prof. Coskery.

THE PHYSIOLOGICAL LABORATORY,

recently established by the school, affords excellent opportunity for the study of clinical chemistry and microscopy.

It will be under the supervision of Prof. Latimer, assisted by the Demonstrator of Physiology, Wm. D. Booker, M. D.

THE SPRING COURSE

begins on the 15th of March and ends on the 15th of June.

It is not counted as one of the regular courses which entitles the student to apply for graduation.

It is intended rather to afford young men better opportunities to prepare themselves for the regular sessions, and to enable advanced students and graduates to receive further facilities for clinical instruction, and the practical application at the bedside of what they have acquired from didactic lectures.

This course consists of clinical lectures by members of the Faculty, which are given each day between the hours of 12 M. and 2 P. M.

Students and graduates are admitted to this course on payment of the matriculation fee, which is credited on the fees of the next winter session.

GRADUATION.

The candidate for the degree of Doctor of Medicine must have studied medicine three years and attended two full courses of lectures, the last in this College. He must be 21 years of age, of good moral character, have received a good English education, and have passed a satisfactory examination before the Faculty.

GRADED COURSES.

While the above are the only obligatory conditions for graduation in this school, the Faculty, realizing how difficult it is for the student thoroughly to prepare himself for practice by attendance upon two courses of lectures, offer students beginning the study of medicine the option of extending the entire course into three sessions.

During the first year Anatomy, Physiology, Materia Medica and Chemistry will be the special, and, in the option of the student, the sole subjects of study.

In the second Gynæcology, Diseases of the Eye and Ear, Diseases of the Nervous System and Diseases of the Skin, and Medical Jurisprudence.

In the third Principles and Practice of Medicine, Principles and Practice of Surgery, Obstetrics, Clinical Medicine and Diseases of Children.

At the end of each year the student will be examined in the branches studied, and if he passes, that examination will be final; but if he fails, the branch or branches upon which he fails will be added to the curriculum of the succeeding year, and on them he will have to stand a second examination.

The graded student can attend all the lectures if he thinks proper to do so, but, as he will only be required to prepare himself for examination on the subjects which constitute that year's curriculum, it is believed that at the end of the course he will be *better* prepared than if he had attempted to read and prepare for examination on *all* the branches during two sessions. While the Faculty, therefore, do not *require* students offering themselves to this College to adopt this graded course, they strongly advise them to do so, as they believe that by doing so the young graduate will be better prepared in every way to enter upon the duties and responsibilities of medical practice.

ADVANTAGES OF LOCATION.

Baltimore is one of the most populous cities in the Union, thus affording its Medical Schools the greatest abundance and every variety of clinical material. Its exemption from epidemics, the salubrity of its climate, the easy preservation of subjects for dissection, the cheapness of living, its accessibility, the genial hospitality of its citizens, all combine to make it the great medical centre of the country. Students who may desire to pursue their studies here will find them-

selves surrounded by all that is calculated to please, improve and interest them.

MEDALS AND CERTIFICATES OF HONOR.

The Cathell Gold Medal is awarded by Dr. D. W. Cathell, formerly Professor of Pathology in this College, to the graduate who stands highest in the final examination.

The Brown Memorial Prize—a handsome silver medal—is conferred by the Faculty on the candidate who stands second at the final examination.

The First Certificate of Honor is also bestowed on the graduate whose standing is the highest.

Five other Certificates of Honor are awarded to the five graduates standing next in order of merit.

HOSPITAL APPOINTMENTS.

In addition to the above medals and distinctions, the Faculty have it in their power to bestow upon those graduates standing highest in their classes four valuable appointments as resident hospital physicians, viz., two at the City Hospital, one at the Maternité, and one at the Maryland Woman's Hospital. These positions last for one year, and each incumbent receives board and lodging free of expense, besides unrivaled opportunity for practical study and clinical practice.

FEES.

The Professors' tickets for the course of lectures in the Winter Session will be \$120.

Tickets for one or more of the branches may be taken out separately.

SPECIAL PRIVILEGE.

In order to place the facilities of this school within the reach of the qualified, yet poor young men of our country, and in conformity with the usage of the times, we receive a number of *Privileged Students*.

They are known as such only to the Dean, and are granted all the advantages the College affords.

Special Privilege Fee, \$55 00

Appointments will be made upon suitable recommendations

The Demonstrator's fee must be paid each year, as all students of this College are required to dissect. No charge is made for dissecting material.

All fees, save for graduation, must be paid at the beginning of the session.

SUMMARY OF NECESSARY EXPENSES.

FULL FEES:

College Fee,	\$120 00
Board, Room, Fuel, Light, &c., for 20 weeks at \$4	80 00
Total,	\$200 00

SPECIAL PRIVILEGE FEES:

College Fee,	\$55 00
Board, &c.,	80 00
Total,	\$135 00
Graduation Fee in all cases, \$30 00.	

Good board can be had at \$3.00 per week. We believe that in no other large city in the United States can the same educational facilities be furnished at so low a cost.

Students are requested to report at the Dean's office at the City Hospital, N. W. corner Calvert and Saratoga Sts., as soon as they arrive in the city, for the purpose of registering their names. Here the Janitor may also be found, who will take charge of baggage, direct them to boarding houses, and furnish all requisite information.

Country Patients, either male or female, coming to the city for treatment, will be furnished with excellent *hospital accommodations*, in public wards or private rooms, as they may prefer, at from \$4 to \$10 per week, according to conveniences required.

TEXT-BOOKS.

The First Named Book in Each Branch is Preferred.

Surgery.

Erichsen, Bryant, Billroth, Holmes, Sayre's Orthopedic Surgery.

Practice of Medicine.

Bristowe, Niemeyer, Flint, Cohen on the Throat.

Obstetrics.

Playfair, Leishman, Cazeaux, Barker on Puerperal Diseases; Barnes on Obstetric Operations.

Diseases of Women.

Thomas, Emmet, Barnes.

Medical Jurisprudence.

Taylor, Beck, Tanner on Poisons.

Anatomy.

Gray, Wilson.

Materia Medica.

Wood, Stillé, Biddle, U. S. Dispensatory, Ringer's Therapeutics.

Physiology.

Dalton, Foster, Carpenter.

Chemistry and Toxicology.

Attfield, Youmans, Bowman's Practical Chemistry.

Diseases of the Eye, the Ear and the Skin.

Nettleship on the Eye, Burnett on the Ear, Wells on the Eye, Turnbull on the Ear, Duhring, Morris on Diseases of the Skin.

Diseases of Children.

Smith, West, Bouchut.

Nervous System.

Rosenthal, Charcot, Althaus' Med. Electricity.

Genito-Urinary Diseases.

Van Buren and Keys and Bumstead on Venereal Diseases, and Otis on Stricture.

ALUMNI ASSOCIATION
OF THE
COLLEGE OF PHYSICIANS AND SURGEONS,
OF BALTIMORE.

The success of the College of Physicians and Surgeons may well be viewed with pride and pleasure by her graduates. It is to be hoped that they will all join this Society, and aid in advancing the interests of their Alma Mater. An annual meeting and banquet take place at the end of each session, to which graduates and students are invited. Desiring to foster a spirit of emulation and professional ambition among the graduates of the College, and to collect from year to year a full and accurate history of her classes, the following information is requested: 1st. The names and post-office addresses of all graduates. 2d. The names and dates of their literary degrees. 3d. Places of honor and trust held in the profession since graduation, with dates of appointment and terms of service. 4th. Full information concerning deceased graduates. The collection of these facts will be conducted by the Secretary of the Alumni Association, who will publish them in subsequent editions of the catalogue.

THE BALTIMORE COLLEGE OF DENTAL SURGERY.

This Institution was chartered in 1839 by an Act of the General Assembly of Maryland, and is the oldest and most widely known Dental College in the world. The majority of the eminent practitioners of dentistry in this country and Europe are graduates of the Baltimore College. The College Building is one of the largest and finest structures of the kind in this country, and the collection of specimens in the Museum cannot be excelled. The number of patients daily visiting the Infirmary has been so great that the Faculty have been compelled to add additional space and chairs to the already large and well-arranged Operating Hall. All such patients are operated on by the students, under the careful supervision of the Professors and Demonstrators.

The Annual Course of Instruction will commence on October 15th of each year, and continue until the beginning of March following. The first weeks of the Session are devoted to Lectures on practical subjects, especially the "Filling of Teeth," and construction of Artificial Teeth, Clinics, Infirmary Practice and Demonstrations.

The fees each session are \$100, Demonstrators' fees included; Matriculation Fee, \$5; Diploma Fee, for candidates for graduation, \$30; Dissecting Ticket optional. *These fees, with the exception of the diploma fee, are expected to be paid on matriculating.*

THE INFIRMARY, in the College Building, is open during the entire year for dental operations, and students can enter at any time by paying \$50, which is deducted from the fees of the succeeding regular winter course.

PROFESSORS.

FERD. J. S. GORGAS, M. D., D. D. S.,
Professor of Pathology and Therapeutics.

E. LLOYD HOWARD, M. D.,
Professor of Chemistry and Materia Medica.

JAMES H. HARRIS, M. D., D. D. S.,
Professor of Clinical Dentistry.

JAMES B. HODGKIN, D. D. S.,
Professor of Dental Mechanism and Metallurgy.

THOS. S. LATIMER, M. D.,
Professor of Anatomy and Physiology.

RICH'D B. WINDER, D. D. S., M. D.,
Professor of Dental Surgery.

DEMONSTRATORS.

WILLIAM B. FINNEY, D. D. S.,
Demonstrator of Operative Dentistry.

JOHN C. UHLER, D. D. S., M. D.,
Demonstrator of Mechanical Dentistry.

B. HOLLY SMITH, JR., D. D. S.,

B. FLANNIGAIN, D. D. S.,
Assistant Demonstrators.

CHARLES F. BEVAN, M. D.,
Demonstrator of Anatomy.

Since the union of the Maryland Dental College with the Baltimore College of Dental Surgery, in March 1879, this latter is the *only* Dental College in Baltimore.

Students corresponding with the Dean will please be careful to give full address, and direct their letters to

F. J. S. GORGAS, M. D.,
Dean of Baltimore College of Dental Surgery,
No. 259 N. Eutaw St., Baltimore, Md.

THE MARYLAND LYING-IN ASYLUM,

161 WEST LOMBARD STREET,

BALTIMORE, MD.

Under the Exclusive Control of the College of Physicians and Surgeons.

This Institution is open for the reception of patients. Indigent women of this City and State are admitted for their confinement, and carefully attended by scientific physicians and skilled nurses. Having been liberally aided by the Legislature, no cost nor pains have been spared to render it as perfect as possible in all its departments. The Public Wards are spacious, well warmed and ventilated, and are supplied with all the appliances and conveniences which can conduce to the comfort of the parturient woman.

Board, attention by a member of the Faculty, nursing and medicines are given free of charge to all patients in the Public Wards.

Private patients are furnished rooms at from \$4.00 to \$12.00 per week, according to the size and location of the chambers.

For additional information apply to the Dean, or to L. L. BITTING, M.D., Physician.

THOMAS OPIE, M.D.

Dean
