

Dear Jo,

Wed. 31 July 68

Sounds like you should be tired from canning all those bushels of vegetables. I, myself, have had a rather strenuous week so far - haven't stopped all day long (till 4:30 at least).

I have typed out over 500 IBM order cards and as many "followups" cards just this month, plus their justification letters and miscellaneous letters reporting inventories and expenditures.

That must sound boring, so I'll tell you what else I've done - I played a couple games of cards, gave up trying to watch a movie when the projector wouldn't work, and ran several laps around the "campus" to build up my stamina. That leaves about a thousand hours unaccounted for (so I'm not too busy). Bored is the word!

I'm thrilled to hear how far along your house is. I can't wait to visit you - just 18 weeks at the most from now.

The weather is hot here again and our power supply is poor, so I'm suffering with you. We run through cases of "soda pop" each day when such is available.

Mom sounds like she is more interested in political science than algebra - I don't blame her.

I get paid tomorrow and plan to send Eric a little something for his birthday - a 1st Mar Div sweatshirt + a \$10 money order. That should give him something to "date" with.

Hello to all,
Am groovy,
Love,
Brother Bill
