# IMPORTANT—These **B-D** Needles are the **ONLY** needles that fit and lock in **LUER-LOK SYRINGES**

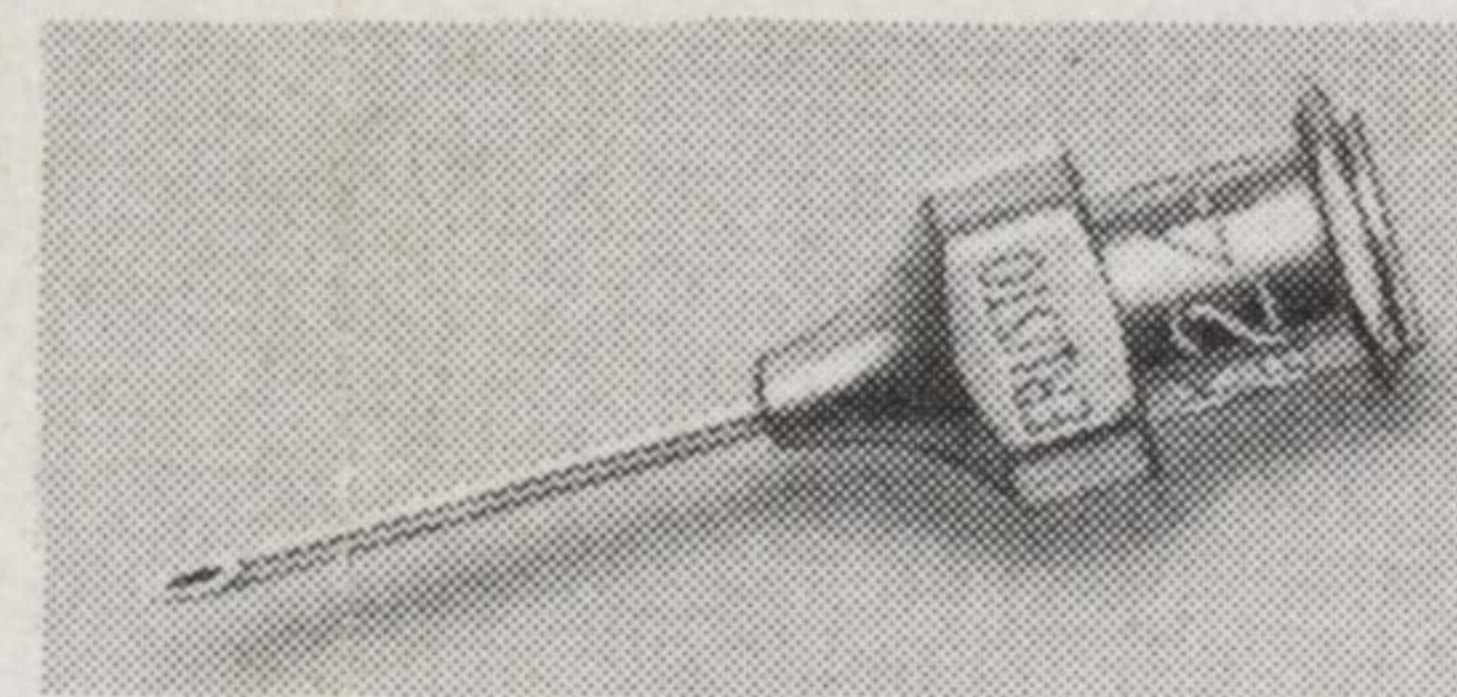

## **B-D YALE**

Made of rustless steel and carbon steel. Rustless needles have unusual resistance to breakage. Require practically no care. Carbon steel needles are not rustless. They take and hold excellent points but must be properly cared for. Gauge numbers are stamped on hubs.

## **B-D MEDICAL CENTER**

Made of Hyper-chrome, rust-resisting steel. Moderately priced. Not affected by iodine, salts or most acids. Cannulae are made from tempered tubing for proper strength and flexibility. Strong sharp points. Square hubs with corner grips. Gauge numbers stamped on hubs.

## **B-D ERUSTO**

Made of Firth-Brearley stainless steel. The standard rustless needle that has demonstrated its superiority in rust resistance, flexibility with proper strength, keenness of point and general operating efficiency. Gauge numbers are stamped on hubs.

Buy **B-D** Needles by the dozen mounted on metal cards in dust-proof containers.
