Col. F. Edward Ward, a member of the Air Force National Security Briefing Team, spoke to students Tuesday on the issues of national security and defense.

By GARY SANDERSON Staff Writer

"When you think of the Soviet Union's military, think of something that is big, modern, and modernizing," said Colonel F. Edward Ward, a member of the Air University's Air Force National Security Briefing Team.

Ward and a national security briefing team, which has addressed over 1200 military and civilian groups, addressed students on national defense and security Tuesday at 7 p.m. The team has been in existence since 1983 for the purpose of informing the people on national security.

He said that the defense strategy of the United States included the worldwide deterence of aggression through preventative measures. "We have to be able to guard against any conflict,

even terrorism and sabotage," Ward said.

"Basically we guard our position through peaceful negotiations, but we will fight if it's necessary."

Ward said that Warsaw Pact nations have overwhelming odds in military equipment.

"They have NATO nations outnumbered 3-to-1 in aircraft, 2-to-1 in tanks, 5-to1 in personnel and 8-to-1 in artillery," Ward said. "The Soviets have the most military hardware on earth. "Through the years,

we've found it in our best interest to ban together with other countries in order to keep world peace.'

He said that the Soviet leader, Lenin, "envisioned a single worldwide communistic state ... we have no reason to believe that they have abandoned that ideal." He said that the U.S. and its allies

keep an eye on world "hot-spots" such as South Africa, Vietnam, the Middle East and Cuba.

the world's oil supply comes from the Middle East ... 70 percent of Europe's oil comes from the Soviet build-up over the past 20 Middle East," he said. "We want years is an ever-growing threat. to keep the Middle East open to everyone ... we recently sent an unconditional message to Libyan leader Khaddafy that wasn't ignored.

Ward said U.S. concerns are far-ranging and that Cam Rahn Bay, Vietnam "is the largest Soviet display of forces outside of the U.S.S.R." He said the U.S. "wants to end Apartheid in South Africa" and that "steps have been made in that direction, though people are still suffering."

points out otherwise," Ward said. He used Afghanistan and Poland as examples. "The Soviets pour \$4 "Sixty-three percent of billion into Cuba every year, that's not just coincidence."

He said that the massive

"The U.S. edge in quality and technology is closing rapidly and some would say it has closed," Ward said. "Today the U.S. military is strong, our capabilities are great but we need to prepare now for the 1990's through continued force modernization ... an F-16 is an excellent jet, but put three or four Soviet planes on it, and it's all over," he said.

Ward said that although the U.S. has made advancements, "Some people believe so too have the Soviets. "The that the Soviet arms build-up is Soviets are not afraid to use legal due to their belief in a western and illegal means to achieve the invasion ... documented evidence technology they desire," he said.

Hamas dispute PLO claim

BETHLEHEM, Occupied West Bank (AP) — Young partisan factions, some carrying knives and clubs, shouted threats at each other today in a dispute over the PLO declaration of inde-

pendence.

Members of the Islamic exstrike call. tremist group Hamas, or Zeal, marched through the city forcing stores shut for a strike they called today on the 41st anniversary of a

confining 3000 residents to their homes.

About 1.5 million Palestinians live in the West Bank and Gaza Strip, which were occupied by Israel from Jordan and Egypt in the 1967 Six Day War. The army beefed up patrol the occupied territories and made preventive arrests to reduce the likelihood of confrontations.

Environmental Blues

Agriculture makes stride

By BEN SELBY

Staff Writer

This is the second part in a series on the environment by Ben Selby

"We've made great strides in agricultural practices, but people haven't really looked at agricultural practices from the point of view of what they're doing to the environment," Spruill said. "It's only a few people who really have enough understanding to realize that we've got these big non point- sources of pollution around the country."

"We're not looking at the long range in my opinion," Spruill said. "The point-sources of pollution become glamorous and the non point-sources of pollution are so broad and so big we just tend to ignore them. They are going to turn out to be significant problems."

Some farmers believe that if 10 pounds of fertilizer will help air resources." their crop grow well, then 20 pounds will help it grow better.

'It's the old idea all over again that if something works, then twice as much ought to work twice as well," Spruill said.

"We can't just blame industry," said Charles Womble, a local tobacco and peanut farmer. "We're part of the problem too." "Obviously, I think we need

some more research," Spruill said, "but I think that we're going down a dangerous path in the state and the country in general in that we're putting too much of our effort on remediation solving groundwater problems or pollution problems."

"I think we need to spend at least an equal amount of time on preventing these problems," Spruill said. "I know I learned from my colleague a few days ago that one of the differences between the U.S. system and the European system is that the Europeans seemed to be putting a lot more emphasis on the prevention of the contamination of water and

"We're doing a pretty good

dogging' in determining where the pollution is - and let's go clean it up", Spruill said sarcastically.

"I think we can take a little bit of our resources awa from the clean- up end, especially in cases where people are not directly impacted, and start putting some educational resources and financial resources, maybe they're one in the same, on prevention of pollution," said Spruill.

"I think that we've gone backwards in the Reagan administration in our assessment of the environment and the emphasis we've placed on the environment," Spruill said. "All the record show that the EPA and the regulatory agencies have been cut extensively."

Conservation education, technology, and recycling at the local, state, and national levels coupled with decision making on large regional levels may be the key to some of the pollution problems we face today.

U.N. resolution calling for creation of the Jewish state.

Parliament may get veto power

MOSCOW(AP) -- President draft, Gorbachev said the Su- houses of the bicameral parlia-Mikhail S. Gorbachev told the Soviet parliament today it would gain the right to veto his decisions if it adopts his revised proposals to overhaul the Soviet political system.

In a speech opening a threeday soecial session of the Supreme Soviet, or parliament, Gorbachev said the Kremlin leadershio made the veto proposal among 88 changes it recommended in response to 250,000 public comments on the new election law and constitutional amendments out before the body today.

preme Soviet "has the right to ment. veto decrees of the presidium, instructions of the president of the Supreme Soviet," and the leadership would be required to account

year."

Currently, directives from seats in the new Congress of the president are made in the People's Deputies. name of the Presidium and are subject to confirmation at the next But practically, there are no chalmemory last month.

Gorbachev promised that Two high republic officials other changes also would prefrom the Baltics, however, regisserve the Soviet Union's traditered dissatisfaction with tional collective style of leaderelements of the reform program ship. Under that style, the highest government body - the Presidium of the Supreme Soviet and the highest party body - the Politburo — are collective bodies. The head of the Presidium is the president, traditionally a ceremonial role. It was not immediately clear whether Gorbachev was giving up his original proposal to strengthen the president's role by giving him chairmanship of the Defense Council and responsibility for overseeing foreign policy. The latest draft of the proposed changes also responded to complaints from small republics, marks in the course of the discusincluding Estonia, Latvia and Georgia, by increasing the republics' representation in one of the

The Supreme Soviet had the central government authority its first non-unanimous vote in to decide issues of national scope and reserve all other matters for the republics.

> He welcomed Gorbachev's announced changes and accepted the president's proposal to cut off issues of the rights of republics until later. Gorbachev proposed creating a special commission to settle the question of division of power between the 15 Soviet republics and the central government and suggested the deputies limit this session to overhauling the government structure. He said the complex questions of the rights of the republics and the powers of local legislative bodies, known as soviets, or councils, could be left for later. "We have just embarked on reform," he said. "In this revolutionary period, we are blowing up the old structure." The first step in reconstruction is the overhaul before the parliament, he said.

Gorbachev rejected complaints that the principle or one man, one vote is violated by a plan to let organizations, such as the Communist Party and trade unions, elect one-third of the deputies in a new Congress of People's Deputies.

He said the reform clearly states that legislative elections can have multiple candidates, but added that because numerous candidates could be proposed, they must face "preliminary discussion" before their local nominating commissions. It was not known whether the commissions could reject specific candidates.

The Soviet leader also hinted at promised future reforms. They include a rewrite of the preamble of the Soviet constitution, includ-

Gorbachev has vision

By MICHAEL KINSLEY The New Republic

A recent survey found that nearly two-thirds of Americans have a favorable opinion of Mikhail Gorbachev. That put him ahead of every foreign leader except Margaret Thatcher. Had Michael Dukakis and George Bush been listed in the survey, he doubtless would have finished ahead of them, too. And with good reason. Gorbachev, more than either presidential candidate, has "the vision thing"- a clearly articulated view of where his nation, and the world, should be heading.

Gorbachev's national vision, of course, consists of perestroika and glasnost: the movement of the Soviet economic and political systems (respectively) away from rigid, topdown control toward the Western model of feedom. Gorbachev's global vision is a retread of former California Governor Jerry Brown's "spaceship earth" platform.

Nations, Gorbachev notes, are increasingly faced with common problems that are best addressed internationally: environmental threats, terrorism, the cost of mutual military buildup, the prospect of nuclear apocalypse, or of economic apocalypse in financially integrated world. Increasingly, we're all in the same boat. In technical parlance, this means nations are playing a "non-zerosum game," in which the contestants can all win, if they cooperate, or all lose, if they don't.

Gorbachev is right. One of the simplest truths about international afffairs is that over this century they have become more non-zero-sum. Similarly, there's no doubt that Gorbachev has correctly diagnosed the maladies of the Soviet economy: communism is an inherently unproductive economic system, and things look especially bleak for totalitarian communism in the information age, when prosperity depends on the diffuse distribution of potent information processing and transmitting machines. The interesting questions aren't about Gorbachev's diagnosis, but about his prescriptions— their likely efficacy, his real motivations in espousing them, and the Western responses they call for. If reporters didn't so slavishly follow the rules of campaign discourse defined by television, these questions might have been addressed in depth by George Bush during his election campaign. Alas, they weren't. Yet they will persist. So, for his benefit, we offer this handy guide to questions that should have been much debated this fall.

Indeed, the new freedom of expression, while still far short of American standards, is in some ways dramatic enough to be puzzling. In the West, the

intial take on glasnost was that it was entirely subordinate to perestroika; either Gorbachev thought (as many think) that some measure of political freedom is essential to fruitful economic freedom, or he was using free speech to woo the intelligentsia, or both. But it turns out that glasnost is keeping pace with, even outpacing, perestroika.

To be sure, the Soviet steps toward a quasicapitalistic economy sound more than tentative. Citizens are to be allowed to buy shares in industrial enterprises- a "stock market" is what the Soviet finance minister called the new system; Western capitalists will be allowed a controlling interest in joint ventures; and farmers, while still no citizens are allowed actually to own land, will be able to lease it for decades. But aspiring entrepreneurs still suffocate in red tape. And, most important, the Soviets have resisted the invisible hand itself: freely floating prices, which bring supply and demand into harmony.

2. Does Gorbachev really believe his own spaceship earth rhetoric? Whether he does or not, much of the world seems to, and he has expoited this fact brilliantly. Indeed, for all the Reagan administration's foreign policy triumphs (notably in upping the price of Soviet expansion, thereby heightening the contradiction between a communist economy and an expensive empire), Reagan suffered a historic lapse in surrendering the center stage

Only Israel backed decision.

Farewell

As another semester ends, The East Carolinian, like other student organizations, must now say goodbye to its seniors. Luckily, we're losing very few.

Joe Harris stepped into the job of news editor this semester after a cross-country trip. Nobody was really prepared for the work load those first few weeks dumped on us, but after all those weeks of relaxation, I think it hit Joe a little harder than others.

But he jammed. He did a great job with the news department this year, especially considering he got little support from the managing editor who knew virtually nothing about hard news. In fact, there were a lot of times that Joe was the news department.

Kim Kayes had an idea of what she was getting into. She had been the editor of The Buccancer, and she knew how late things could get on a publication.

As a layout artist, Kim was one of the fastest and always cheerful. With all the upheavals in the sports department, Kim was a happy transition through it all. Other staff members who are leaving or who recently left include former sports editor Doug Johnson, ad rep Spencer Meymundi and as-

sistant news editor Sean Herring, credit manager Michelle England assistant credit manager Patrick O'Neill and art director John Med-

John has cranked out ad after ad, complaining only a little bit. He's also the only other staff member who's been here almost as long as Tim, James, Pete and myself. I and the rest of the staff wish all these people luck in whatever jobs, schools or classes they head for.

Reshuffling is the name of the game this month at the paper. Copy editor Stephanie Folsom will become the second female managing editor. Tim Hampton will take back his old position of news editor. I will go back to being features editor. We have an entirely new credit department, and Stephanie Emory is going to take over for John Medlin.

One of the lessons I learned this year that hit home is the power the media wields and the temptation to use that power carelessly or ignorantly. While any medium is a powerful thing, the medium of human communication is perhaps the most powerful of all. During this Christmas season, keep that in mind and remember to be kind or at least decent to your fellow humans and animals. Feed the world, and Have a great holiday season.

1. Is Gorbachev for real? Yes. There is a virtual consensus that his reform program is much more than mere talk. Even Jeane Kirkpatrick has lately praised growing religious and intellectual freedom in the Soviet Union and suggested that the U.S.S.R. may be heading toward a promotion from totalitarian to authoritarian regime (no small step, in her lexicon).

Forum Rules

The East Carolinian welcomes letters expressing all points of view. Mail or drop themby our office in the Publications Building, across from the entrance to joyner library.

of world opinion to Gorbachev. He has tried to mount a comeback by sounding kinder, gentler, and more like Jerry Brown. (Recently, for example, he endorsed the use of the World Court-not an institution he has always paid homage to — to resolve some U.S.-Soviet disputes.) But there's more work to be done on the global p.r. front.

George Bush must recapture the leadership of international opinion, recognizing (a) that the people of the world love to think of themselves as being fellow passengers on a giant spaceship; and (b) that in many ways they really are. Through dramatic proposals for making the planet less tense, he can win friends, influence people, and find out whether Mikhail Gorbachev truly is a reasonable man, as opposed to merely a clever one. Would Gorbachev, for example, pull Soviet soldiers out of Eastern European countries in exchange for a partial withdrawal of American troops from Western Europe?

How about a conventional arms pact that unlike past nuclear arms treaties— would actually save both side some money? How about clearer rules of the road to circumvent future military entanglements in the Third World? Bush perfunctorily alluded to questions like this during the campaign, but he didn't sound as if he had lost any sleep over them. He shouldn't get to the next election the same way.

mitted. Students, faculty and priting letters for this page are ded that they are limited to one two weeks. The deadline for ial material is 5 p.m. Friday for

Dr. Shervert Frazier, 67, for- of the Massachusetts. Mental mer director of the National Insti- Health Center, said: "Academic institutions have a very important tute of Mental Health Mental obligation to guarantee the scien-Health resigned last week as a tific integrity of what goes on Harvard professor and head of within their walls and I think McLean Hospital, a psychiatric

hospital affiliated with the university.

Frazier did not dispute the findings of a faculty committee that investigated the allegations, but said the plagiarism was inadvertent, according to Dr. S. James Adelstein, dean of academic programs at the medical school.

"He has accepted the evidence of the committee," Adelstein said.

"But he has ascribed the events to his method of note-taking and composing papers."

Harvard officials said Monday the plagiarism was spotted by Paul Scatena, a graduate student in cognitive sciences at the University of Rochester.

Scatena said in a telephone interview he read several of Frazier's papers while researching phantom pain, a burning sensation that patients sometimes feel from a limb that has been amputated.

Scatena said he found many incorrect citations in the papers and recognized paragraphs that had been lifted from articles by other researchers. He said he sent the passages to Dr. Daniel C. Tosteson, dean of the Harvard Medical School, in August. announced Tosteson Frazier's resignation in a Nov. 23 letter to the faculty. The letter, made public by the university Monday, says a faculty committee investigated the allegations and concluded that plagiarism occurred in four papers written by Frazier between 1966 and 1975. Frazier could not be reached for comment Monday. Spokesmen at Harvard and McLean Hospital said he was out of town and unreachable. He did not return messages left at the hospital, and the phone at his home went unanswered. Three of the discredited papers are about phantom pain. The fourth is on "psychiatric emergency management." The papers, which were published in medical journals and textbooks, were intended as "teaching instruments" and did not purport to present new research data, Adelstein said. One of Frazier's colleagues said he thought the forced resignation was an overreaction. "It's not as if he stole a great

and knowledge."

The university has been hit by other allegations of scientific misconduct in recent years.

Van Hecke wants Democrats to choose next chair

DURHAM (AP) — State Democratic Chairman Jim Van Hecke says a nominating committee, which consists of all Democratic Council of State members and other party officials, should be created to choose the next party chairman.

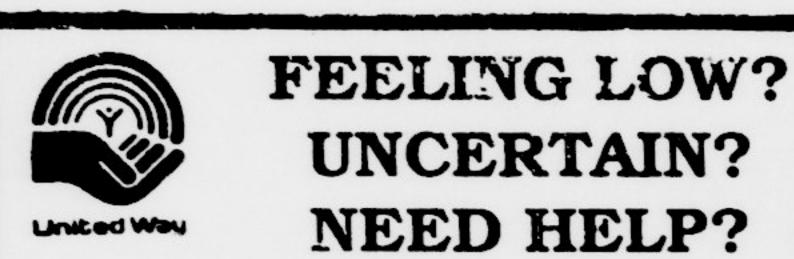

Traditionally, the Democrat holding the highest elected state office, either lieutenant governor or governor, selects the chairman and then the Democratic Executive Committee ratifies the choice. But for the first time in North Carolina's history, a Democrat is not holding either office. "The committee would consist of a broad-based group of people that would look to the grass roots of the party to find a new chairman," said Van Hecke, who noted that he had not worked out the details of the nominating committee. Sen. Terry Sanford should have a say in the matter, he said. "There will not be a situation (this year) where there's one titular leader we're looking to and whose lead we'll follow," he said, "but certainly Sen. Sanford will play a major role in the direction the party's going in, as will other party officials." The Council of State called a meeting two weeks ago to propose that a new board of directors, consisting of Sanford, former Gov. Jim Hunt, the eight Council of State members, Lt. Gov. Bob Jordan and former Senate Majority Leader Tony Rand, be formed to make the decision. The meeting was postponed, however, after an outcry from black leaders in the state because no women or blacks were invited to the meeting. Rep. Dan Blue of Wake County noted that the members of the proposed board of directors were all white men over the age of 40. The meeting has not been rescheduled yet. "I recognize the role that (Council of State members) have to play," Van Hecke told the Durham Morning Herald Tuesday. "They are elected statewide

and a se to be

It's never been difficult for students to convince their parents of the need for a Macintosh[®] computer at school. Persuading them to write the check, for however, is another thing altogether. Which is why Apple created the Student Loan-to-Own Program. An ingenious loan program that makes buying a Macintosh as easy as using one. Simply pick up an application at the location listed below, or call 800-831-LOAN. All your parents need to do is

fill it out, sign it, and

(hristiae)

. .

send it. If they qualify, they'll receive a check for you in just a few weeks. There's no collateral. No need to prove financial hardship. No application fee. Best of all, the loan payments can be spread over as many as 10 years. Which gives you and your parents plenty of time to decide just who pays for it all.

Twister was too close for radar

RALEIGH (AP) — The National Weather Service did not begin issuing tornado warnings resolution the further away you until 38 minutes after the first tornado touched down in western Wake County because the twister was too close to radar to monitor, authorities say.

"If you are looking straight up at a storm you can't see much," said Rod Gonski, a meteorologist with the weather service at Raleigh Durham International airport.

point blank," Gonski said. "You would diminish forecasters' abilcan't tell if it's a pencil or a dot in the middle of a circle."

Gonski said the tornado that struck north Raleigh early Monday, killing two children and injuring more than 100 people, could not have been predicted, even with advanced radar systems.

"The beam gets wider as you get further away, so you have less are," Mosher told The Greensboro News & Record.

"Normally if there's a strong thunderstorm in the area, you take the local radar, look for signatures in the storm like liquid water high up in the cloud," he said. "That's an indication of a said. strong storm. It's difficult to do

that from far away." Mosher agreed that a storm "It's like looking at a pencil at out break over or near a radar site ity to see thunderstorms that have the potential to spawn tornadoes. But Don Burgess, a research meteorologist at the storm laboratory in Norman, said, "At least

they would have seen the storms forming or perhaps moving into the Raleigh-Durham area."

Gonski said the storms were spawned by the collision of a cold front into a warm, moist air mass over the eastern part of the state.

He said temperatures on Sunday ranged in the 70s and humidity was similar to summertime levels. Two jet streams located over the state also contributed to the development of the twisters, he

But Gonski said that when the cold front entered the state, it did not exhibit the qualities of a potentially damaging storm.

"The front had some history of causing severe weather in previous days," he said. "As it entered North Carolina, it did not have severe weather associated with it.'

"The front looked a lot more friendly as it entered the Carolinas than when it exited," Gonski said

crease the temperature of the fire because you intensify the updraft."

"And the whole thing went off in a matter of minutes, literally."

The first tornado strike occurred just northeast of the airport. A clock on a tower at Hartford Hills Apartments was stuck at 1:07, apparently the time electricity was disrupted.

Heres what the J-Team can do for you:

• Change your oil with a major brand! • Add a new oil filter! • Lubricate the chassis!

Prime

NEW YORK (AP) - Consui ers may cut back on big-t Christmas presents now that t nation's biggest banks boost their prime lending rates to 10 dercent, the highest level in 31 vears, some analysts said. The increases in the key len

ing rate by a half percentage por were announced Monday as were the fourth this year.

Many economists have be predicting a prime rate hike recent weeks because intere rates in the bond markets ha been rising due to inflation lation and the dollar's weakne in foreign exchange. "It comes as no surprise.

fact, they (banks) seem to ha help back longer than I expected said Edward Yardeni, chi economist for Prudential-Bac

"Even in hindsight it would have been very difficult to predict that we would have severe damage from this storm," Gonski said.

The weather service office in Raleigh was operating without a critical early-warning tool — a weather radar that has been broken since Nov. 20. Meterologists debated whether the radar's absence kept them from issuing a tornado warning as early as they might have.

All agreed, however, that the you don't know." current weather radar — even when working - doesn't have the early-warning capability of an experimental radar-computer system, called NEXRAD, that should be installed at the 173

Gonski said his office's radar

Gonksi said radars at Volens, Va., Charlotte and Wilmington

Joe Dean, state secretary of Crime Control and Public Safety, said 15 minutes' warning might have made the difference between life and death Monday. But he added that because the storms hit when most people were asleep, it's hard to say how many would have heard a tornado warning.

"In a disaster, the strongest partner I have is the media," Dean said. "If you aren't watching TV or aren't listening to the radio,

Thunderstorms began to develop as the cold front collided with the warm air Sunday night. Gonski said that when the thunderstorms grew to an elevation of about 30,000 to 40,000 feet, their tops were "blown off" by two jet streams.

The high level winds then pulled more air up into the storms. "Suppose you had a fireplace and then you blew a wind across the top of the chimney, Gonski said. "You would in-

Twister was too close for radar

RALEIGH (AP) — The National Weather Service did not begin issuing tornado warnings until 38 minutes after the first tornado touched down in western Wake County because the twister was too close to radar to monitor, authorities say.

"If you are looking straight up at a storm you can't see much," said Rod Gonski, a meteorologist with the weather service at Raleigh Durham International airport.

point blank," Gonski said. "You would diminish forecasters' abilcan't tell if it's a pencil or a dot in the middle of a circle."

Gonski said the tornado that struck north Raleigh early Monday, killing two children and injuring more than 100 people, could not have been predicted, even with advanced radar systems.

"The beam gets wider as you get further away, so you have less resolution the further away you are," Mosher told The Greensboro News & Record.

"Normally if there's a strong thunderstorm in the area, you take the local radar, look for signatures in the storm like liquid water high up in the cloud," he said. "That's an indication of a strong storm. It's difficult to do that from far away."

Mosher agreed that a storm "It's like looking at a pencil at out break over or near a radar site ity to see thunderstorms that have the potential to spawn tornadoes. But Don Burgess, a research

meteorologist at the storm laboratory in Norman, said, "At least they would have seen the storms forming or perhaps moving into

Gonski said the storms were spawned by the collision of a cold front into a warm, moist air mass over the eastern part of the state. He said temperatures on Sunday ranged in the 70s and humidity was similar to summertime lev-

els. Two jet streams located over the state also contributed to the development of the twisters, he said. But Gonski said that when the

cold front entered the state, it did not exhibit the qualities of a potentially damaging storm.

"The front had some history of causing severe weather in previous days," he said. "As it entered North Carolina, it did not have severe weather associated with it."

"The front looked a lot more friendly as it entered the Carolinas than when it exited," Gonski said

crease the temperature of the fire because you intensify the updraft."

"And the whole thing went off in a matter of minutes, literally."

The first tornado strike occurred just northeast of the airport. A clock on a tower at Hartford Hills Apartments was stuck at 1:07, apparently the time electricity was disrupted.

Prime

NEW YORK (AP) - Consui may cut back on big-t Christmas presents now that t nation's biggest banks boost their prime lending rates to 10 percent, the highest level in 31 years, some analysts said.

The increases in the key len ing rate by a half percentage poi were announced Monday at were the fourth this year.

Many economists have be predicting a prime rate hike recent weeks because intere rates in the bond markets ha been rising due to inflation spe lation and the dollar's weakne in foreign exchange.

"It comes as no surprise. fict, they (banks) seem to ha help back longer than I expected said Edward Yardeni, chi economist for Prudential-Bac Securities Inc. The prime rate reflects bank's costs of borrowing mone including interest it pays on sa ings accounts or certificates deposit, and trails more subtle creases in other interest rates. The rate is watched close because bankers use it as a ba for calculating interest on corp rate loans and for determini many types of fixed and adju able-rate consumer loans, such home equity loans. "It's clear that consumers w be absorbing higher borrowi Sentencing being looked into for death row inamte

"Even in hindsight it would have been very difficult to predict that we would have severe damage from this storm," Gonski said.

The weather service office in Raleigh was operating without a critical early-warning tool - a weather radar that has been broken since Nov. 20. Meterologists debated whether the radar's absence kept them from issuing a tornado warning as early as they might have.

All agreed, however, that the current weather radar - even when working - doesn't have the early-warning capability of an experimental radar-computer system, called NEXRAD, that should be installed at the 173 weather stations across the United States by 1995.

Gonski said his office's radar would have been rendered useless by the heavy rains that deluged the radar site at the airport. "The air around the radar site was heavy laden with moisture," he said. "The rain absorbs and scatters energy from the radar so that there is not enough returned to the signal."

Gonksi said radars at Volens, Va., Charlotte and Wilmington are covering the Raleigh-Durham area.

"The radar coverage was

the Raleigh-Durham area."

Joe Dean, state secretary of Crime Control and Public Safety, said 15 minutes' warning might have made the difference between life and death Monday. But he added that because the storms hit when most people were asleep, it's hard to say how many would have heard a tornado warning.

"In a disaster, the strongest partner I have is the media," Dean said. "If you aren't watching TV or aren't listening to the radio, you don't know."

Thunderstorms began to develop as the cold front collided with the warm air Sunday night. Gonski said that when the thunderstorms grew to an elevation of about 30,000 to 40,000 feet, their tops were "blown off" by two jet streams.

The high level winds then pulled more air up into the storms. "Suppose you had a fireplace and then you blew a wind across the top of the chimney, Gonski said. "You would in-

system tilted too much in favor of death sentences, does not apply in North Carolina.

The state Supreme Court, in its most recent ruling, refused Nov. 17 to set aside the death sentence of Oscar Lloyd, who was convicted in 1985 of killing his former boss at a Cherokee County laundry.

The U.S. Supreme Court had ordered the state court to reconsider Lloyd's sentence in light of an earlier ruling by the U.S. court striking down Maryland's death sentence procedure. But the state court concluded that the Maryland ruling did not apply to North Carolina.

Now lawyers for McKoy have petitioned the U.S. Supreme Court to rule that the Maryland decision, Mills vs. Maryland, also overturns North Carolina's procedure.

"The petition says that Mills applies to North Carolina, and the reported distinctions relied on by the North Carolina Supreme Court were unavailing," said Robert Mahler, director of the N.C. Death Penalty Resource Center, which assists lawyers for death-row inmates.

He said he expected the court would decide next spring whether to accept the appeal.

Similar petitions are planned on behalf of Lloyd and other inmates, Mahler said. But a lawyer in the state Attorney General's Office said the state would urge the U.S. Supreme Court to deny the petitions.

"We feel like our Supreme Court is correct, that our statute is different, and there is no reason for the U.S. Supreme Court to grant a review, said Senior Deputy Attorney General James J Coman.

"Generally when we feel our court is correct on a position they have taken, then generally we will file a petition asking that (further review) be denied."

The state Supreme Court, in a series of 5-2 decisions, has said that North Carolina's procedure does not have the defects that concerned the U.S. Supreme Court in Mills vs. Maryland.

The U.S. Supreme Court said that in the Maryland system, jurors in a murder trial thought they had to agree unanimously on mitigating factors.

Bush has to fill vacancy in Tokyo

WASHINGTON (AP) -At least one of the 100-odd American ambassadors that President-elect George Bush must select could rank in importance with many of the Cabinet choices now drawing most of the nation's attention.

Bush must select the successor to former Senate Democratic leader Mike Mansfield, retiring after a record 11 years as ambassador to Tokyo.

The job is important simply because Japan has become so important to America in the late 20th Century.

Together the two countries account for 40 to 50 percent of world economic output. They have one of the world's most complex, emotionally-charged and changing relationships.

Mansfield calls the U.S.-Japa-

feelings often felt between countries are deep cultural and language differences and Japan's new world importance.

In only four decades, Japan has transformed itself from a humble, defeated American enemy to a U.S. protege and loyal ally, an economic superpower and rival, U.S. creditor, landlord and occasional critic.

During the election campaign, Bush took positions on issues such as Japan's military and foreign aid role and trade.

To demands that Japan increase military spending and relieve some of the U.S. defense burden, Bush a bomber pilot against Japan in World War II noted that Japan's Asian neighbors still remember the war and "remain very sensitive to the issue

other conflicts, because Japan is already becoming a rival to U.S. dominance of such international institutions as the World Bank.

On trade, Bush is expected to take President Reagan's general line of seeking to brake protectionist efforts to restrict Japanese imports into the United States while encouraging sharpened U.S. competitiveness.

Reagan and Yasuhiro Nakasone, the Japanese prime minister from 1982-87, developed a first-name relationship un- Nakasone and Takeshita to boost precedented in the two countries' Japanese domestic consumption history. Their personal connection helped the nations weather a rough period marked by U.S. pressure against Japanese domestic barriers, alleged unfair trade practices and insular thinking inappropriate for a country

Tokyo news reports say he hopes to visit Washington early in the Bush presidency to cultivate the same kind of relations.

Announcing his retirement, Mansfield said he felt he could leave "with our heads high." The U.S. trade deficit with Japan, accounting for \$57 billion of a global deficit of \$170 billion in 1987, is finally narrowing, he said, as a result of hard-bargained marketopenings, the costlier yen and cheaper dollar and efforts by and imports.

Names mentioned as early candidates for the Tokyo post include Michael H. Armacost, undersecretary of state for political affairs, who has served in

INSTANT REPLAY'S HOLIDAY **COLOR PRINT SPECIALS**

nese relationship the most important in the world and says that during his tenure in Tokyo it has changed from that of unclenephew to brother-brother.

Complicating the love-hate

of Japanese rearmament."

He suggested that Japan rapidly boost its share of global economic aid, a catetory in which it is about to surpass the United States. But that, too, could create grown rich by exporting.

Noboru Mekalaka Takeshita, Nakasone's successor, said during a White House visit that he also had gotten on a first-name basis with the U.S. president.

Tokyo; Gaston Sigur, assistant secretary of state for East Asian and Pacific affairs; and Lamar Alexander, the former Tennessee governor instrumental in bringino Japanese factories to his state.

State grants two Republican Senator candidates election vote recounts

board."

RALEIGH (AP) — As the state Board of Elections certified results in the Nov. 8 elections, it also granted recounts for two Republican challengers in a Senate race won by Russell Walker, and in another Senate race in which incumbent R.P. "Bo" Thomas fell 264 votes short of re-election.

The board on Tuesday declared Gov. Jim Martin the official winner of the governor race, ordered new elections in local races in Duplin County, and called for a second recount in a state Senate race.

The state board's action gave final approval to most of the results of the Nov. 8 election including state voters choice of Martin, a Republican, over Democrat Bob Jordan, in the governor's race and that of Vice President George Bush, a Republican, over the Democratic nominee, Michael

place finisher in the two-seat district with 49,038 votes, trailing Republican C.W. Hardin of Canton, who won 49,302 votes.

The board also voted to order Macon County Board of Elections to conduct a probable cause hearing on Thomas' request for a new state senate election in that county, said N.C. Elections Director Alex Brock.

The purpose of the probable cause hearing is to conduct a legal forum at which the board decide whether to hold evidentiary hearing of the complaints," Brock said.

"They've got to consider it," he said. "That's what the order will require Macon County Board of elections to do. Whatever they do is appealable to the state

Macon County election officials will decide when the probable cause hearing will be held, but it will not be held until after the recount, Brock said.

"I'm encouraged by the fact they ordered the hearing," Thomas said when reached in Raleigh Tuesday evening. "Nothing has changed, but I'm still confident that the big board will find that the Macon County elections board erred in the manner in which the electronic voting machines were programmed. I'm certain of that. It's as obvious as the nose on your face."

The state board declared Democrat John Lewis Jr., the winner over Republican Donald

L. Smith for a seat on the state Court of Appeals, but withheld final certification pending a noon deadline on Thursday for Mr. Smith, who trailed by 15,858. votes, to call for a recount.

In other action, voters in Duplin County will go back to the polls again to elect two county commissioners and three school board members after the state board ruled that a programming error on voting machines had made it impossible to get an accurate count of the votes there.

The programming error resulted in some straight-ticket voters casting ballots for board members and commissioners in other districts, according to Duplin County officials.

Dukakis, in the presidential race.

In the District 16 Senate race, in which Walker appeared to have won another term, unofficial returns show Democratic incumbent Sen. Wanda Hunt a clear winner with 50,608 votes. Walker won the second seat with 48,170 votes. The two-seat district is made up of four counties -Chatham, Moore, Orange, and Randolph.

Trailing Walker were Republicans Max Reece Jr. with 47,978 votes, and Robert "Bob" Crump, with 47,978. A recount was automatic for Reece under a state law that requires them when unofficials returns show a difference of 1 percent or less between winning and losing candidates.

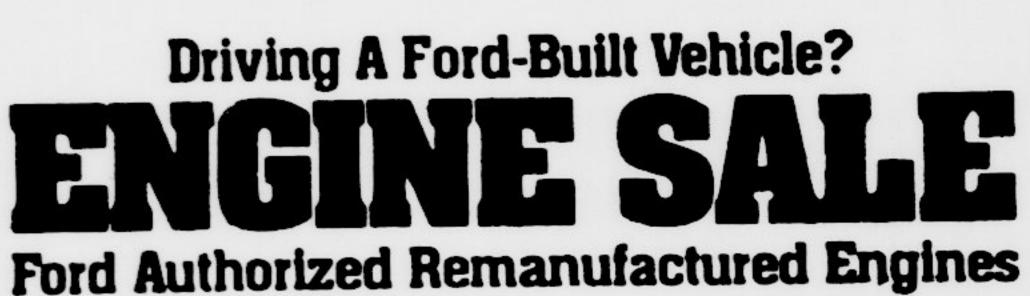

But the board voted also to order a recount for Crump, who trailed Walker by 568 votes, which is also within 1 percent of the vote given Walker even though he was not the candidate "with the next highest number of votes" as provided by state law. A recount was also ordered in Senate District 29 where Thomas, D-Hendersonville, was a third-

'Tar River Poetry' now out

By TODD LOVETT Staff Writer

"It's printed on an ivory parchment sort of paper, so it has a warm, welcoming feel to it," says editor Peter Makuck, and indeed this is the feeling one experiences with a reading of the 10th anniversary edition of Tar River Poetry.

From more humble begin-

is about five years. Ten years clearly means that the university believes in what we're doing, and that we're valuable enough to receive financial support."

The 10th aniversary edition is a celebratory double issue which contains a rich offering of poetry and four essays. Much of the writing is, as Bill Katz, professor at State University of New York, has said of Tar River Poetry in general, "written not just for other poets and academics, but for the general public. The poems are clear, precise, and tend to be involved with close inspection of thing and events rather than with the inner layers of the poet's mind. For example, there is Fred Chappell's "Relativity," a poem which applies Einstein's revolutionary theory to the way we see things in our daily lives. "Let us suppose/ an observer observing within this system. / To him all things are systematic. Within our own lives, our actions have meaning because we are familiar with the system of things that we live in. Yet at the speed of light, the normal laws of physics review pages have been consis- that govern our systems seem to disappear, and as we begin to employ the technology of relativity and the power of the atom, our ability (and perhaps our desire) to understand one another collapse. "The separate systems veer together and apart," and this inability to understand each other "is punctuated by/ the blackened matchstem that was Nagasaki," years because literary journals by our possession and use of the

In "Spilled," Bruce Bennett makes a keen observation about the seemingly undeserved anger and frustration we give to simple accidents.

"It's not the liquid spreading on the floor," nor indeed the parking ticket, missed apointment, or lost keys, all annovances common to everyday existance. These things are "scarcely cause for sobs that will not stop." Instead, it is "everything you've ever spilled, and more," that causes the anger. As the overturned glass falls and its contents spread on the floor, we react to not just it, but to the abundance of mistakes we have made, and helplessness that comes with knowing that we will make them again.

Hiking over this is almost like Pickin' the Bones

Bonehead wraps up the year 1988

By CHIPPY BONEHEAD "It's Not My Problem Anymore."

Well, it seems it's that time of year again. I have to wrap up this column for the year. And it's been a great year, hasn't it? Just think back at all the fun things that happened in 1988 ...

On the social front, Dirty Dancing and endless beer commercial meant one thing to this country — Sexually Transmitted Diseases. Whether it was AIDS, herpes or that old standby cervical cancer, Americans lived in mortal fear of the question, "What do we do after the bars close?" This problem was exacerbated in North Carolina, where ABC laws close all bars at 1 a.m. during Daylight Savings Time. So far, no one at the ABC has offered an explanation for this bizarre law. It must get darker at a.m. in the winter than it does in the summer. On the musical end of the scale, there were few bright spots. SPIN magazine came back, Tracy Chapman got the national exposure she deserved and X didn't break up. The Cars did though, REM sold out, drivin' 'n cryin' didn't, and cover versions of old hits made money for artists who couldn't come up with stuff of their own. Weatherwise, the atmosphere finally went on strike and those ozone scabs finally got a shot at the jobs they've begged for. Raleigh survived a tornado

that deep in my heart I know God was sending to wipe out Greenville. I guess even God's aim is a little off these days.

Whose isn't? America proved her political aim is still the stagnant status quo of the right-wing conservatives. But in the end, it didn't really matter. The only guy qualified to be president blew it by picking on a of the nuclear family

At the movies, "Fatal Attraction" and "Rambo III" proved America likes to watch sequels and psychos, and sequels with psychos are big money. Michael Keaton signed to play Batman in the new movie, throwing the comic book industry back 20 years.

Otherwise, comics did

nings in the late 1960's as a forum for local poets, Tar River Poetry has evolved into a journal of broad scope which accepts submissions from writers and critics of national stature.

In fact it is, 10 years after the establishment of its present form and name, rated by Writer's Digest as one of the top 50 publications for poetry. And deservedly so. As Ralph J. Mills, Jr., author and critic, has said, Tar River Poetry is "edited with quiet brilliance. Favoring no particular school, movement of clique, it has published a broad spectrum of poets.

The criteria have always been the quality of the individual poem. The critical pieces in its tently thoughtful and independent," Mills said.

In a world where there is no money to be made in poetry, the fact that praises of the journal such as Mills' ring consistently true is perhaps responsible Tar River Poetry's longevity. Makuck states that "it's important that Tar River Poetry has survived for 10 come and go. The life expectancy atomic bomb.

Among the critical essays which follow the poetry, there is "Elvis Astride Pegasus," Jim Elledge's look at rock music as a background for the remembered experiences of poets who grew up during the formation of rock and roll, and now write about the stars they listened to.

There is, as Elledge notes, a mythology in rock music that invokes a myriad of emotions, concepts, memories of Vietnam and phrases such as "yeah, yeah, yeah." In light of this fact, it is not surprising that poets such as Gary Soto, Albert Goldbarth, and Richard Blessing among others, should write about the artists who created the recollections of their generation.

The essay's title recalls the Greek myth of Bellerophon astride the winged horse, facing See POETRY, page 15

defenseless moron.

And the whole campaign degenerated into a contest to see which potential First Lady had buried the most children. Who needs it? Thank God for cable television.

What a plethora of choices! Greenville Cable TV alone offers five religious channels. The Weather Channel, ESPN, CNN and MTV were big favorites among college students. In fact, these channel seemed tailormade for us.

Channels that show the same thing every hour, have lots of commercials and require the attention span of a small household appliance were big business again this year. No reason why they won't be next year too. Ted Turner truly is a veritable god.

Vanna White became the Goddess of Love, causing several hundred mythology professors to commit suicide. "The Cosby Show" went into syndication and can now be seen 24 hours a day, providing wit, warmth and wisdom for millions of divorced parents, runaway kids and other remnants

pretty well. Robin the Boy Wonder bit the Bat-dust, SPIN featured hip comic books regularly in their mag, and Matt Groening's cartoon fillers on "The Tracey Ullman Show" were the funniest thing in any media.

And what changes did the Year of the Dragon breathe into The Emerald City? Well, the city got \$8 million from a deceased widow, but they didn't get a tattoo parlor on Fifth Street.

We lost Halloween and gained a new look for The Daily Reflector. No new parking spaces appeared for ECU students, but pink parking tickets multiplied like bunnies on speed

A squirrel man ran rampant, Bonehead and Big E got evicted and The Human Megaphone died horribly. I got turned into a question on a journalism test. It was a strange year.

What to look for in 1989? More taxes, more death and most probably another Tiffany album. Please, God. Send more tornadoes. And just wake me when it's over. Y'all take care.

Pat finds diversity at Varsity Hair Cut

By TIM HAMPTON

Features Editor

With the blinds pulled and the glass door dead bolted, Greenville's own Floyd the Barber, Pat Moore, sweeps up the daily gathering of blond, brown and grey hair clippings from his orange tiled floor.

Reflecting into the combination of locks, Pat looked up and said "I enjoy this. It's not like it's a job. I meet a lot of people I would never have met."

Pat's creation of a "faded look."

Man has musical obsession

NEW YORK (AP) - John McGlinn is a cherubic 35-year-old with a passion, some might call it an obsession, for authentic versions of old musicals.

He is the man behind a new and virtually complete recording of "Show Boat," nearly four hours of music and dialogue from one of Broadway's greatest musicals.

The new recording, using the original orchestrations and produced by EMI-Angel at a reported cost of \$500,000, is pretty much what the first-night audience heard on Dec. 27, 1927, when "Show Boat" opened at Broadway's Ziegfeld Theater.

A lot of the music hasn't been heard since, at least not in the way theatergoers experienced it more than 60 years ago. Over the years, the orchestrations have been "modernized," songs dropped, dialogue cut and some of the show's more racially offensive lyrics softened or eliminated. "Show Boat," written by Jerome Kern and Oscar Hammerstein II, is one of the musical theater's most influential and enduring works. Based on Edna Ferber's epic finale. novel, it tells the unhappy love story of Magnolia Hawks, daughter of a showboat captain,

and Gaylord Ravenal, a charming but irresponsible gambler.

Their tale, spanning four decades, unfolds against a backdrop of black oppression as well as don Sinfonietta and used the miscegenation, unlikely topics for the frivolous musicals of the 1920s. Its score produced such classic love songs as "Make Believe," "Can't Help Lovin' Dat Man," "You Are Love," "Why Do the Glyndebourne production of I Love You?" and "Bill" as well as "Ol' Man River," one of the most stirring songs ever heard on a Broadway stage.

assembled a cast from the worlds of opera, musical comedy and theater. Frederica von Stade sings Magnolia; tenor Jerry Hadley plays Ravenal, a role more likely to be sung today by a baritone;

in New York to accommodate Miss Gish and the rest at London's

famous Abbey Road studios. McGlinn conducted the Lon-Ambrosian Chorus, an English choral group, to sing both the white and black choral numbers.

It wasn't planned that way. Originally, a black chorus from "Porgy and Bess" was to sing the black choral parts. A problem developed with the very first lyrics the audience hears when the For the recording, McGlinn curtain goes up. It's a group of black stevedores singing, "Niggers all work on de Mississippi, niggers all work while de white folks play."

> Those lyrics were from the original production. By the time the 1936 film version was released, the line was changed to "Darkies all work on de Mississippi." The 1946 Broadway version had it, "Here we all work on de Mississippi." McGlinn wanted to use the original lyrics.

and unhappy time in American history," McGlinn says.

"I would have given up the chance to make the record if I had to change the words because one of the things I felt was that the piece derived its power from the fact that it did its best, considering the conventions of the time, to look at life truthfully," he says.

For Broadway buffs, the recording, which takes up three compact discs, three records or three cassettes, is a trove of unknown music.

There is more than an hour's

worth of material that includes songs dropped from the production, written for the 1928 London production or the 1936 Irene Dunne film version or the 1946 Broadway revival for which Kern composed "Nobody Else But Me," the last song he wrote before he died.

'This Morning' turns one

NEW YORK (AP) - Harry Smith's arm shoots up in the air midsentence and he snaps his fingers.

"You know what it was? I'll tell you what it was! The seed was planted in high school, because I had an English teacher and we had to write a term paper. ... I couldn't come up with anything and (the teacher) John Gulassa said, 'Here's some books. Why don't you read these and see what you think?' And he gave me 'On the Road,' by Jack Kerouac.

"That was the beginning of the end for me. You know, the beginning of the end which turned out to be the great beginning.'

"I used to watch Jack Paar and acters like Oscar Levant," Smith said. "Certainly in my realm of existence there wasn't anyone real like that, and wouldn't it be interesting to meet people and know people like that?"

Despite a budding interest in literature and philosophy, Smith went to college on a football scholarship and planned to be a high-said. school football coach. He attended Central College in Pella, lowa, an intellectually "dangerous" place for a young jock, he said, "because they said, 'Here are books. How would you like to read them?' And so I did, and my notions about being a football coach were short-lived." He graduated with a degree in communications and theater. After a stint as a public TV talkshow host in Denver, he moved over to KMGH-TV, the CBS affiliate. There he anchored the noon news with another reporter. Andrea Joyce. Their courtship sounds right out of "Broadcast News."

T've got this thing to go to, would just used to be fascinated by char- you go with me? Just go with me.

> A "convenience date" to the opera led to romance and later marriage.

"I don't know if I can do it forever. I saw where Jane Pauley celebrated 12 years and I don't know if I could do that," Smith

Beavers, virtually exthe turn of the century, are ming their way into urb suburban areas like Raleig napolis, N.C. and Myrtle S.C., wreaking havoc wl they go.

Some people have re by getting permits to kill

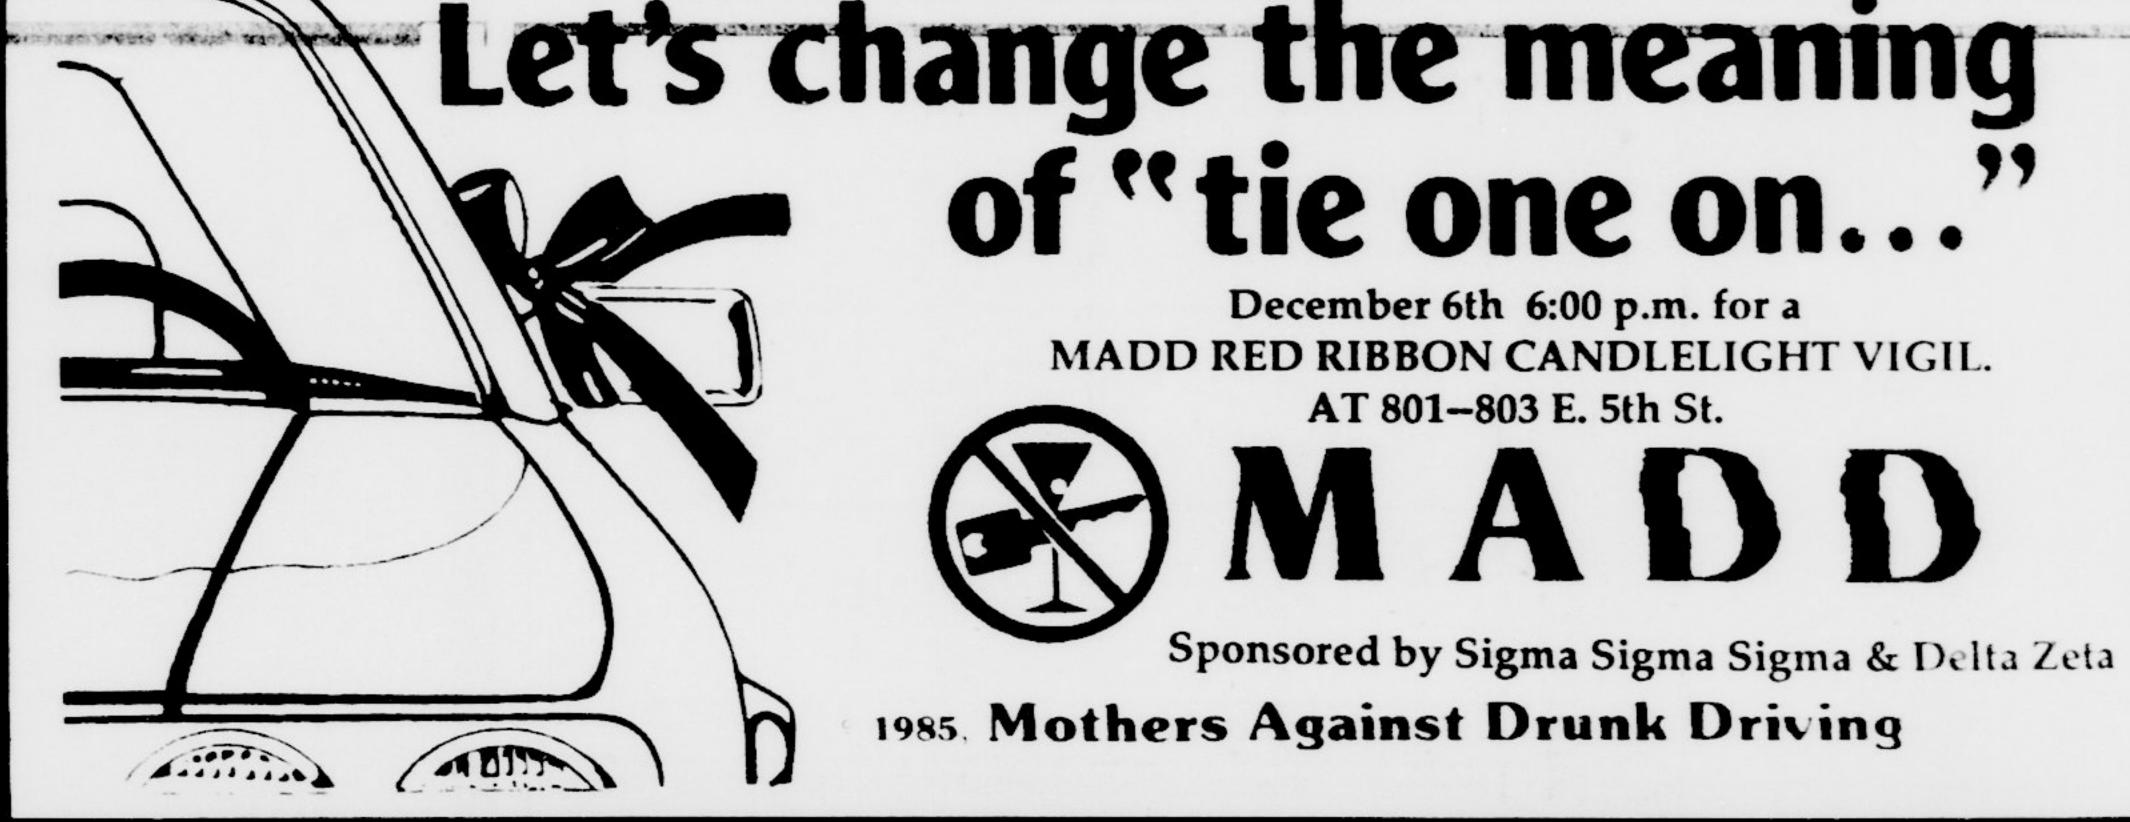

Smith, 37, was searching his memory for the genesis of the story of how a kid from a small blue-collar town in the Midwest found himself in New York City as co-host of a network morning news show.

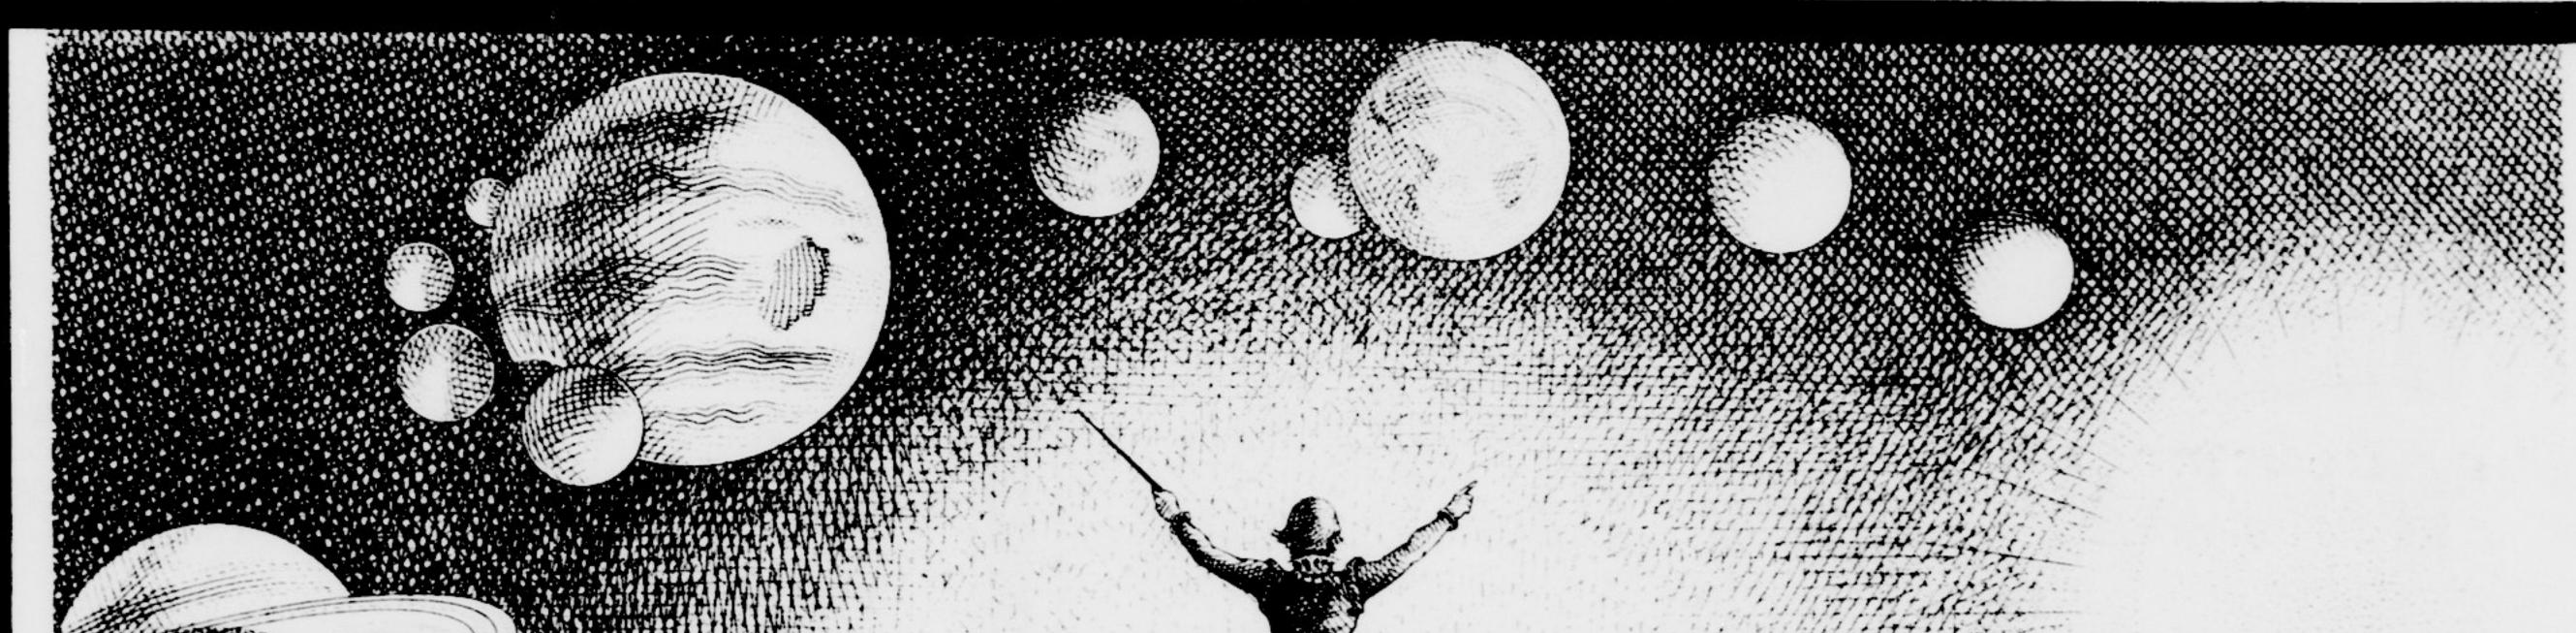

"CBS This Morning" celebrates its first anniversary this week. Though it is still struggling in the ratings behind NBC's "Today" and ABC's "Good Morning America," Smith and co-host Kathleen Sullivan have developed an easy-going rapport, and the network seems content to let them develop a following.

The pressure doesn't seem to get to Smith, the most likely successor to Charles Kuralt as CBS' resident laid-back philosopher.

Smith's feet-on-the-ground attitude comes from deep Midwestern roots and a strict religious upbringing. His father worked two jobs, as a policeman and a milkman. Smith was the youngest of eight children, most of whom "got married pretty young and went out into the world and got real jobs and had real lives," Smith said. "I was the youngest and kind of a surprise. I got a little bit more attention than the other ones did, had a rich fantasy life about doing something other than going to work at the Youngstown Sheet and Tool." Most of those fantasies revolved around television.

"We were just buds," Smith said. "We worked very hard and were very career-oriented and all that sort of stuff, so professional that neither of us would have ever considered going out. We used to 'convenience date.' You know,

Tahnee Welch works hard

NEW YORK (AP) — Tahnee Welch says it was difficult growing up as the child of a sex symbol, but she doesn't fault her mother, Raquel.

"She's a hard worker. She's always taken care of herself. My mother has never, never, never been supported by anyone," the 26-year-old Welch said. "So I had it in my mind that I had to do it myself. I have this pride."

The younger Welch insists she won her part in the 1985 film, "Cocoon," on merit, not because of her mother. Welch also appears in the recently released "Cocoon: The Return."

"They said I never paid my dues," Welch said in an interview in December's Gentlemen's Quarterly.

It took Galileo 16 years to master the universe. You have one night.

It seems unfair. The genius had all that time. While you have a few short hours to learn your sun spots from your satellites before the dreaded astronomy exam.

On the other hand, Vivarin gives you the definite advantage. It helps keep you awake and mentally alert for hours. Safely and conveniently. So even when the subject matter's dull, your mind will stay razor sharp. If Galileo had used Vivarin, maybe he could have mastered the solar system faster, too.

The last Clearly Labeled ...

East Carolinian Satire Page ... of the year

The last clearly labeled quote of the semester: "Fortune favors the bold!" -- Flaming Carrot

Hate mail makes E return to school

folk load of white meat, E turned to Dad and said "I have been offended by a lowly virulent scum who has no sense of good satirical advice."

Stabbing the plated hill of stuffing with a surge of boiled blood, Senior E glared at Junior E authoritatively, "Return to the domains of the Emerald City, seek a second degree and resume your Big E column."

So, just for you Dick Head,

Dear Dirt Eater, P.S. That is really a good anal-No, you are perfectly normal. ogy you used, comparing the E to just finished off my first Pinto last week.

Just Ask Big E white chocolate. Since then, I read

where some people actually eat dirt, so I ate a bucket of the red stuff. Then it was pencil lead. E, do I have a bad sickness?

Unsigned

At parties and downtown, cute guys always ask me to dance all night long and eventually to go home with them. Sometimes I go, sometimes I don't. I never like to be a flirt and I'm not very obvious when I'm around someone I'm interested in. But I don't understand it when guys don't ask me out. If I attract them so easily and have a good time (not what you're thinking of a good time) but really have fun, why don't they call me?

Dear Guy With the Whipped Friend,

So she made him dress up like a raisin, hilarious. It's a shame when good friends get whipped. Have you ever noticed whipped people insist on calling their girl friends/boy friends every ten of curing his problem. He was minutes just to ask stupid questions? It's kind of like the tengirl when he was asked to. For the minute ticker of stupidity. "What have you been doing? Really, call him "Special K." The problem what kind of tooth brush did you began whe he met what is now his

brush your teeth with?" first girlfriend, we will call her In "Special K's" particular case, it sounds like we have lost "Special K" is so whipped another Bush clone to the Neohippies. All the way from a frat boy to a hallucinogenic highway can man. This may be an irreversable personality trait but let's try this.

Anti-State

Dear Earlyis,

Several weeks ago, I visited the N.C. State campus. The students over there told me that they are much smarter and better lovers than ECU students. Earlyis, is this true? What do they know that we don't know?

Signed, Wolfpack envy

First of all, you have to understand the mentality of a State (I'm sorry, Raleigh Farm Institute is not deserving of upper case letters, from now on it will be state) student. Since state's main focus has always been agriculture, most state students major in

Farming and subsequently spend a lot of time with pigs and cows. In the barnyard, I guess it is true, they are smarter and do make better lovers.

Dateless

Big E, I am the only person I know and to my surprise it tasted like be with. I don't understand what Signed, Wanting Someone to Love

Dear Young and Reststop, So, you don't know anybody who doesn't have a boyfriend My, my. Sounds like either you hang around a lot of fags or a lot of whores.

Sorry for that out burst. A lot of guys are reluctant to ask a female out unless the girl lays some subtle or not so subtle hints. Here's some examples: "Hey, what are you doing this weekend?" "Gee, I haven't been to a nice restaurant in a long time." "You know the last good movie I saw was Gone With the Wind."

Or how about the blunt approach: "Wanta come over and tilt some aluminum and vacuum some bingers?" or if you aren't into brain cell damage say "Wanta come over and gurgle some Pepsi and pig on some twinkies?" Or, if you aren't into the glucose scene, say, "Wanta come over and read some Vergil and recite some Homer?" Or, if you aren't into becoming a total dweeb, say, "Wanta come ... ?" You see, the possiblities are endless.

"Helga" made him drop out of the fraternity he was pledging. She won't even let him read the "Big E" column because she is a fraid he will get wise to her. He is also doing very dumb things. During Halloween, she made him dress up as a raisin and he hates raisins. She also uses his head as a foot rest on the bus.

Special K

We had a major virgin friend

last year, who was deathly afraid

even afraid to share his bed with a

sake of hiding his name, we will

Dear Big E,

"Helga."

His grades are suffering and he has even missed a mid-term exam because of her.

His attitude has changed entirely. He use to listen to good music, now he listens to satanic cult chants and Bible stories. His dressing style changed from Izod's to torn jeans with putrid green sports coat with an orange scarf.

Although all this is bad, the real problem is that she won't let him party with his friends. This is causing much concern because we have heard rumors that she is making him have a vasectomy because she doesn't like condoms.

It would be a different story if his girlfriend even looked halfway good, but she is a roadbeast from Hell.

We hope you can give him some advice and with any luck at all he will read your column.

Signed Men Against Road Beasts.

Hey Special K, yeah this is the Big E, can I ask you some questions?

When is the last time Helga shaved her underarms?

The last time you and Helga had a fight, who lost and was forced to drive to the store and purchase some feminine hygiene?

Have you ever been told that when you talk on the phone with Helga that you sound like a pleading baby?

Have you, Special K, ever been forced to listen to The Grateful Dead against your will?

Special K, if you are in our reading vortex please answer these questions and I will determine the severity of your Helga obsession.

Send your problems to:

Miami falls to Charlotte 99-84

CHARLOTTE, N.C. (AP) -They said it was just another night, another game. Deep down, however, none of the Charlotte Hornets would have liked to face it if they had been the first victim of the winless Miami Heat.

"This was a win, the same as a win against anybody," Charlotte coach Dick Harter said of his team's third victory in 13 games, a 99-84 triumph over the Heat. "We need all the wins we can get, although I wouldn't have liked to season high of 22 points. read the papers in the morning and seen where they ended their losing streak."

Tim Kempton said the Hornets were interested in winning, not necessarily beating the Heat.

We felt if we came out and played hard and played to our capabilities, we would win the game," Kempton said. Miami was close, having led midway through the second

at ending its early-season futility an 11-0 run and scoring nine in the fourth period. the coach of the year

ASHEVILLE, N.C. (AP) -Charlie Taaffe, who led The Citadel to its first appearance in the NCAA I-AA playoffs this season, was named the Southern Conference coach of the year.

Taaffe, in his second season at the school, collected 64 of 79 votes in balloting by the Southern Conference Sports Media Association. Marshall coach George Chaump finished second with 10 votes, followed by Furman coach Jimmy Satterfield with three and Western Carolina coach Bob Waters and East Tennessee State coach Don Riley with one apiece.

The Citadel finished 5-2 in the conference and 8-4 overall, including a 38-20 loss to Georgia Southern in the first round of the I-AA playoffs last Saturday. The Bulldogs finished 4-7 in 1987.

The eight victories were the most by the school since 1971, when The Citadel finished 8-3. The All-Southern Conference team was also announced, with Marshall wide receiver Mike Barber and running back Ron Darby heading five repeat selections on the 25-man squad.

Barber, who has caught 73 passes heading into Saturday's playoff game against Marshall, is the league's all-time leading receiver, with 243 receptions.

Darby has rushed for 1,226 yards in 12 games after rushing for 1,506 yards in 15 games last season.

Other repeat selections included Marshall tight end Sean Doctor, Furman offensive tackle Fe Cowan and Tennessee-Chattanooga defensive lineman Tony Bowick.

VMI wide receiver Mark Stock was the top vote-getter on the offense, receiving 76 votes. Furman senior linebacker Jeff

votes.

Washington scored a careerhigh 18 points for Miami. Grant Long had 14 points, Pat Cummings scored 13 and Rory Sparrow had 10.

Zurbrieg wins World Cup

VAL THORENS, France (AP) - Switzerland's Pirmin Zurbriggen won his second straight World Cup race Tuesday, capturing the giant slalom amid fog and rain.

Double Olympic gold medalist Alberto Tomba had the fastest start in the first run, but was disqualified for missing a gate.

Zurbriggen, leading after the first run, held off Austria's Rudi Nierlich by 16. The Swiss skier's combined time was two minutes, 9.32 seconds.

Nierlich, who had the fastest time in the final run, was second in 2:09.38 with two more Austrians, Hans Enn and Helmut Mayer, third and fourth. Enn's was clocked in 2:10.02 with Mayer at 2:11.21.

It was Zurbriggen's 33rd career victory. He won the opening Super-G on Sunday in Schlamding, Austria.

Playoff hopes dim for Redskins

HERNDON, Va. (AP) - The Washington Redskins have resigned themselves to playing out the season with only their selfesteem on the line.

Last year at this time, the next year. Redskins had already wrapped up the NFC East title. Now, however, the defending Super Bowl champions are mired in a threegame losing streak that has left them at 6-7 and with virtually no hope of making it back to the playoffs.

"It's a pride factor for them, kind of a test of what's inside of you," Coach Joe Gibbs said Monday. "It's a situation where you're going to have to really want it bad.

The Redskins harbored hopes

In addition to gauging his team's character over the upcoming three weeks, Gibbs will at- Eagles, who are perched atop the tempt to determine which players NFC East with an 8-5 record. are worth keeping around for

"Each of us wants to keep his job. That's what the coaches will be looking at," Rypien said. "They've seen what we can do under ideal conditions, and now they want to see what we can do when the chips are down

Even defensive end Dexter Manley, who leads the Redskins with 10 sacks, isn't totally sure whether he'll be around next season when Washington tries to pick up the pieces.

"Some guys are going to be out of here. I may be one of them," he declared.

Gibbs would dearly love to see his team rebound against the

"We're walking into something there that's going to be tough to overcome. We know that," Gibbs said. "It's going to be a real test for us. Very few people will give us much of a chance in this one."

- C. . .

For his part, Rypien is looking forward to giving the Eagles a bit of what the Redskins have been experiencing this season as defending world champions.

"Now we can take some licks at someone else," Rypien said.

"People have risen up to play the Redskins this year. Now we have a chance to get them to spend the holidays the same way as us, watching the playoffs on TV."

West V

(AP) — West Virginia coa Don Nehlen has no quarrel wi being ranked No. 3, for now.

But if the Mountaineers be No. 1 Notre Dame in the Fier Bowl and don't win the nation championship, Nehlen will the roof.

The Fiesta Bowl may ha lined up Notre Dame and W Virginia, the nation's only 1 beaten teams (both are 11-0), bu war of words between West ginia and second-ranked Mian under way.

"If West Virginia was to mo above us, as long as we contin to win, that would be the last tir you'd hear me talk about t credibility of the polls," Mi coach Jimmy Johnson said Mo day.

of returning to the playoffs until Sunday, when the Cleveland Browns twice came from behind to register a 17-13 victory. With that loss, Washinoton all but assured itself of becoming the fifth defending Super Bowl champion in the last nine to miss the playoffs.

"I'd say the odds are pretty gloomy," said Redskins quarterback Mark Rypien, named the team's starter next Sunday against the Philadelphia Eagles.

Since Gibbs took over as head coach in 1981, Washington has been among the league's most successful franchises. But now the Redskins have lost four out of five and their incentive for the remainder of the season has nothing to do with playoff booty.

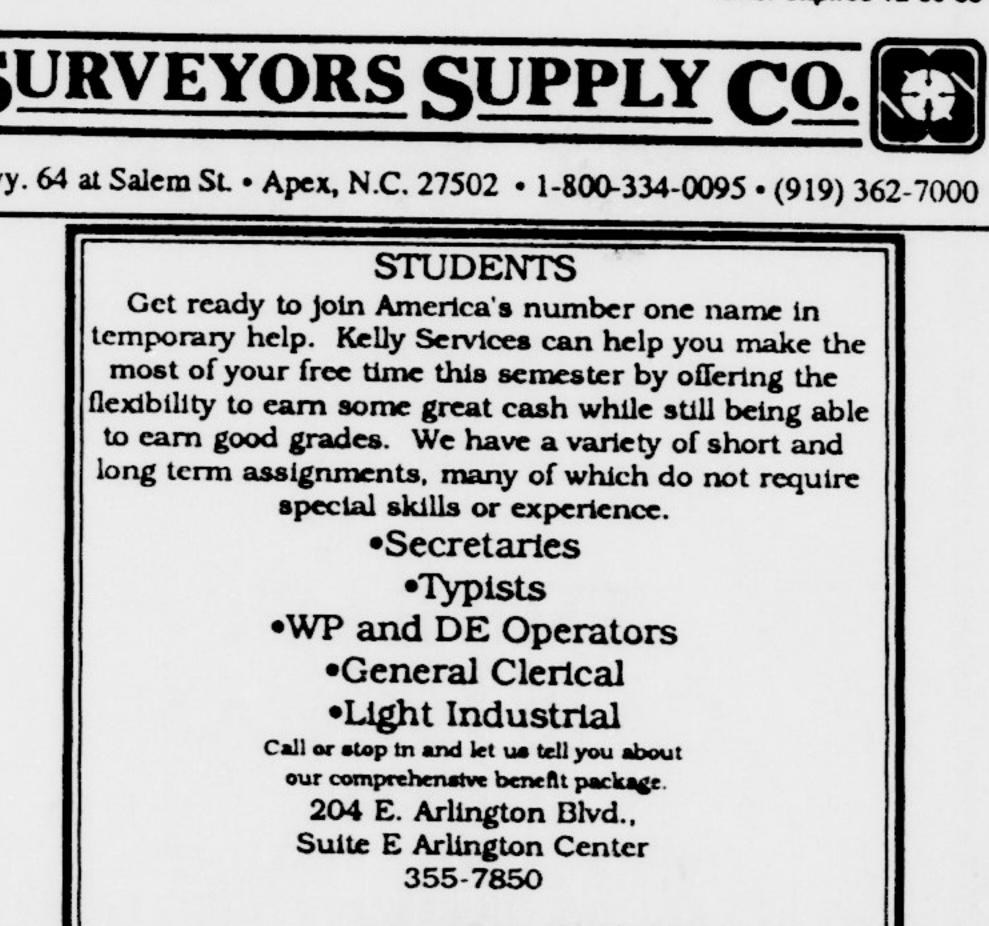

"You've got to take the bad times with the good times to see what you're made of," offensive tackle Joe Jacoby said. "We'll find out about that the next three weeks."

Tennessee ranked 20th in Southeast

EAC names

nessee basketball team is ranked 20th in the country this week.

After opening with a 118-86 romp over Tennessee Tech, Tennessee began its quest for the Southeastern Conference title with an 84-76 victory at Mississippi.

"We may be in the top 20, but we weren't favored to win the game," DeVoe said. "So rankings really don't mean that much. We'd like to be number one, but on April 7."

DeVoe, among the highly respected coaches in the country, has been a success at every stop during a career that is in its 18th season, 88-45 and a National Invitation Tournament title at Virginia Tech, 29-25 in two years of reviving a downtrodden Wyoming program, and 187-126 two games into his llth season at Tennessee.

DeVoe got the call after Tennessee struggled to an 11-16 mark in 1978, and immediately put a charge into the program. His first team was 21-12 and, perhaps more important to Big Orange followers, swept three games against Kentucky's defending NCAA champions.

In succeeding years, Tennessee won 18, 21, 20, 20, 21 and 22 games and played in either the NCAA or NIT each season. As for

the Kentucky thing, DeVoe built a 9-6 record over college basketball's winningest team, including a 7-0 mark in games played in front of the home folks in Knoxville.

Interest in basketball was such that Tennessee embarked on the building of the 24,535-seat Thompson-Bolling Arena. It was at that time that the basketball program soared. Records of 12-16 and 14-15 had the natives grumbling.

Last season, Tennessee began to come back, going 16-13, including a delicious 72-70 shocker over Kentucky that had the fans recalling the earlier DeVoe teams.

Tennessee was the only new member of this week's Top Twenty, although there was shuffling of positions among the other

Duke, No. 1 in the preseason poll, was the choice for the second week in a row in regular-season balloting by a nationwide panel of sports writers and broadcasters. The Blue Devils, who beat The Citadel 93-52, received 47 of 63 first-place votes and 1,229 points.

votes. Brewer had 54 tackles, in cluding nine sacks, and returned an interception for a touchdown South Carolina State nose tackle David Ammons received three votes and Delaware State defen sive back Marvin Bright, Morgar State tackle William Fove and Be thune-Cookman safety Jeffery Alexander received two votes
