Rape prevention discussed

By MINDY McINNIS

What do ECU students know about rape? A questionnaire dealing with campus rapes was given to randomly-selected ECU students in efforts to compile data on rape awareness.

The questionnaire included questions which pertained to students' knowledge of campus rapes, security and resolutions. It wasn't surprising to learn that most students at ECU know either very little or nothing at all about campus rapes.

Campus security was another issue that students were asked to comment on. Most of the students system. The high-pressure sofeel that security isn't strong dium lamps not only yield more enough so they offered some resolight but they consume 1/3 less

"Security should have more ing system. officers on foot rather than in patrol cars," one student said. Rape can also be deterred Not one officer can have a day off by avoiding dark streets, high during a regular school year be-shrubbery, short cuts and dark cause there aren't enough officers doorways. to cover all of the shifts.

Security is not the only problem that causes a lower safety level on campus. Most students believe that campus lighting is inadequate.

The SGA approved a resolution in march 88' to improve campus lighting by installing 150 watt high-pressure sodium lamps to replace the present lighting energy than ECU's present light-

ECU has hired a lighting area in order to provide a sufficient lighting system.

grounds of ECU. Of those three, taken by each individual in the university community."

To deter rape attacks on cam-

Janet Johnson, chairperson of ECU's Sexual Assault Awareness Committee says that eighty-five percent of rapes can be prevented; by a little precaution, preparation and awareness, your chances of attack can be reduced by half.

To help in prevention, ECU offers services such as the Pirate Walk and emergency blue lights. The blue lights, which are placed at different locations on campus, are used as a means for students to contact security when in danger.

Hopefully if the Pirate Walk is allowed to continue and Knox's recommendation to add an additional twelve blue light phones is approved, there will be an improvement in campus security.

ECU's Department of Public Safety offers classes in sexual as-

sault prevention, date rape, men concerning date rape, simple techniques for self-defense in preventing sexual assault and rape preventions.

For further information contact Keith Knox at 757-6294, or come by the ECU Department of Public Safety.

Nanotechnology may control structure of matter in future

By DAVID HERRING
Assistant News Editor

(Editor's note: This is a two-part series looking into Nanotechnology. Tuesday, David Herring will report on the applications of this theoretical technology)

Nanotechnology, by definition, is "a thorough, inexpensive control over the structure of matter," and although this technology is purely theoretical at present, it is firmly rooted in existing technologies, which could ultimately lead us to nanotechnology capability, according to K. Eric Drexler, MIT alumnus.

brainchild, Drexler's the capacity to build programmable molecular machines (assemblers) which, according to Drexler, "will work like tiny industrial robots, directing chemical reactions by positioning molecular tools to build complex structures atom by atom."

The technology would imitate the natural chemical bonding processes found in nature, enabling humans to cheaply massproduce any structure, natural or man-made, simply by breaking existing bonds, repositioning the desired molecules and then forming a new bond to hold it in position — and one machine will do this millions of times per second.

To give an indication of the size involved, microtechnology deals with objects on the micrometer scale (a millionth of a meter), such as construction of computer chips, transistors, etc.

on the nanometer scale (a billionth of a meter) — each assembler so small you could count the number of atoms on its surface.

Easier said than done. We must first learn how to build one of these machines, consolidating information from disciplines in biology, chemistry, computer science, engineering, geology, medicine and physics. Then comes the hard part: manipulating these assemblers, which will require vast amounts of software, on which we will need to store virtual libraries of data from the science disciplines.

Drexler proposes two apnanotechnology offers humans proaches to nanotechnology: top- gists, through biotechnology, can down and bottom-up. The topdown approach is illustrated by the current trend in computer technology toward miniaturiza-

> Fifty years ago it would take rooms of equipment to process information which a computer chip the size of a fingernail can process in a fraction of the time. It can be argued that if the trend continues, microcomputers will ultimately evolve into nanocom-

Drexler credits the top-down approach to physicist Richard Feynman, who in his 1959 article "There's Plenty of Room at the Bottom" wrote, "The principles of physics, as far as I can see, do not speak against the possibility of maneuvering things atom by atom. But it is interesting that it would be, in principle, possible for a physicist to synthesize any

how to work with other people. It

can be a very valuable experience.

battle getting the Elon program

But Yow says she faced a

"It has been for me."

Nanotechnology would operate chemical substance that the chemist writes down. Give the orders, and the physicist synthesizes it. How? Put the atoms down where the chemist says, and so you make the substance.'

Yet Drexler himself is skeptical of the top-down approach and focuses mostly on the bottom-up approach. In 1944, Erwin Schrödinger wrote What Is Life? which, according to Drexler, correctly viewed life as based on molecular devices and machines. Understanding of the func-

tions and structures of molecular devices found in nature, such as DNA and enzymes, has since increased so that molecular biolomanipulate these molecular devices for purposes other than their normal "behavior." Drexler has theorized that molecular biologists could mimic natures processes by employing biotechnology to build assemblers out of

Given certain characteristics, these first-generation assemblers could then build better, more complex assemblers made of stabler substances, such as diamond. "The road to nanotechnology

may pass through protein technology, using parts as stiff as wood," states Drexler, "but nanotechnology itself will use materials like diamond, five times as stiff as steel and fifty times stronger."

"To picture such a device," he continues, "don't picture a protein molecule or a biological cell

Workman clear the Chancellor's yard of fallen debris from the weekend ice storm. (Photo by J.D. Whitmire-Photolab) Basketball coach Kay Yow to speak at ECU

By CLAY DEANHARDT

Staff Writer

When Kay Yow was an English major at East Carolina Teacher's College from 1960-1964, the former Gibsonville High School basketball star couldn't play that sport at the collegiate level. There just weren't that many women's basketball teams in the United States.

A lot has changed since then. E.C.T.C. is now ECU. Kay Yow has won an Olympic gold medal coaching women's basketball and is the head coach of the perenially powerful North Carolina State Unversity women's Wolfpack squad.

She will talk about her Olympic experience and her rise to the top of the coaching profession

when, as ECU's 1989 Distinguished Alumna Lecturer, she speaks Monday on "Striving to Excel — Going for the Gold." Her public lecture will be held at 4 p.m. in room 1031 of the General Classroom Building on the the ECU campus.

Yow began her career teaching English and working as a librarian at Allen Jay High School in North Carolina's piedmont after she graduated with a

bachelor's degree from E.C.T.C. When the basketball coach there decided he wanted to coach only the men's athletic teams, Allen Jay's principal remembered that Ms. Yow had been a basketball standout during her years at Gibsonville High School and he asked her to take on Allen Jay's women's program. It came as quite a surprise.

"It's not something I had even thought about doing," she say's. Coaching, at that time, was an almost exclusively male profession. "I can't imagine their thinking it (I could be a coach) any more than I was thinking it."

But blazing new frontiers has never bothered Yow. Her Allen Jay teams went 77-20 in four years, winning the conference title each year. After she coached one year at Gibsonville High, she decided to work on a master's degree in physical education at the University of North Carolina at Greensboro.

"I planned to go back to (teaching) high school after that," she says.

It was not to be.

Yow spent her second year of

the master's program working part-time in the physical education department at Elon College, just down the road from UNCG. Elon was just developing a women's athletic program, and when they advertised for a women's basketball, volleyball and tennis coach and a coordinator of women's athletics, Yow was coaxed into applying. She began her collegiate coaching career there in 1971.

She began coaching collegiately at a time when many people still felt women should not participate in sports.

According to Yow, however, intercollegiate athletics teach women more about life than they learn in just the classroom.

ture," she says. "You learn a lot

off the ground.

were no scholarships (for women's basketball)," she says. Yow the philosopher says, "Not at Elon." But Kay Yow has never let a little thing like no scholarships stand in her way. In deal of pressure. five years at Elon her teams posted a 57-19 record and won "It's a very educational ventwo state championships.

Then, in 1975, Yow took on a

Guess what? Fast Food isn't healthy

College students are known for their fast food habits. Fast food and foods available on campus are often high in calories, fat, sodium, and cholestero' Many students are concerned about eating a healthy diet because of its importance in maintaining weight and minimizing cholesterol levels. Eating a health diet is easy once you learn how to make the proper food choices. Knowing how to make the proper food selections is important. Many food items have the calorie, fat, sodium, cholesterol, as well as other nutrient contents listed on the label.

Before reading a label you

should know what you are looking for. Many food choices involve making a trade off. For example, pretzels have more sodium than potato chips, but have significantly lower calories, fat, and cholesterol. You need to decide for yourself which of these you most need to avoid.

You should also know about specific ingredients that can clue you in on things that you may not be aware of in your food. Hydrogenated oil and palm or coconut oil indicate high saturated fat content. Eating foods that are high in saturated fat can raise your blood cholesterol level. Corn sugar indicate the presence of by making smart choices from the

Foods high in sugar are usually but a Quarter Pounder without high in calories which can lead to factor in tooth decay.

syrup, dextrose, fructose and malt the nutrient content of fast foods sparingly.

refined sugar. Sugar supplies menu. For example, if you want a calories but very few nutrients. burger, Big Mac has 518 calories,

weight gain. Sugar is also a major mayonnaise has less than 400 calories, and less fat. Likewise, a turkey sub without oil or mayonnaise has fewer calories, less fat and more protein than a salami sub all the way. You don't always have to go for "a salad" to ensure low calories and good nutrition. For example, a fast food baked potato has only about 150 calories, complex carbohydrates and lots of vitamins, compared to a burger at around 400. Remember to order Sometimes you can improve your butter on the side and use

Choosing good alternatives

to junk food is the next step to make an excellent snack that fulchips and pretzels with unbuttered popcorn and nuts in the shell. When you have a sweet tooth, try fresh or dried fruit instead of candy and chocolate. Many of these healthy alternatives are available at on-campus eating sites and in different fast food restaurants. It just takes some nutrition sense and a little will power to make the proper choices.

If you want to know more

about foods and good nutrition healthier eating. Raw vegetables consider taking a nutrition course like FNIM 2100. Also, the Student fills your desire to crunch. Try ice Health Service has a "Guide to milk, sherbert, or low fat yogurt Healthy Eating" booklet which instead of ice cream, and replace you can pick up in the Health Resources Room. This health column was written by Laurie Sodano, student Health Promotion Assistant and Margie Gallagher, Associate Professor in FNIM.

Campaign to increase organ donors

ECU News Bureau

Donor organ recipients will be sharing their experiences with others in a campaign to increase organ donation among eastern North Carolinians.

A support group being established under the auspices of the transplant surgery division at the East Carolina University School of Medicine will serve both as a public education tool and a support network among organ recipients and patients waiting to receive an organ.

Elder Donald Solomon, a Kinston minister and three-time kidney recipient, will help coordi-

To program the assemblers, things." Drexler describes a process whereby Bell Lab researchers are able to produce "bumps" on germanium crystal surfaces by evaporating single germanium atoms from the tip of a scanning tunnelling microscope (STM). "The presence and absence of such bumps might be used to store the ones and zeros of computer data, crowding many trillions of bits into a square millimeter," he states.

A similar process has been devised by IBM whereby molecule fragments are chemically bonded to graphite crystal surfaces using current from an STM. However, such experiments have been unsuccessful so far because the nature of the bumps has proven to be uncontrollable.

Once scientists overcome these problems and get assemblers up and running, they would be used to mass produce more assemblers so that trillions of them could be built in a relatively short time. Drexler cites three possible means of sending commands to them: colored light signals, radio wave signals or by stretching a wire so that it tapers at the end, small enough to connect to the device.

The assemblers would work in an environment rich in the raw materials they would need to do their work, which would vary according to the task to be performed. For example, we could suspend assemblers in the atmosphere, obviously rich in oxygen, and have them replenish the earth's depleting ozone layer by re-bonding O, molecules into O, molecules.

With nanotechnology there is tremendous potential for "good" and "bad" accomplishments which will affect the human race as significantly as the invention of the wheel, control of fire, harnessing electricity, etc. "If we could arrange atoms as we pleased, we would gain effectively complete control of the structure of matter," Drexler states, "Nanotechnology will give us this control, bringing with it possibilities for health, wealth, and capabilities beyond most past imaginings."

"The things he's (Drexler) thinking about would require expenditures of trillions of dollars over hundreds of years," argued Dr. Jim Smith, ECU biochemist/ molecular biologist. In an analogy to the potential to develop nanotechnology he stated, "Theoretically you could count the grains of sand on a beach, but it would be a big problem.

Appalachian hopes installation of condom machines will spur similar plans in UNC

BOONE, N.C. (AP) — Appalachian State University students hope their latest safe sex campaign — condom-dispensing machines in residence halls will catch on this year at other campuses in the University of North Carolina system.

Since January, an outside vendor has supplied some 20 coin-operated machines to offer students convenient access to condoms, a leading AIDS prevention device. The ASU campus was the first in the 16-campus system to install the machines.

body president, will offer his (C.D.) Spangler (Jr.) so all the campus' approach Saturday to other 15 campuses can consider the University of North Carolina Association of Student Governments in Raleigh. He wants the UNC campuses have been disbody, meeting on the N.C. State tributing free condoms for years,

resolution supporting the placing of condom machines in all UNC system campus residence halls.

"We want to tell them how it was done and why they may want to consider doing it," Greene told the Asheville Citizen Tuesday. "We think the students want it."

With plans in hand, other campus leaders could then approach their campus administrators as Appalachian students did. Appalachian Chancellor John Thomas approved the machines it." last December.

"We want to send the resolu-Gary Greene, ASU student tion to UNC system President it," Greene said.

Although health clinics on the University campus, to adopt a ASU students thought the ma-

chines would make it easier and more convenient to get condoms from coin-operated machines.

"The second best way to prevent AIDS is with the condom," Greene said. "And we have to take this seriously. We have had one case on this campus and it is estimated that three of every 1,000 people in the UNC system may be carriers. If the averages hold, we may have 30 carriers on this campus who don't know they have

The machines are in 18 ASU residence halls and commons areas. The campus splits profits from the condoms about 70-30 with the vendor. Greene said, with the campus' 30 percent going into an AIDS education and a sexual abstinence counseling program. A Charlotte company, Barnett Inc., maintains the ma-

Greene would not say how many of the 50-cent condoms are purchased each week on his campus and other business details, but that information will be available at the Raleigh convention, he

"We can't run from this problem because college students are sexually active. It's a choice for safe sex. The machines are back away in the lobby restrooms and are very discreet," Greene said.

Gov. Martin releases few details on public school salary initiative

Martin says he is putting together overhauling the teacher pay a public school initiative that schedule, an NCAE priority. would implement the career-ladder program statewide and untangle the teachers' salary schedule, which he called "a horrible

The governor told reporters about his budding plan Tuesday but provided few details, saying it's still in the planning stage. He said it will be ready to submit to the General Assembly in a week or two.

The blueprint will include funding proposals, Martin said. He would not rule out a tax increase, although some lawmakers say they'd oppose a school tax on top of a gasoline tax for highway construction that has broad legislative backing.

"I would not be inclined to support a tax increase every time we need some money," said Senate President Pro Tem Henson Barnes, D-Wayne. "We should try to find the money in other savings and programs."

A 5.25 cents-per-gallon increase in the gasoline levy is a key component of the highway package. "I do not believe that this (highway plan) should pre-empt consideration of a tax package or any other means of paying for school improvements that would be needed," Martin said. "But before I'm in a position to say how that should unfold, I've got some more homework to do."

Martin called a news conference to embrace the \$8.6 billion highway construction program pending in the Legislature. But he said he did not want publicity generated by a study commission's approval of the road package to deflect attention from needed school improvements.

He said he wanted to "assure the people of this state ... that improvements in our public schools remain among my highest priorities (and) will be the top priority in this legislative year."

He said he will suggest ways to make the program more flexible as recommended by the State Board of Education. He said he

OPINION

Page 4

SGA

It's time for everybody to get involved!

The president, vice president, treasurer, secretary, and speaker of the Student Government Organization are all fraternity/sorority-oriented. In fact, the overall percentage of Greek involvement in SGA is over 60 percent, according to statistics compiled by The East Carolinian.

Only an estimated ten percent of the undergraduates on ECU's campus are in fraternities or sororities, so 60 percent is a high representation for those particular groups.

The reason for this high percentage is not a result of anything Greeks are doing. Or maybe it's a result of everything they're doing. Greeks are getting involved in campus government and that's something other students seem disinterested in. If there's to be true representation of all types of students, then a variety of people have to get involved.

This apathy also shows up at election time when students have a chance to elect top officers for SGA. The activists at ECU, the ones who do come out in numbers, the ones who are behind a candidate and will cast their vote to see that person put into office, are those in fraternites

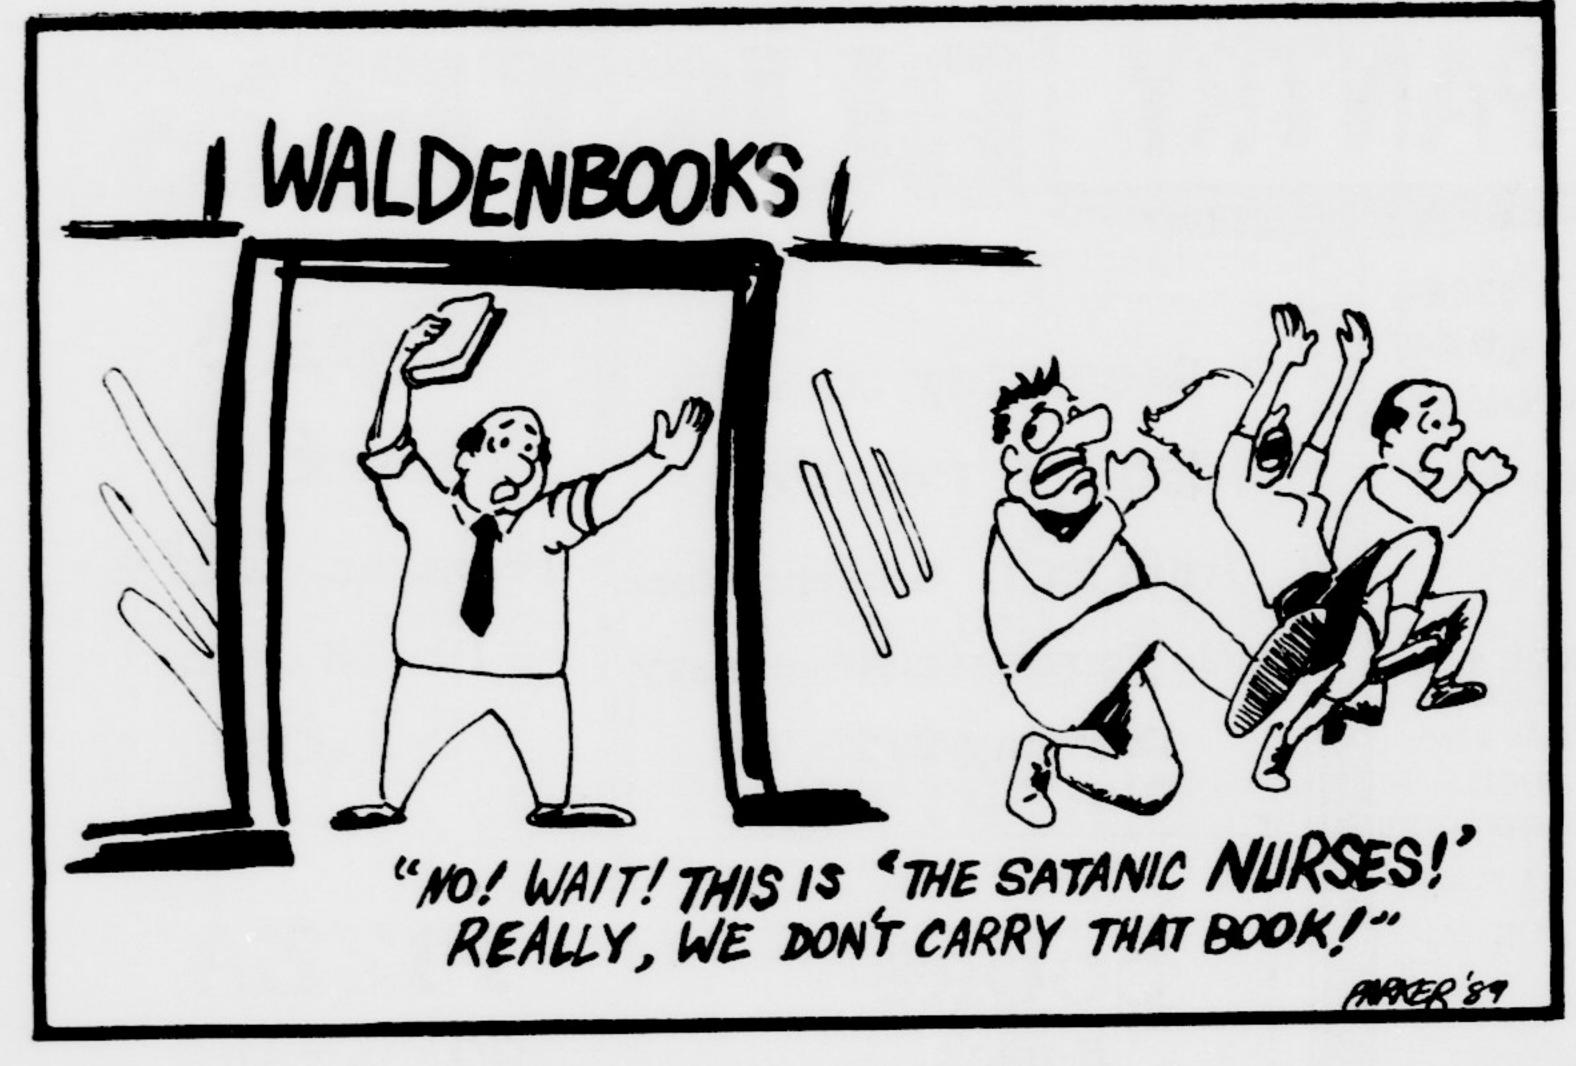

and sororities. What we end up with is the situation wherein a small minority de-

cide the fate of the majority, which rarely satisfies the population as a whole (take South Africa for instance, though that's an extreme example). Here, however, there is no excuse for such exclusivity in our government, which any student can become a part of.

Perhaps that is the problem. An organization such as the Student Government is very intimidating to most students and doesn't often clearly invite new candidates. This results in an in-breeding which is detrimental to the equal representation of various viewpoints. Many students feel that if they don't have some sort of political background in

high school or elsewhere, that it's too late to start pursuing one.

It's not. All a student has to do is to go and attend one of the SGA meetings any Monday at five and watch the government body in action. It will soon become obvious that no-one there is much more qualified to participate than any other student on campus. In fact, once you view the proceedings, the urge to have your voice heard in the decision-making will likely manifest itself.

'Satanic Verses' vs. 'Last Temptation'

By SCOTT MAXWELL Editorial Columnist

The furor generated by Moslem fundamentalists over Salman Rushdie's novel "The Satanic Verses" strikes many in this country as almost comical. Since there are comparatively few American Moslems, the controversy is being treated almost lightheartedly by the American media.

The Moslem world is remote in more than distance, however. It is a remote frame of reference for most Americans, which could help make it easier for Americans to view the situation objectively.

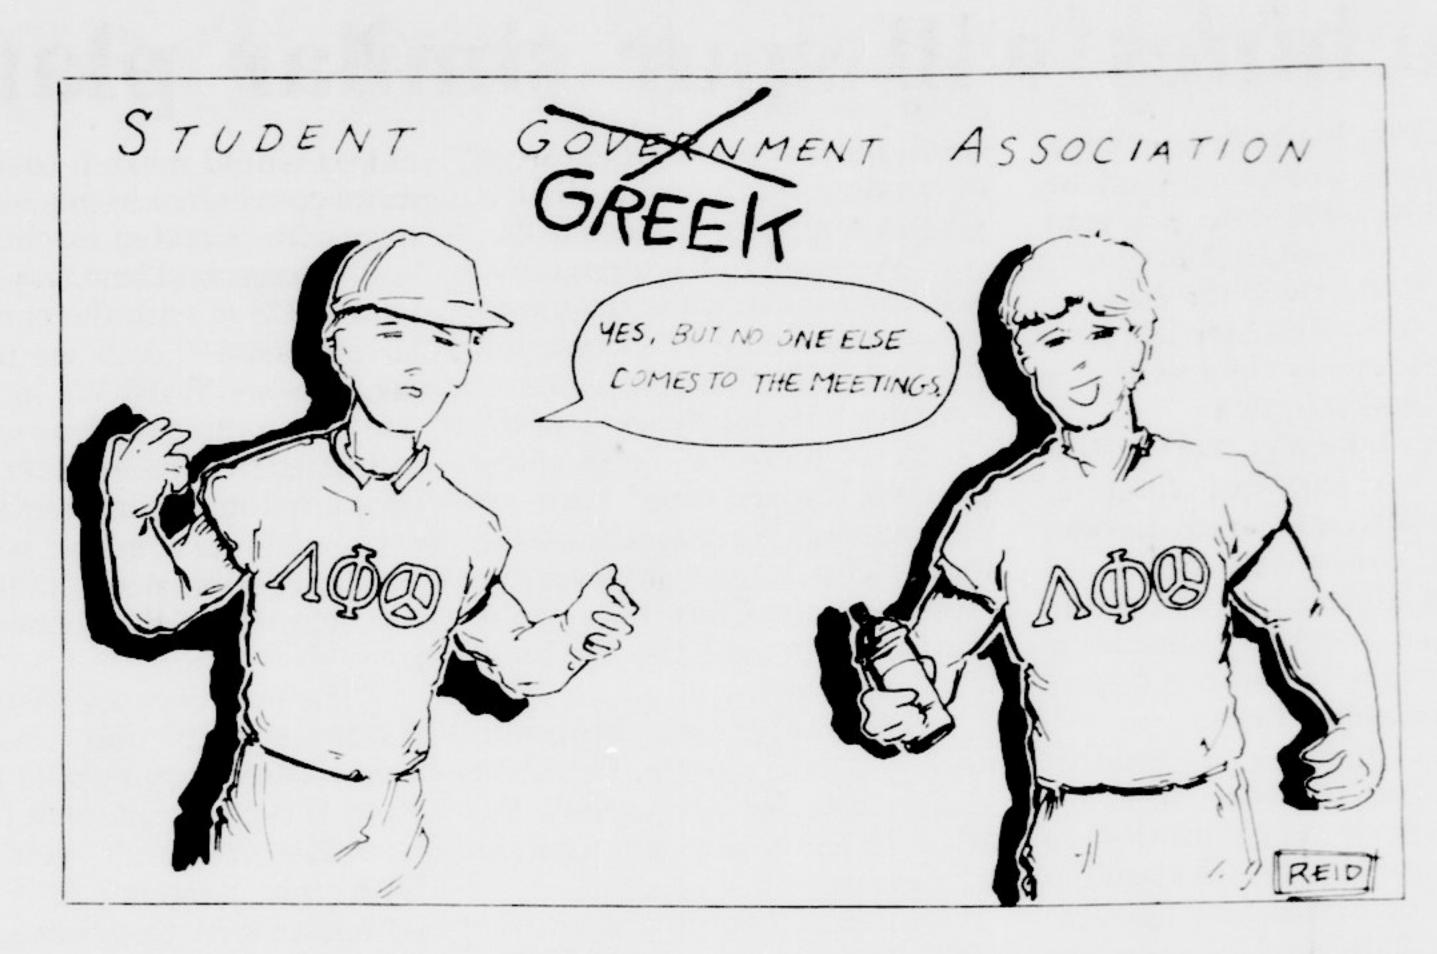

It is worth considering the reaction that would follow from Christian fundamentalists in this country had the book dealt with Christianity instead. Christian fundamentalists here and in other parts of the world have behaved similarly to their Moslem counterparts when faced with similar situ-

"The Satanic Verses" offers a chance to reevaluate the validity of Christian funda-

mentalists' uproar over "The Last Temptation of Christ." In both cases, the outraged group responded to the presentation of an alternate view of its beliefs with violence and calls for censorship. Granted, the Christian fundamentalists didn't call for Martin Scorcese's execution ... but they did destroy property and intimidate many theater owners, much as Waldenbooks has been

scared into dropping the book. Books should not be banned, and their authors should not face death threats even on religious matters. Questioning and criticism are essential to a healthy and vigorous faith, as the Jesuits well know.

One hopes that the public will keep in mind the Moslems' reaction to "The Satanic Verses" next time the Christian fundamentalists are up in arms. If so, the latter group may at last get the amount of attention it deserves: none.

Hysterical overreaction to bats

To the editor:

I fear we have recently witnessed yet another historical overreaction based on ignorance and myth. I refer to the poisoning and bludgeoning to death of over a hundred bats in Belk

According to the biologists who study bats, fewer than 1/2 of 1% of all bats are rabid and these are rarely Skottegaard and others like him how aggressive. These biologists say that "when people are threatened, it is a sick bat that bites in self-defense." Bats are not blind; they navigate not only using their eyes, but aided by high frequency sound, and can detect obstacles as fine as human hair. It is unlikely they will ever become entangled in your hair.

Bats are very efficient insect exterminators, consuming several hundred insects nightly. Many ecodepend on bats to produce fruit.

Granted that few of us, myself included, would want a bedroom full of roosting or flying bats. But by using the last laugh. a little more thought and a lot less hysteria, it is plain that a more rational, humane, and ecologically wise

tected to a bloody pulp.

North is bad

Forum Rules

The East Carolinian welcomes letters expressing all points of view. Mail or drop them by our office in the Public cations Building, across from the entrance to Joyner Library. For purposes of verification, all letters must include the name, major, classification, address, phone number and

the signature of the author (s).

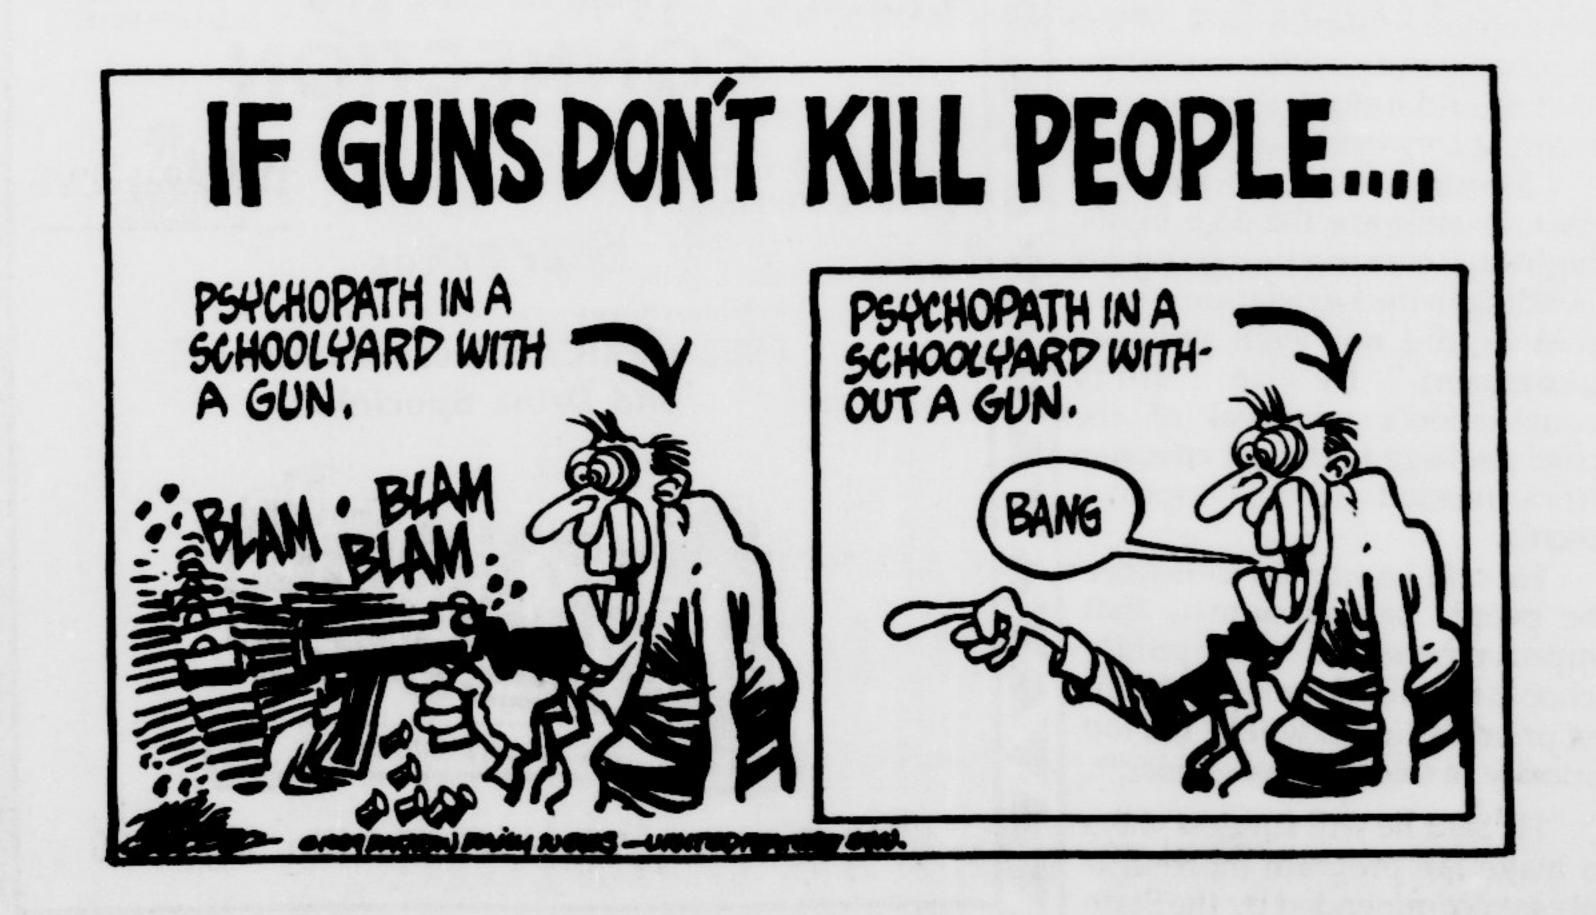

Letters are limited to 300 words or less, double-spaced, typed or neatly printed. All letters are subject to editing for brevity, obscenity and libel, and no personal attacks will be permitted. Students, faculty and staff writing letters for this page are reminded that they are limited to one every two weeks.

The deadline for editorial material is 5 p.m. Friday for Tuesday papers and 5 p.m. Tuesday for Thursday

Spectrum Rules

In addition to the "Campus Forum" section of the newspaper, The East Carolinian features "The Campus Spectrum." This is an opinion column by guest writers from the student body and faculty. The columns printed u "The Campus Spectrum" will contain current topics of concern to the campus, community or nation.

The columns are restricted only with regard to rules of grammar and decency. Persons submitting columns must be willing to accept byline credit for their efforts, as no entries from ghost writers will be published.

Pending \$8.6 billion highway give NC economic boost, says Martin

RALEIGH (AP) — The \$8.6 billion, 12-year highway construction program pending in the General Assembly is "a phenomenal piece of work" that would give North Carolina's economy a big boost, Gov. Jim Martin says.

"It will strengthen our ability to bring manufacturing jobs into any area of the state," Martin said Tuesday. "It will strengthen the ability to get our goods to market. It will strengthen the ability of travelers and tourists ... to travel The governor was briefed on the where they want to go in North study group's plan Tuesday significant opposition to the Carolina."

make your own decisions about pressure. It can be a motivator, or

a destroyer."

coaching internationally." Extensive — and successful. In 1986, Yow coached the American team to a victory over the first time in 29 years the U.S. team \$600,000. had beaten the Soviets in major the 1984 Olympic gold, but the Russian team boycotted those U.S.S.R. fired their women's coaching staff and began to prepare for the World Champion-

ships later that year. The U.S., lea by Yow, met the Soviets again in those championships. And once again the score came out in favor of the Americans. Finally, after years of growing to reach a level where they could compete internationally, the U.S. team took the lead in

women's basketball. It was a lead they would not is, but they've got one," she says. relinquish for the 1988 Olympics, where Yow's team devastated the knocking off the Yugoslavians to

win the gold medal. Yow says winning the gold medal was the most thrilling thing that's happened to her as a coach, with the experience of the opening ceremonies running a

close second. Back home at N.C.S.U. this year, Kay Yow stresses the impor-

tance of academics to her players. "We have an assistant coach in charge of academics, as kind of a liaison between athletics and academics," she says. "We also have a required study hall and an extensive tutoring program. There's a great emphasis on it all

the time." And then there's tradition to think about. Yow's Wolfpack squad is 19-5 as of Tuesday and 10-2 in the Atlantic Coast Conference. Their final game is Saturday against the University of Virginia,

and the team is assured of its 14th winning season in 15 years.

Ms. Yow's work, as important as it has always been, has Yow began her international taken a new focus since a recent coaching career in 1979 as an as- brush with cancer. In 1987 Ms. sistant coach for the World Games Yow had a radical mastectomy. in Mexico City. "From that point Afterwards, she agreed to serve as on I had quite an extensive career a spokesperson and fundraiser for the Lineberger Cancer Research Center in Chapel Hill. She is on a mission to raise \$1 million for research there, and after just Soviet team in the Goodwill over a year she has passed the Games in Moscow, marking the half-way point, having raised

Through it all, if there is one competition. (The U.S. team won thing that has remained constant about Yow, it is her faith. Deeply religious, Yow feels her faith has Olympics.) Following the loss, the helped her to face the challenges that have confronted her on the court and off.

"It's like a wheel. Each person's wheel has a hub around which all the spokes connect and from which the wheel revolves. My faith is my hub. Everything I do is going to relate to that," she

"It's the same with other people. For some the hub is money, for others basketball. They don't always know what it

Yow's faith has been a matter of public discussion ever since she Soviets in the semifinals before smuggled Bibles and other religious literature into the Soviet Union, where they were illegal, during the summer of the 1986 Goodwill Games and World Championships.

She still will not openly discuss the matter for fear there may be some reprisals against the

people who took the literature. Expect faith to be a key focus of Yow's lecture when she speaks Monday at ECU. Using the Olympic theme as a reference, Yow says she will talk about what it takes to be successful: focus, vision, planning, teamwork and desire.

It would be tough to find some one more qualified to discuss what it takes to be a success. Throughout her life, and beneath the many hats she has worn, Kay Yow has always worked to be the best she could.

Just watch her on the basketball court.

Sociological problems to be examined in conference

ECU News Bureau

Educators, career persons and students in the field of sociology will examine many of today's sociological problems this week at the 17th annual sociological research conference held at ECU.

More than 120 participants from mid-Atlantic region colleges and universities are pre-registered for the conference which begins Thursday at the Ramada Inn. The event is co-sponsored by Alpha Kappa Delta International honor society in sociology chapters at ECU and Virginia Commonwealth Richmond, and the Department the College of Arts and Sciences student presenters.

and the Student Government Association, East Carolina Univer-

The event opens with a panel on "Responding to the Challenges of Rural Health Care" and a reception Thursday evening.

William D'Antonio of Washington, chief executive officer of the American Sociological Association, will keynote the conference with a banquet address, "Recruiting Sociologists for the Year 2000," Friday.

Friday and Saturday sessions include sections on the sociology of pornography, crime, war trauma, career opportunities, eat-University, ing disorders, medical sociology, religion and society and value of Sociology and Anthropology, choices. Panelists will include

DEBATE AT BRODY

The ECU Delegation of NCSL will host the state Feb. Interim Council on Feb. 25 & 26. Debate is scheduled from 8:30 a.m. to 6 p.m. each day at the Brody Bldg. (School of Medicine). Affirmative Action and the use of video tapes for testimony in physi-

cally or sexually abused children cases are issues to be discussed. Please come out and meet people from 20 other universities in the N.C. College & University Sys. For more info., contact Janet at 355-6420.

EXPRESSIONS

Expressions is now accepting poetry and short stories for publication in the April issue. Articles can be left at the office or the Media Board secretary's office, located in the Publications Bldg. across from Joyner Library. The first issue for Spring semester is expected to arrive in a few

MUSIC EVENTS

ECU School of Music Events Feb. 21-27: Faculty Recital, Kim Peoria, bassoon (Feb. 23, 8:15 p.m., Fletcher Recital Hall, free); Ralph Walton, clarinet, graduate recital (Feb. 24, 7:00 p.m., Fletcher Recital Hall, free); Faculty Recital, Brad Foley, saxophone, with guest pianist Donna Coleman (Feb. 26, 3:15 p.m., Fletcher Recital Hall, free); Tom McGinnis, piano, junior recital (Feb. 27, 7:00 p.m., Fletcher Recital Hall, free).

TENNIS DOUBLES

Swinging singles prepare for the Intramural tennis double competition registration meeting to be held March 14 at 6:00 p.m. in

PRE-SEASON SOFTBALL

A pre-season softball tournament sponsored by C.O. Tankard Co. (Miller Lite) will hold its registration March 14 at 5:00 p.m. in BIO 103. T-shirts, trophies and more will be awarded to participants. Don't miss the big event!

Announcements

BLACK FACULTY SYMPO-SIUM

Members of the Organization of Black Faculty and Staff (OBLS) will present their current and/or on-going research interests during Black History Month. Presentations will be held each Mon. during the month of Feb. in the Ledonia Wright Afro-American Cultural Center from 11:30-1:30. Students, faculty and staff are encouraged to bring a brown bag lunch and enjoy the discussion. Sponsored by the Office of Minority Student Affairs.

SWIM MEET

Drown your sorrows by signing up for this years intramural swim meet. This will be the only swim meet until 1990! Don't miss registration meeting March 15 at 5:00 p.m. in GCB 1026. Your spring tan should look great!

SOFTBALL

Batter up! Intramural softball registration meeting will be held March 4 at 5:00 p.m. in BIO 103. All men's and women's teams must send a representative.

ALPHA KAPPA ALPHA

You are cordially invited to Alpha Kappa Alpha's Black History program featuring Dr. Theodore Muchiteni Feb. 23 at 7:00 p.m., 1031GCB.

IMPROVING STUDY SKILLS

Learning how to improve your study skills for greater success in college. The following mini course and workshops can help you prepare for the added workload of college or help to increase your GPA. All sessions will be held in 313 Wright Bldg. Feb. 27-Time Mgmt., 3-4:30 p.m Feb. 28-Time Mgmt., 3-4:30 p.m.

ECU LAW SOCIETY

Our next meeting is Feb. 23 at 6:00 p.m. in GCB 1012. Please attend.

PSI CHI

All new members who have recieved a letter of acceptance into Psi Chi honor society must fill out membership cards along with a check for \$35 (made out to Psi Chi) by Fri., Feb. 24 in the Psi Chi Mailbox (Rawl 104). If both check and membership card are not recieved, you will have to reapply for membership next semester.

The next meeting will be held in Rawl 302 on March 1 at 4:00- All members must

ECU GOSPEL CHOIR

The ECU Gospel Choir thanks you for your support throughout our 10 years of existence as a recognized campus organization. We will be celebrating this milestone with a special anniversary musical program on Sun. Feb. 26 at 3:30 pm in Hendrix Theatre. Students and children-\$1, Adults-\$2. We look forward to sharing our happy occasion with you.

ACCOUNTING SOCIETY

The next Accounting Society bus. meeting will be held on Feb. 27 at 3:00 in GCB 1032. Wachovia's Regional Internal Auditor will be the guest speaker. Professional dress is recommended.

ODN

The Overseas Development Network will meet today at 5 p.m. in room 247 MSC. All members should attend because we'll be discussing our fundraisers, especially the upcoming dinner. Anyone interested in

please attend. For more info., call Tonya Batizy (h) 830-8888, (w) 757-6611, ext. 210.

HONORS ORG.

learning about Third World problems

The EC Honors Org. is the student honors group at ECU; it works closely with the Honors Program and is affiliated with the N.C. Honors Assoc, Southern Regional Honors Council, and National Collegiate Honors Council. Meetings are held on alternate Thursdays at 5:00 in room 1004 GCB. The next meeting will be held today. Contact Dr. Sanders (757-6373) for more

DIVE CLUB

There will be a meeting Feb. 27 in rm. 1012 GCB. Ray Scharf will be presenting a slide show and discussion on diving in the Bahamas. New comers welcome. For more info., call David Angel at 355-3546 after 8:00 p.m.

CONCERT

Inter-varsity is having a concert of prayer Feb. 24th in GCB 3008 at 7 p.m. We will be praying specifically for the HABAKKUK

outreach production coming to ECU March 27th and 28th. Come join us!

CAMPUS CRUSADE

Looking for fellowship, fun, and hearding God's word? You are welcome to attend Prime Time at Rawl, rm. 130-every Thursday night at 7:30. Refreshments

CO-OP ED.

If you are interested in federal jobs and how to handle the federal employment process (permanent, summer, or Co-op), you will want to attend a presentation by Mr. Phil Hanson of the U.S. Office of Personnel Mgmt. on 2/24/89, from 10:00 a.m. - 12 noon in room 1031, GCB.

CULTURE MEETING

You can learn what Mormons believe. We will be holding a culture meeting every Thurs. from 6:30-8:00 p.m. in room 248 Mendenhall. Any questions, please call 752-4310. Everyone welcome to attend.

It's hip. It's now. And, best of all ... It's free.

'Cabaret' is a worthy diversion

By LEE HIGHSMITH

Tuesday night, I found myself sitting in my room thinking What good is sitting alone in your room? Come hear the music play!" Yes, Cabaret was in Wright Auditorium, and I couldn't resist one of the greatest musicals ever done on stage. In other words, I opened the doors of Wright with ot of expectations.

The play is set in Berlin just prior to World War Two. Cliff Bradshaw (played by Dan Sharkey), an aspiring novelist, comes to Berlin to find a masterpiece. Instead he finds love in nightclub dancer Sally Bowles, and decadence and rising turmoil

in the world around him.

house run by tough old Frau Sch- offensive. Perfect. He set the tone neider (Judy Ferrell), an elderly of sleazy desparation that perlady preparing to marry one of vades the play. her boarders, Herr Schultz(Tim

the play arises out of this situ- me out of my seat. Sally Bowles, ation, since Schultz is a Jew, and played by Carolyn Wesley, is inence felt in German life. Another getic, sultry and English. Wesley comes pregnant.

All of this is viewed amid the lewd Kitkat Club, hosted by the Emcee(Scott Thompson) an outrageously and wickedly wise character. "Leave all your problems outside!" he demands at the beginning of the show, as he leads you in to the problems of these unfortunate Berliners.

The Emcee was excellently He rents a room in a boarding portrayed. He was rude, loud and

A day in the life of ... an art major Art major not so 'typical'

By KAREN MANN

Finding a typical art major is about as easy as finding typical art. Students range from businesslike commercial arts majors to the so-called nonconformists of the fine arts departments.

Senior metal design student Alice Zincone sees herself as being somewhere in the middle of these two extremes.

"A lot of people think we're all weirdos but you'll find all kinds of people over here," she says. "I'm just me, a very up front and ordinary person. I have my own ideas and style. Every art major is an individual."

For all their individuality, art

Coming this weekend

Thursday

Susie's: The Beam

New Deli: The LA Booker Band

> Attic: Lex Luthor

Mendenhall: Crocodile Dundee II (through Sunday)

Friday

New Deli: The Distance

Attic: Over the Garden Wall (Genesis Tribute)

Saturday

New Deli: The High Water **Blues Band**

> Attic: White Heat

Monday New Deli: Open Mike Night

majors do have certain things in common. Most become interested at an early age and enter school with the intention of being commercial artists. Zincone is from Greenville and began taking art classes at Rose High School. Her father is chairman of the ECU Decision Sciences Department and the family went to many School of Art gallery openings. When it came time for college,

Alice naturally picked ECU. "I wasn't interested in going far away," she says, "that's too much of a hassle. Besides, ECU has one of the better art schools on the East Coast."

Zincone decided against commercial art after dealing with a very technical project in her first design class. After a brief stint in environmental design, she finally settled on metals.

"I like to build with my hands. The fabrication in metals appealed to me. It's more 3-D than, say, CA, and I can get my hands on it better."

Tuesdays and Thursdays are finally over. devoted to metal design classes. At 8 a.m. Zincone has an independent study with Linda Darty.

The class members meet about once every three weeks to present their work in a critique. Otherclass but they are expected to spend at least 3 hours a week in the metals studio. Zincone likes to utilize the alloted class time though she usually starts working

around nine instead of eight. After a lunch break, Zincone is back in Jenkins for an advanced jewelry techniques class. Students learn to work with faceted stones such as emeralds and diamonds and explore new ideas in metal. This semester the course is being taught by visiting artist Steven Albair.

"Steven's from a different market and area of jewelry," Zincone said. "We'll all benefit from

having a different teacher." When class is over, she either heads home or to the New Deli, one of her favorite downtown restaurants. Then it's more work in the art building until around 1:30 or 2 a.m. when her day is

Bill and Ted have an excellent adventure with Socrates and Billy the Kid in "Bill and Ted's Excellent Adventure." They travel in time in a phone booth. Holy Tardis!

Bill and Ted's adventure not so wise, students don't have to go to class but they are expected to excellent unless you dig Tiffany

By MICAH HARRIS
Staff Writer

Once in a while a movie come along that you want to rush out and see at once. "Bill and Ted's Excellent Adventure" is not that

The idea of two California surfer types tripping through time and having adventures is appealing in itself. But what the production team has done with it

is closer to appalling. Bill (Alex Winters) and Ted (Keanu Reeves) are two aspiring teen rock stars who've spent so much time practicing in the garage that they're failing history. Ted's father (played by Hal Landon, Jr. as the despotic parent these teen movies are lousy with) threatens to send Ted to military school and break up their friendship and their band.

... the paradise of the 27th century is dependent on these lads' suc-

guaranteed "A."

"Bill and Ted's Excellent Adventure" has its moments. The special effects are good, and there are some genuinely funny bits, such as Socrates and Billy the Kid becoming pals and trying to pick up some valley girls at the mall. Or Ted's being analyzed live on stage by Freud as part of the his-

tory project. There's enough cleverness glinting through courtesy of ness. scripters Chris Matheson and Ed Solomon (story editor of "The Gary Shandling Show") to show this movie could've been better. But then, it wouldn't be a teen movie, would it?

No great loss, right? WRONG reality to either be removed later to emulate Corey Haim, you'll or remain as an anchor and refer- like this, too. This movie gets ence point for the viewer. As zany bogus two cat heads.

cess. The rulers of the future send as "The Hitchhiker's Guide to the the "super-cool" Rufus (George Galaxy" was, there was always Carlin) into the past to give Bill Arthur Dent's straight-man charand Ted the secret of time travel acter who couldn't quite accept and a history project that is a the bizzare situations he and his weirder pals found themselves in.

"Bill and Ted" offers no straight man. Not only are both of them spaced out, but the stable characters of their real world, with the exception of their history teacher, are presented as parodies: Ted's gestapo dad, Bill's oversexed father and underage step-mother. Instead of logically moving into absurdity, "Bill and Ted" goes from silliness to silli-

"Bill and Ted's Excellent Adventure" could have worked on a parodic or even an absurdist level, but the producers were too busy making sure they cranked out the apropriate teen drivel. If "Bill and Ted" has no foot in you groove to Tiffany and aspire

Pickin' the Suspicious Bones

Bonehead suspects plot from cordons

By CHIPPY BONEHEAD
Staff Conspirator

Winter is in the air. At ECU, conspiracy is in the air. All over campus, things are being mysteriously roped off. Buildings, sidewalks, trees, certain professors ... everything is being cordoned by fences, tape, rope and

The trend started a few years ago, when they blocked off the street in front of the student store. Ostensibly, this was to repave the street, but campus insiders knew it was a scheme to stop the almost militant gatherings of students outside the store every day between classes.

It continued last year, when the fence around Mendenhall sprang up overnight. Inside the fence, a large hole appeared. Many students thought this was the foundation for the Mendenhall Reflecting Pool, but plans changed. The annex got built in-

The fence was for, quote, "the protection of the students so they are not harmed by falling debris as the concrete patio is destroyed." Right. What else was the patio but a place where students congregated between classes ... possible plotting the overthrow of the administra-

In the past semester alone, patches of sidewalk have been roped off. University officials say this was to keep newlydried concrete from being vandalized. But it's no secret that those sections of sidewalk were the most heavily trafficked walkways to classes.

Eventually they tried to section off the Publications Building home of The East Carolinian. This came during our expose of the squirrel man affair. Obviously, the university was trying this lame method of containment to stop our coverage of the squirrel attacks.

Erwin Building was the next to fall victim to this odd method of censure. It's common knowledge that delicate government secrets were being stored there ... secrets that might have indicted several school ofcials in the Iran-Contra affair.

This week, after the Great Blizzard, taped cordons appeared around several trees and bushes. The official university explanation is, "We're trying to keep students out from under trees where large deposits of ice have been melting and falling. Honest."

Right, folks. If y'all were so concerned about our health, why wasn't the huge Mendenhall Canyon roped off when it

appeared three months ago.

The student center was almost completely inaccessible for weeks, and several students returning home from downtown at night were found the next morning, half-suffocated in

Never saw any ropes around that, did we? No. Of course not. There's obviously some plot going on. But what exactly is the plot? I put a team of crack reporters on the job and the facts are startling.

Why were certain things contained and others weren't? Well, the most common denominator were the areas where students frequented. Denyng students access to these places denied them the chance to meet, gossip and communicate infor-

mation with other students. Point one: Ignorant stu-See BONEHEAD, page 9

Rope skipping rhymes are fun

STORRS, Conn. (AP) — Those who hear the rhyme should also know there's reason behind the child's game of skipping rope, according to a University of Connecticut English professor.

"I think maybe that if I've found out anything, it's that all round th world, children skip," says Fracelia M. Butler, author of "Skipping Around the World: The Ritual Nature of Folk ual. Rhymes" (Library Professional Publications, \$18.50 paperback, \$29.50 hardcover).

By EARLVIS HAMPTON

With the recent resurgence of rodents, household pests and other creatures living in the homes and rooms of college students, landlords and building tenants have taken unethical measures in eradicating animals and insects created by God.

The time is now to stand up for the rights of rats, mice, cockroaches, ants and bats.

Case in point: last week's bombing of Belk Dormitory on the ECU campus by five F-15 US Air Force jets to rid the building of "little brown bats" was uncalled for.

University officials repeatedly bypassed proposals made by the Biology department to turn the dormitory into a zoological complex. In doing so, the ECU powers that be forced themselves into a "little brown corner" with the sole alternative of nuking the entire campus.

My question is this: if the administration felt so strongly, why didn't old Dick call up the Ayatollah and tell him the author of "Satanic Verses" was living in Belk? This would have pushed the US into war with Iran, a police action all true Americans want.

But this is not the only instances in which ECU officials have taken drastic measures to kill rodents.

Few people know the real reason behind the construction of the General Classroom Building. The huge complex wasn't constructed to provide additional instructional-lectures rooms. It was built to cover up the largest rat's nest in North Carolina.

Under the elaborate inner wall crevices of the complex there are literally millions, yes millions of rattia rodenti crawling in pestilent herds. Known to have bred with squirrels, the rats can't be distinguished from squirrels and therefore they go unnoticed; but beware: they are really rats.

Other campuses around the nation have faced similar dilemmas. The University of Oregon in Eugene fire-bombed a cafeteria infested with cockroaches while the multi-colored potatoes were still warm. Blockhead College in Wanna, Utah solved their silverfish problem in a gym locker room by unleashing silverfish-eating rats. Blockhead later regretted the decision when they had to place rateating pit bulls in the gym locker room. The dogs ate all the rats, which ate all the silverfish; but my oh my

the mess they made. The classic case involves cows and pigs at NC State, where campus officials made the decision to

overlook the situation and enroll the barnyard animals as students.

because by the year 2121 we will all be living in inner wall crevices with the rest of nature.

> Quote of the week is: "Robin, you're feeling the first thrusts of manhood." - Batman

Dear Big E,

After going out for a year and a half, I think I am on the verge of leaving my girlfriend. At first it was a great — we were caught in the passions of lusty immorality — but now the candles of love are barely flickering and a sudden gust of wind just may sap the spark from the wick.

We have a big communication breakdown. Whenever I ask her to go out, she always says she is going downtown to get sloshed with her friends. And then on other occasions, she shows up at the

worst time wanting to do something. She actually came over to my place last week and made a scene Save the bats, rats, cows, pigs and other animals, because I wouldn't leave my friends while we were watching the Carolina-State came. I mean, the Carolina-State game is like the Super Bowl to me, so I kinda blew her off.

E, what do I do?

Signed, Should I stay, or should I go.

Dear The Clash

According to many mellow songs, breaking up is hard to do. Untrue. Nothing a little road trip to The Fat Lady in Raleigh won't solve. But do you really want to break up?

The flicker on the candle of love can always be made a blaze with the help of a lighter. In other words, with flowers in hand do the real guy kind of thing and act like there is no problem. Cheesy advice, isn't it? If this doesn't work, go get beat up and stand outside her window after midnight and yell "Adrienne, yo Adrienne."

Pirates down Flames for fourth straight win

By MARK BARBER Sports Writer

It was not a pretty game to watch. Nevertheless, East Carolina's Pirates were able to hit 16 of 18 free throws at the end to hand the Flames of Liberty University a 69-60 loss and with the win extended their win streak to four games, guaranteeing themselves a winning record for the season.

"Was that a struggle, or what?" Pirate coach Mike Steele said afterwards. "But it was the fourth game we've had in eight days and I really think we were worn out in the second half."

ECU, up by 10 at the half, led by as much as 17 in the second period, but the Flames changed their defense in order to stop Blue Edwards and slowly worked back into the game. Edwards, who had 15 points in the first half, could only score seven in the second period, with no points in the last 13 minutes.

defense with a chaser on us and it

With 1:30 to play and behind by only six, Liberty began to foul the Pirates in order to get the ball back on missed foul shots.

But the Pirates wouldn't miss-Reed Lose hit eight straight free throws, Kenny Murphy hit four straight and Gus Hill hit on two attempts to spread the lead back to nine by the final buzzer. The only two misses uncharacteristically came from Jeff Kelly, one of ECU's best clutch foul shooters.

The win raises the Pirates' record to 14-12 with only one game remaining — a home contest against rival UNC-Wilming- 9-5. ton. The winning season will be the first since ECU went 16-13 in 1982-83 and the four straight wins is the longest win streak for the Pirates since the 1977-78 season. ECU is now 6-7 in the CAA. The

"They went to a box-in-one Flames fall to 8-16 with the loss.

The Pirates got the opening worked, Steele said, "And that tip, and after the ball changed was the difference in the second hands a few times on missed shots, broke the ice when Edwards stole the ball and broke away for a reverse, two-handed slam. After a double-dribbling call on the Flames, Stanley Love hit an eight footer in the lane.

Liberty's Charles Richardson hit a three point goal for the Flames, but then fouled Edwards at the other end; Edwards sank both free throws to put the Pirates up 6-3 at the 17:26 mark. Flames guard Bailey Alston pulled the Flames to within one, 6-5, with a 15' jumper at the foul line and Murphy took a cross-court pass from Edwards and made good for three from the right side, ECU up

After a travelling call on Liberty, Edwards sank a three pointer for ECU to make the score 12-5. The Flames scrapped back, aided by several Pirate misses, and pulled to within one, 12-11,

with 13:07 to go.

Steele called for a timeout for his squad, and the Pirates came back out to score nine straight, highlighted by another steal and breakaway by Edwards, who this time capped-off the drive with a Jordan-ish long-flying one hander between two Flames defend-

The two teams swapped baskets for the last 10 minutes in the period, the ECU lead varying from eight to 12 points. With the Pirates up 24-16, Liberty's Eric Cunningham let out a "Help me!" cry as soon as Edwards got the ball in front of him. Ball in hand, Edwards shuffled and promptly drove left around Cunningham and down the baseline for a powerful two-handed slam.

It was even play for the remainder of the half, and ECU went into the intermission ahead

CAA honors Edwards' and O'Connor's play

Edwards and Chris O'Connor, both of East Carolina, have been named the Colonial Athletic Association players of the week, the league announced Monday.

Edwards scored 32 points and grabbed seven rebounds to lead East Carolina past American last week. He scored 31 points and pulled down six rebounds in a 65-60 victory over Campbell.

The

RICHMOND (AP) — Blue Walstonburg, N.C., was 67 percent from the floor for the week on 24-of-36 shooting, and upped his league-leading scoring average to 26.5 points per contest.

lead East Carolina's women's team to an pair of victories last week. She tallied 11 points against George Mason before scoring a want more than ever to close out career-high 24 points against American.

made 16 of 22 shots from the floor last week for 73 percent.

By MARK BARBER Sports Writer

Like a line straight from a Hitchcock movie: Look out Pirate fans, the birds are coming. Only this time, the line can be reversed: Look out birds, the Pirates are hot and waiting for birdmeat.

In what is certainly the biggest game of the year for ECU's cagers, the Seahawks from UNC-O'Connor scored 35 points to Wilmington will try to come into Minges Coliseum and leave with the feeling only a win on the road can give. Likewise, the Pirates the regular season with a win over their biggest rival.

ECU has a lot more at stake in The senior from Altoon, Pa., the contest than the Seahawks, who only have regional pride to

allow the Pirates to close out their conference play at the .500 mark, 7-7. The last time the Pirates had at least a .500 conference record was in 1975-76 when the school was still in the Southern Conference. And if the Dukes of James Madison lose on the road to George fall to 6-8, which will mean ECU will finish the season in fifth-place championships. in the CAA, an important finish in regards to the seeding at the CAA tournament.

ECU and Wilmington would then meet again in the first round of the tourney, set for March 4-6. Win or lose Saturday, the Seahawks will finish league play in fourth place.

Another factor for the Pirates is that a win over UNC-W would

ECU looks to pluck Seahawks First, a win for the Pirates will extend their win streak to five games, the longest at the school since the 1974-75 season. Besides records, the extended streak will provide a much needed mental boost going into the tournament. At a time when the team seems to day. be playing together better than they have all year, the added Mason Saturday, their record will confidence from the win could go a long way in the conference

A win would also improve ECU's home record to 11-3, the best since the 1979-80 squad won

11 in Minges. But perhaps the most gratifying result of a win Saturday would be the breaking of the eight-game losing streak to the Birds. The last time the Pirates defeated UNC-W was in 1985, when ECU downed the Seahawks

78-61 in Minges.

The last three games in Wilmington between ECU and the Seahawks have been sellouts. UNC-W is expected to bring a sizeable crowd into Minges Satur-

"I think the biggest reason I want to win Saturday is that we've lost so many in a row to (UNC-W)," Pirate record-breaker Blue Edwards said. "It would be nice to beat them this time."

The last time the two teams met, Jan. 28 in Wilmington, the Seahawks took a two point halftime lead and pulled away for an eventual 81-66. Edwards set the Trask Coliseum opponent scoring record with 36 points in the televised game.

The Seahawks were led with see STEELE MILL, page 14

New Gamecock football coach has 'Spark'

COLUMBIA, S.C. (AP) — Sparky Woods found out what Gamecock fans want when he stopped at a convenience store on the way to a news conference where he was introduced as the new football coach at South Carolina.

"A guy had a Gamecock hat on and I said, Winning is a matter of life and death in this football business down here, isn't it.' He said, 'Hell it's a lot more important than that."

"I can assure you that if it wasn't for these games, this would probably be a very, very great job," said Woods, who left Appalachian State after five sea-

Woods, whose selection ended a search that began just over two weeks ago following the sudden death of Joe Morrison, said Tuesday he was a bit overwhelmed about jumping from

wanted them, then we're very 13. happy with each other," he said.

Wood said he had three goals: "graduation, win football games and have fun while we're doing

Woods said he was nervous about his new job and a 1989 schedule that includes Clemson, Georgia, Florida State and North Carolina State - nine Division I games in all.

"I'm nervous about going against Division I schools. In his final game as coach at the school, the Mountaineers tied Wake Forest 34-34.

Woods said he planned to meet soon with the Gamecock

Division I-AA and taking job of players and the assistant coaches "more magnitude," but had no left on the staff. He said he hoped qualms about his decision. "If to have a complete staff by the they wanted me as much as I time spring practice begins March

He received endorsements "I'm thrilled to be the head coach from President James B. Holderat the University of South Caro- man and Athletic Director King Dixon.

> "I think he's got a fire in his stomach. He's got a lot of enthusiasm." Holderman said.

Dixon, who informed Woods While he wants to have fun, of his selection late Monday afternoon, said the 35-year-old coach "has the characteristics we were looking for - unquestioned integrity, strong character, studentathlete oriented, and a genuine feeling and concern for young

> Dixon said the terms of Woods' contract have not been decided on, but the athletic director said he expected it to be a fiveyear deal.

"We feel as though the contract we will enter into with Sparky will be consistent with what is normally in the Southeast, will be very comfortable and very competitive," Dixon said.

While Woods was officially quetball. introduced at the news conference, his hiring was less than a well-kept secret. Madden leads Heels to non-conference win

CHAPEL HILL, N.C. (AP) -North Carolina coach Dean Smith predicted that Nevada-Reno would, give the fifth-ranked Tar Heels a difficult game, and he was half right.

Nevada-Reno gave North Carolina a difficult first half.

The Wolf Pack took a 12-3 lead in the first three minutes asall five starters scored. But North Carolina tied the score at 17 and went on to beat the Nevada-Reno

109-86 on Tuesday. The Tar Heels, 23-5, have won five straight.

"I was very concerned coming into this game because everyone was saying this was our Harvard or UNC-Asheville game, but you saw some talent out there for Nevado-Reno," Smith said. honestly didn't think it would be like that. We had too much inside strength."

Kevin Madden scored 21 points and J.R. Reid and Rick Fox

added 19 each. The Tar Heels took the lead for good when Fox, who scored 15 of his points in the first half, made two free throws with 13:04 remaining.

North Carolina's lead grew to 36-21 midway through the half when the Wolf Pack, 14-10, threw away the ball eight times in a sixminute span and managed only one field goal.

"I was disappointed in our play in the first half," Smith said. "It seems we have one game every

year where we come out and play for our scoring averages. But in the second half, we did a much better job."

Later in the half, Fox keyed a 10-0 spurt with six points, including back-to-back dunks, as the Tar Heels went ahead 46-27. The Wolf Pack closed to 16 points early in the second half after trailing 60-39 at halftime, but could pull no

"The size factor obviously

hurt us," Nevada-Reno coach Len Stevens said. "We are going against giants with a front line that is 6-3, 6-6 and 6-7. When you go against a mismatch like that, sometimes you can negate size, but not when a team like Carolina

"Our plan was to get certain shooters a certain amount of shots and we did that. The problem was

has size and athletic ability.

that we did not get the percentage we needed to be in the game."

Nevada-Reno made 33 of 88 shots for 38 percent, and were 8-

for-29 on three-pointers. Scott Williams scored 11 points for North Carolina. Steve Bucknall and King Rice scored 10

Darryl Owens scored 28 points for Nevada-Reno and Gabriel Parizzia, 18.

each.

"People just get him angrier by getting into his personal life," Spinks said. "Boxing is the best job in the world to let off steam, and people are in trouble when he (Tyson) wants to let off steam."

Most think Bruno, a hulking Englishman who hasn't fought in 16 months, will indeed be in trouble when he meets Tyson in the scheduled 12-round fight, which will be televised by HBO.

Oddsmakers have made the unbeaten champion a prohibitive 7 1/2-1 favorite to win the fight, and it's even money the scheduled 12-round fight won't last four rounds.

ACC honors players

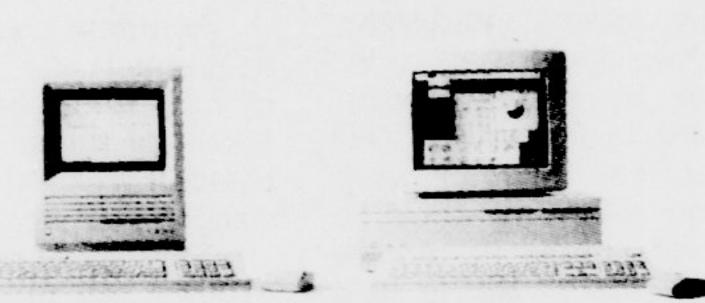

GREENSBORO, N.C. (AP) — Bryant Stith of Virginia was named the Atlantic Coast Conference's rookie of the week

for the fourth time this season. Stith, a 6-foot-5, 192-pound freshman, scored 19 points and grabbed seven rebounds in a 92-79 victory over Virginia Military and added 15 points and eight rebounds in a 65-63 victory over Clemson.

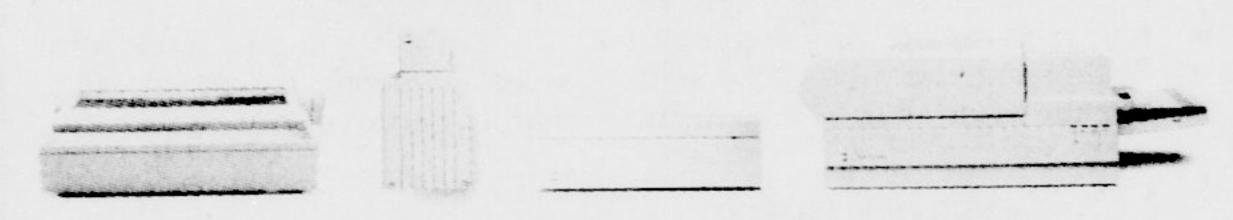

Earlier, North Carolina forward Steve Bucknall, who scored a total of 50 points in three victories last week, was named the ACC's player of the week.

Bucknall hit 15 of 27 field goals, including six of 16 from three-point range, and had 20 assists. He grabbed 11 rebounds and had six steals as the Tar Heels posted victories over Old Dominion, Wake Forest and Maryland.

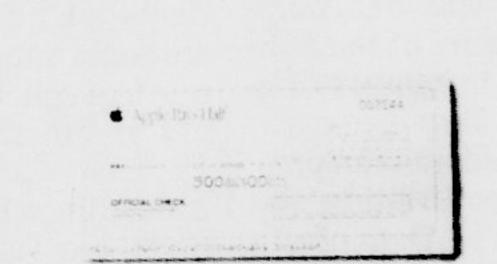

On Sunday, Bucknall scored 14 of his 16 points in the second half to lead the Tar Heels to an 86-75 victory over Maryland.

Pirates hot from line

Continued from page 12

the year, and I can say that ECU gave us as much pressure as any team we've played yet, and that includes Clemson and Towsom State," Flame coach Jeff Meyer said. "Our 10 turnovers in the first half made the difference in the game for us. In the second half, our guys responded to the challenge, but ECU did a good of not letting us cut into their lead."

The. Flames did cut into the lead, but the Pirates were able to sink the free throws at the end to hold off Liberty. Even missed foul

shots didn't help the Flames. "The difference at the end came when Kelly missed his four free throws," Steele said, "and our guys, instead of sitting back and expecting him to hit the shots like he has all year, got in there and tipped the balls back out to another one of our guys. Of the four misses, Gus tipped three of them

back out, and we were able to

keep the ball."

Alston led all scorers for the night, scoring 26 while nabbing six rebounds for the Flames. Todd Cline and Richardson scored 10 each for Liberty. For the ECU, Edwards paced the team with 22 points and nine rebounds. Lose and Murphy were the only other Pirates in double figures, scoring 15 and 14, respectively.

Steele said his Pirates would relax Thursday and look at films in preparation for Saturday's matchup against UNC-W. "They killed us on the boards last time we played them, and we'll have to be — and we are — a lot better now than we were then," Steele

Steele also said that he felt the Pirates would be emotionally up for the game, which would enable them to overcome any fatigue possibly felt by their busy playing schedule.

Steele Mill the site for season closer between ECU-UNC-W

continued from page 12 19 points from senior center Larry Houzer, who has been averaging 16.3 points per game on the year. UNC-W's leading scorer, senior Antonio Howard, scored 11 against the Pirates in Wilmington.

The player that hurts ECU the most, according to Steele, is 6-6 senior forward Greg Bender, a player who Steele says always seems to play well against his Pirates. Bender scored 13 in January against ECU.

The Seahawks come into Saturday's contest with an 8-5 CAA record, 13-13 overall, after losing their last two games, against American and Campbell Universities, both in Wilmington.

One of the biggest advantages for the Pirates this time will, hopefully, be a sellout crowd in the "Steele Mill." Students are encouraged to get their tickets early Friday and to arrive early in

purple Saturday. Tipoff is at 7:30 p.m.
