Two occurrences of attempted rape in June; suspects caught

By Michelle Gastellow Staff Writer

Two suspects have been arrested and charged with attempted rape following separate incidents occurring in the first week of June on the ECU campus, according to a source at ECU Public Safety.

Shon Stocks, 17, a Greenville resident has been charged with attempted rape and assault on female; and Nadiem Al-Awar, a student at ECU has been charged with attempted rape of a resident of Jarvis Residence Hall, according to Lieutenant Rhonda J. Gurley of the ECU Public Safety.

Stocks allegedly committed two offenses on two females during the afternoon of June 1, while Al-Awar allegedly attempted to rape a female in her dorm room on June 7.

Gurley, who is with Public Safety's investigation division, has been accredited with the arrest of the two suspects.

According to Gurley, at approximately 2:50 p.m. on June 1, an ECU staff member was walking near the intersection of 9th Street and Lawrence when she was approached by a young black male riding a metalic blue mountain bicycle. He rode past her several times before he came up behind her and grabbed her on the buttocks.

Then he proceeded to ride off toward Mendenhall Student Cen-

a clear view of his facial features.

During the victim's interview with Gurley, a phone call came in concerning an assault on a female at the ampitheater behind Fletcher Residence Hall. The discription of the suspect in both cases matched. The second victim, a 20 year old ECU student, was sunbathing when she was awakened by the suspect touching her groin area, according to Gurley.

She sat up abruptly and started to scream for help when he reached out and tore off her swim suit bottom. The suspect then proceeded to flee the scene on his bicycle after a male resident of Fletcher observed the incident and

and the student agreed to give details for a composite photograph. From their discriptions, Gurley formed a composite drawing of which James Tripp, a Greenville police officer, later identified as resembling a black juvenile male. The suspect, one Shon Stocks, was notorious for this kind of activity, according to Gurley.

On Monday morning, Gurley

ter. The staff member was fright- obtained a photo from the Pitt ened by the incident and went County Sheriff's Department and directly to the ECU department of formed a photo lineup of six black Public Safety where she gave a males with the same basic facial statement and discription to the characteristics. While compiling dispatcher, Gurley said. The staff the photos, Gurley received a call member discribed the suspect's from another ECU officer at the clothing and stated that he was of Pitt County Court House. He ina slender build but she did not get formed Gurley that Stocks was appearing in court that day on other charges. Immediately, Lieu-

Any woman is a potential victim

By Michelle Castellow Staff Writer

Warm weather brings out the the best in some people and the worst in others. During the summer months, more people are out and about. Therefore, the summer months should be a time of precaution and prevention. Females, especially, should be well Both the ECU staff member | informed on important facts concerning issues of rape and sexual

> Sexual assault involves any I type of forced sexual activity, including physical as well as mental, emotional, or manipulative force, against a persons will or without consent. Any woman is a potential victim, and attackers are of all types. They may be of any race, appearance, age or social standing, so all women should be conscious and knowledgeable of all potentially dangerous situations.

Lieutenant Keith Knox of ECU's Crime Prevention Division offers these startling facts which everyone should be aware of.

 One in four college at some point are victims of rape or sexual assault.

• 84 percent of all rape victims are acquainted with their attacker. 57 percent of these involve

date rape. • In the United States one female is sexually assaulted every

six minutes. • 90 percent of all acquaintance or date rapes involve the

misuse of alcoholic beverages. Only about 15 percent of all

rapes are reported to the police. Knox stresses the importance of knowing the facts about rape prevention and offers these tips for protection against sexual assault.

 Be alert of your surroundings. Use the buddy system when See Prevention, page 3

With the extremely warm weather of June, it's surprising more campus goers don't follow suit and spend a few moments wading through the fountain in front of Wright Auditorium. (Photo by J.D. Whitmire — ECU Photo Lab)

Dr. E. L. Henderson dies at 105

ByMichelle Walker Staff Writer

Dr. E. L. Henderson, the oldest former professor and administrator of ECU, died at age 105 at Pitt County Memorial Hospital on June 17.

In 1923, Henderson joined the staff of then East Carolina Teachers College. He served as first chairman of the educational administration and supervision proof administration and supervision in the School of Education. He said. directed the student teaching pro-

gram as well. During a campus controversy that led to the trial of President Leon Meadows on embezzlement charges, Henderson and five other faculty members were dismissed for "disloyalty" in 1944, just months before he was to retire. Meadows was convicted and even though many students and The Daily Reflector were

Henderson's side, he never returned to teach. He did, however, receive pay for the months entitled to him before his retirement.

It was not until the early 1980s that Henderson's name was officially cleared. Dr. Charles Coble, current dean of the School of Education and long-time friend of Henderson, brought his case to the attention of then chancellor Dr. John Howell.

"The evidence I saw was clear gram, and also of the department and I decided that Henderson had not been treated fairly," Howell

> In 1983, Henderson's faculty status was restored and Howell gave him the rank of professoremeritus. Howell said he thought Henderson hadn't pursued the case back in 1944 because he was so close to retiring and he did receive his remaining pay, and also Meadows had gone to jail.

"The case was somewhat forgotten," Howell said that every-

body back then was on his side anyway and giving him professor- emeritus rank was more a gesture than anything else.

Henderson was a native of Hill County, Texas. He received his undergraduate degree at the University of Texas and graduate degrees in secondary education and educational administration from Columbia University. He lived in Greenville a few blocks from the ECU campus and remained active in the community as a Mason until a few months ago.

From his 98th year on, he celebrated his birthday with friends in the ECU school of Education. His wife, several years his junior, died within days of his hundredth birthday. Howell said that everybody liked Henderson.

"He was a remarkable person. He remained very positive and active up until his last days; we could all try to be a little more like

Hoffman — ECU Photo Lab)

A summer program at the ECU's Medical School is allowing future doctors to have a taste of their own medicine.

Under the auspices of the Center for Student Opportunities, the eight-week Summer Program for Future Doctors gives an intensive preview for premedical students who are minority and/or financially disadvantaged.

One aim of the Center is to increase the number of doctors who may have a rooted attachment to underserved communities in need of medical doctors, an

area where the Medical School is already one of the nation's leader.

ECU had the highest percentage of minorities entered in the 1988-89 year of all medical schools in North Carolina, according to The New Physician, April 1989. ECU ranked ninth in the nation in 1988-89 for the highest percentage of minorities enrolled in traditionally non-minority medical schools.

In this summer program there are 16 blacks, 5 whites, 2 Asians and 1 American Indian. In the class of 24 there are 15 females, which is very unusual according to the

program's staff. Dr. Metcalf, associate dean and See Medical, page 3

By Tim Hampton

News Editor

Illegal parkers on the ECU campus next fall may be fuming after finding that dreaded pink ticket wedged under the windshield wiper blade.

On August 1, fines imposed by Public Safety for a multitude of parking and traffic violations will be increased. The latest rise in fines, approved in the last meeting of the Traffic & Parking Committee, is the second such hike in two years.

The across the board increase includes jumps ranging from \$5 to \$35. Offenses such as jaywalking and unregistrated bicycle will carry a \$10 fine, the smallest on the list. The penalty for parking in a handicapped-only slot becomes a \$50 fine, a more than tripling of the present \$15 violation.

Other pertinent new fine fees are as follows; unregistered vehicle, \$35 - a \$15 hike; freshmen sticker violation, \$25, parking in a no parking area, \$25, parking in the wrong zone, \$15. All others

will see at least a \$5 boost.

Parking fines go on the rise

The jump was instituted by the committee as an alternative to raising parking stickers for which students, faculty and staff purchase for specific lots, according to Pat Gertz, the assistant director of public safety and a member of the parking board.

"Before rising the decal fee, we decided that the person who illegally parks should experience an increase," Gertz said.

Although the fine hike will help to alleviate the shinking parking revenues, it will not prevent the unevitable, Gertz said referring to the enluctability of sticker increases in the near future. Sticker prices should see a jump by 1991, Gertz said. Revenues from decals and fines revert back to the parking and traffic fund to pay for personnel and aid in the purchase of new land for potential parking.

Presently, sticker prices at ECU are the lowest of the three largest universities in the state with a \$50 annual fee for students, faculty and staff wishing to park on

campus.

At the University of North Carolina at Chapel Hill (UNC-CH) and North Carolina State University (NCSU), parking stickers can cost as high as \$210 per annuam for premium parking slots. Finge parking - slots in a remote section of the campus - are the lowest priced parking decal at NCSU with a yearly fee of \$78.

Gertz did point out that bicycle registration is free at Public Safety for those students who wish to escape the escalating costs of parking all together.

Revised Parking Fines (Effective 9/1/90)

• Parking Meter Violation \$10 Wrong Zone Violation \$15

•No Parking Area \$25 • Freshmen Wrong Zone \$25 Unregistered Vehicle \$35

Moving Violation\$35 Handicapped Violation\$50

Dangerous Littering \$35

• Reckless Operation \$30 ·Intentionally Moving Ticket From OneVehicle to Another \$20 Classifieds.

Patients to receive care at new clinic

Patients with muscular dystrophy will be able to receive clinical and follow-up care specific to their disease at a new outpatient clinic established by the department of Physical Medicine and Rehabilitation at the ECU School of Medicine and Pitt County Memorial Hospital.

A ribbon-cutting ceremony for the clinic, which will be housed in the Regional Rehabilitation Center at Pitt Memorial, will be held June 21 at 10 a.m. Officials from the ECU medical school, Pitt County Memorial Hospital, the Muscular Dystrophy Association and the City of Greenville and Pitt County governments will participate.

The clinic's establishment at the medical center provides a third site for muscular dystrophy patients living in North Carolina to receive services which range from medical evaluation to respiratory, physical and occupational therapy. Other clinics in the state are located at Duke University Medical Center in Durham and North Carolina Memorial Hospital in Chapel Hill. The ECU clinic will operate one day per month.

"The clinic here is patterned after others supported by the Muscular Dystrophy Association," said Dr. John Eisele, co-director of the clinic and a specialist in physical rehabilitation. "The new clinic will incorporate thorough diagnoses and evaluation for this complex disease, a strong collaborative research component, and a linkage to community agencies needed by muscular dystrophy patients and their referring physicians.

A \$12,500 grant has been awarded to the clinic by the Muscular Dystrophy Association for development of the clinic's program.

ECU trustees to have short meeting

An abbreviated schedule for the quarterly meeting of the ECU board of trustees July 13 has been arranged to fit the university's summer energy-saving schedule. The board will meet at 10 a.m. Friday morning and end its session by 11:30 a.m., when the campuses close for the weekend to save utilities costs.

The four and a half-day per week schedule has been in effect since May 14. ECU employees work a 40 hour week by reporting at 7:30 a.m. Monday through Friday and having a half hour lunch break.

Trustee committees on athletics, development and finance and facilities are scheduled prior to the full board meeting July 13. On July 12, trustees, spouses and guests will have a social and dinner at the Chancellor's residence and attend an ECU Summer Theatre production of "The Cocktail Hour."

Along with summertime and warm weather comes the threat of poison ivy

By Ralph Gilliland Peer Health Educator

Summertime is here which brings people outdoors to enjoy the warm weather. Unfortunately, it also brings many into contact with poison ivy.

Poison ivy plants thrive in areas that are warm and humid in the summer. In order to avoid and/or treat poison ivy infection it is important to recognize the plant, and be aware of recommended prevention and treatment methods.

poison ivy plant is the key to avoidance. In eastern states poison ivy has three leaflets which are smooth edged.

Generally, poison ivy can be a shrub, ground cover, or woody vine covered with hairy aerial rootlets.

Poison ivy enjoys sun and is most common on floodplains, bottomlands, and along edges of forest and roadways. In the spring, young leaves appear red and glossy but in summer they turn and itching. green.

High schoolers gain interest in science careers

ECU News Bureau

Eighteen high school students are at ECU for a special two-week program to encourage their interest in careers in science.

The rising 10th graders, all minority students from Pitt County, are participating in the ECU Science Track Enhancement Program (S.T.E.P.). In the program the students are working individu-

ally with ECU faculty who teach and conduct research in such areas as biology, marine science and medicine.

"ECU faculty from several several science areas serve as mentors to the students," said Dr. Mary Ann Rose, assistant to the Chancellor for special assignments. Dr. Rose helped to develop and initiate the program at ECU five years ago.

director of Student Opportunities and Minority Affairs, said it might be a new trend among minority schools that may predict an increase in women, both black and white, enrolling in medicine.

Ranging in age from 19 to 30, the students learn concepts in sciences such as biochemistry and physiology; they also learn reading, study and communication skills as well as test preparation for the MCAT (Medical College Admissions Test).

"The program has been highly successful, it is in its twelfth year,'

Dr. Metcalf said.

The "Future Doctor" summer program is aimed to bring students to the ECU medical school to see it for themselves. They have the opportunity to prepare and improve their background for medical school.

The initial planning started in 1976 and the funding for the medical program came in 1978. The federal government determines eligibility for the program since it puts in most of the money. Burroughs-Wellcome also helps out on a local level. Eligibility for

the disadvantaged students is are a lack of sufficient role models determined by their SAT scores and/or their economic status.

Dr. Metcalf said that they are not only increasing representation of minorities but in doing so are contributing in fulfilling one of the missions of the medical school, which is to provide medical education opportunities to minorities. Dr. Metcalf said, "We feel we are making a very strong and positive contribution to the ECU medical school."

"There is a limited applicant pool because there are more black college age men in jail than in school. There are also limited funds available for their medical education," Dr. Metcalf said. The small numbers of minorities in medicine involve many other factors.

Smaller pools may be related ing to the minority student. There dents," Dr. Saunders said.

and mentors for minorities in the medical field. "There are so many educational opportunities within the small pool that medicine is in competition with so many other professions, like law, engineering and computer science as well as other health professions." Dr. Metcalf said.

Dr. Saunders, coordinator and counselor of the summer program, said they try to find people who can benefit from the program, who might have a financial or educational battle in medical school. The students rarely have problems in achieving academically; however trouble for many of these very intelligent students lies in communication, social or cultural prob-

The East Carolinian has served the East Carolina campus community since 1925, emphasizing information that directly affects ECU students. During the ECU summer sessions, The East Carolinian publishes once a week with a circulation of 5,000. The East Carolinian reserves the right to refuse or discontinue any advertisements that discriminate on the basis of age, sex, creed or national origin. The masthead editorial in each edition does not necessarily represent the views of one individual, but, rather, is a majority opinion of the Editorial Board. The East Carolinian welcomes letters expressing all points of view. Letters should be limited to 250 words or less. For purposes of decency and brevity, The East Carolinian reserves the right to edit letters for publication. Letters should be addressed to The Editor, The East Carolinian, Publications Bldg., ECU, Greenville, NC, 27834; or call (919) 757-6366.

Rap group tests right to free speech

It seems that more and more freedoms granted by the Constitution are being challenged each day. The recent case of local governments throughout the nation banning 2 Live Crew's albums and concerts is a direct infringement on the group's freedom of speech.

Federal district Judge José Gonzales upheld the Broward County Sheriff's Department's charge that the rap group's album Nasty As They Wanna Be members of the rap group were arrested for violating court case concerning the situation. the county's obscenity laws.

And, as if the arrests were not enough, several record stores elsewhere in Florida and Texas have pulled the group's albums from the shelves, fearing they may be arrested for the same violations. This is one effect of obscenity rulings that is rarely mentioned — such rulings inevitably lead to unnecessary self-censorship, so that a ruling has much farther-reaching effects than it has by law.

Not everyone likes the lyrics of the rap band in fact, for the most part, many people find their messages repulsive. And even though their concerts may contain "vulgar" acts that go along with with their lyrics, the fans know what kind of show they are case of records, a disclaimer is even placed on the in for before they even purchase the tickets. But the album cover so that the potential buyer will know government should not have the authority to tell these groups that their music is not liked or wanted; that is the duty of the consumer.

The consumer is what makes America live. His choice determines which markets thrive and which fail. Local governments stepped out of line in this case, and it is up to their voters to let them know that they were wrong.

Why has the government not taken a harder

look at the concerts and albums of some of the nation's comedians? Eddie Murphy and Richard Pryor, two of the most notorious vulgar (and obscene, profane, etc.) comedians of all time have never faced the challenges 2 Live Crew recently suffered. In recent years, there has been no record of either of the two (or any other comedian for that fact) being arrested for an obscene concert.

Several years ago, heavy metal star Ozzy was obscene. That ruling, in turn, sparked contro- Osborne was banned from performing in Greens- the intent of its stomach. versy throughout the nation. And when 2 Live Crew boro, N.C., for what Greensboro Coliseum promotgave a concert in Broward County a few days later, ers felt was a vulgar concert. But there was never a

> Certainly, Murphy, Pryor and others should not be censored. But neither should 2 Live Crew.

The case of 2 Live Crew is unique in that the local governments are the guilty parties by choosing to ban the "obscene" material. That alone is wrong because it is the choice of the individual to purchase the album or pay to go to the concert. The people who buy 2 Live Crew's albums and see them in concert know exactly what they are going to hear.

People have the right to choose what they want to listen to or what they want to watch. If someone sees a program on television and finds it offensive, he can simply change the channel. In the that the contents contain obscene language.

Not only do these bans infringe on the First Amendment's guarantee of free speech, but they could set a precedent for local governments to start regulating what messages groups may choose to express. Once the machinery is in place for suppressing expression of one view, it remains in place for the suppression of others. That's frightening.

An Ideal View

Clothes can never cover the heart

By Caroline Cusick **Editorial Columnist**

At a friend's apartment, I saw a picture of a kitten standing with its front paws perched on the rim of a gold fish bowl. The kitten alone looked innocent and harm less. However, in the given situation I have reason to suspect the outward appearance of the furry critter was drastically opposed to

We are a lot like kittens in one since. What we wear on the outside is totally separate from what we wear on our hearts and minds.

Different from the kitten, we can choose how we look on the outside. The kitten has the same fur every day. We change our clothes and change our appearance sever times each day.

Many times, people can tell where we're going or where we've been by what we wear. by our person can be aftered through clothes, people can tell if we're going to church, to class, to sleep, to exercise or downtown to party.

What we choose to wear reflects our activities, our personalities, our preferences and our tastes. Our clothes also can reflect our

all the Madonna-wanna-bes of the past? How did you know they liked her music? Their appearances gave it away. Teen-age girls in church youth groups wear their hair long and wear black hats to look like Amy Grant. People who like the Grateful Dead often wear tie-dyed clothes with dancing bears and skeletons.

People dress for success. They dress to impress. And if they tried, they could probably dress to de- life, as it is for spiritual life. Go

Americans are so obsessed with appearances that the quest for fitness has opened doors to protect us. businesses everywhere. I don't believe it's all for the purpose of armor of God, that you may be being healthier. Most people diet able to stand firm against the and exercise to look better or, at the very least, look more like everyone else.

The outward appearance of a cosmetic surgery, haircuts, dieting and exercise or choice of clothing. These things are easy to alter.

The clothing of the heart is not as easy to change. We can never take it off. We must wear it day and night. We can't use soap to

musical preferences. Remember clean it when it gets soiled by pa or tears. We can only try to prote it from unnecessary bruises an

> The Bible says an excellent wife is clothed in strength and dignity. I doubt that refers to new brand of dungarees. Streng dignity, shame, honor and sa tion are all cioinings mentioned the Bible that have nothing to with fabric or thread.

The heart is vital for physic told us we should protect of selves by wearing a covering of our bodies as well as our hearts

He said to, "Put on the fu schemes of the devil. For our struggle is not against flesh and blood, but against the ruler against the powers, against th world forces of this darknes against the spiritual forces of wickedness in the heavenly places." (Ephesians 6:11-12)

The full armor given to protect hearts from harm is not made of metal or fabric but of faith. The See Clothes, page 5

Under the Boards

Gonzo journalist found not guilty

By Tim E. Hampton **Editorial Columnist**

Maybe our judicial system isn't as screwed up as we make it out to be.

After all, Dr. Hunter S. Thompson - originator of a genre of fiction labeled Gonzo journalism of which arose Fear & Loathing in Las Vegas fame - was recently found not guilty on a crazed array of bull charges linked to a one-night ordeal which allegedly unravelled like one of the salacious and bibu-

lous plots of his novels. The charges - assault, sexual assault, illegally possession of drugs, drug paraphenalia and four sticks of dynamite - were thrown out of court by Colorado state judge Charles Buss, who said it was "unable to establish guilt beyond a reasonable doubt," as chronicalized in a recent issue of

The Rolling Stone. As a judge in his wanted to meet him. sable cloak, he might have been expected to say something of that cationing in nearby Aspen, Colonature, but within the confines of rado with her eye doctor husband, sensibilities, ole judge Buss must have been a bit trickled after listening to the District Attorney's the Grammys on television and evidence.

It was if Thompson actually became the dazed and confused persona found in his narratives. All the elements were present in his real-life chapter: illicit drug use, a propensity to stumble upon a strange conflict and the appearance of weird characters.

The episode began on February 21 when a former pornography film actress, former porno hot tub. According to Palmerproducer, former Playboy "Girl of the Big Ten," but now present wife of a Wisconsin ophtalmologist -Gail Palmer-Slater - called Thompson, said she was a big fan of the writer of gonzo fame and

Palmer-Slater, who was vawas invited to Owl Farm, Thompson's rural home, to watch imbibe alcohol. From there, things get hazy. She alleges there was a plate of a white granule substance passed around the room consisting of Thompson's female assistant and two male friends.

After inhibitions had been shead, the guest then inquired about Thompson's sexual preference. Upon hearing the question, the host so graciously led her to a Slater, she declined to join the writer in the hot tub which made Thompson irate. He allegedly gave one of her breasts a harsh twist and pushed the former porno See Gonzo, page 5

faith that God is who He said He is the covering which is an armor stronger than any metal known to man.

We are told to gird ourselves with truth, and our breastplate which covers and protects our hearts is made of righteousness. Righteousness is not a state of self exaltation placing a person above reproach or correction. The word simply indicates a state of right standing with the Creator.

For shoes, we are instructed to wear peace. It is hard to walk over people for our own gain when we wear shoes of peace. It's also hard to raise our fists to fight when grounded in peace.

Our shield is made of the strongest substance possible, faith,

to extinguish flaming arrows, insults, threats or anything else that would weaken us. A shield is mobile and can be used to protect any side of us that is being attacked. It is held in the hand but a shiled is also a part of armor that can be dropped. For this reason, a firm grasp on our faith, or what we believe, is important.

The helmet is of salvation and our only offensive weapon, the sword of the Spirit, is the word of

What good is all this armor? and be the second toward a faith-in-logic perspective may never agree with me or and be and be toward. There is no proof that it exists. The people won. I won argue this point, or lean duest toward a faith-in-logic perspective may never agree with me or second toward.

even understand my point of view.

Nevertheless, my point of view is ideal and unchanging. It comes completely from the Bible and it always will. I didn't originate this view, I only support it.

According to the Bible, having a strong heart capable for battle is dependent on prayer, prayer, faith in the word of God, and more prayer.

We are at war, often with our selfishness and pride, sometimes with decisions that weigh good and bad and sometimes with other people. All wars are either lost or won.

I would like to close with two questions. First: Is your heart well dressed and armed for battle? And second: Who is winning?

Gonzo

queen.

An complaint to the police ensued. The Aspencops, who were denied a search warrant by the Aspen-based judge, traveled 40 miles to find a propitiating judge. Upon the search of Owl Farm, .09 gram of cocaine (not enough to numbones' tongue), three Valiumshaped pills, 39 hits of LSD, a plastic casing of a Bic-pen with coke residue, seven ounces of marijuana and four sticks of dynamite were found. Thompson, who knew of the possession of the drugs, was oblivious to the findings of the TNT.

Dynamite aside, the list of illicit substances was relatively obsure compared to the stockpile

· The ·

stored in the trunk of a rented Cadillac convertible enumerated in Fear & Loathing. Nevertheless, the District Attorney pursued the

During a May 22 court hearing, Thompson's lawyer found a flaw in Palmer-Slater testimony. On the stand, she contradicted earlier statements that she saw Thompson snort the white substances spread on the plate. In the hearing, she said she couldn't actually remember witnessing Thompson snorting.

Adding a strange twist to the already almost incredulous tale, Mrs. Palmer-Slater of once lusty hard-core scenes told the Rolling brass hookah - pu Franciso during 1960's experience police possession.

Continued from page 5

Stone she was glad Thompson beat the rap.

It is ironic that Thompson - a writer who admonished readers of the growth of the Orwellean society, who slammed Nixon and the Oakland Raider in the same breath while chugging Crown Royal and smoking hash in *The Great Shark Hunt* - was free of blame in this over exaggerated and over emotionalized War On Drugs.

There was one sad loss which followed the Wild Grammy Night at the Owl Farm, Thompson's brass hookah - purchased in San Franciso during the height of 1960's experience - remains in police possession.

STATE AND NATION

Decline expected in college applications for next year

Carolina's colleges and universities are choosing next year's students from a smaller applicant pool, but school officials say endespite a substantial drop in other

Officials at the state's two largest universities — N.C. State University and the University of North Carolina at Chapel Hill said that despite a drop in their applicant pools they expected this year's freshman class to remain about the same size as last year's.

At NCSU, the 1989 class comprised about 3,400 students, said George Dixon, the school's director of admissions. The shrinkage in this year's applicant pool means N.C. State has placed fewer students on its waiting list.

At NCSU, 500 applicants were placed on a waiting list last year, but only 350 are on the list this year.

At UNC-Chapel Hill, the applicant pool declined by 10 percent, or about 1,600 applicants, said Barbara Polk, associate director of undergraduate admissions. She said that even with the

RALEIGH (AP) - North decline, the school expects this year's freshman class to be about the same size as last year's, which was about 3,200 students.

Ms. Polk said the smaller rollment should remain stable applicant pool had not affected the quality of this year's fresh-

> The decrease in the collegeapplicant pool is the result of declining birth rates since the baby boom. Colleges and universities have countered the decline in recent years by enrolling non-traditional students. But many colleges are finding the drop too steep to

Evan Sun, a statistician at the state Department of Public Instruction, said that based on birth rates, it would be five or six years before the number of college-age students

One reason the quality of next year's freshmen should be high, school officials say, is the higher admission standards taking effect this fall for all 16 schools in the UNC system.

In contrast to UNC-CH and NCSU, the number of applications has increased or remained stable at three of the state's predomi-

nantly black institutions.

The higher admission standards were expected to hit the state's predominantly black schools the hardest, but only N.C. Central University said it expects the standards to limit the number of freshmen it enrolled this year.

At NCCU the number of applicants increased, but because of the standards this fall's class will be smaller, said Nancy Rowland, the university's admissions director. Last year's freshman class numbered 990 students, but this year Ms. Rowland said she expects the class to be between 850 and 900 students.

Another factor in the expected decline is the school's new emphasis on reducing its percentage of out-of-state students, she said.

But Ms. Rowland said she thought the decline in enrollment would be balanced in part by a better retention rate because of students' being more qualified.

Despite earlier fears, officials at two predominantly black schools — Fayetteville State University and Winston-Salem State University — said this week that the new standards would not cause new problems.

SBI searches air terminals, buses

Agents retreat from traditional patrol

reau of Investigation look for drugs these days they are more likely to focus on bus and air terminals than the backwaters of the coast or a clandestine airstrip.

In recent years, agents have concentrated their drug interdiction efforts on bus and air termithose efforts is in question. nals, retreating from the traditional patrol of the state's 3,375 miles of beaches, inlets and coastal rivers that form a nook-and-cranny shoreline long known as a haven for smugglers.

It's been four years since the bureau cracked a major coastal smuggling operation — the kind of cases that occasionally yielded huge hauls of marijuana and other

'They're not smuggling by the water as much," says David R. Marshall, the supervisor for the SBI's Coastal District. "Cocaine is the drug of choice. They can do it by air, land or sea. I'm sure some is getting by us, but I don't think as much is coming in."

As the bureau looks for drugs stashed by the new breed of tran-

sient smugglers, it also is involved in another relatively new strategy: street-level undercover campaigns coordinated with local lawenforcement agencies across the

But the effectiveness of some of the most highly publicized of

In Chadbourn, a small Columbus County town, 97 SBI agents part of a 113-agent force — swept down last year in a Friday-night raid heralded as the largest in the state's history. But to date, the 14 arrests have produced only five convictions.

'Chadbourn was political grandstanding at its worst," says lawyer Joseph B. Cheshire V of Raleigh. "Purely pabulum for the public. They don't need to do that.'

This transformation of the SBI's drug efforts, several years in the making, comes at a time when Lt. Gov. James C. Gardner, a Republican, has proposed establishing a new state drug agency. The proposed agency would be controlled by Democratic Attorney General Lacy H. Thornburg, as is cies.

the SBI — but would be separate from the SBI.

The Gardner plan represents a threat to the bureau, because drugs are big business for the SBI, The News and Observer reported Monday.

Over the years, as the needs of local law-enforcement agencies have changed, the SBI has shifted more and more of its resources to drug investigations. In 1978, drug cases represented 38 percent of the SBI's work. By 1989, the figure had soared to 63 percent, and the bureau now employs 68 drug agents out of its 174-agent force.

'As the prevalence of drug use has increased, the importance of the SBI has increased," says Raleigh Police Chief Frederick K. Heineman. "There is a direct relationship between the growth in drugs and our use of the SBI."

Thornburg says taking drug enforcement away from the SBI would be "a serious mistake"

because it would set up, in effect, competing law-enforcement agen-Volunteerism

of students ıncreases

RALEIGH (AP) — North Carolina college students are still out to get a job, but increasingly, they want to change the world too, say school officials, noting a rise in student volunteerism.

"The last couple of years, students seem more aware," said Caroline Craig, who coordinates service programs at Davidson College. "They come to Davidson asking if there's a recycling center, if there's homeless shelter, if

there's a literacy program." Students at the liberal arts college near Charlotte have helped build homes for the needy and operate a campuswide recycling program. More than 100 have trained to serve as tutors for gradeschool and high school students.

James F. Keith Jr., who directs Guilford College's student internships and service programs, says the students arriving on campus appear to be more socially conscious than their peers a few years

More than half of the Greensboro school's 1,700 students donate their energies to philanthropic causes ranging from tutoring prisoners and refugees to working in retirement homes and housing projects.

"I see things over the past five years as having radically changed," Keith told The News and Observer of Raleigh in an interview published Sunday. "The (career) aspirations of students are every bit as strong, but they're bringing with them strong concerns for the environment, for human justice, for peace — much more than perhaps a lot of students five years ago."

Orion pictures approve movie sequel to 'Bull Durham'

DURHAM, N.C. (AP) — Orion Pictures has approved a movie sequel to "Bull Durham," the smash summer hit of 1988 which grossed more than \$50 million. Filming in Durham could start by the fall of 1991.

Producer Thom Mount confirmed those plans from his Burbank, Calif., office.

We intend to make a sequel to "Bull Durham," Mount told The iDurham Morning Herald in an interview published Saturday. We've been working with Orion for about four or five months, but we just recently got the approval to make the film."

Mount estimated that about two-thirds of the sequel will be filmed in Durham.

a former minor-league ballplayer, is currently working on the sequel

screenplay. Shelton's original screenplay received an Academy Award nomination.

'I can't tell you the plot, but I can tell you it will be set at least partially in Durham," Mount said. "It involves the same three characters at latter stages in their lives."

The original starred Kevin Costner, Susan Sarandon and Tim Robbins. All three have been approached about starring in the sequel, Mount said.

The original was filmed primarily in Durham during the fall of 1987. Shooting lasted about three months and involved some 2,500 "extras," most of whom filled the stands of Durham Athletic

Miles Wolff, owner of the Writer-director Ron Shelton, Durham Bulls, said accomodating a film crew for the first movie wasn't easy.

"It was a headache," Wolff said. "We told them we didn't want them to come back, but it was so successful. ..."

Wolff said he would have no problem welcoming Mount back to Durham. Wolff said that with his ball club occupying the stadium April through August, the fall of 1991 would be the most likely time to start filming.

Orion Pictures spent a reported \$8.5 million to film "Bull Durham" and another \$10-11 million promoting it.

Mount, 41, is a former Durham resident who now runs his own production company, Liberty

Other Mount productions include "Tequila Sunrise," "The Deer Hunter" and "Animal House."

Statewide manhunt for convicted murderer continues

RALEIGH (AP) — Officials are pressing their search for Roger Lee McQueen, a convicted murderer who escaped from a job assignment last week, by issuing a nationwide alert and the most recent photograph available.

McQueen, 51, was serving two life sentences for two murders at the time of his escape. It is because of his record that Department of Correction officials say he should be considered dangerous.

'We're following every lead, regardless of where it's at," said lim Byrum, the program director for the Division of Prisons.

"He traveled extensively on his last escape. The South, the West, up in the Northeast. The only area we don't have any clues on are Oregon and Washington State. Everything else, we're covering, and we're also looking at those two states."

McQueen escaped from a Missouri prison, where he was serving a sentence for murder. He was apprehended in Pennsylvania and returned to North Carolina and tried for the two murders in Fayetteville. He was convicted for those murders in 1977.

Department of Correction

spokesman Bill Poston said McQueen was on a work detail from the Greene Correctional Center, working at the state Highway Patrol office in Greenville. Officials said McQueen was one of the better adjusted prisoners and had just one infraction since being imprisoned and had earned a work detail position.

'We have not drawn any conclusions as to how he made his escape. One moment he was there, the next moment he was not there," Byrum said. "We don't know if he had a ride, hitchiked or walked off. Nothing has developed on

that." Spotted fever epidemic said to be par for the course

RALEIGH (AP) - North Carolina this hot season has been home to an estimated one in four of the nation's cases of Rocky Mountain spotted fever, but health officials say that is par for the course.

As of June 1, North Carolina had 14 cases of the sometimes deadly disease, nearly a quarter of the cases reported nationwide by the Centers for Disease Control in Atlanta, said Dr. Janet Fischer, a professor of medicine who specializes in tick-borne illnesses at the University of North Carolina at Chapel Hill.

North Carolina is believed to be a hotbed of Rocky Mountain spotted fever because of a warm climate that spurs outdoor activity and plentiful underbrush in which ticks thrive. But the villain in the disease is not the tick. It is a bacteria called Rickettsia rickettsii.

The bacteria is carried by about 3 percent of ticks and is transferred when a tick is attached

to its victim while feeding. Children, older people and black men are particularly at risk, Ms. Fischer said in a recent inter-

While 60 percent of cases are

in children over 1 year old, "the mortality is higher in people in the mature years of life," she said. "But there need be no mortality except in black males if the disease is treated early."

Black males appear to have a higher risk of death because of an inherited deficiency of a certain enzyme, Ms. Fischer said.

Antibiotics usually prevent the spread of the disease until the body's immune system can fight it, Ms. Fischer said. But since only 60 percent of victims realize they have received a tick bite, getting treatment early can be difficult.

After the bite, the initial lesion disappears and symptoms may not begin for a week, Ms. Fischer said. The initial symptoms are similar to those from the flu, with general muscle aches, headache and fever.

Meanwhile, the bacteria has entered cells and begun multiplying. When they begin damaging capillaries, usually in the first four to six days, the characteristic rash breaks out below the skin, Ms. Fischer said. The rash begins in the extremities, where the cooler body temperature is most hospitable to rickettsia, then spreads

throughout the body.

However, 10 percent of victims never have a rash and another 10 percent may not notice it because it lasts only a short time. The lesions that cause the rash

don't stop there, Ms. Fischer said. The lesions are also on the internal organs, the lungs, brain,

kidney, liver," she said. Through an unknown mechanism, the bacteria is able to leave infected cells and enter new ones, Ms. Fischer said. Antibiotics, which cannot enter the cells, fight the disease by stopping the proc-

ess of spreading.

HEATURES

Pacemaker helps man live normally

Sharpshooter wins competition

ECU News Bureau

In a fashion somewhat reminiscent of Clint Eastwood, R.L. "Jack" Parks is blowing away myths that people with heart pacemakers are best confined to front-porch rocking chairs.

Parks, a 71-years-young resident of the coast near Cape Carteret, N.C., recently earned age group first-team All-America status from the 20,000-member National Skeet Shooting Association (NSSA). To those of you who aren't "shooters," that simply means that Parks and three other persons aged 70 and over are downright handy when it comes to knocking little clay pigeons out of the sky with a shotgun. So handy, in fact, that last year Parks also equalled a world record for a .410 caliber shotgun by hitting a mind-blowing 99 out of 100 targets during NSSA competition.

He did all that despite the fact that he has a cardiac pacemaker battery implanted in his upper left chest. Or, it could be argued, he did all that because of the pacemaker.

A burly retired Marine who survived a bout with cancer, Parks isn't the kind to go scurrying off to a doctor for every little bump and bruise. That's why he wasn't overly concerned several years ago when he began having fainting spells. Nothing too serious—he'd just "blip out" for an instant, usually while resting. Then at a match in Rocky Mount two years ago, he was about to shoot when it happened again. Concerned that he might endanger others, he decided to act.

Parks was referred to a cardiologist at the ECU School of Medicine, who diagnosed a slow heartbeat. More precisely, he had an electrical short in the circuitry that produces a regular heartbeat. When that happens, either as the result of disease or a buildup of calcium deposits, the natural electrical impulse must be supplied artificially by a pacemaker.

About the size of woman's compact, the pacemaker battery is implanted just under the skin on one side of the upper chest. One or more wires carrying an electrical charge connect the battery to the heart. The device has become almost commonplace; 200 are implanted each year at Pitt County Memorial Hospital in a relatively simple and safe surgical procedure.

Parks admits he was fearful of the changes a pacemaker might bring. But his doctors and nurses convinced him that "it wouldn't interfere with my life, except that it would make a better lifestyle for me." His only request was that the pacemaker be implanted in his left side "so I can still shoot" with the shotgun stock against his right shoulder.

Sunshine paradise

Nat Taylor (left), Maria Milani (center) and Michelle McKnight avoid air conditioning and enjoy the heat of the day by taking advantage of the summer sun. (Photo by J.D. Whitmire — ECU Photo Lab)

Air conditioners make hot months more tolerable

(AP) — Air conditioners are a real blessing during the hot, humid days of summer. They not only cool, but also remove moisture, filter dirt and dust and replace stale air with fresh.

so there's a price for this comfort. Here are some tips to ensure costefficient operation of your air conditioner. How Air Conditioners Work

An air conditioner works on the principle that a liquid (a refrigerant) absorbs heat (cools the room) when it expands into a gas, then gives off heat (to the outdoors) when it is again compressed into a liquid.

It circulates the refrigerant through two sets of coils in one continuous loop. The evaporator coil cools the room while the condenser coil gives off heat to the outdoors. Between them is an use large amounts of electricity, two parts from working against each other. Near the barrier — as part of the refrigerant loop — is a compressor which circulates the refrigerant and compresses it. Two fans help transfer the heat from the air to the coils and to the out-

> doors. To Get Your Money's Worth Install the air conditioner as far as possible from exterior doors to prevent drafts and cross-ventilation from warming the cooled

Make sure there are no obstructions, such as chairs or draperies, in front of the unit.

Direct the vents upward so you get cool air at the upper levels of the room. It will drift down created clock faces with numerals To accomplish all this, they insulating barrier that keeps the naturally because cool air is heavier than warm air.

Seal or weatherstrip all gaps around the unit and around exterior doors and windows. Otherwise, the unit will have to work harder to remove heat and humidity. To Maintain in Optimum Condition

Be sure to turn off and unplug the unit before working on it.

Regularly clean the grille with a soft cloth, mild soap and warm See Cool, page 9

Clocks create a new trend

(AP) — If you love modern design but can't afford a status sofa or a work of art, buy a clock.

Novelty clocks for not a lot of money are a phenomenon these days, courtesy of the inexpensive yet accurate quartz movement. The 2-inch-square self-contained movement, about \$2 via mail order, allows a designer to create a unique clock that will run for several years on a single AA bat-

"Everyone knows the clock face and the position of the hands so well that you can take liberties with its design," says Steven Holt of Zebra Design. "So what you see today is a rich series of experiments questioning just how legible the telling of time has to be."

The kit, about \$20, includes a quartz movement in a molded plastic case with three hands, 12 dots as numerals and a paper template to construct a circle on the wall. All mount with adhe-

Some designers; such as Tibor Kalman of M&Co, New York, have that are incorrect or in the wrong place. "They are for that small segment of the public that is ready for confusion, parody and humor," says Kalman.

Another source of inspiration is the verbal metaphor. Emilio Ambasz's Hare and Tortoise Clock consists of a glass-covered circular field on which the hour hand is a plastic tortoise and the minute hand a hare. In a verbal pun, the hanging clock is suspended on a wire clothes hanger.

'Total Recall' matches actor's average roll

body-count space movie with brains!

This comment about "Total Recall" can be taken two ways: First, the plot hinges on brain alteration that permits weary workers a century hence to experience exciting vacations without boarding a jet. Second, the film has been

violence in sequel (AP) — Halfway through pushing a grocery cart of used "RoboCop 2," you find yourself cansis nearly rundown by a speed-

'RoboCop' repeats

Or it is simply the most loathsome zons. example of the genre?

Despite the opaque humor of

"RoboCop 2" offers yet another argument against sequels. The first movie was cannily

directed by Paul Verhoeven with a number of real surprises and no small amount of violence. The new director is Irvin Ker-

script (by Frank Miller and Waylon Green).

The first five minutes are pure hellishness. The Amazon rain forest has been destroyed by a nuclear mishap. The U.S. surgeon general is assassinated while preaching against a new narcotic. A drug treatment center is firebombed. Mobs loot Detroit as the police go on strike. An old lady

wondering: Is this a satire of the ing car. A mugger robs her, then heavy artillery-superhero movies? he is stomped by a pair of Ama-

Time for RoboCop.

He zaps dozens of bad guys, the futuristic TV commercials butheisdismembered by the drug ("Now that we have destroyed kingpins. After staging a comethe ozone layer, use Sunblock back, he faces a graver danger: 5000"), you decide that these Omni Consumer Products has moviemakers are playing it for invented a RoboCop 2 with the aim of destroying RoboCop 1.

More appalling than the relentless butchery is the bad taste. The Detroit mayor explodes in vulgarisms when he is foiled by the evil head of Omni. A "cute" scene shows Little Leaguers looting an electronics store, led by shner, a qualified pro ("The Em-their coach. Six-year-olds spout pire Strikes Back") who seems obscenities. One of the sadistic straitjacketed by an excessive drug leaders is a boy of 12 or 14.

Much of the same cast is back. An accomplished actor, Peter Weller was ideal as the first RoboCop, his gaunt face and otherworldly eyes fitting the role. Here, he struts like a chorus member in "The March of the Wooden Soldiers."

Nancy Allen adds a muchneeded note of humanity as his See RoboCop, page 9

Read Along with Rita Long

Listing priorities simplifies decision making

Dear Rita:

I have a mother that was overprotective when I was growing up and now that I am in college, she still tries to make all my decisions for me. I appreciate her advice but I do think it's about time for me to make my own decisions. How can I tell her in a way that won't be disrespectful? Signed, Respect.

Dear Respect:

Sometimes you have to address situations bluntly. You could say something like this, "I appreciate all the good things you have

some of your good teaching into practice. Even if I make a mistake, learning how to correct it will be good for me." Or you may be more comfortable saying, "I don't mean any harm but as long as I'm depending on you for all my decisions, I will not be able to stand on my own two feet." Whatever you say, try to leave your mom in a positive light.

Dear Rita:

I have a problem of indecisiveness. For instance, if I need a

taught me, but now I want to put blouse, I'll go to the store and see two I really like but can only afford one. At this point, it seems as if I can never make up my mind which one I should get. This indecisiveness has spread to other areas of my life. How can I put a stop to this? Signed, Indecisive.

Dear Indecisive:

Make a list of the things you need most. Set them in an order of priority reflecting your greatest needs. Then make some short-term goals and long-range goals and

do your best to stick with what you set for yourself.

If you think about the things you intend to do before you do them, you can save yourself energy, frustration, and time. After you set goals, ask yourself what is the quickest and most effective way to achieve these goals. If the problem is big enough to call to your attention, it may be robbing you of stamina and a better self image. Making smaller decisions will become easier once you achieve order in handeling your

Campus Voice

What are you doing to beat the summer heat?

Sherard Rogers, 21 Senior, Accounting

Hike to stay cool by undressing and laying in front of a large fan. I also spend as much time as possible in an air-conditioned building, even if it neans being at work."

Ronnie Pope, 25 Junior, Psychology

"I prefer the heat to the cold any day. I'd much rather spend my sunny afternoons out of doors playing basketball with friends."

Michael "Buzz" Jones, 18 Sophomore, Buisness

I'm pretty laid back anyway. I stay cool mostly by enjoying the air-conditioned dorms and hanging out with friends. I also try and spend a lot of ime with my girlfriend."

Matt Hedrick, 18 Freshman, Physics

"I haven't really been staying cool. like hanging out with friends, playing tennis and volleyball. I also head for the beach whenever I get the chance."

Kimberle Gooden, 20 unior, Speech Pathology

I spend a lot of time cooling off in the dorms. Sometimes I go swimming with friends at the pool over at Wedgewood Apartments and enjoy he sunshine.

Music Notes

This summer is going to be the hottest with scorching new releases from Vixen, Stryper, Extreme, Winger, Ratt, Bullet Boys, Anthrax and Guy Mann-Dude. Speaking of new releases, Poison's "Flesh and Blood" LP is due out on July 10. The LP's first video single "Unskinny Bop" had its world premier on MTV last week. Poison will begin a world tour in support of the album on September 1.

Steve Vai's "Passion and Warfare" LP is doing very well for this Whitesnake guitarist. Vai and the rest of the Snakes are touring the country with their successful effort "Slip of the Tongue." At the shows, Vai will perform cuts from his solo LP for all you guitar maniacs!

While we're on the subject of tours, San Francisco-based Faith No More will be concertizing this summer supporting their latest smash album "The Real Thing." This musically diverse and influential act will be coming to The Boathouse in Norfolk, Va., on July 21. You can catch their

hit video single "Epic" on MTV. Diamond David Lee Roth and mega-metalists Megadeth have announced the new guitarists that will be joining them in their respective bands. Jason Becker is the new axeman for Roth, and six-stringer Marty Friedman has joined Dave Mustaine and company. Becker and Friedman are alumni of Cacophony, a band that ripped out some of the fastest and most incredible guitar work to date, before they parted ways to expand their horizons.

This past weekend, newly-formed Fayetteville act Street Lethal made their first club performance at The Carousel in Greensboro when they opened for Last Child. Street Lethal recently had some personnel changes when vocalist Jimmy Walker left the band prior to the weekend shows. Replacing Walker is Sid Starling, a frontman with some smooth and powerful vocal chords. Street Lethal is geared up to play with Last Child at AJ's Lounge in Jackson ville on Thursday. Last Child's extensive road tours have turned this foursome into one of the tighest acts on the metal circuit. Street Lethal is headed in the same direction with tight and talented players, and great originals that keep the audiences rockin'!

Tipper Gor, Greenville's own homeboys from hell, is making its way to The Attic on July 7. Don't miss one of the heaviest thrash bands to invade Eastern North Carolina. On Saturday, there will be a reggae sunsplash concert going on in Atlantic Beach, N.C. For more information call

WZMB at 757-6656. And finally, Still Rain will be playing at The Flaming Mug in Fayetteville on Thursday, Friday and Saturday. Until then, turn up the music and keep rockin'!

Steele teaches fundamentals

By Doug Morris Sports Editor

Students from all over the state have been learning about basketball in Minges Collesium during Mike Steele's Pirate basketball camp. The first week of the annual camp taught children from age six to 12. These children come for the day and go home at night. The second week sees high-school students age 12 and over. Most of these students come with their up some things fundamentally," coaches. Their week is spent in intensive training.

"We start at 7:30 in the morning," said Mike Steele, head coach teams. It really gives them a chance of ECU's basketball team. "We to have a week of intensified baswake them up and coach them ketball." During the week, the until about 10:30 at night, so it's teams compete against each other constant basketball." Steele said that the students are allowed some time to look around. "They've got a chance to swim and to see the campus, but pretty much, it's basketball."

The high-school camp is divided into two leagues, a "pro" plus it gives us a chance to work league, which is comprised of with some of the players and mostly juniors and seniors in high-coaches." school, and a "college" league which is mostly junior varsity or boys who did not come with their the camp in the past. "Not yet," schools. "We've got somewhere around 10 teams in each league," Steele said.

"It's a team camp," Steele vear that we're recruiting." explained. "It gives the coaches a chance to spendall day for a whole larger every year. "The day camp week with their players." Steele has grown from about 30 or 40 said that the camp is also good for kids. We had about 85 or 90 this • the coaches. "It gives the coaches time. It's the same with the team a chance to get to know us, and us camp. We've had about 45 or 50 a chance to know them. They see kids and now we're up to about how we do things. Some things, I

they do the way that they want to do them. I think it's a good experience for them."

Steele said that the camp focuses on basics. "We do all fundamental work at different times. We do some defensive work and some offensive work and then we put them together. We put them in some of our drills and then the kids get to work on them with their coaches."

"We'd like to think they'll pick said Steele, "but it gives them a chance to play five league games against other people and other and the winner receives a trophy.

Steele said the camp does more than just give experience. "It helps in a number of ways," Steele said. "It gives these people a chance to see East Carolina and a chance to meet a lot of people,

players who have gone through Steele stresses, "but we will. We've already seen some sophomores, juniors and freshmen from last

Steele said that the camp is 100. We're real pleased with the think they like, and some things progress we've made."

These "Pro" division champions from Dudley High School celebrate their win with the trophy held high at Mike Steele's Pirate basketball camp. (Photo by Celeste Hoffman — ECU Photo Lab)

Charlotte's footall stadium delayed Officials to shoot for '93

CHARLOTTE (AP) - A Charlotte official said Monday he doesn't believe an NFL football stadium can be completed in time

for the opening of the 1992 season. Loy McKeithen, the former chairman of Charlotte Uptown Development Corp. who is assembling land for the stadium, said the start of construction probably will be delayed a few months for relocation of underground utilities and a business.

But a spokesman for the group seeking the football franchise downplayed the chance of delay

and its significance. "We feel we can work around the bottlenecks," said Mark Richardson of Richardson Sports Group. "If we have to be ready by fall of '92, we can still hit that timetable."

Other options, Richardson said, would be to play the first 1992 games away or in a university stadium.

The stadium, to be built by

Richardson Sports if and when it wins a National Football League franchise, will go in a southwest corner of uptown Charlotte beside I-277 and Mint Street.

Construction is expected to take at least 21 months. So whether it can be finished by September 1992, the earliest possible expansion date, will become clear in coming months.

McKeithen said two key factors are the relocations of W.W. Grainger Inc. and of Southern Bell lines buried in the area.

Both moves are expected to be finished in December. Construction of the stadium for 1992 was originally to start in October.

The delay won't matter if the NFL decides to expand in 1993. The league's expansion committee has met once but said nothing.

"At this time, the league has the flexibility to go either '92 or '93," said Richardson. "The slower the expansion committee moves, the more it looks like '93."

Ga. Tech considers move to SEC

ATLANTA (AP) — Georgia Tech, which resigned from the Southeastern Conference in 1964, has shown an interest in getting back in.

Athletics director Homer Rice said he would listen if approached by the SEC to leave the Atlantic Coast Conference and rejoin the SEC, although he said he has not been approached.

Football coach Bobby Ross said he feels the same, adding that most Southern prospects recruited by Tech have "an SEC mentality."

But basketball coach Bobby

Cremins was less enthused. "I'm for the ACC," he said. "I'm an ACC man all the way. That's one of the reasons I came to Georgia Tech. I really think Tech is embedded in the ACC, and I

believe we're there to stay." The Yellow Jackets won their second ACC basketball championship last season and went to the

The SEC has not identified its target schools, but Southwest Conference member Arkansas has

acted on the SEC's mood to expand its roster from 10 schools and agreed to hold formal conversations with league officials.

"I think all of our people are in line with the ACC, but if something came along, you'd have to listen," Rice said. "It's not a matter of greed, but a matter of survival in the television market."

After Tech resigned from the SEC, football and basketball attendance plummeted and recruiting suffered. In 1976 then athletics See SEC page 12

Clemson football player faces charges of assault and battery

CLEMSON, S.C. (AP) — July 11, Link said. Clemson defensive tackle Chester nary action pending the outcome of charges stemming from an early morning fight outside a nightclub,

McGlockton, a 6-foot-5, 296pound sophomore from Whiteville, N.C., was charged Sunday by Clemson city police with three counts of simple assault and battery and one count of public disorderly conduct, Police Chief Johnson Link said in a news release Monday.

McGlockton, 20, was released

McGlockton could receive a McGlockton could face disciplifine of \$200 or up to 30 days in jail field said. for each count, Link said.

Hatfield, who spoke for 90 minutes with McGlockton on Monday, said the player should "tell the truth," get a lawyer and prepare a defense. McGlockton, like all football players who live in the athletic dormitory, has an unlisted telephone number and could not be reached for comment

Hatfield said he planned to investigate the incident himself. Any disciplinary action, if Haton \$1,800 personal recognizance field believed appropriate, proba-

resolved. 'There is something to be learned from all of this," Hat-

McGlockton was arrested after police received an anonymous telephone call about 2 a.m. Sunday about a fight at the entrance of Village Green Apartments adjacent to a popular Clemson lounge called "The Zoo," Link said.

"As a result of information received from witnesses and victims," police charged McGlockton, Link said.

"The football staff regrets the recent incident involving Chester McGlockton," said Dick Ellis, assistant athletic director for foot-

bond. A hearing has been set for bly would come after the case is See Clemson page 12 Ireland, Italy to face each other in World Cup action

Both continued their streaks can attack.". Monday in entirely different ways.

The host Italians, seeking an unprecedented fourth World Cup, beat Uruguay 2-0 on goals by Salvatore Schillaci and Aldo Serena. Ireland, in its first appearance at the world soccer championships, survived 120 minutes of scoreless play and won a penalty kick shootout over Romania 5-4.

The teams meet in the quarterfinals in Rome on Saturday.

"This is the World Cup and every game is hard, every team is hard," Schillaci said of the matchup with the Irish.

It will be hard for anyone to beat Italy's defense, which has an unblemished record so far. The Italians have beaten Austria and the United States 1-0, Czechoslovakia and Uruguay 2-0.

"I think our midfield is our real source of strength," said Luigi

ROME (AP) — Italy doesn't De Agostini. "We have mobile allow goals. Ireland doesn't lose players and never give other teams a fixed point of reference that they

> Italian coach Azeglio Vicini almost seems to take the impenetrable defense in stride.

"It is something we depend on," he said. "We always attacked and created quite a few plays. In the second half, we were able to break the tie. It was an important step against a very difficult oppo-

The next opponent not only will be difficult but inspired. It has been 19 months since the Irish were beaten and, even though they have not won in regulation time here, nobody has defeated them, either.

"Just think," Coach Jack Charlton said, "we are through to the quarter finals in our first World Cup. I promised them at the start that we would take them to Rome and we've made it."

Barely. The heroes this time were the goalie and the gunner.

Goalkeeper Paddy Bonner guessed right, dived right and stopped the fifth penalty kick in the shootout, by Daniel Timofte.

"I read the way he walked up to the ball," Bonner said.

David O'Leary, known as "Gunner" with Arsenal of the English first division, then walked up to the ball and put it into the right corner of the net for the vic-

"To walk on and score the winner, it was a dream," O'Leary said. "The lads said: Take the fifth one.' So I did."

"I left it completely to them," Charlton said. "There were plenty of willing takers. David O'Leary has had to wait a long time to get on to the team, but he accepted without hesitation the responsibility of scoring the final goal. He did Ireland proud."

When O'Leary scored, the players surged onto the field and mobbed him, while nearly 20,000 See World Cup page 12

up-and-comer Andrew Maynard Sunday with a seventh-round knockout at Atlantic City. Czyz (36-5, 25 KOs) floored Maynard with a right hand. Maynard, his left eye swollen shut, appeared able to continue but let referee Frank Cappuccino count him out. Two judges had the fight even at that point; the other had Czyz comfortably ahead.

Andretti wins Indy race in Portland

Michael Andretti held off a challenge from his father, Mario, to win just 19 games. the Budweiser-G.I. Joe's 200 Indy-car race Sunday at Portland, Ore. Andretti finished 3.92 seconds ahead of his father for his second victory vowed to take the best player in two weeks. His average speed of 110.673 mph is a track record, available — regardless of need. beating the 103.984 by Emerson Fittipaldi last year.

Spinks announces another comeback

Former world heavyweight boxing champion Leon Spinks said he will launch a comeback in September - by fighting a kick-boxer in South Korea. Afterward, he will return to the USA for the real thing. His last comeback ended in 1988 with a 1-8-1 record and 33-second loss to lastsecond substitute opponent Tony Morrison. Spinks, 36, is refereeing concurred. pro wrestling matches.

Giants may rent land for new stadium

The Santa Clara, Calif., City Council will discuss Tuesday a proposal by city manager Jennifer Sparacino that would force baseball's San Francisco Giants to pay Santa Clara rent if the team builds a stadium on city land. The team wants to use 120 acres of municipal property rent-free - to build a 45,000-seat stadium. Sparacino has proposed a \$5.4 million annual rent.

Fastest time of the year set in Minnesota

The Santa Monica Track Club 4x100 relay of Mark Witherspoon, fices. Leroy Burrell, Floyd Heard and Carl Lewis had the fastest time in the world this year, 38.56, in Saturday's Sika Bram International Track & dict 6-foot-9 Syracuse forward Field Meet at Blaine, Minn. The mark came in a rerun, after Santa | DerrickColeman will go first when Monica and Arizona each dropped batons in the first race, won by the the New Jersey Nets pick. Florida Clippers (39.26).

Secret wins cross-country bicycle race

Bicyclist Michael Secret finished the "Race Across America" in a up and his stock has gone down in record seven days, 23 hours and 16 minutes. Secret, 37, of Scottsdale, Ariz., rode out of Huntington Beach, Calif., June 16. The 2,816-mile trip ended Sunday at Atlantic City.

Bullets, Kings, Jazz make three-way trade

In a three-way deal with the Washington Bullets and Secramento Kings, the Utah Jazz got Washington's Jeff Malone. The Bullets sent Malone and a 1991 second-round pick to the Kings for 6-10 center Pervis Ellison. The Kings then dealt Malone and a second-round pick in Wednesday's draft to the Jazz for guard Bobby Hansen, center Eric Leckner and Utah's first- and second-round picks Wednesday.

Players Association files antitrust suit Robinson.

The NFL Players Association, seeking to protect its growing licensing business, has filed an antitrust suit against the National Football League, the NFL Management Council, and NFL Properties. THE NFLPA is seeking \$40 million in damages. They charge NFL properties with illegally trying to sign star players to licensing agreements.

NCAA investigates UTEP basketball

The NCAA is investigating recruiting practices at Texas-El Paso involving a star high school boys basketball player who was brought into UTEP's program without a diploma. In his senior year at Los Angeles Crenshaw High, John Staggers had so many unexcused absences that he failed to graduate. Staggers said UTEP coaches, in 1988, arranged free housing, meals and transportation for him.

Johnson wins \$50,000 in dunk contest

Joey Johnson, brother of Boston Celtics guard Dennis Johnson, won the vertical dunk contest in Monday's One-on-One Collegiate Challenge at the Convention Center in Atlantic City. The 6-4 Johnson dunked on a basket that was raised to 11 feet, 7 inches to win the \$50,000 first prize.

Leonard-Hearns fight may be delayed

A proposed third Sugar Ray Leonard-Thomas Hearns fight tentatively set for November is bogged down in negotiations because Leonard insists Hearns weigh no more than 160 pounds. Leonard won their first meeting in 1980; the rivals fought to a controversial draw last

Tjela barred from running in marathon beauty in their efforts.

Hornets' pick to Czyz KO's Maynard in seventh round Bobby Czyz, the one-time light heavyweight champion defeated be based on talent

Charlotte Hornets' No. 5 pick in the upcoming NBA draft will Salle. depend on which player will help them improve on a disappointing second season in which they won

The Hornets management has

"We'll be taking a guard or a small forward," said Allen Bristow, vice president of basketball Hornets mix. operations. "We won 19 games last year. That's not a delicate mix. We're going to raise our talent level with this year's draft."

Hornets coach Gene Littles

"We need a player who will make us more competitive, who'll help us win a few more games," he said.

Charlotte played it coy Monday, giving few hints about the player they hope to select.

"Did I give it away? Can you read between the lines," Bristow joked after discussing some of the college stars in Wednesday's draft with reporters at the Hornets' of-

Most basketball experts pre-

Until recently, Georgia Tech swingman Dennis Scott was touted as the No. 2 pick. But concerns about his weight have come some circles.

Should Scott be around when the Hornets pick, there's a good chance he'll be their pick.

"He's by far the best offensive talent in the draft," Bristow said. For the Hornets, there's an obvious need that likely won't be filled by this draft — center.

So the attention turns primarily to a strong slate of guards, including Gary Payton, Kendall Gill, Chris Jackson and Rumeal

"This isn't a marquee draft," said Littles.

Bristow spent a lot of time Monday talking about Gill, a 6foot-5 guard out of Illinois, and 6foot-8 LaSalle forward Lionel

"A guy like Kendall Gill will find his minutes," Bristow said. "He's that kind of competitor."

As for Simmons, the Hornets official said: "I like his toughness. He can put the ball on the floor and he's a good shooter. He's also an unselfish player and his consis-

Winners need to fight to win at Wimbledon

WIMBLEDON, England (AP) Ivan Lendl won ugly. Boris Becker won dirty.

The top two seeds survived surprisingly tough challenges in Monday's first round at Wimbledon. And they weren't particularly concerned about the lack of

Lendl, the top seed, lost four of the opening five games against 22-year-old Christian Miniussi, an Argentine ranked 116th in the world. Though he recovered to win 3-6, 6-4, 6-3, 6-4, he seemed to struggle at times with the low bounce of the ball off the carefully manicured grass courts.

"I just had a terrible time with the timing," said Lendl, beginning his annual quest for the only major title that has eluded him. "Every court plays differently and I just couldn't get any rhythm on the return of serve."

Lendl skipped the clay-court season and has concentrated on grass for the past few months to prepare himself for Wimbledon. But he seemed to be suffering from his traditional aversion to grass in the opening set.

"I was a bit nervous at first," he said. "I was not feeling comfortable with the low bounces I was getting. But I got used to it a little bit and I hit some good re-

CHARLOTTE (AP) — The tency is superb. He's done the same things for four years at La-

"Perhaps he is the safest pick in the draft. He doesn't do anythingspectacular He's not super quick. He's like a decathlon ath-

Both Littles and Bristow said Jackson, who averaged 29 points a game in his two seasons at LSU, would probably not fit into the

"He'll be a big draw at the gate and he's going to sell tickets," Bristow said. "We don't need to sell tickets."

Jackson is one of five point guards who figure to go high in the draft.

Besides Jackson and Gill, other potential picks at that position include Oregon State's Payton, Michigan's Robinson and Travis Mays out of Texas.

Bristow listed his top three point guards in Wednesday's draft as Payton, Jackson and Robinson.

Hornets officials were tightlipped about possible secondround selections, but said there may be some good talent left when they pick 39th.

"This draft is as deep as any I've been associated with," said Bristow. "Alot of players are going to stick with their teams."

The big question mark is Scott, who tore up the Atlantic Coast Conference after losing 30 pounds. Some observers say he's put a lot of weight back on during the off-

"The fact that he gained weight doesn't bother me but it should bother Dennis Scott," said Bristow, who added that the Hornets were unable to bring the 6foot-8 Georgia Tech star in for an interview.

"He's the one guy we can't find," he said.

up-and-comer Andrew Maynard Sunday with a seventh-round knockout at Atlantic City. Czyz (36-5, 25 KOs) floored Maynard with a right hand. Maynard, his left eye swollen shut, appeared able to continue but let referee Frank Cappuccino count him out. Two judges had the fight even at that point; the other had Czyz comfortably ahead.

Andretti wins Indy race in Portland

Michael Andretti held off a challenge from his father, Mario, to win just 19 games. the Budweiser-G.I. Joe's 200 Indy-car race Sunday at Portland, Ore. Andretti finished 3.92 seconds ahead of his father for his second victory vowed to take the best player in two weeks. His average speed of 110.673 mph is a track record, available -- regardless of need. beating the 103.984 by Emerson Fittipaldi last year.

Spinks announces another comeback

Former world heavyweight boxing champion Leon Spinks said he will launch a comeback in September - by fighting a kick-boxer in South Korea. Afterward, he will return to the USA for the real thing. His last comeback ended in 1988 with a 1-8-1 record and 33-second loss to lastsecond substitute opponent Tony Morrison. Spinks, 36, is refereeing concurred. pro wrestling matches.

Giants may rent land for new stadium

The Santa Clara, Calif., City Council will discuss Tuesday a proposal by city manager Jennifer Sparacino that would force baseball's San Francisco Giants to pay Santa Clara rent if the team builds a stadium on city land. The team wants to use 120 acres of municipal property rent-free - to build a 45,000-seat stadium. Sparacino has proposed a \$5.4 million annual rent.

Fastest time of the year set in Minnesota

The Santa Monica Track Club 4x100 relay of Mark Witherspoon, fices. Leroy Burrell, Floyd Heard and Carl Lewis had the fastest time in the world this year, 38.56, in Saturday's Sika Bram International Track & Field Meet at Blaine, Minn. The mark came in a rerun, after Santa Monica and Arizona each dropped batons in the first race, won by the the New Jersey Nets pick. Florida Clippers (39.26).

Secret wins cross-country bicycle race

Bicyclist Michael Secret finished the "Race Across America" in a up and his stock has gone down in record seven days, 23 hours and 16 minutes. Secret, 37, of Scottsdale, some circles. Ariz., rode out of Huntington Beach, Calif., June 16. The 2,816-mile trip ended Sunday at Atlantic City.

Bullets, Kings, Jazz make three-way trade

In a three-way deal with the Washington Bullets and Secramento Kings, the Utah Jazz got Washington's Jeff Malone. The Bullets sent Malone and a 1991 second-round pick to the Kings for 6-10 center Pervis Ellison. The Kings then dealt Malone and a second-round pick in Wednesday's draft to the Jazz for guard Bobby Hansen, center Eric Leckner and Utah's first- and second-round picks Wednesday.

Players Association files antitrust suit Robinson.

The NFL Players Association, seeking to protect its growing licensing business, has filed an antitrust suit against the National Football League, the NFL Management Council, and NFL Properties. THE NFLPA is seeking \$40 million in damages. They charge NFL properties with illegally trying to sign star players to licensing agreements.

NCAA investigates UTEP basketball Simmons.

The NCAA is investigating recruiting practices at Texas-El Paso involving a star high school boys basketball player who was brought into UTEP's program without a diploma. In his senior year at Los Angeles Crenshaw High, John Staggers had so many unexcused absences that he failed to graduate. Staggers said UTEP coaches, in 1988, arranged free housing, meals and transportation for him.

Johnson wins \$50,000 in dunk contest

Joey Johnson, brother of Boston Celtics guard Dennis Johnson, won the vertical dunk contest in Monday's One-on-One Collegiate Challenge at the Convention Center in Atlantic City. The 6-4 Johnson to fight to win dunked on a basket that was raised to 11 feet, 7 inches to win the \$50,000 first prize.

Leonard-Hearns fight may be delayed

A proposed third Sugar Ray Leonard-Thomas Hearns fight tentatively set for November is bogged down in negotiations because Leonard insists Hearns weigh no more than 160 pounds. Leonard won their first meeting in 1980; the rivals fought to a controversial draw last

Tjela barred from running in marathon

Ernest Tjela of Lesotho, who won the 1989 San Francisco Marathon, has been barred from the July 1 race because he ran in a cross-country race in South Africa. In 1988, Tjela was barred from the Seoul Olympics because he ran in South Africa earlier that year.

Hornets' pick to Czyz KO's Maynard in seventh round Bobby Czyz, the one-time light heavyweight champion defeated be based on talent

CHARLOTTE (AP) — The Charlotte Hornets' No. 5 pick in the upcoming NBA draft will depend on which player will help them improve on a disappointing second season in which they won

The Hornets management has

"We'll be taking a guard or a small forward," said Allen Brisshack tow, vice president of basketball operations. "We won 19 games last year. That's not a delicate mix. We're going to raise our talent level with this year's draft."

Hornets coach Gene Littles

"We need a player who will make us more competitive, who'll help us win a few more games," he said.

Charlotte played it coy Monday, giving few hints about the player they hope to select.

"Did I give it away? Can you read between the lines," Bristow joked after discussing some of the college stars in Wednesday's draft with reporters at the Hornets' of-

Most basketball experts predict 6-foot-9 Syracuse forward Derrick Coleman will go first when

Until recently, Georgia Tech swingman Dennis Scott was touted as the No. 2 pick. But concerns about his weight have come

Should Scott be around when the Hornets pick, there's a good chance he'll be their pick.

"He's by far the best offensive talent in the draft," Bristow said.

For the Hornets, there's an obvious need that likely won't be filled by this draft — center.

So the attention turns primarily to a strong slate of guards, including Gary Payton, Kendall Gill, Chris Jackson and Rumeal

"This isn't a marquee draft," said Littles.

Bristow spent a lot of time Monday talking about Gill, a 6foot-5 guard out of Illinois, and 6foot-8 LaSalle forward Lionel

"A guy like Kendall Gill will find his minutes," Bristow said. "He's that kind of competitor."

As for Simmons, the Hornets official said: "I like his toughness. He can put the ball on the floor and he's a good shooter. He's also an unselfish player and his consis-

Winners need at Wimbledon

WIMBLEDON, England (AP) Ivan Lendl won ugly. Boris Becker won dirty.

The top two seeds survived surprisingly tough challenges in Monday's first round at Wimbledon. And they weren't particularly concerned about the lack of beauty in their efforts.

Lendl, the top seed, lost four of the opening five games against 22-year-old Christian Miniussi, an Argentine ranked 116th in the world. Though he recovered to win 3-6, 6-4, 6-3, 6-4, he seemed to struggle at times with the low bounce of the ball off the carefully manicured grass courts.

"I just had a terrible time with the timing," said Lendl, beginning his annual quest for the only major title that has eluded him. "Every court plays differently and I just couldn't get any rhythm on the return of serve."

Lendl skipped the clay-court season and has concentrated on grass for the past few months to prepare himself for Wimbledon. But he seemed to be suffering from his traditional aversion to grass in the opening set.

"I was a bit nervous at first," he said. "I was not feeling comfortable with the low bounces I was getting. But I got used to it a little bit and I hit some good re-

tency is superb. He's done the

same things for four years at La-"Perhaps he is the safest pick in the draft. He doesn't do anything spectacular He's not super quick. He's like a decathlon ath-

Both Littles and Bristow said Jackson, who averaged 29 points a game in his two seasons at LSU, would probably not fit into the Hornets mix.

"He'll be a big draw at the gate and he's going to sell tickets," Bristow said. "We don't need to sell tickets."

Jackson is one of five point guards who figure to go high in the draft.

Besides Jackson and Gill, other potential picks at that position include Oregon State's Payton, Michigan's Robinson and Travis Mays out of Texas.

Bristow listed his top three point guards in Wednesday's draft as Payton, Jackson and Robinson.

Hornets officials were tightlipped about possible secondround selections, but said there may be some good talent left when they pick 39th.

"This draft is as deep as any I've been associated with," said Bristow. "A lot of players are going to stick with their teams."

The big question mark is Scott, who tore up the Atlantic Coast Conference after losing 30 pounds. Some observers say he's put a lot of weight back on during the off-

"The fact that he gained weight doesn't bother me but it should bother Dennis Scott," said Bristow, who added that the Hornets were unable to bring the 6foot-8 Georgia Tech star in for an interview.

"He's the one guy we can't find," he said.

Obscenity ruling spawns imitators

THE AMALGAMATED PRESS

"Oh, yeah? Well, then, 'La Bamba' is obscene," federal district Judge Ray Diculous ruled Monday. "Take that, Gonzo."

Diculous was referring to Fort Lauderdale federal district Judge José Gonzo, who touched off a firestorm of judicial reaction when he ruled that 2 Live Crew's rap album Nasty As They Wanna Be was legally obscene, despite contrary testimony provided by several expert witnesses.

Judges in thirty-eight states have issued similar rulings in the wake of Gonzo's pronouncement, leaving the record industry in a state of total confusion.

For example, Massachusetts federal district Judge Whitebread Yuppie ruled that country music was obscene, pointing out that "most of it talks about wife-beating, adultery, alcoholism, and so on — hardly the kind of thing we can allow young children to listen to."

However, Yuppie's ruling did not long go uncontested, as Gang of Sena-

tors' Wives Who Unfairly Use Their Unelected Positions to Squash Free Speech (GSWWUUTUPSFS) high priestess "Tipsy" Gore quickly rushed to country music's defense. "Country music is not obscene; it's simply a glorification of good old-fashioned American values," said Gore. "Things like wife-beating, adultery and alcoholism. I'm against dirty language and sex being mentioned in any song—unless it's in a country music song, of course. But that couldn't be because my husband is a senator from Tennessee or anything like that. No way."

Her disagreements with Yuppie's ruling aside, Gore, who has long advocated banning or labelling albums she personally thinks others shouldn't listen to, considers Judge Gonzo's ruling "a big plus. How can we teach our children how to decide for themselves what music to listen to, other than by taking away from them anything we don't like? How can we produce thinking and reasoning adults who resist censoring others and who resist censorship imposed by others, except by teaching our kids

at the earliest possible age that if you're bigger than somebody else, you can tell them what to do? Face it: any music that discusses sex and violence, promotes sex and violence. Except country music, of course. Country music is different. I like it. So do my husband's constituents."

Gore and the GSWWUUTUPSFS were also very pleased by an Alabama court ruling in which federal district Judge Gud Olboy mandated that any records sold in the state would have to have all the lyrics printed on the outside of the album. Also in the ruling, Judge Olboy used much the same reasoning to declare that movie theaters would have to print all the words to all the movies being shown on the back of each ticket sold, that television shows would have to print to the screen all the words that would be spoken in each show immediately before the show aired, and that publishers would have to print all the words to every book on the outside of the book. "No way anybody in this state is gonna be exposed to anything that might offend 'em," read part of Olboy's ruling - or, at least, that's what it looked like it said; it's hard to

The spate of rulings has resulted in several albums besides Nasty As

read crayon.

They Wanna Be being declared obscene, as intolerant judges, law enforcement officials and community groups work together to use their newly discovered ability to ban whatever they don't like or understand. Among the more prominent artists whose works have been outlawed were Barry Manilow, whom Judge Robin Wrights accused of "pandering to the questionable tastes of white, middle- to uppermiddle-class city dwellers," and Milli Vanilli. The ruling that Milli Vanilli was obscene was the only such declaration contested by no one.

2 Live Crew has profited from the widespread controversy, both through increased record sales and through their newfound martyr status. But perhaps the performer who has most benefitted is Madonna, whose recent sexually explicit dancing in Toronto was only a prelude to the smut-peddling she now engages in. Her new album, Nasty As A Madonna Wanna-Be, contains several songs already deemed obscene by anti-freespeech groups, even though the album hasn't yet been released. The song that most offended the GSWWUUTUPSFS and other groups is titled "Vague," which contains ostensibly objectionable lines like "Obscenity's where you find it."

ECU SNAPSHOTS meaningless statistics that shape our campus

Scientific discovery yields important insight

THE AMALGAMATED PRESS

Shortly after researchers made the disquieting discovery of the first hard evidence of the huge black hole at the center of our galaxy, scientists at ECU's Center for Ascertaining Things ascertained the reason for the ongoing state budget crisis that has been plaguing education.

It seems that, just as the great concentration of stars at the center of the galaxy creates a black hole into which surrounding stars are drawn, the great concentration of wealth in the hands of incompetent state legislators creates a fiscal black hole which drains off money that might otherwise be used for worthy causes. Like providing scholarships for the poor, for example, or improving ECU's library, or even funding Chancellor Bach Hurtin's little campus beautification project.

The Center's director, Dr. Hi Brow, says the fiscal black hole is a serious problem, but is doubtful that anything can be done about it.

"As far as we can tell, this fiscal black hole has existed put-near for-ever, like bureaucracy" said Dr. Brow. "And it'll probably last until incompetence and stupidity cease to exist, and I think we all know when that's likely to happen."

DEBATE

Plain Talkin'

By Alvin Newhart ECU Today founder

I just finished listening to that rap album that got banned, whad-dayacallit — Nasty As A Sailor, or somethin' — and I get the feeling that if I could a understood a word of it, I'da been really offended.

Okay, as soon as that ruling was passed, I ran out and got a copy of the album. I'm not ashamed to admit it. Don't tell my wife, of course, but that's different. Ethel — that's my wife — she don't know nothing about music.

Anyways, I bought the album because I heard on the TV that it had lotsa offensive lyrics and graphics depicting sex, and I thought, hey, if it's bad enough to piss off the authorities, it's good enough for me.

But Nasty As Can of Beans wasn't dirty at all. At least, not so I could tell. I wasn't really sure there was anything obscene until I read the lyric sheet. And there it was, plain as day: about a hundred million times these guys talk about sex and what they're gonna do when they screw these chicks and whatnot. Boy, I spent a lot of time holding that thing with one hand, if you get my drift.

But the issue is, should this album be for sale at all? I say no. It's a real disappointment, you wanna know what I think. In my opinion, those guys should either describe the sex clearly and distinctly, so we can use both hands for whatever we happen to be doing while we're listening, or they shouldn't go around getting federal judges to call it obscene.

Bill O'Rights An opposing view Judge's ruling was wrong

Banning Nasty As They Wanna Be is nothing short of ludicrous. It's not as if the album's listeners

(Hi! It's us again! We just thought we'd cut in to say that this time, we're going to print the opposing viewpoint in its entirety. Really. Just thought you'd like to know.)

symptoms, not the disease. After all, who is it hurting? Who has been harmed as a result of listening to

(Oh, by the way ... we just wanted to let you know, if you win some money in one of those Coke® Cool Cans, don't drink the stuff inside!)

obscene, but if 1.7 million people bought it, doesn't that lead the judge to question his decision? Suppose

(By now, you have of course grasped the awful truth. We are cutting off the opposing view. But hey — if a federal judge can do it, we can do it.)

Published by Offense Unlimited
— a division of Mapplethorpe
Manuscripts®.

Published every other week, unless there are more pressing considerations. Like, for example, if *The Simpsons* is on.

Just to dispel the rumors, Jesse Helms has never lifted a finger to help.

publication which has been shown to cause cancer in lab rats. It has also been declared legally obscene in Broward County, Florida, where police and judges apparently have nothing better to do than forcibly shut off outlets for young people's frustration and anger at a system which spends most of its time shutting off outlets for their frustration and anger.

CORRECTION: Due to our lax fact-checking standards and relentless disregard for the truth, yesterday's issue was completely wrong about absolutely everything. We reluctantly apologize for the resultant stock market crash and ensuing worldwide panic.

QUOTELINES

"U can't touch this."

— Federal district Judge José Gonzo, Explaining the effect of his ruling on the 2 Live Crew album

"Man, that's some lousy f---ing bulls---! That obscenity s---, like, impinges on my f---ing First Amendment rights and s--- like that. That a--hole judge better f---ing 'pologize, or me and my boys are gonna f--- him up!"

— 2 Live Crew's lead vocalist, Articulating his response

"The fighting in Palestine grew worse today, as protesters pelted Israeli soldiers with rocks and garbage. Soldiers responded by ... oh ... sorry, wrong page."

— One of our reporters, Soon to be fired

VOICES / Is the album Nasty As They Wanna Be obscene? And, by the way, have you heard a word of it?

M. Pact, 32
Rich executive
Greenville, NC

Well, I'll tell you one thing. They shouldn't be allowed to say all that disgusting stuff. I mean, I'm revolted by their language, and if I disagree with it, why should you be able to listen to it?

No, I haven't heard a second of the album. Why, do you think it matters?

T. Fortwo, 32 Camel trainer Grifton, NC

I'll teil you what's obscene. It's human beings forced to sleep in the streets of our country. It's children and druggies being used as excuses to strip us of our freedoms. It's a school system whose graduates can't read. It's — what? I'm under arrest? Damn—I knew I should have moved out of Broward County before I said this.

X. Rated, 32 Hit man Ayden, NC

Uh ... freedom of speech! No? Free press! Not that, either? Um ... did I say "freedom of speech"? I did? Okay, I already said "free speech" ... how about "free press"? I said that, too, huh? No unreasonable search and seizure? No? Well, okay then, I admit it: I can't think of a single constitutional right that I think is safe today.

Y. Amihere, 32 Elvis biographer Chocowinity, NC

I think Broward County, Florida, would be a great place to live, because I know that my friends the police would keep me safely cocooned in my little artificial world, far removed from the troubles of life, secure in the knowledge that nobody was hearing anything that might offend me. At least until someone shot me in the head.

Comic-style films multiply

THE AMALGAMATED PRESS

With the recent spate of successful films like Batman, Who Framed Roger Rabbit?, Teenage Mutant Ninja Turtles, and, most recently, Dick Tracy, comics and cartoons are back with a vengeance. And filmmakers are rushing to crassly exploit them.

Though studios are traditionally reluctant to talk about projects under development, The Amalgamated Press, in the finest tradition of investigative journalism, managed to dig out of its files several compromising photos which persuaded studio heads to overcome their reticence.

First, the sequels: various studios will be releasing sequels of their hit films, such as Batmen; Oh, So THAT'S Who Framed Roger Rabbit! (to be followed by So Who Framed Roger Rabbit THIS Time?); Teenage Mutant Ninja Snapping Turtles: This Time, They're Mad; and Dick Tracy 2: Electric Bugaloo (which may instead be titled Dick Tracy 2: Madonna's Naked!).

However, several original movies are also planned, like Try-Stair's What's-His-Name — You Know, The Little Black-And-White Dog Who Talks Funny, and Pairofmounts' Jessica Rabbit: The Early Years, When She Needed the Money. Each of these films will be released after about eighteen years of saturation advertising, and each will have its own line of dolls and a related game at McDonaldtrumps.

Disney Studios wouldn't tell us about most of its upcoming releases, which means you'll soon be seeing some very interesting photographs involving studio officials, jungle gyms and underage horses. However, we did manage to get them to reveal the titles to their The Little Mermaid sequels: The Even Littler Mermaid, The Even-Littler-Than-That Mermaid, The Microscopic Mermaid, and The So-Darn-Small-We-Could-Hardly-Find-Her-In-Order-To-Make-This-Film Mermaid.

Other studios are pondering more "quiet" films — like Divided Artists' Scooby Doo Reunion. Insider gossip has it that Fred is now totally bald, and that Scooby Doo is developing cataracts and kidney problems and may

soon have to be put to sleep. In a similar vein, Touchrock Pictures is considering The Flintstones Check Into a Nursing Home.

The Oscar for "Most Honest Title," if the Academy gives such a thing, will have to go to Orison's God's Gift to Merchandising.

The most surprising story of all came from Cosmological Studios. Studio head Lois Commondenominator, who asked not to be named, revealed that the studio plans to release a detective comic/film called *Trick Dacy*, starring Tom Hanks as the title character and Roseanna Arquette

as a lovely femme fatale by the name of Breathless Maloney. Detective Dacy will have an assortment of innovative gadgets in his crime-fighting arsenal, such as a three-way wrist radio (which Commondenominator describes as "kind of like a two-way wrist radio, but with conference-call capability").

Commondenominator further stated that Dacy "will wear a trench coat and hat which look yellow, but are actually a kind of off-yellow." Commondenominator describes the film as "nothing at all like Dick Tracy, honest," and has already announced plans to "think of some pretext to rip the film brutally out of the director's hands and mangle it beyond recognition, like we did with the television release of Brazil."

This season's TV shows go nuts with cliffhanger finales

By Chippy Bonehead ECU TODAY

In the tradition of such great network television cliffhangers as "Who shot J.R.?," syndicated shows are now enticing audiences with season finales that hinge on life-or-death situations for the characters, hoping to boost ratings and win fall renewals.

Star Trek: The Next Generation ended its 89-90 season with Captain Picard facing certain death aboard an alien vessel. Fox Network officials and producers of other shows have released teasers of other shows' cliff-hangers to watch for this week.

The Simpsons' Bart will dream about his sixteenth birthday, when Marge and Homer go out of town and he hires a hooker to open a brothel in

the Simpson home for the weekend.

The series will end as Bart drives Homer's car off the dock of the Springfield pier.

Superboy will finally bed girlfriend Lana Lang. Just as they are about to consummate their relationship, they will discover arch-enemy Lex Luthor has embedded kryptonite in her diaphragm.

America's Most Wanted Home Videos has a double treat in store for viewers. As the search for footage of George and Barbara Bush in the shower continues, host Bob Saget will be bludgeoned to death by the studio audience

for telling them to "enter those votes" just one time too many.

Small Wonder's adorable robot Vicki will turn out to be a renegade Fembot from the old Bionic Woman series. Her programming will go beserk and she'll try to rip the faces off the adorable family she lives with.

And finally, the wacky New Munsters will see a Clive Barker movie. The show will fade out as Heman, Lily and the gang realize their true calling as terrifying creatures of the night and start hanging out behind Fast Fares across the nation, killing and violently brutalizing teenagers.

Got a normal and healthy interest in sexually explicit material that certain brain-damaged federal district judges might declare obscene?

Do you share the rest of the American public's inexplicable and downright nosy interest in the private lives of celebrities?

House holds scintillating debate

THE AMALGAMATED PRESS

This past week, the House of Representatives was the scene of one of the most original, thought-provoking, scintillating debates in all of time, even better than the Lincoln-Douglas debates of more than a century be-

fore. Let's listen in:

Rep. Barney Flagg, D-S.C., took the floor in support of the amendment, saying, "We have to protect the flag. Veterans support this, and we all know that the fact that they fought in a war means they have the right to restrict other people's freedoms. Little children pledge allegiance to the flag, and if we vote against the amendment, they'll be permanently braindamaged and they'll all end up like Barney Frank, not that I mean anything by that. Most important, the voters are for it — and if the majority of people thinks something, then it must be true, even if they think that slavery is okay or that the Earth is flat. Uh, could I have thirty more seconds? Now, I don't intend to make this a political issue. Patriotic Americans can disagree. But not unless they're actually commie subversives."

Rep. Pat Schredder, D-Colo., then took the floor to argue against the amendment, saying, "The flag is a piece of fabric; the Constitution is the

Attention, foreign governments!

If you need help locating dangerous fugitives from justice, you'll want to try the CIA's Activist Location Program!

CIA-ALP's courteous staff will take your call and locate your fugitive within 30 minutes, or you get the service absolutely free! Guaranteed!

Fast service, fully guaranteed, and all for the low, low price of just 30 pieces of silver!

Well, we did a pretty good job with Mandela, didn't we?

fabric of our country. When flag-burners deface the flag, they're really just defacing themselves. Or something like that. Uh, could I have thirty more seconds? Anyway, vote against the flag amendment, because if you don't you're obviously for censorship, and you're probably also a commie subversive."

Minority Whip "Salamander" Gingrich, R-Ga., then took the floor in support of the amendment, saying, "We have to protect the flag. Veterans support this, and we all know that the fact that they fought in a war means they have the right to restrict other people's freedoms. Little children pledge allegiance to the flag, and if we vote against the amendment, they'll be permanently brain-damaged and they'll all end up like Barney Frank, not that I mean anything by that. Most important, the voters are for it -- and if the majority of people thinks something, then it must be true, even if they think that slavery is okay or that the Earth is flat. Uh, could I have thirty more seconds? Now, I don't intend to make this a political issue. Patriotic Americans can disagree. But not unless they're actually commie subver-

House Speaker Tom Fooley then took the floor to argue against the amendment, saying, "The flag is a piece of fabric; the Constitution is the fabric of our country. When flag-burners deface the flag, they're really just defacing themselves. Or something like that. Uh, could I have thirty more seconds? Anyway, vote against the flag amendment, because if you don't you're obviously for censorship, and you're probably also a commie sub-

versive." Rep. Bill Shootme, R-Mich., then took the floor in support of the amendment, saying, "We have to protect the flag. Veterans support this, and we all know that the fact that they fought in a war means they have the right to restrict other people's freedoms. Little children pledge allegiance to the flag, and if we vote against the amendment, they'll be permanently braindamaged and they'll all end up like

Barney Frank, not that I mean anything by that. Most important, the voters are for it — and if the majority of people thinks something, then it must be true, even if they think that slavery is okay or that the Earth is flat. Uh, could I have thirty more seconds? Now, I don't intend to make this a political issue. Patriotic Americans can disagree. But not unless they're actually commie subversives."

Rep. Tim Christmascard, R-N.C., then took the floor to argue against the amendment, saying, "The flag is a piece of fabric; the Constitution is the fabric of our country. When flag-burners deface the flag, they're really just defacing themselves. Or something like that. Uh, could I have thirty more seconds? Anyway, vote against the flag amendment, because if you don't you're obviously for censorship, and you're probably also a commie subversive."

Rep. G. V. Montgomerywards, D-Miss., then took the floor in support of the amendment, saying ... well, you get the picture.

Arnold Schwarzenegger

Ronald Reagan

in the hyper-mega-blockbuster hit of the century:

"It's a movie!" - Gene Shallit

"Two thumbs!" - Siskel & Ebert

"[Unintelligible]!" - Arnold Schwarzenegger

"Yes, I believe I may have seen that film at some point ... but I'm afraid I don't recall any specifics at this time. You know, I think I'd remember a lot more if Nancy didn't always talk so damn much ... it's really hard to concentrate." - Ronald Reagan

Directed by Arnold Schwarzenegger. Produced by Arnold Schwarzenegger. Filmed by Arnold Schwarzenegger. Edited by Arnold Schwarzenegger. Popcorn popped by Arnold Schwarzenegger. Written by some sociopathic jerk who evidently doesn't mind bastardizing the hell out of one of Philip K. Dick's many brilliant works.
