Nurse grad named top

By Lisa Dawson

Staff Writer

Robin Morreale, a staff nurse in the Coronary intensive care unit at Pitt County Memorial Hospital, has been named as one of 100 outstanding nurses from more than 63,800 registered nurses in North Carolina.

Morreale graduated from Roy C. Ketcham High School in Wappinger Falls, N.Y. in 1973. After earning an advanced degree in nursing from Dutchess CommunityCollegein 1983, Morreale went to Barton College in Wilson, where he earned a bachelor of science degree in nursing. He is currently a graduate student at ECU.

Morreale is a certified critical care nurse through the American Association for Critical Care Nurses. He is also certified as an advanced cardiac life support instructor. With his wife Linda, who is also a registered nurse, Morreale has three children: Lyndi, 13; Daniel, 9; and Nickolas, 7.

ECU team to explore civil war shipwrecks

By Tammy Carter Staff Writer

"Damn the torpedoes! Go ahead." These famous words spoken by Admiral David Farragut in the famous Civil War battle of Mobile Bay inspired an underwater survey team from ECU to head to the site of the battle.

Five students, two ECU graduates, and team leader, archaeologist Gordon P. Watts, all from the graduate program in Maritime History and Nautical Archaeology, plan to examine three battleships that sank more than a century ago. They left on Oct. 5 and will return around Oct.

While in Mobile, the divers will explore and survey three ships; the C.S.S. Gaines, the U.S.S. Philippi and the U.S.S. Tecumseh.

The five-student team members, led by Watts, recently returned from practicing mapping and surveying techniques on an 18th century British shipwreck in

The team will assess the

wreck sites for the U.S. Department of Interior, National Park Service and for the U.S. Navy, funded by a \$20,000 grant. The study may improve the way the Park Service manages its battlefield protection program.

The Park Service presently protects historic battlefields, but the protection only applies to battle sites on land. According to Gordon P. Watts, the work performed by the diving team could lead to the protection and management plans for historic nautical battle by a Confederate blockade runsites. These sites would include Mobile Bay; Fort Fisher, N.C.; and Yorktown, Va.

The most famous of the three, the Tecumseh, struck a torpedo or a mine at the beginning of the battle and sank in 25 seconds, killing 93 men. Stunned by the hit, the Union fleet momentarily failed in its progress until Admiral Farragut climbed to the upper deck of the flagship Hartford, lashed himself to the rigging and allegedly yelled the words so many people remem-

Now, most of the Tecumseh's hull is hidden by mud and silt. Jeff Morris, Tim Hastings, Ted Dunlap, and Lex Turner, all ECU students,

will note the exposed area and determine the deterioration of the ship, and hopefully feel the spirit of the war that helped mold

our country The Gaines, one of the other two ships to be surveyed by the team, was an armor-clad ship and was one of very few used by the Confederacy. Its commander, under the threat of defeat, ran his vessel aground in an

attempt to save the guns. The Philippi, once owned ner and named the Ella, was converted into a gunboat by the Union forces. The Confederate artillery sank it during the battle.

The team's leader, Watts, is one of North Carolina's most experienced underwater archaeologists. He was part of the team that discovered the U.S.S. Monitor off North Carolina's coast in the early

Over the summer, Watts worked with an international research team in France to help excavate the C.S.S. Alabama, a Confederate raider that was sunk in the English Channel by the U.S.S. Kearsarge in 1864.

Study warns against drinking games

Chug-a-lug and other drinking games are not as harmless as college students may think, warn two researchers in a recently published study. Nearly 4,000 alcohol-consuming students from 58 American colleges and universities were surveyed about the games they play when drinking. While students who identified themselves as "light" or "moderate" drinkers experienced few alcohol-related problems, those who played a drinking game within the preceding year significantly increased the probability of negative consequences in 15 of 17 drinking-related behaviors, the report said. While the researchers said more emphasis should be placed on drinking games in campus alcohol prevention programs and messages, the messages that stress abstinence from drinking have proved to not be effective among college students.

Miami professor fired for sexual harassment

A high-profile University of Miami professor from the Graduate School of International Studies (GSIS) was fired for sexual harassment and other charges in late September, following an investigation which began in 1992. Professor Jiri Valenta was terminated by a unanimous vote of the Executive Committee of the UM Board of Trustees after professor Vandulka Kubalkova filed a formal complaint against Valenta for sexual harassment, abuse of power and financial improprieties. The charges were substantiated through the testimonies of 53 witnesses over a 15-day period, which generated more than 3,500 pages of transcript. Charges surrounding Valenta's dismissal include physically touching seven women, including grabbing their breasts and buttocks, inviting women to bear his children and threatening retaliation when his advances were rebuffed.

Students arrested in prostitution ring

Three University of Arizona students were arrested for allegedly running a prostitution ring near the campus and employing college-age women, according to the Daily Wildcat. It was undetermined whether the women involved in the ring were UA students, the campus newspaper reported. According to police reports, a 19year-old woman who was employed by Elite Escort Service agreed to have sex for money with an undercover police officer at a hotel near the Tucson International Airport. The arrests took place after police investigated an advertisement reading, "Elite Escort Service featuring Lauren, Nicky & Victoria. Noon-3 a.m. Large selection. Reas. rates," that was published in The Arizona Daily Star.

who comment on rock videos and spend time burning and destroy-

Carole Robinson, a spokeswoman for MTV, said Friday that the cable network would "re-examine issues regarding 'Beavis and Butt-head."

"Responsibly programming MTV has always been and will continue to be our top priority,"

Sigler said he wants MTV to eliminate any shows that might encourage playing with fire and would like to see violence on the program reduced.

"When you take a child in the formative years and you get these cartoon characters saying it's fun to play with fire ... this is going to stick in that kid's mind and it's going to be with him for a long time," Sigler said.

EBU hadn't changed much. and passed the dorms, I soon found out that the coach was definitely the right person to talk to. Banners were up everywhere, the campus newspaper was plastered with photos of young women and I could even see a few footballs being thrown around.

Homecoming had arrived and

Coach Steve Lager was the man I needed to see. : It was even more apparent when I pulled to a stop next to Foster's Stadium. The stadium looked in mint condition and you could barely tell that the students had trashed it last week. The athletics department at EBU had gone to a lot of trouble to make sure that this

have to brew up something.. I found Lager in the locker room, surrounded by football helmets and dwarfed by a chalkboard filled with X's and O's. He looked up from his playbook and shot me a look. Man didn't seem to like me -. he'll get over it soon enough.

"You'd more than likely be Mick Hammered. What can I do for you, besides show you the door?" It seemed like the administration didn't take too well to me nosing around. They'd have to live with it, though, until I found what I came

"Well, Lager, you can tell me about Al Cohol. Don't cop an attitude, either, because I've just about had it with bureaucrats." I brushed aside the flap of my trenchcoat, letting Lager get a good look at Betsy. She seemed to change his attitude. She had that effect on people.

"Okay, Hammered, but only for a minute. I got a game to get ready for." I put my foot on a bench and waited for him to continue. "You picked a good time, though. Homecoming is definitely the time when you'll see Cohol here. The students here just don't seem to listen when we tell them what the truth actually Is about him."

"What would that be exactly, Lager?" I felt the hairs on the back of

A place where dreams are made and unmade, lives are turned upside As I drove up Case Hill Drive down and a drink is a drink. A place where you kept one hand on your wallet and one eye on the guy across the street. Basically, a place

will meet a character who will expose Al in a whole new light. When it's finally over and done with, Mick—and the reader—will be faced with one of the most important questions either has ever faced.

What place does Al Cohol have in my life?

THE CASE OF THE TEN BEERS "Gritty, realistic. Hammered is the ultimate in tough, comparable to

Spillane's Hammer and Hammett's Spade." Joel Keggsy, The Beersborough Gazette

my neck rise. Maybe now I would get something I could use.

"Let me show you." Lager moved to the chalkboard and erased the crazy tic-tac-toe game. "It's like this - the more time students spend with Cohol, the more their behavior changes. When he's in their blood at a .02 or .03 level, they start relaxing and become more outgoing. At .05 to .12, they start to lose control and can hurt themselves. Not that they would ever admit that, though." Lager shook his head in disgust and continued.

"If the level gets as high up as .25, they start losing their coordination. You know, spilling drinks and falling down on everyone and everything. If they go over .35," Lagershuddered, "Well, there's not a whole lot you can do. A person

may fall into a coma ... or even die." I gritted my teeth and vowed to get to Cohol, no matter what it took. Someone had to show him what was going on. "What about after they drink, Lager?"

"Well, about the only thing they can do to stop feeling like crap the next morning is drink some water, take some aspirin or eat something. And that might not even help. What burns me is that some think that more time with this guy will help. All that leads to is more problems.

"Gotcha. What about helping someone who's gone too far?"

"Leave it to the professionals, Hammered. Emergency rescue teams are trained for that kind of thing. About the only thing you should do is turn the person over on their side so they don't choke on any vomit. Other than that, keep them safe until the paramedics get there."

"Thanks, Lager. For administration, you're alright."

Lost in thought as I stepped out of the Sports Mill Building, I failed to notice the limousine parked near by. Until the two thugs grabbed me and pulled mer inside "The Director wants you."

Fire! Fire! Fire!

"Beavis and Butthead" blamed for death of child, MTV considers reexamining programming

Unbelievable.

An Ohio mother is actually blaming a cartoon for the death of her child. A cartoon! You know, those two-dimensional, fantastical, kid-loved characters that made Saturday mornings super-duper great.

Well, okay, this is "Beavis and Butthead," two deranged, pathetic, clueless teenagers with a penchant for the words "suck" and "shut-up." Yep, 'Beavis and Butthead," an MTV cartoon that until last week I had never entirely sat through. "Loony Toons" is one thing, but "Beavis and Butthead" is just plain

The situation goes something like this: a 5-yearold boy started a fire that killed his younger sister. This boy's mother is convinced that the idiot cartoon is the cause of the young boy's actions. Now, please understand that every sympathy is extended to the mother as far as the loss of her 2-year-old daughter is concerned, but to take the blame this far is, in fact,

The question has to be asked: why is a 5-year-old child allowed to watch MTV in the first place? As a kid, I remember being locked out of my parents' bedroom after school, simply because the cable TV was there and they felt it within my best interests to prohibit me from viewing that new-fangled cable channel called MTV. They cared, and were watching out for my well-being, don't you see? Why on earth would you let a child in his developing, formative years watch a show that very obviously is geared toward a more mature (or immature) audience?

And another thing — this 5-year-old had access to a cigarette lighter, with which he started said fire. This is grave mistake number two. Never leave a lighter or matches somewhere that a child (that is, one not yet ready to decide these things on his/her own) can find it, take it, touch it or see it. Never, never,

Kids generally find fire fascinating. And that has nothing to do with "Beavis and Butthead." Fire has been cool even before the word "cool" was used in everyday speech to indicate the acceptance of something. To kids, fire is something pretty and scary and dangerous, all rolled into one. Who's going to deny that? Kids tend to like the dangerous, walk-the-line stuff. Hell, who are we kidding, adults are just as fascinated with fire and danger as kids are! But we're not going to go out and randomly set fire to things because we're adults and we don't do things like that! At least, we're not supposed to...

O.K., obviously this Ohio mother loves her son and does the best she can at raising him, but she related to firefighters on the scene that she was so concerned with his behavior since he started watching the show that she took the boy's bedroom door off the hinges in order to watch him more closely. Hello! Eady, if you can carry a thought process as far as removing a door from its hinges, you certainly can see that a television show is maybe not quite suitable for

your wee tot?! To all the parents out there — please don't blame MTV, "Beavis and Butthead," cable television, the anvils that fall on Wile E. Coyote's head, HBO or anything else if you can't see it within yourself to get off your butt and cancel your cable subscription (who needs it, ever hear of reading?), scramble the channels that offend you or simply have enough insight to protect your impressionable child from things that s/ he'll learn soon enough.

Fire is cool, but so is good parenting, huh-huhhuh-huh.

Letters to the Editor

Abortion editorial fails to benefit an already 'screwed up world'

To the Editor:

I am writing in response to the article by Alex Ferguson on the Opinion page this Tuesday. What the hell kind of stand is that? I am so glad there are not more gether. people out there like Mr. Ferguson—people that are so innocent and naive and take no responsibility for the decay of society. "I don't care if ten year old's them to school, we don't know article. This article really disgusted me. I have never written any newspaper in response to an article before. I've also never written to a Congressman either. But something in this article really did it. It really triggered something.

Here is someone who doesn't American citizen to protest abor-

fully blocking an entrance to a clinic or tossing a couple grenades in these clinics; those are extreme radicals and another topic alto-

But Mr. Ferguson wasn't targeting these radicals, which would have made more sense. Instead he chooses to criticize any man who has an opinion on abortion and is own submachine guns and take not pro-choice. He goes on by saying, "does it ever occur to them what kind of neighborhood they that maybe the women don't need were born in." This statement the opinion of a man to complicate would just as easily fit right in things?" Complicate things?! with his way of thinking in the What a cop-out! Oh, it is too complicated, shut up don't voice your opinion, you're a man. We as a society need to be concerned with the actions of others, whether they country's youth are the brave ones.

are men or women. The topic here isn't abortion. Although I'm sure, by the tone of this letter, I am going to be labeled give a damn about anyone else as a "pro-lifer" by those who and clearly makes a mockery of choose to read it. And I'm also any man who chooses to express sure that many will be quick to his constitutional right as an attack me verbally, either in person or in a future edition of this

tion. I'm not talking about force- paper because I am pro-life, and a what he would probably say. young college male. I must obviously be a male pig with a screwed up head. If this letter is printed, I guarantee that I will be better known for my pro-life stance than for any other aspect about me. I must obviously kill abortion doc-

> tors and blow up clinics. And it seems that in some screwy irony, those who are "prolifers" are made out to be a bunch of radical old men who must be evil, because they believe in saving the child's life. You would think that, in any other context, up and speak their mind, male or they would almost be heroes. In female. this context, however, they are the evil ones and those out there defending mass murder of this

What a screwed up world we live in. People like Mr. Ferguson sure aren't helping any. If I were his friend, and I had been drinking heavily and had decided to drive us somewhere, I sure couldn't trust him with stopping me. "Why complicate things? Let_ him make his own decisions," is

The point I'm trying to make here is this, and it is really quite simple, and it extends to almost any subject, not just abortion: if you believe in something strong enough, you have the moral responsibility to protest it in some form or another. By saying that voicing an opinion is complicating things too much, Mr. Ferguson has done a great injustice. Many things would not be the way they are today if someone didn't have the guts to stand

In response to the comment, "after all, I certainly would prefer if they stay out of my prostate cancer," I wonder what he would think if the person treating his prostate cancer was a woman. Would he want her to interfere or to complicate things? Yeah, right. Don't ever run for office.

Comparing prostate cancer to pregnancy unjustified, in poor taste

To the Editor:

This letter is in response to the article appearing in the October 5 issue of The East Carolinian, "Man's position in abortion questioned." I completely see that Mr. Ferguson is entitled to his own opinion, and I respect that. In fact, everyone is entitled to their opinion. This is true whether the man feels he should be included in the decision making, or if the woman feels it is no

business to the man. The only thing I had a major problem with was the last

paragraph in the whole article. It stated, "After all, I certainly the human body and needs to be too many rights. They are right prefer if they stay out of my quickly destroyed. If it is not in saying that: women are alprostate cancer." It is under- destroyed, it will cause havoc lowed to abort babies without standable that a man may want over a person's body. A baby is even consulting the fathers a woman to stay out of an issue a gift. A gift that is best when it even though it took the father such as prostate cancer. This is shared between two people. just as much to create the baby. feeling may be the same for a What makes pregnancy a strictly After all, women cannot do it woman, if, for example, she has feminine issue? Better yet, what alone. Maybe I have overbreast cancer or cervical cancer. makes it comparable to prostate stepped my bounds, but being Pregnancy and prostate cancer cancer. As the years have gone a female, I guess I have that cannot, and should not, be used by, it has been proven that a choice, right? in the same sentence. For years, men have com-

Patricia Lafuente Occupational therapy Freshman

I blame it all on Alan Alda.

Remember when Hawkeye was the symbol for men's tian rock musicalittle too loudly. you're thinking about getting ing; they stick by you no matter Doug, kind soul that he is, gave behavior in the 80s? He was so disarming and funny. And he Doug, who lived below him, was one, keep a few things in mind. how badly you treat them. They Mariam water when hers froze, cried and broke away from the machismo of the likes of television's Vinnie Babarino and Dwayne F. Schneider. The man was something men were not supposed to be at that time: sensitive. It became the rage. Men who wept or hugged their best male friend in public were suddenly in almost as much demand as Cabbage Patch Kids. Almost, now.

Anyway, sensitivity became popular. People began to get in touch with themselves; therapy groups popped up for everything from family alcoholism to subconscious childhood trauma to slight acquaintances of pyromaniacs and the women who love them. Talk shows sprang up from the depths of Social Hell to exploit the cause du jour and to expose people who like nothing better than to talk about their love lives and eating habits. Therapy led to resolution, and resolution led to a need to confront. But these confrontations were not aimed at specific individuals but at society as a whole.

Movements then cropped up, telling us what not to listen to, who not to sleep with and where not to go for personal growth (We had a men's movement, for God's sake. Most men I know won't even move to change the television channel. And what did this movement encourage men to do? Strip, run around and bang on drums. Hell, I thought that was what Woodstock and Lollapalooza were for ...). Sensitivity thus led to well-intentioned and emotionally timid people becoming immense pains in the ass.

I have heaps of trouble with this political correctness thing. No longer are we allowed to offer critical opinions on other people. No not without having to battle a vague and everchanging set of guidelines. Either we refer to people positively, or in such an ambiguous way that the tone of our statement can't be discerned. Political correctness tells us that fat people aren't fat (they are "remarkably obese" and "unfashionably unsvelte"); handicapped people aren't at a disadvantage even if stairs become as impassable as a Tolkein mountain. And of course, there is the thorny issue of what to call people. This just eludes

Let me preface the rest of my comments by saying that nomenclature reflects the times, and I surely won't stand in the way of anything as impressive-sounding as "modern nomenclature", even when I look up the definition. Simply put, what we call ourselves and others is now more important than how we treat ourselves and others.

Can someone please print a translation text for those of us too busy to rationalize proper ethnic designation—among African- American, American-Indian and other such hyphenated labels like wall-eyed-rouge-headed-horizontally-allergic-splendidly-myopic-thoroughly-left-handed-Bulgarian-on-the-leftno-no-I-said-the-left-yeah-that's-him-in-the-blue-sweater-eating-the-Kit-Kat?

Allow me to ask a simple question. If the fashionable i.d. for black people is "African-American" (and using the word "colored" is on par with drop-kicking infants), why is the leading organization for the rights of black people called the National Association for the Advancement of Colored People? Is it all right to say ... (you know, that phrase) if you're black? And why is the KKK allowed by law to scream the word "nigger" up and down the main street of small towns, and if I yelled it out my window I could be thrown out of ECU for speech infringement? I don't want to call anyone anything but words now are like property, with rightful owners and users? Who says what word is right or wrong? Can a word be right or wrong? Didn't Shakespeare say nothing is bad or good, but is defined by how we see it? I mean we are talking about a couple of syllables, whenever slurs or other nasty comments are used. Are we so thin-skinned that we sue or (yikes!) kill over something as small as a word? Were we told to say "sticks and stones can break my bones, but call me so-and-so and I'll own your house or stomp on your privates, bub"? No, we were told to be better than those Cro-Magnons calling us "nerd," "weirdo," "cootie" or "fairy." Did I just insult any Cro-Magnons out there? "... Names can never hurt me." Anyone remember that?

It's now necessary to know one's entire genetic lineage in order to both correctly label him (I refuse to say him/her, because if we can say "mankind" to refer to him and her, then "him" can reflect both as well) and not offend him (nope, won't do it; him, him, him) in even the most remote circumstance. So, we, the writers, who for whatever reason must conform with the fashion of the day, must be aware of who people are linked to by political, religious or ethnic means. For practice, the prudent writer should examine his (okay, okay: his/her. geez...) own heritage for such exposition.

I happen to be one of those lucky people whose genetic background could constitute the Security Counsel of the United Nations. I can claim Irish, German, English, Cherokee and (if Dad's right about the in-laws) Martian. But I can live with "writer." It fits. "What is he, anyway?" A writer. Not Caucasian Overlord or Oppressor of Pencil Leads or Destroyer of Trees. "A writer" will suffice, thank you.

Before the torrent of letters arrive demanding my head, I do not believe in the right of people to be mean and offensive with racial slurs, so save a stamp and relax. If we can mature past the point of using "bad words," can't we get past being hurt by them? I always thought that words that insulted were used , out of frustration or anger, not because they magically reduced someone in stature or deed. If we are trying to prove that 30 years of desegregation weren't for nothing, we have to start on the most basic level. Self-image defines a person, not preconception or suggestion. Words, for all their connotations and emotional weight, are merely words. They cannot defeat us. We are better than that. All of us. Even Alan Alda.

begin with personal growth

Let me ask you a question.

How is it that a person can tell you one thing and six months later act totally different? How is it that someone can tell you - and make you believe — that they feel a certain way and then act in a very extreme opposite manner? Does it not occur to them that if a person is exposed to this hypocrisy often enough, more than likely they'll just give up on the person all together?

Granted, I am taking these questions from a personal experience of mine that happened recently. However, this column is not meant as a vent for my personal frustrations. Rather, I have to wonder how some people maintain friends and relationships when they don't follow up their words with actions.

Look at it this way: a politician running for election says that he is vehemently against spending taxpayers' money for personal trips. After he is in office for a few years, someone discovers that he has been writing off trips to the Bahamas as "business-related." No one's very surprised when this happens — hell, all politicians are liars, right? What does this do that person's status in the public eye, however?

Let me bring this a little closer to home for Joe Average Student. The person you're going out with says that they don't want to have sex because it would ruin the friendship. They say that the friendship is too important to them to risk losing it. You respect that decision and admire the person for thinking so much of you. Later, however, that person lies to you or just decides that it's time to move on. What message does this give you?

I'll tell you what message it gives me. For all that talk about how important that friendship was, that's all it ever was — just talk. If a person can't back up their statements with concrete examples, why should you believe any of it for a second? Any man or woman can look you straight in the face and lie their assoff. The only way you can tell what the truth really is, is by looking at how those people act.

This touches on a previous topic of mine. People moan and complain about how bad and terrible our society is nowadays. If they would only start to look at their own lives and live them the way they think others should, maybe, just maybe, this world would be a better place to live in. Clean your own house before you start commenting on the terrible condition of your neighbor's.

How will people be able to know what you think life should be like? By your actions, and nothing else. If you think work ethics are important in life, show your co-workers with your own work.; if family values are important, give some attention and love to your children and spouse. It might surprise you how quickly people come to respect and emulate you when you show them what you feel the good things in life are.

Want to change the world? Great. Noble concept. The problem comes up when you ask yourself how can you change the world. Allow me to give you my own personal solution, if you would. Change your little corner first. Show people — by your actions, not your words—what you think utopia is. Create your own personal paradise and let others view it so that they might eventually achieve their own.

"Talk is cheap." "Actions speak louder than words." Clichés are only clichés unless they're true.

 The rate of heterosexual HIV transmission has increased 44% since September 1989.4

 Sexually transmitted diseases (STDs) infect 3 million teenagers annu-• 63% of all STD cases occur among

persons less than 25 years of age.6 • 1 million new cases of pelvic inflammatory disease occur annually.7

 1.3 million new cases of gonorrhea occur annually8; strains of gonorrhea have developed that are resistant to penicillin. Syphilis is at a 40-year high, with 134,000 new infections per year.9

• 500,000 new cases of herpes occur annually10; it is estimated that 16.4% of the U.S. population ages 15-74 is infected, totaling more than 25 million Americans — among certain groups, the

infection rate is as high as 60%.11 4 million cases of chlamydia occur annually12; 10-30% of 15- to 19-yearolds are infected.13

 There are now 24 million cases of human papilloma virus (HPV), with a higher prevalence among teens.14

To date, over 20 different and dangerous sexually transmitted diseases are rampant among the young. Add to that the problems associated with promiscuous behavior: infertility, abortions and infected newborns. The cost of this epidemic is staggering, both in human suffering and in expense to society; yet epidemiologists tell us we've only seen the beginning.

Incredibly, the "safe-sex" gurus and condom promoters who got us into this mess are still determining our policy regarding adolescent sexuality. Their ideas have failed, and it is time to rethink their bankrupt policies.

How long has it been since you've heard anyone tell teenagers why it is to their advantage to remain virgins until married? The facts are being withheld from them, with tragic consequences. Unless we come to terms with the sickness that stalks a generation of Americans, teen promiscuity will continue, and millions of kids . . . thinking they are protected . . . will suffer for the rest of their lives. Many will die of

There is only one safe way to remain healthy in the midst of a sexual revolution. It is to abstain from intercourse until marriage, and then wed and be faithful to an uninfected partner. It is a concept that was widely endorsed in society until the 1960s. Since then, a "better idea" has come along . . . one that now threatens the entire human

Inevitable questions are raised whenever abstinence is proposed. It's time we gave some clear answers:

Why, apart from moral considerations, do you think teenagers should be taught to abstain from sex until marriage?

No other approach to the epidemic of sexually transmitted diseases will work. The so-called "safe-sex" solution is a disaster in the making. Condoms can fail at least 15.7 percent of the time annually in preventing pregnancy. 15 They fail 36.3 percent of the time annually in preventing pregnancy among young, unmarried minority women. 16 In a study of homosexual men, the British Medical Journal reported the failure rate due to slippage and breakage to be 26 percent." Given these findings, it is obvious why we have a word for people who rely on condoms as a means of birth control. We call them. "parents."

Remembering that a woman can conceive only one or two days per month, we know the failure rate for condoms must be much higher when it comes to preventing disease, which can be transmitted 365 days per year! If the devices are not used properly, or if they slip just once, viruses and

bacteria are exchanged and the disease process begins. One mistake after 500 "protected" episodes is all it takes to contract a sexually transmitted disease. The damage is done in a single moment when rational thought is overridden by passion.

Those who would depend on so insecure a method must use it properly on every occasion, and even then a high failure rate is brought about by factors beyond their control. The young victim who is told by his elders that this little latex device is "safe" may not know he is risking lifelong pain and even death for so brief a window of pleasure. What a burden to place on an immature mind and body!

In fact, the University of Texas Medical Branch recently found that condoms are only 69 percent effective in preventing the transmission of the human immunodeficiency virus (HIV) in heterosexual couples. Dr. Susan Weller of UTMB conducted a meta-analysis of 11 independent HIV transmission studies. Her conclusion: "When it comes to the sexual transmission of HIV, the only real prevention is not to have sex with someone who has or might have HIV."18

This surely explains why not one of 800 sexologists at a conference a few years ago raised a hand when asked if they would trust a thin rubber sheath to protect them during intercourse with a known HIV-infected person. 19 Who could blame them? They're not crazy, after all. And yet they're perfectly willing to tell our kids that "safe sex" is within reach and that they can sleep around with impunity.

There is only one way to protect ourselves from the deadly diseases that lie in wait. It is abstinence before marriage, then marriage and mutual fidelity for life to an uninfected partner. Anything less is potentially suicidal.

That position is simply NOT realistic today. It's an unworkable solution: Kids will NOT implement it.

Some will. Some won't. It's still the only answer. But let's talk about an "unworkable solution" of the first order. Since 1970, the federal government has spent billions of our tax dollars to promote contraception and "safe sex." This year alone, hundreds of millions of your tax dollars will go down that drain! (Compared with less than \$8 million for abstinence programs, which Sen. Teddy Kennedy and company have sought repeatedly to eliminate altogether.) Isn't it time we ask what we've gotten for our money? After 22 years and billions of dollars, some 58 percent of teenage girls under 18 still did not use contraception during their first intercourse.20 Furthermore, teenagers tend to keep having unprotected intercourse for a full year, on average, before starting any

States, 1988," National Survey of Family Growth. 28. Joseph S. McIlhaney Jr., M.D., Sexuality and Sexually Transmitted Diseases, (Grand Rapids, Baker Publ., 1990) p. 137. 29. A.M.B. Goldstein and Susan M.

ratio of the experts who call abstinence "unrealistic" and "unworkable."

Even if we spent another \$50 billion to promote condom usage, most teenagers would still not use them consistently and properly. The nature of human beings and the passion of the act simply do not lend themselves to a disciplined response in young romantics.

But if you knew a teenager was going to have intercourse, wouldn't you teach him or her about proper condom usage?

No, because that approach has an unintended consequence. The process of recommending condom usage to teenagers inevitably conveys five dangerous ideas: (1) that "safe sex" is achievable; (2) that everybody is doing

it; (3) that responsible adults expect them to do it; (4) that it's a good thing; and (5) that their peers know they know these things, breeding promiscuity, Those are very destructive messages to give our kids.

> Furthermore, Planned Parenthood's own data show that the number one reason teenagers engage in intercourse is peer pressure!22 Therefore, anything we do to imply that "everybody is doing it" results

in more . . . not fewer . . . people who give the game a try. Condom distribution programs do not reduce the number of kids exposed to disease . . . they radically increase it!

Since the federal government began its major contraception program in 1970, unwed pregnancies have increased 87 percent among 15- to 19-year-olds.23 Likewise, abortions among teens rose 67 percent;²⁴ unwed births went up 83.8 percent.25 And venereal disease has infected a generation of young people. Nice job, sex counselors. Good thinking, senators and congressmen. Nice nap, America.

Having made a blunder that now threatens the human family, one would think the designers would be backtracking and apologizing for their miscalculations. Instead, they continue to lobby Congress and corporate America for more money. Given the misinformation extant on this subject, they'll probably get

But if you were a parent and knew that your son or daughter was having sex, wouldn't you rather he or she used a condom?

How much risk is acceptable when you're talking about your teenager's life? One study of married couples in which one partner was infected with HIV found that 17% of the partners using condoms for protection still caught the virus within a year and a half.26 Telling our teens to "reduce their risk" to one in six (17%) is not much better than advocating Russian roulette. Both are fatal, eventually. The difference is that with a gun, death is quicker. Suppose your son or daughter were joining an 18-month skydiving club of six members. If you knew that one of their parachutes would definitely fail, would you recommend that they simply buckle the chutes tighter? Certainly not. You would say, "Please don't jump. Your life is at stake!" How could a loving parent do less?

Kids won't listen to the abstinence message. You're just wasting your breath to try to sell them a notion like that.

It is a popular myth that teenagers are incapable of understanding that it is in their best interest to save themselves until marriage. Almost 65 percent of all high school females under 18 are virgins.2

A few years ago in Lexington, Ky., a youth event was held that

kind of contraception.²¹ That is the success featured no sports contest, no rock Data Sources: 1. groups—just an ex-convict named Harold Morris talking about abstinence, among other subjects. The coliseum seated 18,000 people, but 26,000 teenagers showed up! Eventually, more than 2,000 stood outside the packed auditorium and listened over a hastily prepared public address system. Who says kids won't listen to this timehonored message?

Even teens who have been sexually active can choose to stop. This is often called "secondary virginity," a good concept that conveys the idea that kids can start over. One young girl recently wrote Ann Landers to say she wished she had kept her virginity, signing the letter, "Sorry I didn't and wish I could take it back." As responsible adults we need to tell her that even though she can't go back, she can go forward. She can regain her self-respect and protect her health, because it's never too late to start saying "no" to premarital sex.

Even though the safe-sex advocates predominate in educational circles, are there no positive examples of abstinence-based programs for kids?

Thankfully, some excellent programs have been developed. Spokane-based Teen-Aid and Chicago's Southwest Parents Committee are good examples. So are Next Generation in Maryland, Choices in California and Respect Inc. in Illinois. Other curricula such as Facing Reality; Sex Respect; Me, My World, My Future; Reasonable Reasons to Wait; Sex, Love & Choices; F.A.C.T.S., etc., are all abstinence-themed programs to help kids make good sexual decisions.

A good curriculum for inner-city. youth is Elayne Bennett's Best Friends Program. This successful "mentoring" project helps adolescents in Washington D.C. graduate from high school and remain abstinent. In five years, not one female has become pregnant while in the Best Friends Program!

Establishing and nurturing abstinence ideas with kids, however, can be like spitting into the wind. Not because they won't listen, because most will. But pro-abstinence messages are drowned out in a sea of toxic teen-sexis-inevitable-usea-condom

from "safe-sex" professionals. You place major responsibility on those who have told adolescents that

propaganda

sexual expression is their right as long as they do it "properly." Who else has contributed to the epidemic?

The entertainment industry must certainly share the blame, including television producers. It is interesting in this context that all four networks and the cable television entities are wringing their hands about this terrible epidemic of AIDS. They profess to be very concerned about those who are infected with sexually transmitted diseases, and perhaps they are sincere. However, TV executives and movie moguls have contributed mightily to the existence of this plague. For decades, they have depicted teens and young adults climbing in and out of each other's beds like so many sexual robots. Only the nerds were shown to be chaste, and they were too stupid or ugly to find partners.

Of course, the beautiful young actors in those steamy dramas never faced any

consequences for their sexual indulgence. No one ever came down with herpes, or syphilis, or chlamydia, or pelvic inflammatory disease, or infertility, or AIDS, or genital warts, or cervical cancer. No patients were ever told by a physician that there was no cure for their disease or that they would have to deal with the pain for the rest of their lives. No one ever heard that genital

cancers associated with the human papilloma virus (HPV) kill more women than AIDS,28 or that strains of gonorrhea are now resistant to penicillin.29 No, there was no downside. It all looked like so

much fun. But what a price we are paying now for the lies we have been told. The government has also

this crisis and continues to exacerbate the problem. For example, a current brochure from the federal Centers for Disease Control and the City of New York is entitled, "Teens Have the Right," and is apparently intended to free adolescents from adult authority. Inside are the six declarations that make up a "Teenager's Bill of

contributed to

Rights," as follows: I have the right to think for myself. I have the right to decide whether to have sex and who[m] to have it with.

• I have the right to use protection when I have sex.

 I have the right to buy and use condoms.

 I have the right to express myself. • I have the right to ask for help if I

need it. Under this final item (the right to ask for help) is a list of organizations and phone numbers that readers are encouraged to call. The philosophy that governs several of the organizations includes presenting homosexuality as an acceptable life style and vigorous promotion of a teen's right to sexual expression.

Your tax dollars at work! Surely there are other Americans who recognize the danger now threatening a generation of our best and brightest. It is time to speak up for an old-fashioned value called virginity. Now, more than ever, virtue is a necessity.

If you agree with Focus on the Family that it is time for a new approach to adolescent sexuality, tear out this ad and save it. Take it to your next school board meeting. Send it to your congressman or senator. Distribute copies to the PTA. And by all means, share it with your teenagers. Begin to promote abstinence before marriage as the only healthy way to survive this worldwide

Please use the coupon below to obtain a valuable booklet on abstinence. There is no charge for it. However, your support is requested for an upcoming TV program for teenagers on this important topic. Your comments are also solicited.

Lubovitch's work for its rhap-Why does the sun shine? I've asked myself that more times than I can remember, and I know I'm not alone. Well, for all us stumped science buffs down here on Mother Earth, They Might Be Giants has kindly released a new EP that boldly asks (and answers) that very question. Appropriately titled Why Does the Sun Shine? (The Sun is a Mass of During the past three years, Incandescent Gas), this new disc from the men who brought us such sciencontinents and has performed in tific blockbusters as "Particle Man" faces one of the burning questions of our day head-on.

The title track is delivered with a lovely sing-song quality that lingers in your mind for hours after just one listen. Handy for those impromtu physics quizzes! This song provides a flurry of essential background information on our sun. "The sun is hot, the sun is large, the sunisfaraway," croons vocalist John

revealing passages. Aside from offering this cornucopia of vital information (another themes and improvisational jazz. mind-blowing tidbit: "[The sun is] 93 million miles away, and that's why it looks so small." Wow! It's science!), "Why Does the Sun Shine?" finally answers its own question. The sun shines, we are told, because it is in reality "a huge, atom-smashing

machine." What a bold statement! This is likely to ruffle a few feathers among theorists following the "Flaming Chariot of the Gods" school of physics. The group might soften the blow with the gentle arrangement in true

They Might Be Giants fashion, but their dedication to scientific truth remains adamant. If people are worried that there's a huge, uncontrollable atomic reactor our there just waiting to blow us all to Kingdom Come, then so be it. It's about time we faced the truth.

But They Might Be Giants aren't just a bunch of science geeks! As the rest of this EP proves, this band has its fingers on the pulse of themusic industry, too. Following "Why Does the Sun Shine?" is a rollicking cover of the Allman Brothers' "Jessica," delivered with the full power of a They Might Be Giants all-out accordion-andglockenspiel attack.

Next is a cover of the Meat Puppets' poignant "Whirlpool," the touching story of a "swirling mass of water" that wants to go out and see the world. A slight return to the scientific motif, "Whirlpool" is nevertheless a gentle, heartwarming piece of music. Listen to it with somebody you love.

The disc is rounded out with "Spy," an homage to spy movie Good for those romantic evenings in your secret under-ground headquarters, or even when you're just feeling a little sneaky.

They Might Be Giants has done it again, with a collection of music that's both educational and entertaining, in a tone every bit as sarcastic as my own. Why Does the Sun Shine? is a fine addition to the band's catalogue of goofy weirdness; music that sounds like a surrealist Disney cartoon soundtrack. Pick it up for a taste of the strange.

Let's talk funk, shall we? Or is it soul? I don't know. James Brown is soul. But then, he's funk too. Anyway, Johnny Gill's Provocative, on the Motown label, is a swell release. I'm not really into dance-pop-funksoul whatever, but Gill is good.

His vocals are smooth and gritty, lending themselves to both the hopping funk of "Provocative" and the mellow groove of "Quiet Time to Play."Overall, there's an abundance of that electronic rhythm sound, that dance thing that permeates so much of today's contemporary music. If you. Gill redid this album with a jazzier approach, I'd love it. But I don't listen to much dance stuff.

And yet, as I sit here banging at

Watt notes that an important aspect of this research is that the Parks Service considers Mobile Bay a battlefield. He said, "Park Service protects historic battlefields but that protection, until now, has extended to battle sites on land. This could lead to protection and management plans for historic nautical battle sites at Mobile Bay, Fort Fisher, North Carolina and Yorktown, Virginia."

The ECU team includes students and faculty from the graduate program in Maritime History and Nautical Archeology. A couple of weeks ago, Watts brought five of the team members to Bermuda where

Mickey Mouse Club Sings

By Andy Sugg Staff Writer

If you've had the blues since NKOTB split up and you were dissappointed by Debbie Gibson's new direction, cheer up! MMC is here for you!

MMC is the cleverly devised way of marketing the Mickey Mouse

And look here, there is absolutely no reference to the Mickey Mouse Club in the package! But it's them! From the Disney Channel show! Singing and rapping! Well, well, well.

These are not the clean cut kids like Annette, Cubby, Darla, Jermaine and Tito. These kids wear the baggies, the retro-threads, the complete contemporary youth package. And - check'emout: Josh, Lindsey, Rhona, * Nita, JC, Dale, Tony, Ricky, Jennifer, * Ilana, Matt, Keri and Marc. Sounds like "Saved by the Bell" meets "90210", doesn't it?

But look, I could mock 'em all day. The truth is, this is a slick album. * Production-wise, this album has drawn immense professional techinical support from people associated with the likes of Paula Abdul,

If you are looking for a change of music, you have found the group. Disney has devised a way to market the MMC in the music industry.

Bobby Brown, Whitney Houston making this stuff sound good, and it and Eddie Murphy. Can you stand does. it?Sure, it's nothing but dance music with stupid lyrics and titles like "Flava," "Gimme Back My Groove," "Step to the Rhythm" and "Let's Get

together." But it's not bad. If you like dance music with that pop edge, you'll like MMC. If you liked Milli Vanilli, you'll love dance pop stuff. MMC. A lot of effort went into

Give credit to Walt Disney records for that. And give thanks to the original Mouseketeers for starting something: Annette, Jimmie, Cubby, Sharon, Kukla, Franand Ollie.

Look, it's cheese-eating dance pop stuff, but it's good cheese-eating

James Hall's release worth a listen

:Andy Sugg

Staff Writer

"Deception of Light," the seventh track on James Hall's My Love, Sex and Spirit, is the best number on the album. Maybe it's the melanchloy — yet unobtrusive hom solo. Maybe it's the heavy guitar riffs and the way the axe fades at the end with a little feedback. Or maybe it's the only track Ilike. I don't know. He's cool.

The album has some diverse elements on it and some good music, but despite some of the promising openings to the songs, Hall's vocals are an enigma, a mar-- vel of the modern era. He's been likened to an early David Bowie, but I see more of Alice Cooper, ala 1973's "Black Juju," mixed with every other alternative singer in the nation and a little of that heartwrenching vocalization about Metallica trash like that stupid song stuff. that was on the radio and MTV every other hour.

But the heck with the vocals, the music does some swell stuff. "Criminal Hero" is a lively number with somber overtones reflecting the age we live in and its effect on the individual. "Trouble in Paradise" is a wailing little ditty with some down to earth

Love, Sex and Spirit, is full of passion that successfully brings over to his audience.

WILLIAMSBURG, VA.

IRONICALLY, THE TIME TO START SAVING FOR RETIREMENT IS WHEN IT LOOKS LIKE YOU CAN LEAST AFFORD IT.

an't afford to save for retirement? The truth is, you can't afford not to. Not when you realize that your retirement can last 20 to 30 years or more. You'll want to live at least as comfortably then as you do now. And that takes planning.

By starting to save now, you can take advantage of tax-deferral and give your money time to compound and grow. Consider this: set aside just \$100 each month beginning at age 30 and you can accumulate over \$154,031* by the time you reach age 65. But wait ten years and you'll have to budget \$211 each month to reach the same goal.

209 E. 5th St.

Greenville, NC

Even if you're not counting the years to retirement, you can count on TIAA-CREF to help you build the future you deservewith flexible retirement and tax-deferred annuity plans, a diverse portfolio of investment choices, and a record of personal service that spans 75 years.

Over a million people in education and research put TIAA-CREF at the top of their list for retirement planning. Why not join them?

Call today and learn how simple it is to build a secure tomorrow when you have time and TIAA-CREF working on your side.

Start planning your future. Call our Enrollment Hotline 1 800 842-2888.

752-7303

75 years of ensuring the future for those who shape it.™

*Assuming an interest rate of 6.50% credited to TIAA Retirement Annuities. This rate is used solely to show the power and effect of compounding. Lower or higher rates would produce very different results. CREF certificates are distributed by TIAA-CREF Individual and Institutional Services.

MANY DRINK SPECIALS

decorates New York City streets

NEW YORK (AP) — It's one artist's answer to the Waif Look. It's a sight that will give many a skinny Park Avenue socialite pause.

Botero's chubby bronze sculptures have arrived.

begins on 54th Street with "Maternity,"abig,boulder-likewomanholdingachildonheramplelap. Shelooks Venezuela. Her child stretches his the MetLife building ahead. The rear | comes a 150mm lens. view of "Maternity" is an ample eyeoverflow.

All the way up the street, oversize limbs and solid curvature prevail. Botero's 16 sculptures come to New York straight from Paris where they adorned the Champs Elysees. They are weighty masterpieces, no doubtabout it. The work has a mythical feel to it, suggesting a world that is beyond ordinary dimensions.

Because Botero's world is overflowing with fat people and creatures, their appearance in this weight-conscious country gives them a whimsi- | cal quality, and prompts some to chuckle.

Don't chuckle too loudly in the artist's presence.

Youmightnotassociatehimright away with his work. Botero has fierce, small eyes, a stern little mustache and bristling gray hair that forms a crown around an oblong, dark face. He wears a blue shirt, a red tie and a gray suit that is definitely size "regular."

"At many parties, people have said, 'Oh, Ithought you would be a fat man," the artist says and smiles briefly

Heisseated in a conference room at the Marlborough Gallery on East 57th Street. Concurrent with the Park Avenue exhibit, the gallery is showing more Botero sculptures and an accompanying show of the artist's pencil-and-watercolor drawings. Here, more of the same world is rendered on canvases depicting everything from voluptuous women and men to a voluptuous pineapple.

"My work is not a social commentary," he says, effectively silencing further Waif Questions.

"Yet, yes, there is sometimes a touch of humor in it. But I think of this

on any particular person, he says. "I don't work with models. Everything you see comes from my imagination. Ever since I was little, I have been

preoccupied with volume." Botero was born 61 years ago in Medellin, Colombia, and grew up, he says, "a skinny kid." But even in his earliest paintings, which Botero showed publicly for the first time at age 16, his work had an obvious appreciation for voluptuous figures.

Today, Boterosays, his appreciation for econo-size extends into his personal life only in the sense that " haveenormous studios in Paris, New York and Italy. I don't have big furniture, nothing like that," he adds with a laugh. "I have a normal wife, normal kids."

Boterosays that from conception to finished project, each of his sculptures takes more than a year to execute. A miniature of each is made, followed by larger-than-life versions

in clay, plaster, wax, bronze. When Botero's world collides with the Big Apple, start! for example, stand Central I Hotel, like stare-down in horse-drawn car

"Reclining Ve on Park Avenue with toward a Mercedes-Bering Unfortunately, all but two siskers on "Cat" (1984) have been stolen.

Despite his good humor in addressing the most obviously whimsicalaspects of his masterworks, Botero adds solemnly: "The work is not meant to amuse people. I take it very seriously."

Bucs prepare for 'Dogs | Q and A with

By Brian Olson Assistant Sports Editor

This year's homecoming could not have come at more opportune The rest of this season's schedule only gets harder and the Bucs will sail into Ficklen Stadium Saturday with a 1-4 mark. The struggling offense has been locked up and has not passed 'GO' since the loss of starting quarterback Marcus Crandell. Lastweek the Piratessaw their two-game win streak over South Carolina snapped, 27-3.

The bright spot for ECU is the improved defense under new defensive coordinator Larry Coyer. The defense has shown a muchimproved ability to stop the run. Five games into this season, the defense has only allowed 134.4 yards per game on the ground, a vast improvement on last year's total of 253.4 per game. ECU's defense has not had such success stopping opposing runners since 1983 and Tech's offense is nothing to write home to mom about.

The Bulldogs have used three quarterbacks this year and none have thrown for a TD. Jason Martin has been their best signal caller, going 26 of 55 for 334 yards. Aaron

Ferguson has continued to search for success after last season's disappointment and will likely share some time with Martin.

Tech departed with 18 Bulldogs. time for ECU — a win may help lettermen from the offense last seasavage a potentially dismal season. son, including offensive lineman Willie Roaf. He was selected eighth overall by the New Orleans Saints. Techalsolost their offensive coordinator, Pat Tilley.

> The weak offensive line for holes Roaf made last season for the running game. LTU's main running back to watch is Jason Cooper. He is averaging 3.8 yards a carry and has a total of 211 yards through four

Defensive troubles are everywhere for Louisiana Tech. Opponents have barreled through the young defense gaining 781 yards over four games. They are allowing are day-to-day. an average of 4.6 yards per carry. This could be the ingredient the Pirates are looking for to take pressure off the struggling passing offense. The Bulldogs lost eight starters from a defense that held opponents under 17 points nine times in '92. National Champion Alabama managed only 13 points against the

Bulldogs. ECU running back Junior Smith is running well for the Bucs. He has ing.

also has five TDs. Look for him to have another big day against the By Warren Sumner

This week it appears that Perez | Staff Writer Mattison will get the starting call from coach Steve Logan at quarterback. East Carolina's swim teams are looking forward to another banner year. Head Coach Rick Kobe expects to improve on last season's 10-2 record.

Swim teams set for season

By Brad Oldham Staff Writer

One of the most successful athletic programs here at East Carolina is swimming. Rick Kobe, entering his 12th season as head coach of the swimming teams, is looking to continue that success in the upcoming 1993-1994 sea-

The Pirates are coming into this season off a 10-2 record from last year. Both the men's and women's teams finished in third place at the CAA championships

held in Wilmington. ECU combined to break 21 varsity and freshman records as a team.

"We have a better team this year than last and we are definitely looking to break more records," Kobe said. "We want to move up in the championship meet and I feel like we have the team to do it. Our strong point is depth, along with specialized talent. That's what it takes to win meets

and championships." Winning the CAA won't be easy for Kobe and his swimmers. ECU brings in a team with only two senior girls and five senior guys. The rest of the team is made up of mostly very

young swimmers. Don't worry though, because Kobe has recruited a very talented group of first year swimmers. The talent of the freshman swimmers came through on Oct. 5, when ECU held its annual Pentathlon meet. The meet consists of all the

Pirate swimmers competing in five different

events, scoring points for their overall perfor-

mance on the day. And what a day it was.

Sophomore Jackie Schieder set a new point

total record for the women and also set a Pentathlon meet record in the 200 individual medley with a 2:15.08 time. Other records broken from the meet were freshmen Melissa Phillips 100 Fly time 1:01.73 and Lesley Hawleys 100 backstroke time of 1:02.27. Other strong performances from the women were put out by freshmen Christy Winn, Ellen Howard, Beth Browne, Elizabeth Bradnor and Meg Watson. Sophomores Beth Humphrey and Rachel Atkinson also turned out good scores. On the guys side, it was sophomore David

Benson leading the way. Freshman Chris Bembenek

also had a good outing, breaking a pentathlon record with a 54.73 time in the 100 backstroke. Seniors Carlos Ochoa and Ben Soltz, came in third and fourth place, respectively. Freshmen Brian Wall, Alan Pritchett, Ryan Barlow and Erik Griffin also accumulated impressive scores on the The Pirates obvi-

ously have a tough road in front of them. The men are looking to win their third conference championship, while the women are still

working on winning their first. The Dukes of James Madison University are going to be tough in defending their CAA crown, but the tradition of ECU swimming is a strong motivator in continuing future success.

Rick Kobe

East Carolina will hold the Purple-Gold meet on Tuesday, Oct. 19. The team will be divided equally and will compete against each other at the Minges Aquatic Center. The Pirates first opponent will be Virginia Tech on Oct. 30.

gained 627 yards rushing and is averaging 4.86 yards per carry. He also has five TDs. Look for him to

Raymond Peace is a perfect example of someone who is carryis faced with the task of bringing you coached at the beginning

this year despite more losses than wins last year, unit fell to na-

the .500 mark

Alabama by and lost to powerful Southern Mississippi by only a field goal.

Now as this season begins, Peace finds himself in a rebuilding process once again. As he prepares to make a trip to Ficklen stadium to face the struggling Pirates, he talked about what his job was like. Q: What is the most frustrat-

ing aspect of your job? A: I'd have to say that all the

things you are looking at in the future of Division I football, the cuts that will be made on Louisiana Tech coach Joe programs and such. It's really a tough league to play in.

Q: As a nineteen year veteran of college coaching, you have seen a great many players of your ca-

A: It's a

lot different today. I think that these players are a reflection of our society in general. think the society plays a big part in how they do. You have a lot more kids from broken homes today. When

Joe Peace

started, about all you had to do was be a football coach. These days, you have to

be a coach, a father, a disciplinarian and a psychologist. You have to be all of these things all wrapped up in one.

Q: Coach, last year your team was plagued by a number of close losses, where you just couldn't seem to win the game.

Hadelman holds high hopes

By Ashley Neal

Staff Writer

Unity and a good coach are important characteristics for a team to possess. According to Lisa Hadelman, ECU's women's tennis team has both. Hadelman, sophomore, is beginning her second season with the Lady Pirates this year. "He's [Coach Farfour]

such a good player, Hadelman said. "Last year he took us from a losing record in the fall to a winning record in the spring."

A Roswell, Georgia native, Hadelman is a long way from home. She decided to attend

ECU because of her brother and the medical school. Hadelman's brother came to ECU on a golf scholarship and said he loved it in Greenville. The medical school contributed to

Hadelman's decision because she

is a nursing major.

In high school, a fractured ankle forced her to sit out for a year and a half. She has made up for lost time since then by teaching lessons during the summer months. Once she has completed her education and is a registered nurse, Hadelman says she would

enjoy teaching private lessons at a club. For

Lisa Hadelman

*

a freshman. Because she balanced academics and athletics in high school, Hadelman thought the routine would be similar in college.

"In college you have to study so much more and people always want you to go out," Hadelmansaid. "[I] wasn'tready

Pirates pounded by 'Cocks

COLUMBIA, S.C. (AP) — South Carolina reserve quarterback Blake Williamson couldn't figure out why he wasn't playing much for the Gamecocks.

Once he got in, though, East Carolina couldn't figure out a way to stop him.

Williamson, who relieved Steve Taneyhill in both halves Saturday, second scoring drive in the Gamecocks'27-3victoryagainstEastCaro-

The redshirt sophomore learned Thursday that he'd play. Before Saturday, he hadn't spent much time on the field for South Carolina (3-3), although he completed the only two passes he threw this season.

But when he came on with 8:27 left in the half and South Carolina up 7-0, 62,307 fans roared with ap-

He quickly justified their faith, hitting Terrell Harriswith a 17-yard TD pass in the right corner of the end zone.

"Idon'tknow, for some reason they like mea lot," said Williamson, whoalsoguided a seven-play drive in the fourth quarter that ended on Reed Morton's 20-yard field goal."I welcome that and certainly the cheers get louder if you play well."

Williamson has heard those cheers a lot, but from the sidelines, watching Taneyhill restore life to a

Prices \$10.95-\$17.95

team that began the 1992 season 0-5. the second quarter. The backup is certain he too can be partofthe Gamecocks' revitalization.

"I'malwaysdisappointedwhen I don't play because I know I can do losses. something when I get in there," Williamson said. "I try not to let that

In some cases, the revolving quarterbacks may help.

Joe Montana has now missed 2 and players like Orlando's Shaquille 1/2 of his five games with Kansas Since Magic Johnson made his O'Neal and Charlotte's Larry City—he sat out the too-narrow 17the 49ers, it may keep him fresh for

But in most cases, it simply night or guarantee a full house on | muddlesthings. Miami (4-1) had control of the AFC East with Marino, but Barkley can. And he can still make | will that continue with Scott Mitchell? people's blood boil from coast to After throwing an interception that about-to-stars: Reggie Lewis, who coast. But a few somebodies had was returned 97 yards for a touchbetter step forward and soon, to help down on his first play, Mitchell threw twoTD passes to lead the Dolphins to

LOW

a 24-14 win over the Browns. But when teams have time to

prepare for backups, look out ... Bubby Brister led the Eagles to a comebackwin over the Jetstwoweeks ago, but was awful in the 17-6 loss to the Bears, who sacked him seven

times, intercepted him twice and

forced him to fumble twice. But Brister is new to the Eagles and Mitchell's been with Miami for four years (although he's thrown only eight passes). Still, coach Don Shula got to a Super Bowl in 1982 with David Woodley playing quarterback.

"We think Scottie will be all right,"saidShula."He'sbeenwithus for a while, he knows the players and the players know him."

The Eagles were 4-0 with Cunningham, but Brister was awful Sunday. They figure to slide behind the Cowboys and Giants in the NFC East and maybe out of the playoff picture, especially since Fred Barnett, their best receiver, is out for the sea-

Some of the other quarterbacks introublearen'texactly small-timers. With Minnesota's Jim McMahon pulled for Sean Salisbury in the fourth quarter of the punchless Vikings 15-0 win over Tampa Bay Sunday, another one-time Super Bowl starter was added to the mix of missing

quarterbacks. Including McMahon, who started the 1986 game for the Bears, quarterbacks who have missed time include starters in eight Super Bowls: Marino; McMahon; Montana (four with the 49ers); Jeff Hostetler of the Raiders (Giants, 1991) and Washington's Mark Rypen.

And it includes Montana's three Super Bowl MVPs and three league MVPs (Montana twice and Marino).

And, of course, there's Bernie Kosar, lifted for the third straight week in favor of Vinny Testaverde and now demoted — Bill Belichick announced after the game that Vinny's now the starter.

That makes Kosar, who just signed a \$27 million, 7-year contract, the world's highest paid backup.

TEC Sports Quote of the Week:

"Of all the trips we've made to grandma's over the years, I think my favorite visit was when Rod and I replaced Uncle Louie's dentures with a set of foaming Siamese badgers."

Marshall looking for upset

HUNTINGTON, W.Va. (AP) - Marshall coach Jim Donnan has one word to sum up the hoopla that surrounded his last trip to Raleigh, N.C., where he was quarter back for North Carolina State 26 years ago.

"Unbelievable," Donnan said. Donnan takes the Thundering Herd (4-1), ranked No. 3 in NCAA Division I-AA, to play Division I-A North Carolina State (3-2) on SaturdayatCarter-FinleyStadium,where he helped lead the 1967 Wolfpack down pass as time expired. to the Liberty Bowl.

Two seasons ago, Marshall played at North Carolina State and led the 11th-ranked Wolfpack late into the fourth quarter before falling 15-14.

Donnan said he received at least 95 requests for interviews before that trip and spent about 11 hours giving interviews.

"I counted it," he said. This time, the Herd coach is having Marshall's sports information office screen all his calls and arrange a teleconference in the week leading up to the game.

Besides Donnan's background at North Carolina State, there is extra interest because Donnan's son, Todd, will start at quarterback in the same stadium where his father played.

"I think it's going to be neat," said Todd Donnan, who threw for 258 yards and a touchdown in a 51-0 rout of VMI last weekend.

For some members of the Herd who remain from the 1991 squad, Saturday represents a chance for "Everybody still talks about that (1991) game," said senior tight end Casey Hill. "In our minds, we won that game. We just didn't win on the scoreboard." The Wolfpack is coming off a 36-34 comeback victory over Texas Tech. It won on an 11-yard touch-
