The mere fact that it was staged We are all aware that shamrocks are a solid foundation surrounding the holiday, and that they bring good luck, but do

you know why? We'll tell you. During one of his lessons in Ireland, St. Patrick stressed the importance of the father, son and holy ghost and how they all joined to make one God. People questioned this asking why he said he worshipped one God when he actually preached about three. Legend states that St. Patrick bent down and plucked a shamrock and held it out to show the leaf. He compared the three sections of shamrock that make up one leaf to God and the trinity. This legend is why we wear green on St. Patrick's Day.

The Irish now believe shamrocks protect us from evil spirits. Girls put shamrocks in their lover's shoe to ensure their safe return, and shamrocks were brought to America to bring luck to those leaving their homeland for an unknown world. Before St. Patrick's conversion of Ireland, the natives of the country were known to believe in several gods, worshipped many spirits and practiced spells and magic. Over time, St. Patrick did convert the country and the previous gods were thought of less, they became smaller and were eventually referred to as the "wee ones". Thus, the fairies and leprechauns we have been taught about were originally derived from the gods and spirits the Irish worshipped before St. Patrick came to town.

This handsome young hooligan goes by the name of Carrot Top, and he'll be sharing his zany comedy stylings with See CARROT page 10 doring fans on Sunday at 8 p.m. in Wright Auditorium.

In 1994, he was named Comedian of the Year at the American Comedy Awards. He has appeared on television shows from The Tonight Show to Evening at the Improv. What is behind his enormous success? It seems that Carrot Top's success comes from hard work, dedication and an imagination that borders on the insane. From impersonations of the Wendy's girl to wacky inventions, nothing is sacred from Carrot Top's unusual brand of hu-

cine Man, Rising Sun and A Good and he exudes the confidence and Man in Africa, Connery's latest film charisma that make him a huge star. suggests that he needs to read his What Connery seems to be lacking scripts a bit more carefully before signing on the dotted line.

Just Cause opens with two police officers (one black, one white) beating a confession from a young black man (Blair Underwood). One of the police officers, Tanny Brown (Laurence Fishbume), puts a single bullet in the chamber of his pistol, spins the chamber, then puts the gun in the prisoner's mouth and pulls the trigger. The gun clicks on an empty cylinder, and the prisoner confesses to raping and murdering a young girl. Eight years later a Harvard law school professor named Paul Armstrong (Sean Connery) is approached by the prisoner's grandmother, who pleads for Armstrong to come with her to Florida to clear the name of her grandson. The young man has been sentenced to die in the electric chair, even though all evidence suggests that he is innocent. Armstrong, a vocal opponent of the death penalty, cannot resist the offer to help an innocent man. Though Armstrong is unsure at first, his wife (Kate Capshaw) convinces him to help the man. Armstrong has not practiced law for 25 years, but his legal acumen remains. His sharp mental skills appear any time he interviews a witness from the trial, or a lawyer in a small town, or any of the police officers involved with the case. Armstrong at the General Classroom Bldg. unravels the pieces of the mystery only to find even more mystery in what he uncovers. Armstrong's investigation leads him to encounter a psychopathic prisoner (Ed Harris, in the most energetically overplayed role in the film) who claims to have committed the rape and murder of the little girl. Fashioned after Hannibal Lecter, Harris' psycho embodies evil. Just Cause has the elements of a workable thriller but none of the pieces ever fit together. Unlike Lecter in Silence of the Lambs, the psycho in Just Cause serves only as an interesting diversion. The director, Arne Glimcher, lacks the visual panache of Jonathan Demme (who directed Silence of the Lambs). Glimcher keeps Harris' psycho as a one-dimensional character who spouts biblical verses but lacks any complexity. A portion of the blame for this lack of character development (not

up early today and was really tired. I fed Mr. Peterson, took a shower, and ate some cereal. But even then I was still really tired. So I slept for a little while longer."

Not exactly scintillating stuff, but that's the point. Whereas most comic strips build up to a gag in the final panel, in "Jim's Journal" there's no such thing as a gag. Jim wouldn't know humor if it came up and bit him on the ass. His most striking observa- Dirty Looks tion about anything is, "It was pretty
