The Charleston Exposition.

The Legislature of Illinois has passed a bill appropriating \$25,000 for the purpose of making a full exhibit of the resources of that State at the South Carolina Inter-State and West Indian Exposition at Charleston, and Missouri has appropriated \$25,000 for the same purpose.

The light seems to be shining for us in all parts of the country, and the blessed thing is growing bigger and bigger every day. And not only from our own country, but from other lands and from the islands of the sea good tidings are coming. The City Council of Ottawa, Canada, has passed a resolution in favor of transferring the Canadian exhibit from Buffalo to Charleston. The resolution was forwarded to the Minister of Agriculture of the Dominion, and he has expressed his wish that the Canadian exhibit be made at Charleston.

The Governor of Cuba has appointed an active commissioner to prepare an exhibit from that island for the Exposition at Charleston, and the special commissioner of the Exposition in Havana makes encouraging reports of the progress of his work there and at other points in Cuba.—Charleston News and Courier.

What it Cost China.

The Boxer uprising in China has cost that country far more than the \$335,000,000 indemnity demanded by the Allied Powers, for, according to a reputable Chinese authority, whose credibility is vouched for by prominent Americans in China, it has cost her millions in property destroyed and looted, and a million of lives of persons killed in battle, suicides to escape outrage, and from disease starvation caused by the war. This looks like exaggeration, but Americans who have been in a position to witness the ravages and form an opinion as to their extent, say it is not, but that the statement by this Chinese authority is rather under than over the mark.—Wilmington Star.

Can Frost Be Abolished.

As to other possibilities of the cannon, there is that of abolishing frost. Herbs and resinous wood are often burned so as to shelter the plants under a screen of smoke, but just a few nights ago the cannon were tried instead in the Beaujolais. Two of them were apportioned to a hectare, about two and one-half acres and they were fired horizontally about two yards over the fields. The ground was rendered damp and warm, though the surrounding soil was cold and frost-laden. But the most astounding use of this artillery has been found in Madagascar and Algeria—to fight grass-hoppers. It is claimed that the shot cuts a discouraging swath in the invading swarms. And now the question is, what might it not do to a cyclone? There is serious food for reflection in that same question.—Everybody's Magazine.

Saturday night the Ocean View hotel and bath houses, one cottage and a store at Wrightsville were destroyed by fire.

Negroes As Obstructionists.

It is to be regretted that the negro will persist in putting himself in the way of the plans and purposes of the white man when those plans and purposes mean for his good. He is a constitutional obstructionist always in political matters his prejudice being sufficient cause for his taking the opposite position if he had no other reason; but he does not stop there. Whether it be some public question looking to the material progress and prosperity of the community—advancement along moral, educational and industrial lines—it makes no difference with him. He is ready to oppose and obstruct.

If additional proof of this was needed it could be found in the action of the negroes in regard to the special school tax elections held in various parts of the State last week. In every instance a majority of the negroes voted against it or a majority of them did not vote at all, which had the same effect. Cases might be multiplied but a single instance will suffice: In Mount Olive out of 74 votes against the school tax only 26 were cast by white men, thus showing that the negroes there as elsewhere arrayed themselves against the white people in their desire to tax themselves for their own benefit—the education of their own children—when the negro is to participate in this benefit also.

It is doubtful if any act of the negroes since the right of franchise was given them has done more to emphasize the wisdom and necessity of the Constitutional amendment adopted last August than their conduct in voting against or

not voting at all—which was the same thing—in the school tax elections last week. Nor is this all: it has done more to crystalize public sentiment in favor of a separation of the school taxes than any other one thing could have done perhaps. And when this comes—as come it will though probably not within some years yet—the negroes will have no one to blame but themselves.—Henderson Gold Leaf.

The Voice of Experience.

A manager of the dry goods house of Marshall Field & Co., of Chicago, is quoted as saying that while some sort of argument may be urged in favor of nearly every form of publicity "you can reach more people in the best manner and shortest time, and get better results for your money, in the columns of a good newspaper than in any other way."

North Carolina Millionaires.

In a recent article headed: "America's Chrysochry—Our 3,-828 Millionaires," the New York Herald credited the following to North Carolina:

Frank Coxe, Asheville; J. S. Carr, Washington Duke, James B. Duke, Geo. W. Watts, Benjamin N. Duke, B. L. Duke, Durham; Lawrence Holt, James Holt, William E. Holt, Burlington; P. H. Hanes, Winston; K. M. Murchison, Wilmington; Mrs. Westmoreland, Charlotte.

This may be all right as far as it goes, but the list strikes us as incomplete. Conspicuous for their absence are the names of several members of the newspaper fraternity whose modesty doubtless kept them from standing up to be counted.—Henderson Gold Leaf.

MONDAY, MAY 20, 1901.

Tomorrow will decide the graded school question for Greenville, as the bill passed by the recent Legislature will then be voted upon. There are some objections raised to the bill, but these are not, or should not be, material and the bill should be ratified at the polls. If the matter is defeated now it will mean a delay of two years before any other steps can be taken to get a graded school, and one defeat would make the second easier. THE REFLECTOR believes the present bill should be carried, then it would be much easier to make any desired amendments when another Legislature meets than it would be to have to go all over the whole matter again of getting another bill passed and holding another election. Defeat the matter now and we believe Greenville's prospects for getting a graded school are killed for a long time to come, and this will be a reflection on the town that our people cannot afford. Vote for the school.

Rowan has set a good example to the other counties of the State in building a county asylum for the care of its insane who cannot be gotten into the State Hospital at Morganton. It is on the jail premises but apart from the jail, so that none of the opprobrium which attaches to jail confinement will attach to the inmates of the asylum. It appears that provision for all the insane in North Carolina will never be made by the State, and in this case it behooves the counties to look around and determine what they will do themselves about this class of their unfortunates.—Charlotte Observer.

Hail falls are getting in their work all around these days. They have played smash with the garden sassa in some localities in this section, but up in Pennsylvania they have been killing cows. They were not the regulation "as large as an egg" stone, neither, but only as large as "hickory nuts."—Wilmington Star.

They do things queer in Pennsylvania. They imprison or expel tramps or vagrants because they will not work, and have just fined a citizen for working too much and sent him to jail because he wouldn't pay. They caught him working in his garden on Sunday.—Wilmington Star.

There is an opening for every man—in the cemetery.
Blessed is the man who hasn't time to tell his troubles.

BEAUTIFUL BUFFALO.

Vice President Porter Briefly Describes the Exposition City.

I have been spending several weeks in Buffalo, the city which will next year offer, for the delight and uplifting of all mankind, the great Pan-American Exposition. I am sure my fellow citizens of North Carolina who are not already familiar with Buffalo will be interested in knowing a few of the facts that I have gathered while here.

Buffalo is situated on Lake Erie and Niagara river, in the western part of the state of New York. We are struck with wonder and amazement when we consider the magnitude of Buffalo. It is the tenth city in population in the United States. The area of the city limits is 42 square miles, and the city proper extends some distance beyond these limits. It is said to contain nearly 400,000 inhabitants. These figures are from official sources. It has nearly 340 miles of paved streets, 1,000 acres of parks, 17 miles of park driveway, the largest flour depot in the world, largest lumber market in the world, 600 miles of steam railway tracks within the city limits, 26 railroads, 250 passenger trains every day, more than one every six minutes; 140 miles electric street railway, 3,000 manufacturing plants, employing 75,000 hands; 50 grain elevators. Buffalo's park system is unsurpassed by any in the world. You can ride for hours in your carriage over park drives and parkways without a single jolt. The majority of the comprehensive exhibits of the Pan-American Exposition we see a record in graphic form of what mankind has accomplished upon this hemisphere during the 100 years now completed.

With vision sharpened we look forward with prophetic eye into the mysteries of the future and get, in imagination at least, a glimpse of what the next century is to bring forth.

Can it be possible that the Twentieth century will see an advance in material and intellectual things as great relatively to that of other centuries as the Nineteenth century has witnessed? It scarcely seems within the bounds of possibility, and yet who can say whether even more wonderful discoveries and even more valuable applications of our present knowledge than the past century has given us do not await us in the one now just begun? The Nineteenth century saw the revolution in methods of travel on land and sea caused by the invention of the steam engine; it saw the invention of the telegraph and telephone and electric light; it witnessed the application of electric power to urban transportation methods and to the operation of the wheels of industry generally; it produced great improvements in the fields of medicine and surgery and of education; it gave us inventions in the way of machinery which have completely revolutionized labor for the manual workers of the civilized world and particularly of this hemisphere. To go on and enumerate in detail the features of Nineteenth century progress would require more space than is at my command. But it will not do to forget that great as this progress has been and proud as we have a right to be of it there are tremendous problems of a social and political character yet to be solved. Their settlement during the next century will do much to alleviate the misery yet existing in the world and render happier the millions who will be born, live and die during the next hundred years. It should not be forgotten that many branches of science are yet in their infancy. We have only begun to understand the mysterious force of electricity, and we have not yet succeeded in navigating the air. There are yet many worlds to be conquered by the daring, the inventive and the pioneers of human progress in the forthcoming century.

That the pulse of mankind will be quickened by the great Exposition of all the Americas so soon to be held there is no room for doubt.

No more appropriate time could be chosen for such an Exposition upon the American continent. No more appropriate place than Buffalo and the Niagara frontier could be selected, for it is at this spot, where the cataract of Niagara has been harnessed and science and industry have combined to concentrate all the energies and activities characteristic of the time, that the most fitting assemblage can be made of the things which portray most effectively this progress.

Never before in the history of expositions in either the New World or the Old has such remarkable work of a constructive character been done. Never before did six months show such a wonderful change in the appearance of tract of land as has been worked, without the aid of magic, in the 350 acres which comprise the site of the Pan-American Exposition.

Now that the principal buildings are practically constructed and the whole great enterprise has been thus far run on schedule time it can be seen that

the confidence existing in the ability of the management to open the gates on May 1 upon a completed and perfectly embellished creation is justified. The financial prospects of the Exposition are all that could be desired. The advertising it has received is already bringing forth fruit, and an unprecedentedly large attendance is now as certain as anything can be which belongs to the future.

For a week I noticed the word "panaque" on the bill of fare at the hotel and did not know what it was. There is a brand of wine from one of the Chilean vineyards with that name, and I supposed it was perhaps the same thing referred to, although it was difficult to understand why it should appear among the desserts on the menu at the dinner table and on the bill of fare for breakfast. The best way to find out about such things is to try them, and the next morning, being in an experimental mood, I ordered a "panaque," which, to our amazement, was an ordinary griddle-cake. Then it dawned upon my dull perceptions that "panaque" spelled panake. I called the attention of the head waiter to the discovery, and he seemed quite astonished. He could speak English well and claimed to be familiar with the cuisine of America. Therefore he did not see anything unusual in my discovery, and I rather think he wrote the bill of fare himself, for he remarked in a surprised tone: "What do you call a panake in America?"—(See Chicago's Democrat)

THE SUNNY SOUTH

Fifty Cents a Year Less Than a Penny a Number

THE SOUTH'S LITERARY WEEKLY

Published at Atlanta, Ga.

After a career of more or less activity in the Southern field for over a quarter of a century The Sunny South has again become a weekly, better and more readable than at any time in its history. It contains serial stories from the best known authors the world over. It is devoted to Southern readers and Southern writers and is their own story paper. Short stories, sketches, incidents of war and of peace, anecdotes at home and abroad, poems, ideas, fashions, hints for home keepers, everything of interest to old and young will appear in its excellent weekly make up.

The two great serials, "TRISTRAM OF BLENT," by ANTHONY HOPE (now in progress with full synopsis to cover former installments), and "Rosalynde's Lovers," by Maurice Thompson, to begin April 27th, will be read with absorbing interest throughout the whole South. This is your opportunity, and only 50 cents for a full year of it. Think of it! 50 cents.

Subscription price is only fifty cents a year. No agents' commission. The paper is its own best offer and argument to the subscriber. One sample copy free to you and to your six neighbors whose names and addresses you send on a postal card, provided you send at once. A club of five at 50 cents each, accompanied by the full amount \$2.50 net to us, entitles the sender to The Sunny South a whole year free.

The Sunny South is your old friend in a new form, always improving, every issue to excel the last one. The South's literary paper is here at last. Order it to-day.

The Sunny South in combination with the greatest of all Southern Weekly NEWSPAPERS—The Atlanta Weekly Constitution—both for only \$1.25 a year. Remit that amount to The Sunny South, and get these two great papers—One Literary; the other News.

Going! Going! Gone!!

Going! to advertise sometime in the future will not bring business to you today.

Going!!

to wait until times get better means the missing of many dollars that would come to you now for the asking.

Gone!!!

will be your opportunities if you neglect this important matter and let your more enterprising competitor get ahead of you and stay ahead. Don't wait.

The easiest, quickest and best way to sell anything is to advertise it in THE REFLECTOR. Such an advertisement goes straight to the people, they learn what you have to sell and you reap the benefit.

We have just purchased a large supply of bright and attractive cuts to illustrate REFLECTOR advertisements, and you are at liberty to use them. If you don't know just what you want to say, we will help you get up your advertisement. That is our business, to help you talk to the people.

The cost of an advertisement in THE REFLECTOR is the easiest part.
