WINTERVILLE FOR STATE PROHIBITION.

Winterville, N. C., Jan. 20, 1908

On Sunday evening at 7 o'clock about one hundred of the leading citizens of Winterville and surrounding community met in a mass meeting at the Baptist church. Prof. G. E. Lineberry made one of the strongest temperance speeches ever made in this town. Several other speeches were made also.

The following resolutions were unanimously adopted by a standing vote:

Believing the time now ripe for state prohibition for North Carolina, and believing it the most opportune time for our legislature in special session which convenes Tuesday Jan. 21st, 1908, to thereby enact such a measure;

Resolved 1. That we the citizens of the town of Winterville and community, in a mass meeting Jan. 19th, 1908, do hereby urge our legislators to enact such measure.

Resolved 2. That we feel it our supreme duty to thus inform our senator and representatives from Pitt of our sentiments in this regard.

Resolved 3. That copies of these resolutions be forwarded to each of our representatives from Pitt.

Resolved 4. That a copy of these resolutions each be forwarded to The Reflector and to the News & Observer for publication at once.

Important Meetings Tonight.

Attend the temperance mass meeting in the opera house to night, and remain to the meeting of the chamber of commerce. Both these meetings are important and should have the presence of all interested.

Leading His Greatest Contest

The brilliant paragraphist has tempted to sacrifice many excellent things for liberty to say something that sounds well. Too many of them become flippant and are not careful enough in their references to the motives of good men. For example, the esteemed Darham Herald's brilliant paragraphist in the following unintentionally does great injustice to a good man in this paragraph:

"We do not know what Governor Jarvis wanted but he is being properly advertised for anything that he may ask for."

The inference the average reader will draw is that in his lead in the fight for State Prohibition, Governor Jarvis was animated by a desire to secure some political honor or preferment, though the paragraphist did not seriously intend to make any such reflection. As a matter of fact, Governor Jarvis does not need or desire official position. He could be on the bench if he had desired. He has had the highest political honors the State could confer—Speaker of the House, Lieutenant Governor, Governor, seven years United States Minister to Brazil—enough to satisfy the highest ambitions of any man. Now past three score and ten, still deeply interested in good government, he is greatly concerned for the education and moral betterment of the people who have honored him and of their children and children's children. With no thought of further honors, no unsatisfied ambitions, this old man is leading in his old age a fight that means more for the more welfare of his people and State than any in which he has engaged. His clarion call was heard and heeded in every part of the State, and thousands gladly heard his voice and joined his demand for State Prohibition.

We are sure that the Herald did not intend the reflection contained in the flippant paragraph. It is not only today, in his mature old age, that Governor Jarvis stands for the suppression of the liquor evil. He was Governor of the State in 1881 when the big convention was held that secured the submission of the question of prohibition to the people of the State. He knew at that time that it would be overwhelmingly defeated and yet he spoke in that convention for prohibition and voted for it at the polls when it was defeated by an overwhelming majority.—Raleigh News and Observer.

Good Music.

Prof. J. T. Bailey, of Atlanta, who is to instruct the Aeolian band, came in Saturday evening. Prof. Bailey is a trombone soloist, and on Sunday night he with his trombone and Mr. D. C. James with his clarinet played with the choir of the Baptist church. The music was splendid.

Banks Will Close Earlier.

Beginning on February 1st the three banks of Greenville will begin closing at 3 o'clock p. m. instead of at 4 o'clock as heretofore.

Mrs. T. J. Jarvis with the company of home talent will repeat the play "The Young Mrs. Winthrop," in the opera house next Friday night. There have been numerous requests by people who were prevented from attending before, and even by many who were present, for the play to be repeated.

Important Matters.

Two important things for the chamber of commerce to consider tonight are the establishing of boat transportation and the proposition of the Atlantic Coast Line to discontinue half of the passenger train service on this branch of their system. There should be a large attendance at the meeting which will follow immediately after the temperance mass meeting.

Murderer Brought In.

Today Mr. L. A. Farnell, a police officer of Mystic, Ga., brought in Major Barnhill, colored, and delivered him to Sheriff Tucker. Barnhill is the man who killed Ezelle Chance in this county last fall, and for whose arrest the governor offered a reward of \$50. He was arrested near Mystic last week. The case will be tried at this term of court.

Band Notes.

Don't forget to vote for the teachers.
Gee whiz! All our teachers seem to be popular.

Mr. Sakatsuma, a Japanese who is a graduate of Boston University, delivered an address in Jarvis Memorial church, Sunday night, on customs of his native country and the great work Christianity is doing among the Japanese. His address was very interesting and was heard by a large congregation.

The residence of Dr. Charles Laughinghouse caught on fire, Sunday evening, from a grate. The fire was discovered and put out before any damage of consequence was done and without any alarm being given.

SUPERIOR COURT.

January Term in Session.

The second week of court began this morning. Solicitor Abernethy, who has been troubled with grip, was in the court room but hardly well enough to attend to his duties, and Mr. H. W. Whedbee represented the State for him.

The following cases have been disposed of.

Jesse C. Wilson, removing property, not guilty.

Hillie Taft, assault with deadly weapon, pleads guilty, 8 months on roads.

Sam Bryant, false pretense, nolo contendere, judgment suspended on payment of cost.

Richard Bradley, resisting officer, 60 days on roads.

Tleo Jenkins, larceny, guilty in two cases, not guilty in one case, 8 months on road.

Jim Ennett, failure to list taxes, guilty, 60 days on roads.

Major Barnhill was arraigned on the charge of murder and the case continued.

Government by Commission.

Virginia cities are turning to the Texas plan of municipal government. Some weeks ago the common council of Lynchburg adopted a committee report favorable to it. The Staunton council has adopted a similar committee report except that according to The Richmond News Leader, the Staunton proposition goes further than it has been carried in Texas. It "recommends that the control and management of the city's executive and administrative affairs be placed in the hands of one man, to be selected by the council, to be known as general manager, to be adequately paid and to give his entire time and thought to the city's service." And our contemporary says "a plan looking to the same general end but following more closely the methods of the Texas cities is under serious consideration in Richmond."

Municipal government by commission has proven successful wherever it has been inaugurated, even in so large a city as Des Moines, Iowa. The idea is spreading and it would not be surprising if the near future should witness its general adoption in the towns of the country and the cities also, excepting those of great size.—Charlotte Observer.

Opposed to Taking Off Trains.

We hear many people here and at points both sides of Greenville express disapproval of the movement of the Atlantic Coast Line to discontinue the midday passenger train on this road. This train is used by many people traveling and to discontinue it would result in great inconvenience. Those opposed to taking off the train should lodge their objections with the State corporation commission.

Go to the opera house early tonight, as the meeting will begin at 7.30 o'clock.

The early bird catches a cold starting the furnace.

Talking about grip, just suppose we had Chicago's 650,000 cases.

The legislature and the prohibitionists have got their faces turned towards Raleigh.

The only safety in going hunting is to go alone. Even then there is danger of shooting yourself.

From the way the attorneys for the defense are talking, the Thaw family must be a crazy bunch.

With the court room closed against the newspaper men there may be less of the Thaw trial to read. The public will be better off.

President Roosevelt owes his position largely to Secretary Cortelyou, but that did not keep him from going back on the latter.

If the members from Forsythe, Rowan and New Hanover are going to want any when they get to Raleigh, they had better take it along with them from home.

Ever since it had existence somebody has been jumping up with the alarm that so and so will kill the Democratic party. But the party is not so easily killed and continues to do business.

The Democratic party of North Carolina will not suffer half as much by the special legislature passing a prohibition law for the State, as it will if the legislature fails to pass such a law. The people want prohibition, and the party will entrench itself more strongly with the people by enacting prohibition at the very first opportunity.

In a few days one of Charlotte's building and loan associations will pay the handsome sum of \$78,000 to its shareholders. Last fall when the avenues for borrowing money were closed for the time being the same association loaned \$123,000 to the people of Charlotte. Building and loan associations are the best financial institutions a town can have.

The first North Carolina district has not had an abler and more faithful representative in congress than Hon. John H. Small. He looks well after the interests of his district and much has been accomplished through his efforts. It has been frequently said of the South that because of its disposition to change congressmen it never let a man stay there until he gained sufficient influence to accomplish much for his section. And this district is going to make a mistake when it sets about to displace Congressman Small with a new man.

WHO'S WHO AND WHY

Who made the best crop in Pitt County during the year 1907

EVERYBODY admits that this has been a bad crop year and as a whole it has been, but some planters had bounteous yields in return for their labours.

Why because they used Cotton Seed Meal as a Fertilizer.

DR. BONSTEEL of the Bureau of Soils of the U. S. Department of Agriculture in his address to the planters of Pitt county strongly advised its use, stating that as a fertilizer stable manure was the best adapted to our soil and the next best was cotton seed meal.

WINTERVILLE MEAL IS THE BEST OF THE "NEXT BEST"

IF you did not use it last year inquire of someone who did and you will try it in 1908.

WE will buy your cotton seed and sell you meal at reasonable prices, or we will exchange Meal for Seed on a liberal basis delivering the meal at any railroad station in the county.

SACKS furnished to seed shippers upon request.

WRITE or telephone us at once how many seed you have, what station you can ship from and whether you wish to sell for cash or exchange for meal. All enquiries will have prompt attention

There is nothing better offered the public today for stomach troubles, dyspepsia, indigestion, etc than Kodol. A tickling cough, from any cause, is quickly stopped by Dr. Shoop's Cough Cure. It calms the cough, and heals the sore and sensitive bronchial membranes. No opium, no chloroform, nothing harsh used to injure or suppress. Indigestion
Stomach trouble is but a symptom of, and not in itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific Nerve sickness--nothing else.
It was this fact that first correctly led Dr. Shoop in the creation of that now very popular Stomach Remedy--Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had. For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative--Tablets or Liquid--and see for yourself what it can and will do. A Fable of the Future.

In 1920 A. D. the Stingiest Man in Stringtown carted his Household Goods to the Depot and bought a ticket for Millionville, the Metropolis.

"Why are you moving to Millionville?" inquired a Citizen.

"To save postage," replied the Stingiest Man. Whereat the Citizen marveled mightily.

Now, be it known that the Stingiest Man in Stringtown was wise in his Day and Generation, for along back in 1907 A. D. or thereabout it became the Settled Habit of the Stringtown people to purchase Large Sheets of Little Stickers bearing portraits of G. Washington, B. Franklin, W. McKinley and other Late Illustrious Ones, which Specimens of Art they straightway stuck on envelopes and sent to a Large and Luring Mail Order Concern in Millionville. Wherefore it came about that the Seven Stores in Stringtown Shut up Shop, one after the other, until along in 1919 A. D. the Stingiest Man found it incumbent upon him to begin purchasing these Small Specimens of Art to present to the Maw of the Monster in Millionville, and the Aforesaid was Simply too Stingy to stand for the Same.

MORAL: If you can't see the Moral without being Missouriified, look up the Ad. of an Oculist in this Paper and purchase a Pair of Specs.

Leap Year Proposals.

What woman has ever availed herself of the privilege of proposing in leap year? Nevertheless, it is interesting to discover whence the idea arose. "Her maist blestie Margaret" decreed in the year 1288 that during her reign every maid of Scotland, whether of high or low degree, should speak to the man she loved. If he were not betrothed already he must marry the maid or pay £100. Queen Margaret died, and the women were then clamorous for this strange privilege to continue. To appease them an act of parliament was passed allowing the maidens to make their proposals every fourth year.—London Graphic.

London's Lord Mayor.

A London paper reports that it costs the corporation of London about \$90,000 a year to maintain the pomp and glory of the lord mayor's office. The lord mayor gets \$50,000 a year salary, new furniture for each incumbent costs \$500, and the robe supplied to each newly elected official is worth \$1,000. The rates, taxes and tithes payable on the Mansion House total \$10,000 a year, and other incidental expenses bring the annual cost of the office up to \$90,000.

Defined.

Naggsby—Borum has quite a logical mind, don't you think so? Waggsby (who has spent an entire evening with Borum in a vain effort to get a word in edgewise)—Yes, monological.—Chicago News.

Placing the Value.

Edward Everett Hale was one of the guests at a New York millionaire's dinner. The millionaire was a free spender, but he wanted full credit for every dollar he put out. And as the dinner progressed he told his guests what the expensive dishes had cost. "This terrapin," he would say, "was shipped direct from Baltimore. A Baltimore cook came on to prepare it. The dish actually cost a dollar a teaspoonful." So he talked of the other courses. He dwelt especially on the expense of the large and beautiful grapes. He told, down to a penny, what he had figured it out that the grapes had cost him apiece. The guests looked annoyed. They ate the expensive grapes sparingly. But Dr. Hale, smilingly, extended his plate and said, "Would you mind cutting me off about \$1.87 worth more, please?"

How the Japs Pull Teeth.

The Japanese dentist does not frighten his patient with an array of steel instruments. All his operations in tooth drawing are performed by the forefinger and thumb of one hand. The skill necessary to do this is acquired only after long practice, but when once it is obtained the operator is able to extract half a dozen teeth in about thirty seconds without once removing his fingers from the patient's mouth, says Home Notes. The dentist's education commences with the pulling out of pegs which have been pressed into soft wood. It ends with the drawing of hard pegs which have been driven into an oak plank with a mallet.

This Life of Ours.

Children will awaken in the night and cry for a long time without apparent cause. Not even the reassuring caresses of the mother will quiet them, and they continue to sob after they have fallen asleep again. Is it because they realize in their dreams what they are coming to? what a miserable, cheerless life they will lead as men and women and how soon they will be forgotten after they are dead? We have never known a man or woman who did not deserve pity for some reason.—Aitchison Globe.

Cautious Girl.

The modern Romeo leaped from his red fier and climbed the vine covered balcony. "Who in the world is that in there with a clothespin on his nose?" gasped the youth. "Pa," laughed the beautiful girl, "and I attached the clothespin." "Why?" "To prevent him from detecting the odor of gasoline emanating from your machine." Resourceful girl! The next minute they were speeding toward the parsonage, while poor pa lay dreaming of a giant clam that was clamping his proboscis.—Chicago News.

A Number Guessing Puzzle.

Tell your friend to think of a number; multiply by 6, divide by 3, add 40, divide by 2; then let him name the result, and you can tell him the number he thought of. The method is: Multiplying by 6 and dividing by 3 gives twice the number. Add 40, and you have twice the number plus 40. Divide by 2, and you have once the number plus 20; hence if you subtract 20 from the result he gives you you will have the number he first thought of.

PERSPIRATION.

The Important Functions of This Watery Secretion.

The perspiration is a watery secretion of certain curiously coiled glands in the skin. It used to be thought that it served a useful purpose in removing waste matters from the system, and there is no doubt that it does so in a measure, but it cannot compare in this respect with the secretion of the kidneys. Indeed it is ninety-eight and eight-tenths parts water, and the solid part is chiefly chloride of sodium, which gives it the well known salty taste. Its function is to moisten the superficial layer of cells in the skin and so facilitate their removal. But its chief use is believed to be to regulate the temperature of the body and prevent, by evaporation, excessive and dangerous heat.

The quantity secreted depends much upon the temperature of the air, exercise and the amount of fluid drunk. But it averages between thirty and forty ounces a day.

It varies in inverse proportion to the secretion of the kidneys. The secretion is constant summer and winter, day and night, but ordinarily evaporation keeps pace with it, and it does not appear as moisture on the skin. This is called the insensible perspiration, while that visible as water is called the sensible perspiration.

It is decreased in amount in certain diseases, such as diabetes, in which the kidney secretion is enormously increased, and in ichthyosis, a dry, scaly disease of the skin.

Increased perspiration may be purely nervous in origin, as seen in the beads on the forehead of one who is embarrassed, or the cold sweat of fear or some other powerful emotion. In some cases the increased perspiration is localized in the hands and feet. If this is an expression of general weakness, tonics and good food may correct the condition, but usually local treatment is called for. Immersing the palms of the hands or the soles of the feet in water as hot as it can be borne for about five minutes and then, after drying, dusting them with very finely powdered boric acid is often of great service.

The moist hand may be kept dry by frequent application to the palms of a saturated solution of boric acid in cologne water.

The perspiration that occurs at night in consumption and other diseases, accompanied with hectic fever, is often very distressing. The quantity of water exuded is sometimes enormous, soaking not only night clothes, but the entire bedding and mattress. If the patient's condition will permit, a hot bath of four or five minutes' duration at bedtime will sometimes prevent or lessen night sweats. If this is not permissible, sponging with hot vinegar and water may be tried. A glass of milk and half a dozen crackers taken at midnight will also occasionally be found useful.—Youth's Companion.

A Child's Dictionary.

The late Frederic R. Coudert, the noted lawyer and wit, had a great fondness for children. He collected indefatigably the quaint sayings of children, and one of the treasures of his library was a small manuscript volume called "A Child's Dictionary," and these are some of the definitions that Mr. Coudert would read from it:

Dust—Mud with the juice squeezed out of it.
Snoring—Letting off sleep.
Apples—The bubbles that apple trees blow.
Backbiter—A mosquito.
Fan—A thing to brush the warm off with.
Ice—Water that went to sleep in the cold.—Boston Herald.

The Business of Sympathy.

One of the most valuable items of one's social stock in trade nowadays is sympathy. A little goes a tremendously long way, and the great advantage is that it need never be real. People never stop to think whether the seeming interest in one's illnesses, the sorrow for one's domestic worries, the interest in one's long string of woes and worries, is simulated. Nor do I honestly believe they really care. The majority of folk just want a listening ear and a fuss for the time being.—London World.

Willing to Exchange.

The man who had purchased some currant buns at a bakery was distressed on starting to eat one to find that it contained a fly. Returning to the bakery, he made an indignant complaint, demanding another bun in place of the inhabited one. "I am sorry, sir," said the saleswoman. "I can't give you another bun, but if you will bring me back the fly I will give you a currant for it."—Kansas City Independent.

The finest coffee substitute ever made, has recently been produced by Mr. Hoop, of Racine, Wis. You don't have to boil it twenty or thirty minutes. "Made in a minute," says the doctor. "Health coffee" is really the best coffee imitation ever yet produced. Not a grain of real coffee in it either. Health coffee imitation is made from pure toasted cereals or grains, with malt, nuts, etc. Really it would fool an expert—were he to unknowingly drink it for coffee. J. E. Hooker & Co.

The disposition to grumble produces a condition which inspires general dissatisfaction.

TO MY FRIENDS.

Having been away for several months I wish to announce to my friends and patrons of the "empire" of Pitt that I am still connected with the firm of Chas. M. Steiff, and if bachelors are allowed to misuse the happy term home as a synonym for a "hanging out place" I still call Greenville my home, and while I intend to be away from Greenville a great deal of my time during this fall a postal care of box 325, Greenville, will reach me within a day or two. We now have a number of slightly used upright pianos, some of which have been rented during the summer months, others which were temporarily used by artists at the exposition and for orchestra work, at bargain prices.

We also offer a special school piano for \$225.00 fully measuring up in standard to any \$350.00 instrument. This piano is especially built for college and school work for the special price named above and is full guaranteed by my firm for 10 years. Those interested in a school piano or in a good slightly used piano for the home should write me at once and will profit by it, and as ever I am always mindful of my patrons' protection and interest as well as my firm's interest. Grateful of past patronage. Very respt., G. G. Fineman, Box 325 Greenville, N. C.

A FIELD AND A GARDEN.

Wide Difference in the Emotions to Which They Give Birth.

Nobody ever became suddenly fond of a field. It is the great difference between a field and a garden that no one could do so. Almost anybody may take up gardening and become fond of a garden quickly, but a field is different. The beauty of a garden, or at least some of the beauty, is so easily seen; the pageant of colors and scents is so varied and so soon past; the flower borders are always so near at hand and within limits so obedient that a garden may become the most sudden and the most commanding of hobbies. But a field is not to be known so quickly. Its friendship cannot be had in a year nor even in a few years. But it is a friendship which once given ends only with the life of the friend. An hour in a flower garden is like a conversation with a happy and a charming companion. But a morning in a field is like a walk with one of those friends who are so completely understanding and understood that conversation is needless.

The beginning of knowledge of a field is the feel of the actual earth—the solid soil of it under foot. You cannot come to real terms with earth in a flower garden, though you may find out something with a spade, and perhaps you cannot reach the best of all knowledge of a field without plowing it. But you can begin an acquaintance on a field newly plowed or, better still, being plowed, and the first and best knowledge is the touch of the crumbling furrow, an extraordinary sense of bounty. In a garden you cannot rid yourself of a certain uneasiness, almost a fear of trespass, if you step on a flower border or even if you walk over a vegetable bed in the kitchen garden. The gravel path awaits you, clean and yellow, and the only possible scraper is the box edging. But a field is a field, to be crossed with confidence and stamped about with heavy boots. Shoes are no use. You must have great boots, with nails in them, tough and secure over slippery furrows. Every season, almost every month, changes the surface of that solid, restful floor.—London Spectator.

Carbonic Acid Springs.

In the Auvergne region of France a large amount of carbonic acid gas comes from the soil and is one of the last traces of the former volcanic activity of this region. The springs that yield the gas are found generally in the fissures of the ground which allow the water to rise. One of the Montpensier springs has become known as the "poisoned spring." Animals which descend to the cavity to drink are soon asphyxiated by the gas which is given off by the water and accumulates here. Bodies of birds, rabbits, dogs, sheep and other animals are found, and even persons have narrowly escaped. Vegetation is also affected by an overdose of the gas. Spots can be seen running in a line across the fields, where the plants have suffered from gas coming up through the fissures of the ground at different points. Soundings show the presence of a great quantity of gas, and it is usually in a very pure state.

A Timely Warning.

Mr. H. was recently presented with a handsome revolver, whose qualities he was testing by firing blank cartridges into the air, when his daughter, Natalie, aged six, appeared upon the scene. "Oh, papa," she exclaimed in great distress, "don't shoot at the sky! You might kill an angel!"—Circle.

Clothes and Seasons.

Like the blessed wild goldfinch, who sometimes stays with us all winter; I feel a stirring ere February is out to shed the gray outward disguise my soul has all along been wearing and to come forth in bright aureate splendor of full summer plumage. I wish to wear a green kirtle when the grass burns emerald and even the sunset skies assume chrysoprase. In the winter were it not for startling the good folk I would go everywhere in the hibernal attire of the wise little ermine. In autumn—no; there the analogy stops—I would not array me in carmine or imperial orange, though nature is thus minded to do. In the autumn, even in the late summer, a psychic revulsion from this rule of sympathetic or protective coloring is experienced.—Atlantic.

Surprising.

"I suppose your husband gave you a little surprise?"
"Oh, yes. He came home before midnight."—Houston Post.
