

An additional year has been added by the Pitt County Board of Education to its Reading Circle course. It now covers four years. The system is one of the best ever introduced into the educational cycle. Influences of good reading cannot be estimated in benefit upon both the juvenile and adolescent minds of school children. At these periods children are absorbing tastes and habits that will stick thru life. No better system could be employed in forming and building

character than through the medium of instructive and interesting literature.

The board, Superintendent Fitzgerald and his assistants are certainly forwarding an outstanding movement in the direction of higher education. In every school child there is a latent spirit of emulation. The certificates that reward the successful completion of the course has not only a stimulating effect upon pupils, but unconsciously de-

velops discriminating preference for all that is best in books, periodicals, etc.

New ideals are created, new enthusiasm is instilled, vision is broadened, while effect as a unit of transcendent benefit and importance is uplifting and salutary. The board and Superintendent Fitzgerald are to be commended for this fine foresight.

WEATHER

Fair tonight and probably Saturday warmer. Gentle westerly winds.

GREENVILLE, N. C., FRIDAY AFTERNOON, JUNE 15th, 1923.

Stamboulisky Is Slain In Escape Dash; End Bulgaria Revolt Seen

SOFIA, June 15.—Former Premier Stamboulisky of Bulgaria has been killed while trying to escape, it is authoritatively reported today. Semi-official announcement states that perfect order is expected to be restored throughout the country without further trouble.

Stamboulisky started for Elishing-tza in an automobile, disguised as an army chauffeur. He had shaved off his moustache. When he and his party arrived at Pierdop, his four remaining followers were captured or killed by the troops and the automobile in which they were traveling was seized.

During the fighting Stamboulisky escaped and plunged into the forest. He knows perfectly the country where the troops are pursuing him. Ivan Rousseff, the new Minister of the Interior, had issued an order for the capture of Stamboulisky. He was to be taken alive, if possible, when the courts will settle his fate.

A sensation has been created by the discovery in the archives of the National Bank that Stamboulisky last March cashed a check for 120,000,000 leva, the sum having been authorized at a secret meeting to these members of the cabinet. The purpose of the expenditure was not designated, beyond the statement that it was for the security of the state.

LONDON, June 15.—A Bulgarian semi-official agency here, announced the death of Stamboulisky today and added that he was killed during a fusillade of bullets after a party of armed peasants had attacked the car in which he was riding through the village of Slavovitz.

Overman Expects Ship Liquor Ruling To Be Solved Soon

WASHINGTON, June 15.—"I hope through diplomacy and by treaties we may come to a satisfactory settlement of the troublesome question involved," Senator Overman, North Carolina, ranking Democratic member of the judiciary committee, declared regarding the question of liquor aboard foreign ships in American harbors.

"That, of course, means a settlement that does not interfere with the Constitution and is not contrary to the 18th Amendment. I am not prepared at this time to express an opinion as to whether Secretary Hughes' suggestions are within those limitations. I further hope that the British House of Commons will not pass the bill aimed to compel American ships entering the ports of that country to carry liquor. Our people are not to be abused by any such tactics."

MOOSE HOLD MEETINGS

GREENSBORO, June 15.—Two hundred persons, members of the Tar Heel Mooseheart Legion, a part of the Loyal Order of the Moose, gathered here from many parts of the State for their semi-annual meeting and ceremonial.

FARM EXTENSION WORK IS TRANSFERRED STATE COLLEGE

RALEIGH, June 15.—Removal of all educational features of experimental and extension work to the administration of State College, and the appointment of Dr. B. W. Kilgore, now director of extension work for the state board of agriculture to be Dean of Agriculture at the college was unanimously agreed upon by the Joint committee on Extension at its session here.

Distribution of the experimental and extension branches of work now administered jointly by the college and the department will be made by a committee composed of President E. C. Brooks, Commissioner W. A. Graham and director B. W. Kil-

CALLS CARELESSNESS BIG 'NATIONAL SIN'

Emphasizing that great property loss could be averted and many lives saved by practicing "safety first" fire prevention Mrs. J. G. Fearing, State Insurance department, division of safety, addressed members of the faculty and students of the East Carolina Teachers College yesterday.

Mrs. Fearing attributed the greatest losses to negligence which she described as a "national sin." She declared that habits were fixed early in life, and for that reason youth should be taught good habits and obedience to high ideals. She urged the students when they started their work of teaching to instill into pupils the value of "safety first" and to fight against the habit of carelessness if it appears in the school room.

Six million dollars worth of property was destroyed by fire in North Carolina and 337 lives sacrificed, last year, Mrs. Fearing declared. She stressed the importance of constant co-operation of teachers to help in the campaign to reduce the life hazard and property damage by keeping before pupils the danger of carelessness.

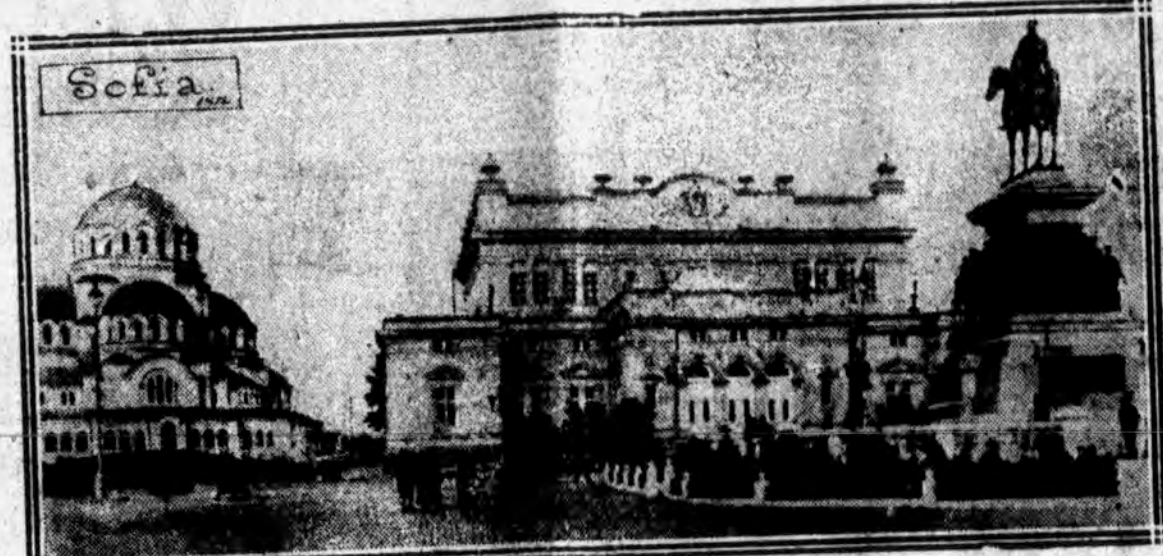

A prize winning essay "A Terra Cotta Flue," written in negro dialect by B. E. Moore, Jr., student of the New Bern high schools was read by Pauline Deans, 11 years old, of Elizabeth City.

Score Methods of Ohio Dry Officials

WASHINGTON, June 15.—A charge that prohibition officers in Ohio have resorted to "terrorist methods scarcely exceeded by the Communists regime in Russia," was made in a statement issued by W. H. Stanton, board of the Association Against the Prohibition amendment.

The statement quoted from a letter written by Dwight Cusick, a New Lexington lawyer, declaring that in Perry county search warrants had been used improperly, householders had been mistreated at the least protest, and those who showed dislike for prohibition had been imposed upon by the "planting" of evidence and in other ways. In Summit county, Etayton said, a state examiner's report showed there had been much abuse of authority.

TERROR REIGNS IN BULGARIAN CAPITAL

It is reported that 100,000 Bulgarian peasants are preparing to attack Sofia, the capital, to turn out military regime which has seized the reins of Government. This photograph shows a view of Sofia with the Houses of Parliament, the Church of St. Nicholas of Neski and a monument to a former ruler.

THREE CHILDREN OF HAYES FAMILY DIE WITHIN WEEK

Doek Manning Hayes, 7 years old, and Susie Lee Hayes, 11, son and daughter of Mr. and Mrs. J. M. Hayes died at their home near Bruce this morning, the little boy's death occurring at 4 o'clock and the little girl's at 9 o'clock. The second child, Amanda, aged eight years, died last Wednesday night. All three died with dysentery.

Immediately after the death of Amanda the body was brought to Greenville to await the outcome of the illness of the other two children. Physicians, at the time, entertained little if any hope for their recovery. Mr. and Mrs. Hayes, are from Pelham, Ga., but Mr. Hayes has been in this county for several weeks. He is employed by the White-Mitchell

Construction company. They only had the three children and their deaths leave them not only childless but heart broken. They with the bodies of the children, will come to Greenville this afternoon. Mr. Wilkerson will take the bodies to his undertaking parlors to prepare them for burial, while the parents will go to Mr. and Mrs. Frank Mitchell's home on Fourth street. They will leave for their home in Georgia tomorrow afternoon where burial will take place.

This is one of the saddest events ever happening in this county and the sympathy of the entire community goes to Mr. and Mrs. Hayes in their great sorrow.

Medical Subjects Talked at Meeting Tri-County Society

Subjects of vital importance to medicine and surgery were discussed at a meeting of the Tri-County Medical Society last night held in the Rotary Home. Dr. H. W. Dixon, Ayden, led the discussion on "Purepral Eclampsia." He dealt at some length on various phases of the topic. Others who participated in the discussions included Doctors Swindell, Washington; Saunders, Williamston; Frizzelle, Ayden; McLean, Washington; K. B. Pace, Greenville; J. Nicholson, Washington; Riddick, Ayden. The society is composed of physicians of Pitt, Beaufort and Martin counties.

Dr. C. O. H. Laughinghouse, delivered the address of welcome.

These officers were elected: President, Dr. J. C. Greener; Vice-President, Dr. H. W. Carter, Washington; Secretary, Dr. William Warren, Williamston.

The next meeting will be held in Washington in September.

Brothers Acquitted of Murder Charge

FAYETTEVILLE, June 15.—Gus and Mann Pate, well known young farmers of Gray's Creek township, charged with killing George Marsh, negro preacher, and farm hands and wounding W. B. Coates, wealthy landowner, yesterday morning in a pistol battle that followed Pate's refusal to allow Coates to enter their barn, were freed by a coroner's jury here.

The jurors after hearing the evidence as to the killing of Marsh, returned a verdict of justifiable homicide. No testimony was taken by the coroner in the shooting of Coates as his wounds are not likely to prove fatal.

Goldsboro Klan Holds Ceremonial

GOLDSBORO, June 15.—Probably 2,000 members of the Ku Klux Klan, some from as far west as Asheville and as far south as Atlanta, according to cards displayed by leaders paraded the Main streets of Goldsboro last night garbed in the regalia of their order, while thousands of curious people in varying moods, lined the curbs, some applauding but the majority remaining silent.

MAN 35, SLAYS SWEETHEART 14, HER MOTHER, KILLS SELF

HONOLULU, June 15.—Angered because the mother of his 14-year-old sweetheart refused to permit her to marry Pomo Crisco, 35, Filipino, shot and killed the girl and her mother today. He then seriously wounded the girl's father and her 12-year-old brother. He completed the shooting by killing himself.

Chamber Commerce Told How to Move Fall Crops Fast by A. C. L. Officials

COTTON AT TOP PEAK OF CONSUMPTION

WASHINGTON, June 15.—Cotton manufacturing was at top-notch capacity during May, consumption of lint cotton having been 620,956 bales exceeded only once before in the history of the industry. Consumption was about 43,000 bales more than in April of this year and 125,000 bales more than in May of last year, but it was 2,140 bales less than the monthly record consumption attained in March this year.

Consumption in cotton growing states for May established a record indicating growth of the manufacturing industry in that section. Consumption in that region totalled 392,575 bales or 500 bales more than the record consumption in March.

Fewer spindles were operated in the country as a whole in May as compared with the record month of March, but in cotton growing states the number operated established a new record of 16,089,463.

Baraca-Philathea Meeting Underway

KINSTON, June 15.—Preceded by a meeting of the executive committee during the day, the annual convention of the North Carolina Baraca-Philathea union got under way here last night, the opening session being held at Gordon Street Christian church, which has large organizations of Philathea and Baracas. Hundreds of delegates are on hand for the convention representing classes in hundreds of North Carolina cities and towns.

Dempsey Slips Hard Blows to Trainers

GREAT FALLS, Mont., June 15.—With a terrific left hook to the chin, Jack Dempsey today knocked out Jack Burke, a Pittsburgh heavyweight, making the heavyweight champion's second knockout victim in two days since he resumed boxing after a week's layoff.

Reeves Finds Real Weevil Specimens

County Agricultural Agent R. B. Reeves, recently forwarded to Prof. Franklin Sherman, state entomologist, specimens of weevil. Sherman advised Reeves today, they were the real boll weevil type, and adds, they were the first specimens received as far north as Greenville, "though I have received them from many points to the south."

Proposed to Reduce Virginia Dry Force

RICHMOND, VA., June 15.—Early reduction of the Federal prohibition force operating in Virginia to meet the recent order of Director Haynes that expenses of the department must not exceed the Congressional appropriation for enforcement of the Volstead Act, is announced by Director R. A. Fulwiler.

H. L. King, general agent, Atlantic Coast Line, Norfolk, and C. M. Cobb, superintendent, addressed the monthly meeting of the Pitt County Chamber of Commerce last night, pointing out how fast freight movement of fall crops could be obtained by co-operation of Pitt county shippers.

King explained to avoid the possibility of a car shortage at the height of fall shipments, that fast unloading and re-loading of box cars to capacity would greatly expedite freight movement. If that rule was observed by county shippers, traffic would be kept moving constantly and the usual cry of car shortage would be largely obviated, he said.

Various other matters discussed at the meeting included: Labor emigration situation; selective emigration from Denmark, Sweden, Norway, Switzerland; interesting settlers of the northwest in Pitt county; custom hatchery, increasing capacity to 10,000 chicks; permanent pastures and feed; purebred live stock, etc.

Importance of Hatchery. Of all the projects talked, it is fair to assume that the establishment of a large hatchery will be among the first things that the body will undertake. It is felt appreciated that sufficient breeders lay the foundation of the poultry industry, and its value in money return, not only to flock owners but to the community, has long since been proved.

Messrs. Keel and Levy, local representatives of the Coast Line also attended the meeting.

Some of the general matters discussed by King, which have local application, were:

"By loading cars to capacity and by loading and unloading them promptly the movement of freight can be speeded up and considerably better service rendered the public. The railroads are spending for new equipment and improved facilities this year, \$1,100,000,000, of which \$24,000,000 will be spent by the Atlantic Coast Line. The railroads pledge their best efforts for continued and increased efficiency and economy of operation and ask for the same fair chance to work out their own salvation that any other legitimate business in this country has a right to expect."

"Present indications are that on the basis of a weeks movement of freight the peak movement next fall will exceed the peak of any previous year by more than 60,000 cars. The railroads hope to have in service by the end of this year the 223,616 new freight cars and 4,219 new locomotives ordered by them between January 1st, 1922 and March 15th, 1923, King said. In addition, the roads are making an effort to reduce to a minimum the number of bad order freight cars and locomotives awaiting repairs."

A. C. L. Orders New Equipment

"The Atlantic Coast Line has ordered 5,331 new freight cars, enough to make a train 40 miles long, and 98 new locomotives of the latest type, while the Fruit Growers Express has taken steps to acquire 2,877 new refrigerator cars which will bring the total refrigerator cars owned by that company up to 14,087. The railroads realize their own obligations to the public and will be able to provide adequate transportation, if not prevented from doing so by legislation or restrictive regulations."

Chinese President Denies Resignation

LONDON, June 15.—Li Young Hung, has issued a statement from Tientsin repudiating his resignation as president of China. He asserts his action was taken under duress, a special dispatch from Peking says.

DO YOU KNOW THAT

Optimism will replace distrust and misunderstanding with confidence and faith. BE AN OPTIMIST.

CREDIT IMPROVED BY ADVERTISING

There is one way by which a business man's credit is improved, and that is by a policy of consistent advertising. Bankers believe in advertising, for they know it pays.

Discriminating buyers of every class know they can get fresh goods from the STORE THAT ADVERTISES. The MERCHANT WHO ADVERTISES SELDOM HAS SHOP WORN GOODS.

THE LIVER NEW FOUNDATION OF LOVE

Now comes one of our eminent Pitt County physicians who informs us that the real foundation head of love is not the heart but the liver.

That's information really worth while. This medical authority declares that scientific data shows that those with well ordered and healthy livers are ardent lovers, while disordered livers renders their possessors cold and repulsive.

Now that we have learned that the heart has nothing to do with love, naturally we will have to change our endearing greetings in speaking of our "sweethearts," and now say our "SWEETLIVERS."

It is suggested that some of our Greenville young men hesitate before trying it out on their best girls.

COUNCIL OF CHURCHES PROTESTS

The renewed attack of the Council of Churches, in which are included not merely evangelical Protestant churches, but Roman Catholic and Jewish, upon the 12-hour day in the still mills cannot be ignored.

The Council declares that the recent report of the American Iron and Steel Institute in opposition to cutting down the 12-hour day at this moment "shatters public confidence that was inspired by the creation of the committee a year ago at the request of the President of the United States."

Dr. Harrison Howe, Washington, D. C., chairman of the committee on work periods of the American engineering societies, declares that the eight-hour day is not only practicable, but that the profits of iron and steel concerns which introduced it have not been diminished by the change.

Dr. Howe asserts that no country in the world can compete with the United States in iron and steel. He says the United States Steel Corporation can produce pig iron at \$2 a ton less than its competitors. Labor is only 5.8 per cent to 8 per cent of the total manufacturing cost.

Fifty per cent of the work at the Birmingham, Ala., steel mills is down on an eight-hour basis.

THE PLAYTHINGS OF YESTERDAY

The airplane, the object of experimentation and admiration since the days of its adaptation to practical uses, seems about to lose some of the romance which has surrounded it by being compelled to carry the white man's burden.

A few days ago it was announced that an official of the American Railway Express company was negotiating for proposals to carry packages of merchandise and other articles between the Atlantic coast and Chicago. The plan, ostensibly, is to establish a trunk or through line of service which will be fed by the sections adjacent to the terminals, thus making the service available to many millions of people.

Almost simultaneously came the announcement that ambitious publishers are planning to deliver the edition of their daily papers by airplane to subscribers to summer resorts and camps.

These undertakings probably are only forerunners of like enterprises which will be fostered and encouraged if this success is assured. Through the trackless air, by day and night, there no doubt soon will be speeding, in sections and relays, the broad-winged ships of commerce.

Man is availing himself of the once-hidden and unknown natural forces. He plans to harness the water power of the continent. He is perfecting a device for obtaining power from the air. He talks half way round the world and receives an answer almost in the twinkling of an eye. He rides above the mountains and valleys and spans a continent in a day.

Only yesterday the first locomotive thundered along at a speed of 12 to 15 miles an hour.

Will the future generations look back upon the age of the airplane and also smile?

NOTICE OF SALE OF LAND.

By virtue of power vested in the undersigned by that assignment executed to by John I. Smith, assignee, to J. M. Hines, mortgage, made on the 4th day of July 1922, and recorded in the Register's office for Pitt county in Book A-15, at page 369, and by virtue of power that was vested in J. M. Hines in that mortgage which was executed to the said Hines on the 23rd day of November, 1920, by T. C. Sutton and wife, Rosa Sutton, and recorded in the Register's office for Pitt county in Book K-13 at page 504, the undersigned will, on Monday, the 18th day of June, 1923, offer for sale at public auction, to the highest bidder for cash at the court house door in Greenville, the following described parcels of real estate, lying, being and situate in Chicod township, in the county of Pitt, and state of North Carolina, to-wit:

FIRST TRACT - Lying on the west side of the Greenville and New Bern road, bounded on the north by the land of Tom Sutton, on the west by W. B. Haddock, on the south by Richard Sutton, and on the East by the Greenville-New Bern road, containing 11.9 acres, more or less.

SECOND TRACT - Also one other piece on the east side of the Greenville-New Bern road bounded on the east by the lands of Jesse Haddock, on the north by the lands of Jesse Haddock, on the south by the lands of Tom Sutton, on the south by the lands of J. D. Williams, and containing 39 acres, more or less.

THIRD TRACT - Also one other piece or parcel of land on the west side of the Greenville-New Bern road, bounded on the north by the lands of W. L. Smith, on the west by W. B. Haddock, on the south by Fred Mills, on the east by Johnnie May and containing 39 acres, more or less.

FOURTH TRACT - Beginning at a stake on the Greenville-New Bern road Claude Sutton's corner; thence with his line north 82 1-2 west 52 poles to this corner, a stake on the ditch on the west edge of Horse-Pen Branch; thence with Wm. Haddock's line to the corner of Jack Sutton, thence with Jack Sutton's line to the Greenville road; thence with said road to Joe beginning, containing 11.9

acres more or less. This May 19th, 1923. GREENVILLE BANKING & TRUST COMPANY, Assignee of John I. Smith, Assignee of J. M. Hines, Mortgagee, Albion Dunn, Atty. 22 1tw 4w

NOTICE OF EXECUTION OF SALE

By virtue of the power vested in me by that certain judgment which appears of record in Judgment Docket 26, at page 159 it being Judgment No. 525, and by the power of sale contained therein, directing me to sell the property hereinafter described, and said judgment being dated January term 1923 of Pitt superior court, I, A. C. Jackson, the undersigned, Sheriff of Pitt county will expose to public sale for cash to the highest bidder before the court house door in the town of Greenville on Monday, June 25th 1923 at twelve o'clock noon the following described real estate to-wit: The same being situated in the Town of Ayden, Pitt county, and State of North Carolina, and more particularly described as follows: the same being the property on which and in which John C. Humphrey and wife, Appie Humphrey now lives. The same being the property on which and against which the plaintiff A. L. Jackson filed a material furnishers lien, which said material furnishers lien appears of record in lien book No. 1, at page 472 the same consisting of a house and lot and the same being lots No. 14, 16 and 18 of the division of the A. L. Harrington property in the town of Ayden and is contained in map book No. 1 at page 109 and which said property was owned by F. F. Eure, S. A. and J. B. Eure to Appie Humphrey and the same also being the property on which L. T. Robinson filed a laborers lien which said laborers lien appears of record in the office of the clerk of the superior court of Pitt county in lien book No. 1 at page 461 said sale being made for the purpose of satisfying the material furnishers lien set out and described in that certain action wherein A. L.

Jackson was plaintiff and J. C. Humphrey was defendant. This 23rd of May, 1923. A. C. JACKSON, Sheriff of Pitt County. P. R. Hines, Atty., A. L. Jackson, 26 1tw 4wks

MORTGAGE SALE VALUABLE FARM.

By virtue of the powers contained in that certain mortgage deed executed by J. A. Briley and wife Lizzie Briley to William House, dated Jan. 6th, 1922, and recorded in book H-14, page 399 of the Register of deeds office of Pitt county, and given to secure certain indebtedness therein specified, and default having been made the undersigned will on Monday the 16 day of July, 1923, sell at public sale at 12:00 m. before the court house door in Greenville for cash, the following described tracts or parcels of land: Two certain tracts of land in Greenville township situated on the North side of Tar river and known as lots Nos. 1 and 3, in the division of the lands of the late Elihu Briley described as follows: Not No. 1, which was allotted in said division to J. A. Briley, containing 9.90 acres of woodland and 21.40 acres of cleared land; Lot No. 3, containing 12.40 acres of woodland and 14.87 of cleared land. This lot was allotted in said division to the heirs of Pattie A. Ward and from them purchased by the said John A. Briley. This being the lot upon which the said J. A. Briley and wife resided. For full and accurate description of said two tracts of land by courses and distances, reference is hereby made to map of said division which appears of record in the office of the register of deeds of Pitt county in Map book No. 1, page 102.

Terms of sale cash. This the 11th day of June 1923. WILLIAM HOUSE, Mortgagee. 13 1tw 4wks

Did Robin Hood Live Still Under Dispute

There are plenty of undisputed historical facts concerning the events of the Twelfth Century in England. Experts who conducted the research work in connection with the preparation for the making of the new Douglas Fairbanks screen sensation, "Douglas Fairbanks in Robin Hood," a United Artists release coming next Monday to the White theatre, found a wealth of intensely interesting data relative to the doings, manners and customs of the people who lived in the greatest age of chivalry.

There was assembled quite enough material for creating a truly remarkable historical background for the enactment of the dramatic romance associated with the name of Robin Hood, known to this generation as only a traditional English hero. He is said, by some, to have been born at Locksley, Nottinghamshire, about the year of 1160.

In the more thrilling days of his career, he lived in the woods with his band, either for reasons of his own or because he was really outlawed, his haunts being chiefly Sherwood Forest and Barnsdale in Yorkshire. The most generally accepted theory is that he was the Earl of Huntingdon incognito by circumstances over which he had no control. He was generous to a fault as well as adventurous to a dangerous degree, for he robbed the rich to give to the poor. His companions were Eriar Tuck, Little John, Will Scarlet, Allan-a-Dale and George-a-Green.

Many diligent inquiries have been made to ascertain whether or not the personage known as Robin Hood ever had a real existence, but without positive results. The story of his life is purely legendary and the theories in regard to him have never been advanced beyond hypothesis. However, it is exceedingly probable that such a man lived in the Twelfth Century and that most of the exploits ascribed to him were of his own volition, although it is likely the deeds of heroes of less popularity were also associated with his name. The noble descent which bestowed upon him by common consent may be the result of the medieval idea that the great virtues existed only in the persons of gentle birth.

NOTICE.

Get your town automobile license at the Town clerk's office, you must have them on July, 1st, 1923 now on sale \$1.00.

LESTER JONES,
Chief of Police.

Accepts Position Here.

Mr. J. J. Pugh, of South Carolina, has accepted a position with the local firm of McKay, Washington Co., as general manager of their sales department. Mr. Pugh has had years of experience at the head of some of the largest stores of the Palmetto State, and will no doubt prove his worth to the already efficient sales forces of the company.

PENSION CHECKS ARE READY FOR DISTRIBUTION

Clerk of Court Frank Harrington advises that the semi-annual pension checks for the veterans and widows of the civil war are here, and that his office is ready to distribute these to the rightful parties.

Swedish Cigarettes to Carry Slogan Safety

STOCKHOLM.—The "Two Million Dollar Cigarette" is one of the main arguments advanced in the present nationwide drive in Sweden to pre-

vent fires through the careless throwing away of cigarettes, under taken by the Fire Prevention Society.

Some time ago a lighted cigarette, thrown carelessly down by a youth in a saw mill, started a fire which was not extinguished until nearly \$2,000,000 worth of property had been destroyed. Other large fires have been started in the same way. The Fire Prevention Society, desiring to enlist all possible forces in its campaign, suggested to the Swedish Tobacco Monopoly, which controls the output of cigarettes in Sweden, to print the warning, "Kill your cigarette when you are through with it," upon every package.

WORK OF POLISH CHILDREN TO BE SHOWN IN WASHINGTON

WARSAW.—During the celebrations in Poland last year in honor of America and American Poles, Polish school children united in composing several laudatory letters and addresses, which were by themselves beautifully transcribed on parchment and illuminated.

This work was so well done, and has such artistic merit, that it has been decided to collect the parchments and send them to the Polish legation at Washington for exhibition.

Newspapermen Go to Sweden.

STOCKHOLM.—Fifty leading journalists from all parts of the world including six from the United States, will participate in the International Press Congress at Gothenburg, Sweden, which opens June 16 in connection with the Tercentennial Jubilee Exposition. After the congress they will be taken on pleasure tours through the most interesting sections of the country, according to travel plans and schedules which have been arranged here.

Decay of Buildings Studied By Experts

LONDON.—London is said to be slowly crumbling away, or at least most of the historic buildings are decaying.

In an effort to ascertain the cause of this crumbling of apparently insubstantial stonework, the government has appointed a committee of scientific experts to thoroughly probe the matter. It is known that stone used in one part of the country will stand unaffected, but if used in another it will decay. This is a mystery the experts have to probe, and it will take considerable time, for it involves questions of chemistry, biology and physics.

COMING MONDAY

"SONNY"

PANGHO VILLA WILL MEET JIMMY WILDE IN FLYWEIGHT BOUT

NEW YORK.—Pangho Villa, born Francisco Guileo, the tiny Filipino who will meet Jimmy Wilde the Welsh man in a fifteen round contest at the Polo Grounds next Saturday in an attempt to win Wilde's world flyweight title, is one of the greatest little warriors the ring game has known.

The terror of all the youths in his native island home of Iloilo, in the Philippines, Villa was fashioned into a boxer in 1918 by an American patron of the game of fist-cuffs. Villa was then 17 years old. He entered the professional game in the Philippines in 1919, and for three years he fought without losing a single contest.

His early opponents were bantams in four and six round bouts. Terrible Pondong, the ugliest and heaviest hitting little man in the island; Stiff Iringo and Battling Balaraino, two of the smartest bantams, were unable to defeat Villa. Balaraino tried no less than ten times, and the best he ever got was a draw. George Menders, the Australian flyweight title-holder, was knocked out by Villa in three rounds in 1921.

Dog-Meat Market Falls Igorots Try Beef, Pork

MANILA.—The dog market of Baguio has disappeared entirely and the eating of dogs by the Igorots, a non-Christian tribe inhabiting the mountain province, has been reduced to a minimum, according to Colonel Henry Knauber, head of the constabulary academy at Baguio.

"Introduction of the meat of cattle and hogs has turned the Igorots, who formerly ate dogs, into eaters of meats recognized by the civilized world as eatable," said Colonel Knauber. "These people had to have some kind of meat and years ago the only animal they knew was the dog. When civilization introduced cattle and domestic hogs to these mountain people, they quit eating dogs. Only a few scattering cases of dog eating have been reported for some time, and these were among the peoples living far back in the hills."

England Worried Over Immigration to America

LONDON.—Great Britain is worried over the increasing number of skilled artisans and domestic servants who want to take up their abodes in the United States. The stream of emigrants which has flocked from these shores to America has caused a special committee of the government to inquire into the causes.

Only the exhaustion of the annual quota of British subjects eligible to enter the United States under the percentage law has prevented tens of thousands of others from pitching their tents under the Stars and Stripes. With the exception of France and Germany, practically every nation is now barred from sending emigrants to America until next July, when the new annual quota begins. Already the steamer bookings from the United Kingdom to America for July, August and September are full.

England Brews Lake of Beer.

LONDON.—The total number of bulk barrels of beer brewed during the year ending March 31 was 22,334,328 in England and Wales, 1,598,339 in Scotland, 2,684,286 in Ireland making a total of 26,616,953. These figures were given officially in answer to a question in Parliamentary Papers.

WORLD'S LARGEST AIRPLANE WILL BE TESTED AT DAYTON

DAYTON.—The largest airplane the world has known, with a wingspread of 120 feet—half again as wide as the great Martin Bombers of the Army Air Service—will take to the air for the first time here some time this month.

The new monster of the skies, intended solely for use as a bomber, and said to be capable of carrying a quantity of explosives sufficient to destroy a large portion of a modern city, is being assembled at McCook Field, the army air station, under direction of Walter H. Barling, its designer.

With its great width and other measurements in proportion, the plane will dwarf the largest ships now used. The height of the new plane will be 8 feet, while its length from nose to tail will be 65 feet.

Driven by six Liberty engines, the new ship will require a minimum crew of four men and contain provi-

sions for a working force of eight men to be used when the occasion requires. Exclusive of the crew, it will weigh more than 40,000 pounds.

With the idea of obtaining a maximum of lifting power, stability and safety, Mr. Barling designed the ship as a tri-plane of modified type. The upper and nether wings will be of practically the same dimensions, while that in the center will be narrower. Along its length will run the control devices, giving them protection and adding a feature of safety.

Declares Today to Be Golden Age Medicine

LONDON.—Cholera, plague, typhus, typhoid, smallpox, tuberculosis and malaria have at last become controllable, says Sir George Newman, chief medical officer of the British government. The antitoxin treatment of diphtheria has reduced the death-rate in that disease from 29.8 percent in 1890 to 9.3 percent in 1922, which means that 200 additional lives are saved in every 1,000 cases. In 1871, enteric fever claimed 374 lives in each million of the population; in 1922 it was 12 in each million.

Pamlico Beach

The management of the Pamlico Beach desires to assure its patrons that it has now increased its facilities for handling its guests, and that prompt, efficient, and satisfactory hotel and dining room service will at all times be rendered. Special efforts will be made to extend to all week-end parties every convenience and comfort.

The management also wishes to state that by an arrangement with the sheriff of Beaufort county, a sufficient number of deputies will be present to guarantee all persons from annoyance of any character, and that the recently passed prohibition law will at all times be strictly enforced.

The usual dances will be given Friday and Saturday nights. Music by Edmonds Orchestra. Admission \$1.00.

Announcing the Reopening of

Greenville Vulcanizing Co.

REAR OF GREENVILLE STORAGE BATTERY CO.

We have installed one of the most modern and up-to-date vulcanizing plants in the state and are in position to render the very best service and the highest grade of workmanship. We have again secured the services of Mr. J. M. Hill, who was in charge of this plant before it was closed down and is well known to the automobile public of Greenville.

Those who have trouble with their tires and tubes need have no regret to call on us either in person or by telephone as our service car is at your disposal. All our work is absolutely guaranteed and our prices are in accord with what you have to pay in other cities much larger than Greenville.

Below is a list of our prices:

Vulcanizing 3 inch case	\$3.00
Vulcanizing 3 1-2 inch case	\$3.50
Vulcanizing 4 inch case	\$4.00
Vulcanizing 4 1-2 inch case	\$4.50
Vulcanizing 5 inch case	\$5.00
Prices on Spot Jobs on outside of case:	
Small cuts	\$1.00
Large Cuts	\$2.50
Prices on Vulcanizing tubes:	
Nail Holes	.50
Larger holes,	from 75c to \$1.00

There are many things in connection with our service for which we make no charges—absolutely FREE.

We make no charge for changing your tires while at work on them.

Water and air for your car and tires absolutely free, conveniently located and a man with a smile to wait on you.

There is no extra charge for testing your tires.

Tires will be sold for charges when left at our plant more than 30 days.

We will appreciate your business and assure you the best service possible.

Greenville Vulcanizing Co.

FIND NEW WHEAT DISEASE IN STATE

RALEIGH, June 7.—A wheat disease new to North Carolina and to the United States, has recently appeared in some fields near Lincolnton, according to findings of Dr. F. A. Wolf, plant pathologist of the North Carolina experiment station. Specimens of the disease were sent in to Dr. Wolf by Garren Morrison, county agent of Lincoln county, and because the disease was new to this state, Dr. Wolf sent them to Washington where the disease was found to be the dreaded "Take All." "Take All" was first discovered in the United States in 1920 at a few places in New York State. Later it was found in Washington and Oregon and these affected fields in North Carolina is the third finding of the trouble in this country. Other specifications have just been received from county agent, R. W. Graeber of Iredell county.

So serious is the disease that Dr. A. G. Robinson of the United States department of agriculture was sent to Lincoln county to make a study of the trouble. Accompanied by G. W. Fant, extension plan disease worker, Garren Morrison, county agent, and a number of farmers, a trip was made over the infested district where they found, in the most heavily infested areas, that about one-fourth of the wheat crop was destroyed.

Berlin Subway Shylocks to Woo the Fickle Mark

BERLIN.—Since the mark began palpitating uncertainly from one day to another—indeed, from one hour to another—Berlin has undergone a mushroom growth of small exchange establishments along streets all over the city. The tourist, looking for a place to convert quick his good American dollars, English pounds, or other currency, does not need to make a lengthy search, for he runs into a money-changing booth at almost every turn, even in the midway promenade and driving sections of the boulevards.

Now an enterprising Ehylock has hit upon the happy idea of setting up exchange shops at transfer points on the underground and elevated railways. The logic is simple: The alert business man enters his home station and buys a morning paper; he finds the mark is rising, or falling; his office may be a half hour away, too far to permit keeping pace with the exchange; at the transfer point he can sell "short" if necessary, or buy at a liberal margin, without the necessity of awaiting his train's arrival down town.

Sheep Fed Screenings Make Money Owners

FORT WILLIAM, Ont.—The feeding of western sheep and cattle on the screenings from the big elevators at the head-of-the-lakes has been carried on successfully during the past winter. The animals are brought here from the prairie provinces and finished for shipment to eastern markets.

This plan was inaugurated by R. C. Harvey, an Alberta sheep rancher, two years ago. In 1921 he wintered some 6,000 sheep. The railways granted him a through rate to eastern Canadian points with stop-over privileges. The sheep were fed on a diet consisting of screenings, mixed with an allowance of hay. After being fed for the winter months on this con-

centrated ration, the animals showed a very profitable increase and were reloaded for eastern markets.

Youthful Rancher Visits His Vast Hawaiian Estate

HONOLULU.—The high cost of living is one thing that need not cause much worry for the next year to ten-year-old Richard Smart, who is now on his annual visit to his domain, the great arker ranch of almost 200,000 acres on the island of Hawaii.

On the petition of his grandmother and guardian, Mrs. Elizabeth Knight, who was Mrs. John arker before her second marriage, Judge John Desha of Honolulu has just increased the youngster's annual allowance from \$9,000 to \$16,300. This sum is divided as follows—general maintenance, education, upkeep of automobile and employment of nurse, governess and chauffeur, \$12,000; provision for annual gifts to employees of the arker ranch, \$1,800; special fund for his annual vacation in Hawaii, \$2,500.

Poland Honors Lord Balfour.

LONDON.—The University of Cracow, Poland, has conferred upon the Earl of Balfour the degree of Doctor of Philosophy.

It was conferred in recognition of Lord Balfour's services to the literature of philosophy, and as a tribute to his work as a statesman of international reputation.

HOUSEWIVES OF GREENVILLE, YOUR LAST CHANCE TO GET BILL ALLEN'S SELECTED SPECIAL HAMS, FOR THIS SEASON.

Owing to ill health I will close my Ham Emporium after Saturday, June 16 and go away for the summer to recuperate. I have on hand a good supply of the finest selected special hams that have been shown in Greenville for many years and I am off today to secure an additional supply in order to take care of the heavy demand for our closing sale on Saturday. Be sure and secure your supply of these fine hams Saturday at the reduced price of 35c per pound.

Wishing to extend my most grateful appreciation to the people of Greenville for their liberal patronage, I am

Yours to serve, with a full supply of the best hams on the market, Saturday, June 16. Phone 203, W. H. ALLEN.

Phone 204, Atlantic Ave. 14 21

SCIENTISTS REDUCE DANGER OF DEATH FROM NOXIOUS GAS

PITTSBURG, Pa.—Carbon monoxide gas poisoning, the nemesis of workers in mines, mills, garages, tunnels, and other industries, as well as the occupant of the home, is the subject of an important discovery just made by experts of the Pittsburgh station of the United States Bureau of Mines. The discovery affords a quick and sure method of determining the presence of carbon monoxide poison in the blood, and according to the experts, will not only prove a boon to sufferers from the dreaded gas, but will be useful in a legal way in that it will prove conclusively the cause of such deaths.

Dr. R. R. Sayers, and W. B. Yant, chemist of the bureau, made the discovery, and after months of research work and actual tests upon human beings, they have reported that their simple system could be operated by anyone, and that within 15 minutes after the test is made the amount of carbon monoxide poison in the blood of the subject could be determined, thus insuring the right and prompt treatment for the patient. Heretofore doctors treating carbon monoxide cases have had to wait from 24 to 48 hours for a blood test before they could begin proper treatment.

000 to build, and already twice that amount is being invested in office buildings either completed, under construction or projected along its approaches.

On the site of old Fort Dearborn, whose garrison was annihilated by Indians on Aug. 15, 1812, a 21-story building is being completed by the London Guarantee and Accident company.

Across the river the 9-story Wrigley Building share honors with the new Methodist Temple as the tallest building in Chicago. The Wrigley building cost more than \$5,000,000 to build.

Adjoining the original Wrigley Building Wrigley is erecting a 16-story annex at a cost of \$4,000,000, and across the street from the annex the Chicago Tribune has broken ground for its monumental tower, which is to cost \$8,000,000.

Hague Court Interferes Wireless News Dispute

THE HAGUE.—Property rights in news distributed by wireless is a subject now engaging the Dutch

courts. One Dutch news agency sued another for intercepting and sending to its newspaper subscribers news sent to the first agency by wireless from a third agency in Berlin, each of the dispatches bearing as a prefix a notice that they were the copyright in Holland of the plaintiff agency which claimed payment at a specified rate for each message thus intercepted and distributed.

German Convicts Run Races. BERLIN.—Sports are being introduced in German prisons, and the first trial of the experiment during 1922 is said to have met with encouraging results.

In the penitentiary near Berlin 224 hours of physical exercises and athletic training were given in the course of the year by a well-known instructor in these branches. More than a hundred men and boys participated. Gymnastics, races and team contests were parts of the schedule.

BAR ASSOCIATION RESENTS ATTACKS ON CONSTITUTION

NASHVILLE, Tenn., June 15.—Now, at the very apogee of the achievements of the Constitution of the United States, when its blessings are apparent to the most casual observer, it is being most bitterly attacked from many quarters, condemned and even execrated as an instrument of oppression and injustice, R. E. L. Sauer, of Dallas, Tex., Chairman of the Citizenship Committee of the American Bar Association today told the Tennessee Bar Association meeting here.

"The Constitution that is being attacked is the one under which this government has endured for 133 years, has grown in wealth, power, extent of territory and intelligence of its people beyond the wildest dreams of its founders," Mr. Sauer said. "No other people since the dawn of time has been as happy. Under this constitution we have survived the greatest civil war in history, we have fought four great foreign wars and carried them to triumph and a just and victorious peace, we have become the admiration and envy of the whole civilized world."

"But from many quarters it is being assailed. The criticisms come from various classes. From below, the anarchists, who would tear down all government, assail it with open violence. This is the least of our danger, however. We can cope with the anarchists."

"There is another element, the parlor socialists, who combine with half-baked educators in a more insidious propaganda. Many of them are people of wealth and position, some of them with humanitarian ideals, some with simply lunatic notions, but they have the power to invade our schools and in our schools, all the way from the first grade up to the highest collegiate institutions, we find here and there a half-baked professor who insidiously instills into the minds of our youth these socialistic ideas."

Rhodes scholars lead in scholarship and scholastic honors among all the Rhodes scholars from British Dominions and the United States, according to the recent report of the trustees of the Cecil Rhodes Fund.

In arts, Australian candidates who took honors of the first class are 38 percent, as against 15 percent for the United States, 14.5 for Canada, and 4 percent for South Africa. The proportion of scholarships won by the scholars at Oxford is: Australia 15, Canada 11.5, United States 11.

Australian scholars also lead in athletics during their stay at the university.

Cupid's Stock Exchange Is Booming in Germany

BERLIN.—Fewer babies are being born in Germany now than before the war and fewer people are dying, but the marriage license clerks are doing more business than during 1913. The Germans say there is a boom in the marriage market "after every war."

The state of Hamburg lived up to its name of having the most attractive "frauleins" in the republic. It chalked up a wedding record of about 15 to every 1,000 inhabitants. Schaumburg-Lippe, a little to the south of Hamburg and in romantic proximity to Steinhuder Lake, ran a close second with 14 to every 1,000. Saxony's proportion stopped at slightly over 13, while Berlin city was only 12.8.

The most timid bachelors in all Germany appear to live in the mountainous state of Waldeck, in the Weser basin, where there have been only about seven weddings to every 1,000 residents. And yet the Waldeck boys have not such faint hearts as before the war, when their average was only

BRITISH FLYWEIGHT KNOCKED OUT ONCE IN FIGHTING CAREER

NEW YORK.—Jimmy Wilde, world flyweight champion, who will defend his title in a 15-round match tomorrow with Pancho Villa, the Philippine mite, at the Polo Grounds, has been called the perfect fighting machine.

Master of all the tricks and punches of the trade, Wilde has had the greatest boxing career of any living pugilist of the British Isles. In more than a dozen years in the ring he was knocked out but once. Pete Herman, former world bantamweight champion, sent Wilde down for the count in the 17th round of a picturesque fight in London in January, 1921. Wilde has been idle since that defeat.

Born in a hamlet near Cardiff, Wales, 31 years ago the twelfth of last month, Wilde entered the pugilistic game when a mere strip of a lad. He soon became a wily, clever boxer, fashioned in the English mold. Then, taking a lesson from the American game, he developed a punch.

German Capital Is Seeking Investment In the Far East

LONDON.—German trade magnates are seeking control of the coal, iron and oil of China, according to information supplied to the British Board of Trade from trustworthy sources.

The Stinnes interests have \$2,000,000 already invested in coal concessions in He-nan, Hu-nan, and near Pukow. This group has found oil in Che-kiang, and is interested also in coal near Hang-Chow. The big Siemens corporation of Germany has \$4,000,000 invested in coal interests in Shantung, Ho-nan, Hu-nan and near Hang-Chow. In Saghalien this company has something like \$1,000,000 invested in coal and iron concessions. Thirty-eight German engineers are now waiting in Shanghai for instructions to proceed to various centers.

Motor Cars Open Remote Sections of The Near East

BEIRUT, Syria.—American automobiles threaten to supplant railroads in many parts of the Near East. Throughout Syria, Palestine, Mesopotamia and in certain parts of Transjordan and Arabia, fleets of American motor cars now link up remote cities and towns and afford the traveler a cheaper and more comfortable journey than by rail.

In some of the sparsely settled and scattered regions of the Mediterranean and interior countries, Yankee motor cars have blazed the way to places which heretofore were accessible only by long and tiresome journeys on donkeys and camels. In Syria and Palestine 90 percent of all automobiles in use are of American make.

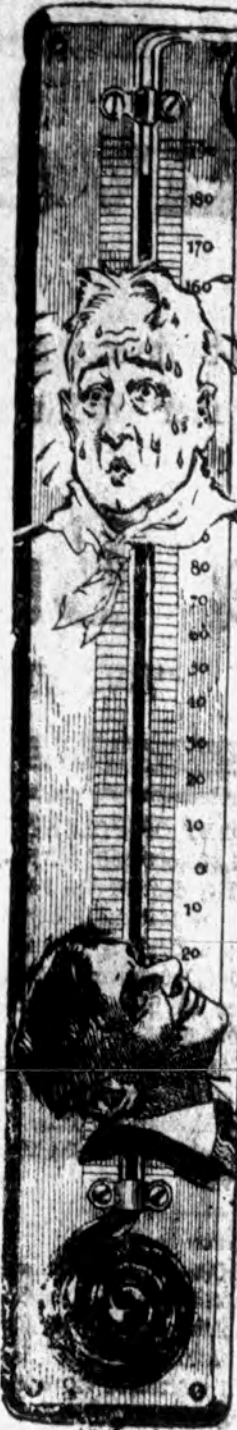

American tourists to the Holy Land are now able to make the trip from Beirut to Jerusalem by automobile over excellent roads. Before the advent of the American car the 200 mile trip from Beirut to the Holy City occupied nearly a week; today it can be done in 10 hours.

Predict Machines Will Replace Hand Workers

CLEVELAND.—A new industrial revolution is going on in America without Americans generally realizing it, according to several leading foundrymen of the country who were here recently to attend the convention of the American Foundrymen's Association, the technical organization of the foundry industry.

The return to prosperity, coupled with the restriction of immigration and the present shortage of labor is bringing about an overturn in the iron working trade, a change destined to dislodge hand labor in the next 10 years and largely to eliminate the old fashioned small foundry in favor of the foundry of mass production, the foundrymen claim.

Pythians Close Session.
MORGANTON, June 15.—The session of the Grand Lodge Knights of Pythias of North Carolina came to a close here today and the majority of the delegates have left for their homes. Clayton was chosen as next year's meeting place, this selection meeting with general approval because of the location there of the Pythian Home.

PETROGRAD HOPES TO REGAIN POSITION LOST THROUGH WAR

PETROGRAD. — Petrograd has come back to the million population class. A recent police census showed the city has 1,065,000 inhabitants, as compared with 740,000 in 1920. Although still almost dead industrially in comparison with its wartime status, Petrograd in general is beginning to "come back."

During the war days Petrograd had more than 2,000,000 people. After the Bolshevik revolution the capital was moved to Moscow and thousands of government employees and factory workmen were evacuated. The lean and hungry years of the revolution brought about a further decrease in the population, many of the people going to the country districts where food was cheaper and more plentiful.

Two years ago Petrograd merited the predictions of foreign observers that it would be a city as dead as Pompeii. But the past year has brought a tremendous change. Factories are being reopened, the port is in operation, and thousands of persons are returning to the city. Many of them have come from Moscow, which is so overcrowded with its 2,500,000 people in a city built for 1,000,000, that it is almost impossible to find a place to sleep. In Moscow one cannot get a spacious apartment for love or money; in Petrograd there are many of them. And so hundreds of Moscow businessmen, whose work keeps them in the capital, have sent their families to Petrograd where they can live comfortably.

Ancient Ice Floes Caused Rich Soil Geologist Thinks

EVANSTON.—Farmers living in the fertile valley of the middle west may attribute their rich crop yields, fat swine, and excellent butter to the fact that more than 50,000 years ago their acres were covered with ice.

This is the gist of the finding of Professor William H. Haas of the geology department of Northwestern University, who has made a study of the subject, concentrating his observations upon Ohio.

Comparing the glaciated section of the continent and the driftless area Professor Haas found that the soils in the two differed. In the glaciated land the soils are more diversified and of better quality, he states.

"With this asset it is little wonder that the farmer living in the zone which a few years ago had been covered with ice should find himself better off than his brother of the driftless area," says Professor Haas. "This covers some 10,000 square miles and embraces northwestern Illinois, a small part of Iowa, southwestern Wisconsin and Minnesota."

The geologist, in explaining the action of the ice and why that portion of the earth's surface touched by it should yield to man an abundance of crops, said that the pressure exerted by the glaciers 50,000 years ago crushed the rocks and mixed the dirt as they rolled southward; hence the many soils.

Trucks and Tractors Reduce Use of Oats

WASHINGTON. — Production of oats in the United States probably has reached its highest point, in the opinion of experts of the Department of Agriculture.

The yearbook of the department for 1922 declares the advent of motorized trucking, both in city and country, and of the tractor on the farm, are reducing markedly the commercial demand for feeding oats. The result, it is predicted, will be to reduce acreage and production, which have increased rapidly and consistently since annual estimates first became available in 1866. The oat crop now ranks third in importance, the cereals being next to corn and wheat.

Czechoslovakia Turn Out Fine Violins Now

PRAGUE.—Favored by a natural love of music, a plentiful supply of the right kind of resonant wood, and deft craftsmanship, the violin making industry in Czechoslovakia is assuming an important position.

Something like 4500 home workers are engaged, and the instruments all are of high quality. One hundred and thirty-three thousand violins were turned out in 1922, beside 2,100 cellos and 1,200 double basses.

ROSE COVERED ISLAND

BUCHAREST.—On the agenda of the Lausanne conference is an item which has baffled the world's statesmen who are trying to reestablish peace in the Near East. It is the question of the "Kadi of Ada Kaleh." At first nobody knew whether Kadi of Ada Kaleh was the name of a man, geographical term, a state of mind, a mystic Turkish phrase, or a species of banana. Inquiry by the peace delegates, however, showed that Ada Kaleh is a delightful little island in the Danube near the "Iron Gates," with only a few thousand Mohammedan inhabitants who grow roses and extract the essence from the leaves. The minaret of the only mosque on the island is a well-known landmark on the Danube as boats pass through the Iron Gates.

School Children Taught to Be Kind to Animals

DETROIT.—People are becoming more humane in their treatment of dumb animals, according to F. E. Hutchinson, manager of the Detroit Humane Society, basing the statement upon personal observations over a period of many years, and upon letters from those engaged in similar work in various cities of the country.

"There are two reasons for the success of the humane movement," Manager Hutchinson said. "The most important work is being carried on in the public schools. School children are being drilled from the kindergarten on, that it is manly and womanly to be kind to all helpless creatures. As a result boys and girls are looking out for the interest of the birds and animals as never before. They personally are watering and feeding animals in need of attention and do not hesitate to call to the attention of the proper authorities any cases of inhumane treatment they observe."

Convicts Not Wanted.

LISBON.—Portugal today sends its convicts to the penal colony at Loanda, on the west coast of Africa, but the presence of these undesirable is resented by the Portuguese and foreign residents there, who have petitioned the government to remove the government to remove the convicts to one of the islands of the Cape Verde archipelago.

Loanda is prospering these days, and its people declare the presence of the convicts hampers their development.

Talks on Osteopathy

By DR. F. FITTS

PHYSICAL FITNESS

Too often, we regard physical fitness as easily achieved with a simple formula of adjusted diet, changed environment, or systematic exercise.

All these factors are important. But one truth remains. Correction of conditions outside the body will avail but little so long as the physical mechanism within is out of order.

Relief may come temporarily. But permanent health can be built only on a physical basis—by which the natural functions of the body can be carried on without interruption.

The purpose of the Osteopathic physician as he applies his science is to lay the foundation for permanent health by maintaining and restoring the natural operation of the physical mechanism.
