

The Reflector recently published a series of articles written by officials of the United Mine Workers of America, which, in substance asserted, that a group of Lithuanian-Bolsheviks led the massacre of non-union miners at Herrin, Ill., last year. No stronger argument against restricted immigration has yet been put forth. The danger of radical aliens is at once obvious.

Whether the charge is true or false, whether the United Mine Workers are bolting up a bad case, or disclosing a good one, the fact that there are enough Bolsheviks in this country to commit such a crime, is sufficient indication that in a low grade of immigration lies danger. This country, however, welcomes to its shores thousands of high grade foreign born who make good citizens.

Countless numbers of the latter class have become good Americans and passed into history as fathers of even better Americans. But in the present European turmoil, when the riff raff of the world is ready to come here, Congress should stand firm against those interests which would commercialize this country by unrestricted immigration at the expense of quality citizenship!

Walton Beat in Call For Extra Session of Legislature by Foes

OKLAHOMA CITY, OKLA., Sept. 20.—Events in Oklahoma moved today to a test of power between Governor Walton and members of the legislature over the exercise of authority in the executive's war on the Ku Klux Klan.

In a call for a special session of the legislature signed by members of the house today it is charged that Walton has taken upon himself the power of a despot and has supplanted the constitutional government with a regime of dictatorship.

The call was made public by W. D. McBee, representative from Stevens county and bore the name of 45 house members. Others were promised during the day which would bring the total to 54—a majority of the house. Noon next Wednesday is fixed in the call as the time for the meeting of the legislative body. The threat of the governor that he would proceed to jail the law makers is not taken seriously, and that the folly of such a threat must be apparent to the executive, it was declared as he realizes such action is not legal and cannot be enforced. It was stressed that Walton has been informed on the best authority that the call by the members of the house for an extraordinary session is regular and perfectly legal in every respect.

Calls it Klan Move.
Simultaneous with the action of house members, Walton issued a statement appealing to the people of the state to repudiate the attempt of the legislature to assemble. He charged those who were sponsoring the move were members of the Klan and that the movement was "inspired by the invisible empire."

McBee asserted that Walton in conjunction with F. Gibbons, speaker of the house, consented to issue a call for a special session in a last desperate hope that "some of the boys would be won over to his cause and show desire to remedy a bad situation he had created." However, before the governor could put this machinery into action, McBee released the call issued by house members and beat the governor to it, it was explained.

Disrupting Courts.
BATON ROUGE, LA., Sept. 20.—Governor Parker made public today a resolution adopted at a mass meeting in Jackson parish and forwarded to him in which it is charged that "the super-government established in Jack on Parish is disrupting the state judiciary and machinery of the courts in such ways as to punish the innocent and let the guilty go free." Voters who are not in sympathy with the Ku Klux Klan are virtually disfranchised, the resolution said.

Tuttle Indicted For Slaying Judge Jones
GREENSBORO, Sept. 20.—F. Clyde Tuttle, well known advertising man has been indicted by the Guilford county grand jury on a charge of murder, resulting from the killing his father-in-law, C. A. Jones, former judge of the municipal court here on the evening of August 1.

Tuttle's case was first heard in municipal court here, and although he showed a strong case of self-defense, the presiding judge, D. H. Collins, said that the charge was so grave he preferred the grand jury to pass upon it.

Defer Rate Order.
WASHINGTON, Sept. 20.—The interstate commerce commission suspended until Jan. 18, next the proposed rate changes on car loads and less than car loads lots of commodities to points south of the Potomac and east of the Ohio Rivers.

Capt Gen Primo Rivera Spain's Dictator

Captain-General Primo Rivera, the Marquis de Estella, who commanded the Spanish troops in Barcelona, has been appointed Dictator of Spain as a result of the mutiny of the Spanish army and the overthrow of the Cabinet. He has started widespread reforms.

LEAGUE TO KEEP "HANDS OFF" OF INDEMNITY ROW

GENEVA, Sept. 20.—"Hands off" the reparations problem, for the moment at least, was the decision reached today by one of the main commissions of the League of Nations. This decision, it is believed, will affect the entire attitude of the League assembly on this problem. It was not reached without some murmurs.

The reparations issue arose before the commission on technical organizations, when Sir Henry Strakosch, the financial expert representing South Africa, alluded to the statement at the opening of this year's assembly to the effect that the League was confronted with difficulties owing to the absence of a settlement of the questions of reparations and inter-allied debts. But after consulting his French and Belgian colleagues, Sir Henry said, he was convinced of the advisability of not starting a debate on this delicate subject, which might aggravate the situation and hinder eventual settlement.

To Select Candidates For U. S. Academy

RALEIGH, Sept. 20.—Authority has been granted for the continuations of appointment through competitive examinations of members of the national guard for attendance at the United States Military Academy at West Point, it is announced by Adjutant General J. Van B. Metts, whose headquarters are in Raleigh.

In making the announcement Adjutant General Metts outlined the course to be pursued by national guardsmen seeking appointment to West Point. The appointments are open only to guardsmen between the ages of 18 and 19, he stated.

At some date, to be announced later, between November 1 and 15, a preliminary examination will be conducted for candidates from this state the adjutant general said. He explained that the examination will be open only to guardsmen within the mentioned age limits who have been members of the national guard for at least one year.

SOLICITOR TO PROBE FLOGGINS IN ALABAMA, DESPITE GOVERNOR

BIRMINGHAM, Ala., Sept. 20.—Solicitor J. G. Davis, will proceed with his investigation of conditions at the Banner mines, and beating convicts in spite of Governor W. W. Brandon, who declared that the inquiry would not be tolerated as the sole authority governing state convicts rested entirely with the governor of the state. Davis was preparing an array of facts to submit to the grand jury today. Officials of the Banner mines and L. Boyd, head of the convict supervisory board will be called as witnesses before the grand jury, it was announced.

The investigation follows recent disclosures that convicts had been flogged at the mines. That practice was abolished during the administration of former Governor T. C. Kilby.

COACH DUNCAN ROUNDING HIGH ELVEN INTO FINE CONDITION

Under the direction of Coach Duncan, the Greenville High School football eleven is rapidly rounding into form. The squad is being put through strenuous practice each day. The team looks more promising this season than ever before. Members of last year's squad are in splendid form and when the local team makes its initial appearance on the gridiron it will show well balanced strength in every position and speed. Norman Winslow was recently elected captain and Roy Hardee, manager.

In addition to these players Robert Mayo, Francis Wilson, D. S. Smith, Leile Humber, Wesley Harvey, Robert Forbes, several candidates are trying for regular positions on the squad.

Coach Duncan announced today that the schedule for the season would be given out in a few days.

SHE DIDN'T WAIT FOR LAW, SMASH SOURCE OF BOOZE

Lina Barrow, colored girl, William township, Martin county, believes in doing things and explaining later, if necessary. Anyway Lina put this rule into practice when she discovered her brother drunk the other day. She scented the air and saw either the smoke or caught the aroma from what she believed the source of supply of her brother's repeated violation of the Volstead law. She hit the trail into the woods and found a still running in full blast. Without hesitation she laid a heavy charge of rocks against the steaming container and followed the onslaught with complete destruction.

Like a Roman "warrior" she returned from her victory wearing the bottom of the boiler as a shield across her breast. Her brother has been sober since.

Bogus American Degrees Easily Sold In England

LONDON.—The Englishman's love of initials after his name has made this country a fertile field for bogus American colleges, which carry on a sort of correspondence curricula and supply degrees at five dollars each, according to Dr. George E. Maclean, former president of Iowa University, who has recently been warning gullible Britons against striving for sheepskins from unheard of institutions in the United States.

"I have had a steady stream of people coming into this office with the degree 'B.D.' (Bachelor of Divinity) he said. "Until they interviewed me they had no idea that the money paid for their degrees had been obtained from them virtually by false pretenses.

"I know an English clergyman who in two years got the degree of B.D. and D. Litt, simply by correspondence. There is one of these 'colleges' incorporated in Illinois that has tricked hundreds of English students into parting with considerable sums of money for attractive looking diplomas, which are entirely worthless from an educational point of view.

COTTON GOES TO 30c ON VIOLENT MARKET ACTION

NEW YORK, Sept. 20.—Thirty cent cotton became a reality yesterday when October contracts on the cotton exchange crossed that level and went 30 points farther or to 30.30, before the excited advance and covering movement was checked by active realizing sales. December contracts followed with sales at 29.90, these prices representing net gains of 130 points, or about \$6 per bale. Slight setbacks near the close left the market finally very nervous but generally strong but at net advances on active positions of 65 to 103 points.

The violent upturn to new levels for the season marked the culmination of a strong bull movement which has been almost continuous since the end-July government report made it plain to the cotton world that the supply of the fleecy staple this year would fall considerably short of earlier estimates.

Italy Again Reaping Golden Travel Harvest

ROME.—The Italian tourist trade has resumed its pre-war status. Before the war, the tourists flocking into Italy from all parts of Europe added 500,000,000 lire, or \$100,000,000 at the exchange rate of those days, to the wealth of Italy. In 1922 tourists from all over the world brought 2,000,000,000 lire, to Italy which, calculated at the present rate of exchange, would give about the same sum, \$100,000,000.

Coupled with remittances received from Italian emigrants, mainly in America, this tourist revenue used to be sufficient to balance Italy's diverse trade balance. The emigrant remittances, especially during the present year, show a considerable falling off, probably owing to the restricted immigration system now in force in the United States. In 1922, however, the emigrant remittances equaled their prewar figure, which was about the same as that of the tourist expenditures.

New Military Rule In Spain Functions

MADRID, Sept. 20.—The military directorate of Spain began functioning today at a council held in the Royal Palace. The council was presided over by King Alfonso and was attended by General Primo Rivera, president of the directorate, and his generals.

Those participating in the council declined to give any details of the meeting. The new government has begun a campaign against profiteering in prime necessities. While it asserts that owing to circumstances some merchants may increase their prices slightly it is disposed to apply most energetic measures to prevent the exploitation of the people.

NEW YORK, Sept. 20.—The strike of pressmen on the New York daily newspapers which has been in effect since Tuesday continued today with little prospect of settlement in sight. The large publications are issuing under difficulties.

PRINCESS MAFALDA SERIOUSLY ILL

Princess Giovanna (left) & Princess Mafalda.

Princess Mafalda, second daughter of King Victor Emmanuel and Queen Elena of Italy, is dangerously ill at the royal villa, at Racconigi, near Rome, suffering from fever and intestinal trouble. Her younger sister, Princess Giovanna, who was also ill, is recovering. Seven doctors are in attendance on Princess Mafalda, and it is feared she will collapse from insomnia.

PROPOSED UNION STATION TO BE DISCUSSED AT MEETING TONIGHT

SHIPS HURLED ON ROCKS; IGNORED RADIO SIGNALS

SAN DIEGO, CAL., Sept. 20.—Absolute certainty that they were right and a radio compass stationed on Point Arguello wrong led navigators of destroyers, division 10, to plot a change of course that hurled seven ships on the rocks off Point Honda and cost the lives of 23 enlisted men, a naval court of inquiry was told here by Lieut. Laurence Blodgett, navigation officer of the squadron's flagship Delphy.

The frank admission that "little weight was attached" to the radio signals from Arguello furnished the chief sensation of the hearing today, and he denied the interruption of the witness' account by Admiral W. V. Pratt, presiding member of the court long enough to name him the thirteenth defendant in the case.

Consolidation of Schools Urged By Many Educators

WASHINGTON, Sept. 20.—To date, there have been completed 18,913 miles of Federal aid highways and more than nine thousand miles in addition are under construction. The mileage is of importance to educators, because of the increasing movement of progressive states towards the establishment of consolidated schools in rural districts. Such schools gather together half a dozen or more teachers, and bodies of school children, to form a large and well equipped school, taking the place of those which are smaller and less well served.

Consolidated schools must gather up children from their country homes delivering them to and taking them from school, by road transportation. It has been found that the consolidated school is seldom a success except where good roads serve the communities affected. Where there are good roads everywhere, the school buses run inexpensively and quickly, and provide the children within a radius of ten or even fifteen miles with school facilities equal to that enjoyed by pupils in cities. Where roads are poor, the maximum distance over which a child can come to school is two and a half miles.

MARINES, CADETS REPRODUCE HISTORIC FIGHT OF CIVIL WAR

High Officials Attend Military Spectacle at New Market, Va.

NEW MARKET, VA., Sept. 20.—Cabinet officers and high government officials, ranking officers of the army, navy and marine corps and foreign diplomats were among the throngs of visitors here today to witness the re-enactment of the battle of New Market between United States marines and cadets of the Virginia Military Institute. The cadets will be assigned the same place occupied by the student body of the institute 59 years ago.

The streets and buildings are richly decorated for the occasion and the stars and bars of the Confederate flag in many instances are floating side by side with the national colors.

Follows Original Lines.
The battle will take place just outside the town of New Market between the Valley Turnpike and the Shenandoah river on Shirley's hill and Bushong's hill which were occupied respectively by Confederates and Federals and on the ground between. It is expected that the battle exercises will be finished by 3:30 p. m. after which there will be a number of entertainment, and social affairs for the marines and distinguished visitors.

High Attendance.
Authorities estimate that in the neighborhood of 20,000 automobile parties from Virginia and nearby states, as well as many from more distant parts are here for the ceremonies and with a view to taking care of the largest possible crowd arrangements have been made to provide parking space for 30,000 machines. Elaborate preparations have been made to facilitate the handling of the automobile traffic. Marine tents are stationed on all roads at point, 10 miles from New Market and hand to each automobile driver printed instructions as to traffic regulations and arrangements for parking and the accommodation of spectators.

Dr. Outland Warns Against Diphtheria

Dr. C. L. Outland, county health officer, sounding a warning today against diphtheria said:

"Now that the schools have opened the danger from contagious diseases has greatly increased. If every child under 10 years had been treated with toxin-antitoxin to prevent the disease no time would have been lost from school on account of this serious, but preventable disease. The treatment can be readily obtained from the family physician or at the health department. It is safe and sure as it is given in typhoid treatment three doses, one week apart." The health officer added that parents should not neglect to follow prevention methods.

Rev. J. C. Griffin, Is Holding Revival In Black Jack Section

The Rev. J. C. Griffin, state evangelist of the Free Will Baptist church is conducting a series of revival services at Black Jack. Meetings are being held every afternoon except Monday while the evening services will continue, each day until Sept. 30. Mr. Griffin, was located in Ayden for four years, later moving to New Bern.

Reports from Black Jack say that the services are being well attended and that the evangelist is doing splendid work in that section.

Donates \$100,000 To Lenoir College Fund

GASTONIA, Sept. 20.—The Lenoir Rhyne College campaign received a substantial boost this afternoon when Daniel E. Rhyne, Lincoln county capitalist and millionaire, in response to a visit from a delegation of Gastonia citizens, subscribed \$100,000 to the campaign being waged in Gaston county.

"RED" AND "PALE PINK" MEN

How many "reds" are there in the United States? When is a man "red" and when is he only "pale pink?"

Nobody seems to know. The American Bar Association, through its Committee on American Citizenship, believes that there are a million and a half "reds." Other civic organizations with a different definition of what is a "red" put the number much lower.

The man in the street understands by "a red" a person who wants to overthrow the government, who believes in the Soviet rather than in representative government, who thinks the sword and the torch, the industrial revolution and the commune, are better than the economic structure of this or any other civilized country.

But many an alleged "red" is only "pale pink" in the sunlight!

By "a pale pink" most of us understand a man who is radical in ideas, in that he believes the present order of things is due for a change, but who wishes that change made in an orderly legal manner. A "pale pink" may believe in a commune (in which everybody shares in everything, in which all are equally wealthy), and yet desire to bring about such a state of affairs by educating people to demand such an amendment to the constitution as will insure that plan. A "red" may strongly desire child labor to be forbidden, education made free to all, government ownership and building of national highways and other "good" ideas, and yet think the best way to get them is to start with a revolution battle, murder, sudden death!

The "pale pink" radical is not a menace. The "red" is. That there are a million and a half men and women in this country who

want revolution, is unthinkable. That there are not more than a million and a half "pale pink" people is probable; prosperity always decreases and hard times increase their number.

All good Americans are on guard against the real "red," but it is not inherent in any red-blooded American to be scared of an army of "reds," which is really very pale pink. Only a few hotheads really try to invade American sanity with anarchy. Let us concentrate on these, and not scatter our efforts to make this land 100 per cent American by worrying over the harmless "pale pink."

HALT THE FIRE DEMON

In the year 1922, the United States offered up as a sacrifice to the fire demon, property valued at the stupendous sum of \$521,000,000. In the year 1906, when the San Francisco fire virtually wiped out the Golden Gate city, at a cost of \$350,000,000, the entire fire loss for the year in the United States, including that at San Francisco, did not equal the total of last year.

Half billion dollars is a sum sufficient to operate the government machinery of many nations. Half a billion and twenty-one millions additional would build a great navy or maintain an army for a considerable period. Such a sum would go far toward reducing the annual burden of taxation for the entire nation, relieve the nation-wide shortage of schools and teaching forces.

It would give the farmers a fund sufficient to enable them to dominate the markets of the world, if devoted to agricultural purposes. It would build a great railroad system, or as an aid to American shipping, would place this nation at the forefront of maritime powers. If invested in hydro-electrical development, half a billion dollars would bring to the great industrial centers of America sufficient cheap power to make the annual threat of a coal strike harmless, as far as industries might be concerned.

America, richest and most prodigal of all nations, can ill afford to continue its enormous fire waste. Throwing to the fire demon a half billion of dollars a year is more than any land, even this country of seemingly limitless resources, can long endure. The fact that prevention of even this single waste would ease immensely the economic burdens of the United States, ought to appeal with insistent force to every American who has it in his power to guard against the fire demon.

The flame peril is becoming an actual menace to the continued prosperity of the American people. It is time, and long passed time, to call a halt.

COMMISSIONER'S SALE OF LAND.

By virtue of the authority contained in a decree of foreclosure at the April term 1923, in the case of Fleishman, Morris & Co., Inc., vs. W. H. Woolard and others. The undersigned commissioners will offer for sale on Monday the 22nd day of Oct. at 12:00 noon, for cash to the highest bidder, the following described lands:

FIRST TRACT: In Chicod Township beginning at a stake at the corner of a ditch in a field, A. Jerome Cox's corner and runs South 41° 12' E. 56 poles to an old post oak on the west side of the public road leading from Calico X Roads to the Washington and New Bern Roads in Beaufort county, and running with said road north 68 east to a bridge on a ditch in the Cowell Smith line; thence up said ditch to a stake with pointers, corner of said Smith land, thence northwardly with said Smith line to the old path that leads to the J. P. Adams place; thence westwardly with said path to a lightwood knot, W. N. Cox's corner; thence south 10° 1-2 W. poles to the beginning, containing 90 acres more or less and being the same tract of land conveyed by Sarah A. Cox to J. Horace Cox by deed bearing date, March 6, 1911, and duly registered in Book U-9 at page in the office of the Register of Deeds of Pitt county.

SECOND TRACT: Also another tract described as follows: Beginning at a stake, near the run of Gallows Branch and runs with said branch to Haw Branch; thence down the run of Haw Branch a short distance to a small branch making into Haw Branch, and being the line of the tract of land owned by the late W. W. Clark, thence up the run of said small branch to N. T. Cox's line, a northerly course to a stake near the road crossing of Haw branch; thence with his other line South 89 East 112 poles to the corner of Lot No. 5, of the Nobles land, thence with that land to the beginning, containing 81 acres more or less, and being the same land conveyed to J. Horace Cox by D. A. Smith and wife Margaret Smith by deed dated March 6, 1911, and duly registered in Book U-9 page 234 in the office of the Register of Deeds of Pitt Co., to which reference is hereby made for a more accurate description.

The said lands described above, will be first offered for sale subject to the homestead rights of J. Horace Cox and second, free and discharged from any homestead of the said J. Horace Cox. That is to say in fee, without regard to the homestead rights of the said J. Horace Cox.

This the 14th day of Sept. 1923.
H. W. WHEEDBEE,
F. M. WOOPEN,
Commissioners.

PAW PAW CALLED THE PERFECT DIGESTER

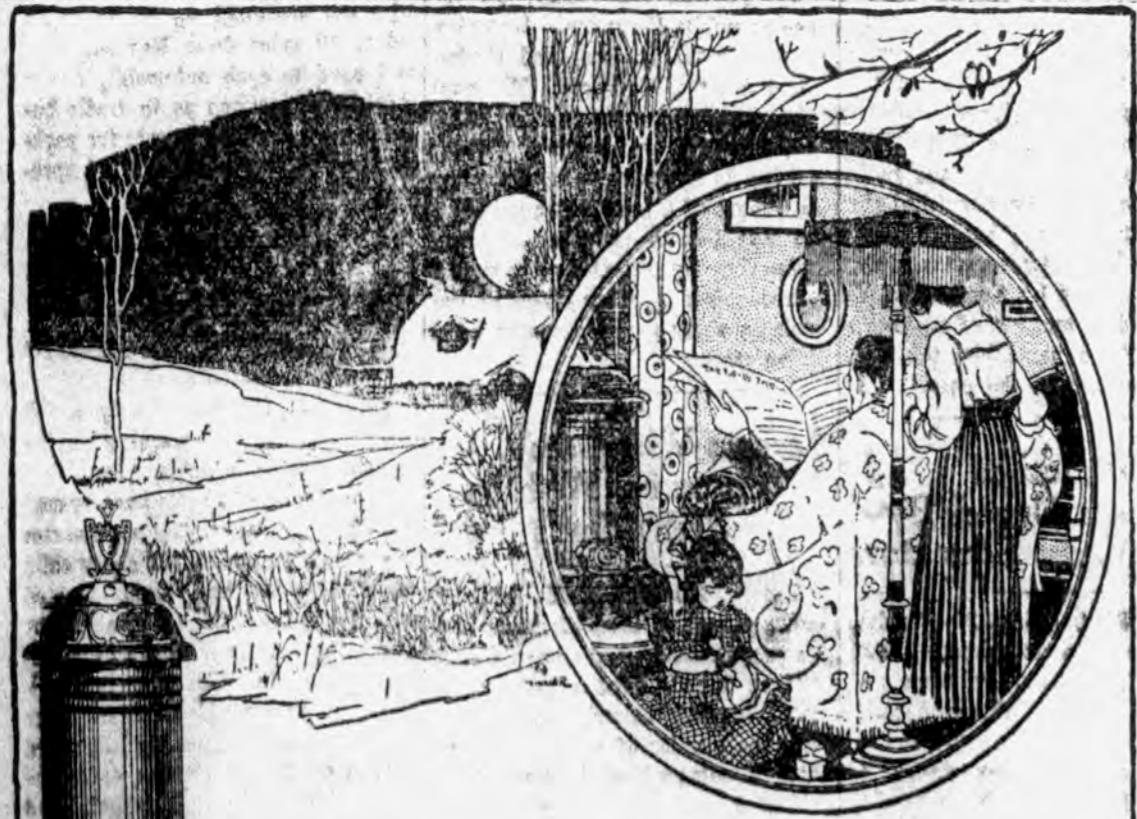

Scientist Explains Its Tonic Effect Upon the System, Saying It Makes Dyspepsia Impossible.

In condensed form, the following is what Professor Willard H. Morse, LL. D., F. S. S., a Fellow of the London Society of Science, wrote to Robert Halford, an eminent therapist: "Munyon's Paw Paw is scientific in that it properly presents to the materia medica—the medical profession and to the sick and suffering the active principle of the fruit of the caribbea-papaya (Paw Paw) in its most eligible form.

"It accomplishes digestion surely and perfectly. It makes the most of the food. Makes the best of the food. Assures perfect assimilation. It perfects the several fluids that have to do with digestion and makes dyspepsia impossible.

"Munyon's Paw Paw disposes of the blood all faulty acids or poisons, because the blood made from the food treated by Paw Paw is a true vital fluid, which refuses to contain the acids, germs or poisonous taints, and as most diseases arise from impure blood, it makes all of them impossible."

If you are nervous, if you are weak, if you have indigestion in any form, if you have stomach trouble, if you cannot sleep, try Munyon's Paw Paw Tonic. It has stopped those conditions for thousands and may for you. It costs \$1 per bottle and is for sale at all first-class drug stores. Munyon's Homeopathic Home Remedy Co., Scranton, Pa.

keep your home warm and cosy with a

COLE'S ORIGINAL HOT BLAST HEATER

THE health of your family depends upon properly heated rooms—warm floors. The maximum radiation, low base heat, air tight construction, and Hot Blast Combustion insure even temperature in all parts of the room at all times.

And besides, Cole's Original Hot Blast Heater is guaranteed to consume one-third less fuel than any underdraft stove on the market—guaranteed to hold fire for thirty six hours.

Let us show you yours today.

Quinn-Miller & Company
"THE LIVE FURNITURE DEALERS"

More Grip on the Road!

Buick Four-wheel Brakes

Buick four-wheel brakes give all 1924 Buick cars twice the amount of grip on the road, thereby doubling their braking efficiency. It is the friction or grip of the tire on the road surface that brakes or slows down the car.

Buick four-wheel brakes not only provide a greater power to stop in case of emergency but, because of this four-wheel road grip, reduce skidding dangers to a minimum.

In turning, Buick four-wheel brake construction automatically releases whichever is the outside or guiding front wheel so it is instantly responsive to the steering mechanism.

Buick four-wheel brake construction distributes braking friction over four drums and four wheels. This reduces wear on brake linings and tires, thereby assuring their longer life and greater efficiency with fewer adjustments.

Buick four-wheel brakes (on all models) together with countless other distinctive features of the 1924 cars further establish Buick as the Standard of Comparison.

Breakfast No. 1

The finest cereal dainty ever served

No breakfast dainty can compare with steam exploded rice. In texture, flavor and ease of digestion it holds the supreme place.

Grains puffed to airy morsels, 8 times normal size. Food cells broken so digestion is made easy. A nut-like flavor due to fearful heat.

The greatest night dish is Quaker Puffed Wheat in milk. That is whole wheat steam exploded.

The wheat supplies 12 minerals growing children must have. Also their need of bran. Milk is rich in all three vitamins.

Make whole wheat and whole milk tempting in this delightful way. Then people will revel in these matchless foods.

Millions of people are better fed since Professor A. F. Anderson invented Puffed Wheat and Puffed Rice.

Let no day pass without them.

KING'S DAUGHTERS TO HAVE SPECIAL MEETING

The Patient Circle of King's Daughters will have a special meeting tomorrow afternoon at 4 o'clock at the home of Mrs. Hortense Moye. Every member is urged to be present.

New Crook Picture Has Many Thrills

Betty Compson and Richard Dix featured in "The Woman With Four Faces."

Betty Compson in the Paramount Picture "The Woman With Four Faces" A Herbert Brenon Production

One of the most thrilling dramas ever shown on the screen is "The Woman With Four Faces," featuring Betty Compson and Richard Dix, which will be the attraction at White's theatre tonight. It is a Herbert Brenon Paramount production.

To bring to book a ring of dope traffickers, men of wealth and power, the district attorney resigns his job and gains the aid of a clever girl crook to open a safe which contains a paper incriminating these nefarious operators.

She tells him there is but one man who can do the trick, and he is in prison. An escape is effected by means of an aeroplane, but the crook, believing the district attorney is trying to win the girl's love, refuses to aid him. Then they go after the paper by different tactics. It is the center of a mad struggle for its possession, and a series of climaxes are piled on top of one another ere the attorney secures the document and sends the guilty ones to prison. In the end, the girl, reformed, wins the love of the district attorney.

Betty Compson as the girl, Richard Dix as the district attorney, and a cast of favorites in the other parts, make this a super-excellent mystery drama. The supporting company is quite capable.

Gen. Bowley to Speak.
HIGH POINT, Sept. 20.—General A. J. Bowley, commanding officer of Fort Bragg, N. C., has accepted an invitation to attend the Pageant of Progress to be produced here October 25, it has been announced by J. Elwood Cox, chairman of the committee in charge of arrangements.

Vera Gordon Plays Powerful Role In "Your Best Friend"

One more Vera Gordon is seen in the role of a mother in the Warner Brothers picture, "Your Best Friend," at the Strand theatre today.

The performance of Miss Gordon in this her latest picture is a masterful characterization. She is first seen in a modest home; a lonely middle-aged widow. Apparently without any knowledge of her son's doings, she is introduced to his wife. She welcomes the girl who is accompanied by her mother who immediately strikes the observer as a designing woman. And the observer is not disappointed in his opinion as the action progresses. Now the daughter-in-law and mother are extremely cold to the widow Mrs. Meyers. They look with disdain at the modest furnishings of an equally modest home, and when Mrs. Meyers attempts to manifest a motherly interest in them they back away as though fleeing from the plague.

NOTED EXPLORER DEAD

NEW YORK, Sept. 20. — Paul J. Rainey, noted explorer and big game hunter, died of a stroke of paralysis aboard the British steamship Saxon en route from Southampton to Cape Town, according to a radio received

today from his sister, Mrs. Grace Rainey Rogers, who was accompanying him to his ranch in Nairobi, British East Africa.

Federal Research Reduces Number of Mine Disasters

WASHINGTON—Although the recent mine disaster at Kemmerer, Wyoming, took a heavy toll of lives, there has been a great reduction in such accidents since organization of the Bureau of Mines. The Kemmerer disaster was only the second of any magnitude this year, while in former years, before the adoption of safety methods devised by bureau experts, life-taking explosions were not uncommon. In the month of December, 1907, 600 men were killed in two disasters alone.

While the Bureau was not organized until 1910, it now trains annually 12,000 coal miners in safe methods in mining, rescue and first aid work; operates 10 mine rescue stations and 10 safety stations; and includes in its mobile rescue units a number of fully equipped railroad rescue cars and a fleet of similar automobile trucks.

Most mine disasters result from explosions, caused by the high explosives, used in the mining process. Although American coal mines used last year more than 220,450,000 pounds of assorted explosives, however, the number of men killed per 1,000 dropped from 6.24 in 1907 to 1.19 in 1921.

The most important of the discoveries of the bureau's engineers was that finely divided coal dust is highly explosive without the presence of an explosive gas, and that a spark, open light, or flame from a "shot" in a vein can set it off. Prevention of such explosions can be effected through sprinkling dry mines, or by adding to the ever-present coal dust a suffi-

cient quantity of a non-explosive stone dust. On some mines a stone dust cloud is let loose before every "shot."

**"You're shifting's O.K.—
Fix your clutch brakes"**

Trust
this live
experience!

Say
"Polarine"
—not just
"a quart of oil"

The Fleet Boss knows from years of experience that noisy gear shifting isn't always the fault of the driver. Very often a slight adjustment of the clutch brakes will remedy grating gears. Many clutches can be adjusted to a quick or slow shift, whichever your habit of shifting may be. The Fleet Boss has learned by experience a bookful of things that you will never find in print.

It's much the same with refining motor oils. Polarine is the product of a vast fund of practical experience possessed by the men who make it—experience that has to be learned under actual refining conditions. You can rely 100% on this experience for the service Polarine will give when it gets into your motor. You can trust quantity production and long experience in distributing, too, to keep the price reasonable.

MODART CORSETS

Like All Fine Things

To say that "there is no other corset just like the Modart" implies much - to wear one, proves much more. Like all fine things, the difference is very subtle; a finesse of design, a little more ease here, a flattened line there - qualities that women desire most and find in the Modart.

Our corset section has a large selection of latest Modart models. Lightly boned, giving that greater measure of style, freedom and bracing snugness, the Modart is designed to fit as a corset should at every point.

Before you decide on your fall wardrobe come to our corset section and have a trial fitting. Then you will know how perfectly the Modart fits every figure. You will know too why it is the favorite corset among more than a million women wearers.

Lightly boned, dainty, correctly designed; a much finer corset is the Modart.

Models, prices and materials to suit every purse and personality. \$3.50 up.

THERE IS NO OTHER CORSET JUST LIKE THE MODART

C. Heber Forbes

FARM SCENES SHOW SPLENDID HEADWAY IN A DVANCED FARMING

RALEIGH, Sept. 20.—George W. Ackerman, photographer of the United States Department of Agriculture, F. H. Jeter, agricultural editor for the state college, and department of agriculture, spent last week in Piedmont North Carolina making photographs of farm scenes for the purpose of showing the various lines of agricultural work being promoted and developed by workers of the state college, and agricultural department.

In a statement issued today, Jeter said that an average of about 40 photographs was taken each day of the five days' trip, and farming operations in Alamance, Rowan, Iredell, Catawba and Cleveland counties were used as subjects. Special attention was devoted to the progress being made by the farmers in these counties in live stock breeding, food and forage, crop production, home beautification, pasture development, boll weevil control and club work.

Some of the fine Jersey and Guernsey herds of cattle were photographed in each of the five counties. Farm flocks and the improved methods of handling poultry were also used as objects for the camera. It is expected that the 20 or more photographs taken in these five counties will be used in the various agricultural publications issued by the Extension Division and be distributed by the U. S. Department of Agriculture, at Washington. The photographs will not be available for about four weeks, said Mr. Jeter.

Arrangements probably will be made, Jeter said, to have Mr. Ackerman return to North Carolina at some time in the future to take photographs of agricultural subjects in the western and eastern sections of the state. North Carolina farming should receive wide advertising from this work, he concluded.

Assumes New Pastorate.

CHARLOTTE, Sept. 20.—Rev. W. B. Lindsay, for nine years pastor of the First Associated Reformed Presbyterian church here, but more recently pastor of the First A. R. P. church at Tampa, Fla., has returned to Charlotte and become pastor of the Chalmers Memorial Meeting House, of the Associate Reformed Presbyterian denomination.

Notaries Licensed.

RALEIGH, Sept. 20.—Notary of the public licenses have been issued at the office of Governor Cameron Morrison to the following persons: Lee T. Duval, Whiteville; H. C. Dockery, Charlotte; S. A. DuPlantz, Bogue Banks; George D. Motte, Wilmington; Miss Edith McLeod, Rockingham; D. A. Nance, Winston-Salem; C. C. Smith, Winston-Salem; Forrest Counts, Leaksville.

SAYS HER BACK ACHED TO KILL

Could Not Get Her Strength Back After Confinement Until She Took Stella Vitae

"I just could not seem to get my strength back after my last confinement until I started taking Stella Vitae," said Mrs. Anna Durlander, Route 1, Ashbybur, Ky., a few days ago.

"About three months ago my baby was born and I just seemed to lose every bit of my strength and vitality. My back ached to kill and made me so miserable I feared I was in for a long spell and may never be what I was before.

Some of my neighbors told me what a wonderful medicine Stella Vitae was for weak and ailing women and got me to try it. I have taken two bottles so far and feel so much stronger and better that I am going to keep on taking it a while longer for it has done me more good than any other medicine I have ever taken."

Stella Vitae may be obtained from any druggist and the purchase price will be refunded if it fails to bring relief. Home Station Drug Co.

Make Plans For New System Of Water Transport

ST. LOUIS. — A new system expected to mark an era in inland waterway transportation, is planned by a group of prominent St. Louis business men who have incorporated the Standard Unit Navigation company. Under the plans, transportation on the Mississippi and other rivers of the country would be handled in a manner similar to railroad transportation. New types of towboats and barges

are to be used, extensive trials of which have proved successful officials said.

Explaining the method Carl J. Baer, one of the directors, declared that instead of the huge barges in use on the lower Mississippi and other rivers, the system provides for small barges which would be linked together like freight cars of a train. The towboats would weigh only one-third as much as the present towboats, but would develop the same power.

Propulsion of the boats would be from paddles fixed on an endless chain on each side of the boat. Every paddle, which would exert a direct thrust at the water, would develop

more pulling power than the usual paddle wheel and with less resistance, according to Mr. Baer.

"The barges will be small, having a capacity of from one to three car loads," continued Mr. Baer. "Trains of barges would be made up in a fashion similar to freight car trains, with no waiting for loading or unloading. A barge designed for a river port would be dropped at that port and the train would proceed, picking up loaded barges at different points.

EXPERT TELLS HOW TO PROTECT GARDEN PLANTS FROM COLD

READVILLE, Mass.—Put a damp, warm air jacket on your garden plants if you want to protect them from frost this autumn. That is the advice of Alexander McArdie, director of the Blue Hill Observatory, who speaks as one with authority on this subject because of his success in aiding orange growers in California to keep their crops from freezing.

"Your grandmother probably loved flowers and took good care of them," said Director McArdie, who also is professor of meteorology at Harvard. "She had the right idea, when the crisp early fall nights came round, of protecting the flowers from frost by wrapping newspapers around them carefully, pinning the paper so that there would be no gaps and wide-open places. In this way her plants would keep their blossoms until October."

"But grandma did not know it all; we think we know a little more than the old lady did. We now wrap the newspaper around the plant just as before, but after pinning it tightly we twist another sheet of paper into something like a rope about an inch thick and pin it in place. We then take a third sheet and wrap it around just as was done the first sheet. We now have an air space about an inch thick between the two wrappings and this air jacket prevents loss of heat. It is an excellent heat insulator. We have practically bottled up the inside hot air around the plant, and if this is done about three o'clock in the afternoon it is almost as effective as keeping a small stove near the plant. Also we should sprinkle the plant and the ground with water, sprinkle it well, before we wrap the papers around it."

"With most flowers and small fruits the temperature has to fall four or five degrees below the freezing point and remain there for several hours before damage is done. Plants can be cooled to a point below freezing and yet if gradually warmed up, not injured."

England Wants Cheap Coffins.

WASHINGTON.—Expert advice to American coffin makers has been received by the department of commerce from Alexander Dye, its commercial agent at London.

Concerning coffins, coffin lumber and similar materials Mr. Dye advises American manufacturers that the British market for American products is at low ebb because the British, since the war, have lost their taste for expensive funerals and made cheaper coffins the vogue.

Sister's Eyesight Better; Hopes to Play Next Year

ST. LOUIS.—George Sisler, star first baseman for the St. Louis Americans, who has been unable to appear in the lineup this year on account of eye trouble, hopes to be able to play again next year, and if the condition of his eyes is satisfactory he will be appointed manager of the team, according to reliable reports in sporting circles here.

Sisler has declared that his vision is improving gradually. This has been noticeable in his preparations for opening the 1924 season in his regular position.

Sisler's enforced retirement, which was one of the big disappointments of the season, is believed to be responsible for the unfavorable standing of the Browns as compared with last year, when they fought the New York Yankees a hot battle for the pennant. His absence is believed by many fans to have had a demoralizing effect on the playing of the Browns early in the season.

CAVALRY TO CONCENTRATE IN TEXAS FOR MANEUVERS

EL PASO.—The First Cavalry division, the only regular cavalry division organized and functioning in the United States, is to be concentrated at Marfa, Texas, Sept. 23 for maneuvers under command of Major General Robert L. Howze. The division is regularly stationed at Fort Bliss, Marfa, and Fort Clark, Texas.

Maneuvers will start the day after the division is concentrated at Marfa and will extend to October 3, inclusive. They will be followed by a division review, at which General Pershing is expected to be present.

UNEARTH ORNATE HAIRPINS OF PREHISTORIC WOMEN

SANTA BARBARA, Cal.—Hairpins of bone, studded with tiny crystals, are among more than 2,500 prehistoric objects so far unearthed on the site of the former Ambassador hotel here, according to George G. Heye, founder and director of the Museum of the American Indian (Heye Foundation) of New York City, under whom the work is being carried on. Mr. Heye declares the ornate hairpins "show that the prehistoric woman had much the same traits as a modern sister."

"From what we have discovered thus far," said Heye, "it is safe to assume that the tribes who left these remains were the most skillful workers in stone and shells within the boundaries of what is now the United States."

Pursue "Paying Sandit."

PUEBLA, Mexico.—Best known for his unflinching custom of dropping to his knees daily when the Angelus sounds and praying for the souls of 20 persons he has killed, Feliciano Machorro, 19-year-old outlaw, is being pursued through the mountains by a special squad of police agents by a special squad of police agents. Machorro is credited with having murdered four persons and escaping with many thousands of pesos.

Parks Return Big Revenue.

OTTAWA, Ont.—Canada's national parks will return a revenue to the Dominion in excess of \$30,000,000 in 1923, according to estimates compiled by the Dominion Parks commissioner. The volume of tourist traffic to the parks has been unusually heavy this year. The number of visitors is expected to total nearly 200,000 before the end of the season.

Quill Pens Press.

LONDON.—Quill pens have been abolished at Southwark county court. This breaks a tradition of 150 years, and deprives barristers of an implement of many uses.

Quill pens in skilled hands have been known to be useful for other things than writing. They were waved to drive home arguments. They were flourished to distract attention from some specially obvious flaw in reasoning.

Will Seek World Peace.

STOCKHOLM.—Nathan Söderblom, Archbishop of Sweden, peace worker of international fame, will go to the United States the end of September to deliver a series of lectures under the auspices of the World Alliance for Peace through the churches, and the Augustana Synod. He will tour the entire country, including the Pacific coast.

Redmen, Attention.

All Redmen are requested to meet at the hall on Evans street Friday night, Sept. 21 at 8 o'clock. After the regular order of business supper will be served and a good time in store for you. Remember the date, Sept. 21.

Also office furniture, and fixtures, including desks, chairs, typewriters, to-wit: The sale will be made subject to confirmation by the court. This 5th day of September, 1923. J. C. LANIER, Trustee. 13 1tw 4ws

Don't say, "Oh, Nothing will happen to me, I am a careful driver and I have it securely locked." If thieves want to steal they will find a way. The other fellow may not be so careful a driver and accidents will happen. Have us write you a full coverage policy today.

W. Bruce Warren Telephone 142

Greenville has about 10,000 people. Suppose each one put \$1.00 each week in the Greenville Building & Loan Association. What a powerful factor it would be in helping people to accumulate and help others own their homes.

"The Man to See Is Carter"

Greenville Building and Loan Association With—Greenville Ins. and Realty Co. Dr. C. J. Ellen, Pres. — D. B. Carter, Sec'y Greenville, N. C.

The Man Who's Never Worn a Cap Finds "SURE-FIT" a Real Treat

There's a comfort to "Sure-Fit" that no hat can ever give. Nor any other cap, either. An adjusting device tightens it or loosens it to suit any need. Just like a belt. AND—there's a style in "Sure-Fit" equal to that of the best felt you ever wore. Just try cap comfort—with one of the fine new Fall designs in "Sure-Fit".

SOLD AT GOOD STORES Look for Them in the Window

Makers: FINE & LEVY, 702 Broadway, New York City

FALL APPAREL

That is Chic and Practical

COATS, SUITS, FROCKS and HATS so smart and individual of design, that one is amazed at their moderate pricings. Come and view our showing, for we are certain of your enthusiastic approval.
