CONVENTION BALLOTS FOR NOMINEE

Indictments Returned---Fall, Sinclair and Dohenys

INDICTMENTS RESULT FROM OIL SCANDALS

pot Dome reserves in Wyoming. The third indictment charged Fall with accepting a bribe of \$100,000 for using his official influence in the California leases in behalf of Doheny Sr. The two Dohenys in the fourth indictment are charged with inducing Fall to take unlawful action.

Secretary Fall, it was testified before the oil committee, had been loaned \$100,000 by E. L. Doheny Sr., and that the money had been delivered in a satchel by E. L. Doheny Jr. Later Doheny obtained a lease for the Elk Hills reserve in California. Sinclair obtained the Teapot Dome, in Wyoming without competitive bidding.

WASHINGTON, June 30.—Criminal indictments were returned by a Federal Grand Jury today against Albert B. Fall, former Secretary of Interior; Harry F. Sinclair and E. L. Doheny, Sr., oil operators, and E. L. Doheny, Jr., as an outgrowth of the leasing of naval oil reserves.

Four indictments were returned. The first named Fall, Doheny Sr., and Doheny Jr., charging conspiracy to defraud the government in connection with the leasing of California reserves. In the second indictment Fall and Sinclair were accused of conspiring to defraud the government in connection with the leasing by Sinclair of Tea-

First Three Ballots Brings Little Change In Standing Of Candidates

DAUGHTERS OF DEMOCRATIC DELEGATES STAGE BEAUTY CONTEST.

McAdoo Leads In Third Ballots Smith Is Second

Democratic Convention Completes Three Ballots Before Noon With No Nomination for President in Sight and Managers for Favorite Sons Sitting Tight for Deadlock Between Smith and McAdoo

Madison Square Garden, New York, June 30.—With three ballots the Democratic National Convention worked its way to noon today to find no nominee and no material change in the relative positions of the two leaders, William G. McAdoo and Governor Al Smith.

The appeal for the native son held forth only one being eliminated in the three ballots, Sweet, of Colorado. On the third ballot the delegation took the vote which they had been casting for him and divided it principally between McAdoo and Smith.

Aside from a little rumpus in the Missouri delegation the balloting was without interruptions. After challenges with respect to the unit rule two Missouri delegates had a brush but the state's 36 votes stayed solid for McAdoo under the unit rule despite the charges of challengers that the majority there did not express the will of the people of the state and that money had been brought in for the McAdoo campaign.

It seemed obvious that the managers of the leading favorite sons were sitting tight waiting for the expected deadlock between Smith and McAdoo which will unmistakably be established.

Of course all campaign managers expressed satisfaction at the voting and pointed out that things were going as had been predicted.

Second Ballot. The result of the second ballot was as follows:

Underwood 43; McAdoo 431; Robinson 41; Sweet 12; Smith 251; Brown 12; Harrison 12; Saulsbury 6; Cox 61; Silzer 30; Bryan 18; John W. Davis 32; Ritchie 21; Harrison 23; Johnathan Davis 23; Walsh 1; Thompson 1; Kendrick 6; Ralston 30; Ferris 30; total 1998.

Third Ballot. The third ballot was as follows:

Underwood 42; McAdoo 437; Robinson 41; John W. Davis 34; Smith 255; Brown 12; Harrison 12; Saulsbury 6; Cox 60; Bryan 19; Ritchie 22; Harrison 23; Glass 29; Walsh 1; Ralston 30; Johnathan Davis 20; Ferris 30; Silzer 28; Thompson 1; Kendrick 6. Total 1998.

Fourth Ballot. Madison Square Garden, New York, June 30.—The Democratic National Convention found no candidate on its first ballot today.

On the official figures McAdoo's total on the first ballot ran up to 431 1-2 and Smith's 240 1-2. How those figures represented the maximum and minimum strength no one

Hundred Dead; Property Damage Thirty Million Result Of Storm In Ohio

RESOLUTIONS IN MEMORY HARDING ARE INTRODUCED

Bryan Obtains Unanimous Consent to Present Resolutions to Convention

Madison Square Garden, N. Y., June 30.—After announcement of the first ballot today William Jennings Bryan got unanimous consent to present resolutions in memory of the late President Harding. He moved for the introduction and it was done by a rising vote.

GERMAN STEVEDORES NEED MORE SPEED

Bremerhaven. — The stevedores of New York have an enviable reputation for efficiency. For instance they can load a liner in New York in 26 hours, but when the vessel gets here it takes the German dockmen 72 hours to get this same cargo ashore.

Efforts are being made to get better service in Bremerhaven, because every hour alongside a dock is wasteful, from the standpoint of the owners, as compared to sea travel with cargo and tourists paying transportation rates.

Storm in Upper Mississippi Valley and Lake Region Saturday Takes Heavy Toll Life and Property; Lorain, O., Hardest Hit, Reporting 70 Killed and Hundreds Injured; Many City Blocks Destroyed; Several Are Caught When Theatre Collapses

Cleveland, O., June 30.—89 persons are known to be dead as result of Saturday's wind, rain and electrical storm which swept the coast of Lake Erie and Sandusky and Lorain, O., wrecking a large portion of Lorain and parts of Sandusky.

Although the loss of life is not as large as at first believed relief workers said today that the list of dead may grow as there are reports of injured, several scores seriously, and property damage totalling 30 million dollars.

The following is a tabulation of the Ohio storm damage as compiled today by the Associated Press:

Lorain, 0 dead, several hundred injured and damage estimated at more than \$15,000,000; Cleveland, seven dead and small property loss; Mantua, three dead; Akron, one

dead, property damage estimated from \$500,000 to \$1,000,000; French Creek, three killed, 12 houses demolished or badly damaged near Meymouth, two children dead; Alliance, no casualties but 100 persons rescued by police when their homes were flooded; Salem, one dead; Elyria, virtually no damage; Cedar Point, six cottages blown down, no damage to persons reported; Vermillion, small damage from the heavy rains, no casualties; Norwalk-Creek Valley residents made preparations to leave homes as waterworks reservoir became weakened by heavy rains.

Lorain, Ohio, June 30.—The number of dead in Lorain as a result of Saturday's tornado jumped to 70 today as early reports came in from those who had been searching through out the night.

Cleveland, O., June 29.—Loss of life in yesterday's tornado which wrecked a large portion of Lorain and parts of Sandusky and other Ohio cities was not as great as first reports indicated, but re-checking of casualties tonight showed that more than 100 sons lost their lives in this storm and persons lost their lives in the storm and almost simultaneous disturbances at Pittsburg and the Upper Mississippi Valley.

The greatest loss of life was at Lorain, where the latest count showed 59 dead and 118 injured, a score of them suffering severe hurts. The property loss there was upwards of \$30,000,000, 125 city blocks having

MR. SAM WARREN DIED EARLY TODAY

Funeral Services To Be Conducted n Tuesday Held Tuesday Afternoon 2 O'clock From the Home

Mr. Sam W. Warren, 47, died this morning at 3 o'clock after an illness of ten days. Services will be conducted from his late home tomorrow afternoon at 2 o'clock by the Rev. Tom Pollard, of the Free Will Baptist Church, interment following in the family burying ground near Whitehurst Station.

Mr. Warren was well known throughout the county. He resided on the C. G. Little farm, formerly known as the farm of Sheriff Mooring. He was held in high esteem by a host of friends.

The deceased is survived by his wife, two daughters, Misses Julia and Fannie, ages 17 and 19 years, and one son, aged 10 years.

POLICE MUST LEARN HOW TO RUN

Los Angeles.—The police here are being put through a course in physical culture by Captain Walter Yant former physical director of the 91st division at Camp Lewis.

Explaining the need for the course Captain Yant said: "Very few police men can run three blocks or even two. Few can go up or down a rope. Having big muscles and being able to lift heavy weights are not physical fitness. Some officers don't know how to stand. Many don't know how to breathe."

AIRMEN DIE WHEN THEIR PLANES CRASH

Nashville, Tenn, June 30.—Lieutenants Truello and Boyd Copeland, of Columbus, Ga., were killed when their airplanes crashed together over Blackwood field here today. They were participants in the air meet held at Nashville Sunday.

Mrs. James Long Breaks Left Arm In Automobile

Mrs. James Long is in the Washington hospital suffering from a broken arm and bruises received Saturday afternoon when he was knocked from the rear seat of an automobile, falling against the side.

Mr. and Mrs. G. V. Smith accompanied by Mrs. Long were on their way to Pamlico Beach to spend the week-end. Just as they reached a bad piece of road three miles beyond Bath, the car went into a hole which had been filled with mud.

Mr. Smith was driving slowly, not over fifteen miles an hour, but the jar was so great that the tire on the back of the car was knocked off. While Mrs. Long, who was in the rear seat was thrown forward. Her left arm, it is believed hit the side of the car.

Mr. and Mrs. Smith hurried back to Washington and placed Mrs. Long in the hospital where it was ascertained that the arm was broken. She also suffered several painful bruises.

Several cars passing over the same bad piece of road have reported trouble such as receiving shocks and losing tires.

Mrs. Long will remain in the hospital several days.

Women Are Fast Increasing in Wall Street's Crowd

New York—Wall Street is becoming more and more dependent upon women; the average space for each office worker in the financial district of Manhattan has been cut down over six percent in the last decade; bankers maintain more magnificent quarters and give their employes less elbow room than all other tenants of the most pretentious skyscrapers.

These are the outstanding conclusions of experts of the Building Owners' and Managers' Association, after a survey of a group of the world's largest office buildings undertaken to obtain data for the use of architects in designing skyscrapers of the future.

Ten years ago, when the last accurate door-to-door census of first-class office buildings in the Wall Street district was taken, it was found that there were four men employes for every woman, and that the average floor space for each worker was 125 square feet.

A similar census in a typical office building recently revealed that in a total population for the structure of 10,868, the proportion of men to women was only two to one, and that the average working space had been reduced to 107 square feet.

\$35,000,000 To University Given By Rockefeller

Chicago—Urging adoption by the city of Chicago of the University of Chicago "in fact as well as in name," President Ernest De Witt Burton brought out that John D. Rockefeller has given \$35,000,000 to institution, "a sum almost or quite without parallel in the whole history of education."

President Burton made the statement after announcing that Mr. Rockefeller had discontinued his gifts, that the university has no right of further approach to the founders as individuals, "and less reason to make such an approach to Mr. Rockefeller." To the university's resources of approximately \$54,000,000, President Burton said, "there should be added within the next ten or 15 years at least an equal amount," and for this sum "we must look largely to Chicago."

"When in December, 1910, Mr. Rockefeller promised to give the university the sum of \$10,000,000 in ten annual payments, he accompanied this pledge with a statement that this was his final gift, and commended the university to the friendly citizens of Chicago as those to whom it should look for the means with which to insure its future development." President Burton asserted, "In pursuance of this statement and policy Mr. Rockefeller discontinued his gifts."

"It is but reasonable that Mr. Rockefeller should feel that the city whose name it bears and whose citizens have already shown their interest in it by many generous gifts, should adopt the university as their own. The cost of education rises with startling rapidity as one passes upward from school to college, and from college to graduate and professional school."

Philippine Troops May Get Better Army Posts Now

Manila—Military authorities in the Philippine department have recently discussed tentative plans for the gradual concentration of the United States forces in the islands at Fort McKinley and Corregidor Island. At present the United States troops are garrisoned at seven widely separated points, and the plans under discussion included the abandonment of five of these forts, including Fort Santiago, Manila, Camp Stotsenberg, 60 miles north of Manila, Pettit Barracks, Zamboanga, and Camp John Hay at Baguio.

Camp John Hay, which is 5,000 feet above the sea, under the proposed plan, would cease to be garrisoned by troops but would be retained as a convalescent hospital. Fort Santiago, situated within the old Walled City, is now department headquarters and in event of its abandonment by the United States would probably be turned over to the Philippine constabulary as headquarters.

The Fort McKinley reservation is composed of more than 2,000 acres about five miles from Manila on an elevation 100 feet above the sea. On Corregidor Island are the fortifications which guard the entrance to Manila Bay.

SWEDISH FIND NEW PROCESS TO DERIVE OIL FROM SHALE

Stockholm—A total of 245,000,000 tons of fuel oil can be derived from Sweden's deposits of bituminous shale, according to estimates of a Swedish public bill in connection with the announcement that production of shale oil is about to begin

on a large scale at Kinnekulle. Since Sweden is entirely dependent on imports for her coal and petroleum, for many years attention has been directed to the economic importance of finding some way of producing fuel from her vast deposits of alum shale.

A highly satisfactory solution has been reached by two Swedish engineers and the considerable quantities of oil which they have already produced has been tested practically by the Swedish navy on oil-burning vessels and by various industrial es-

tablishments. The results show that shale oil can compete successfully with all except the more refined grades of petroleum oil.

League Ready to Help Community Betterment

Indianapolis—Interest in community and civic betterment among members of the American Legion is growing rapidly, according to Garland W. Powell, director of the Legion's National Americanism commission, under whose direction this phase of Legion work is being car-

ried out. Mr. Powell's statement was based on the hundreds of requests which have been pouring into the Community and Civic Betterment bureau, a division of the Americanism commission.

"While we have many reports concerning posts which have already assumed some community responsibility, it is surprising how many Legionnaires are planning campaigns for betterment of conditions about them," Mr. Powell declared. "Requests for direction along these

lines are received daily, and indicate that constructive work for their neighbors is the principal aim of this great group of ex-service men.

"There is no intention on the part of the Legion to supplant any agency engaged in work of this character, but to offer our broad membership as an agency equipped to align all community endeavor."

Advice furnished by the bureau will extend to every phase of community development and civic betterment, Mr. Powell said.

One Cent Bus Fare.
Long Beach, Cal.—One cent bus fares between the hours of 9 a. m. and 4 p. m. have been put into effect here as an experiment by a private bus company. A nickel is paid to the driver as before, but a coupon good for 4 cents in trade at about 100 city stores is given with each ride.

Famous Zoo to Reopen.
Hamburg, Germany.—After hav-

ing been closed since 1920 for financial reasons, the famous zoo at Stellingen, near Hamburg, founded by Karl Hag-nebeck in 1907, has been re-opened.

This is chiefly due to the initiative of Henry and Lorenz Haxenbeck, the two sons of the famous showman. Their greatest task was that of repopulating the zoo with species of beasts of prey from India and Africa that had been killed off during the world war to save food.

Work the territory near at home. Save freight and traveling expenses, overcome competition and get the biggest business near-by. Manufacturers are concentrating in near-by territories. With the proper advertising and merchandising campaign, and the right sort of sales effort, the Southern states offer the biggest returns for Southern manufacturers.

Tennessee is one of the richest and greatest of Southern states. It has a population of 2,337,885, of which 99.3% are American-born, and 85% are white. The negro population is very small. There is little illiteracy in the state. With its splendid roads, large and thriving cities, Tennessee is very prosperous and progressive.

Manufacturing—Agriculture—Mining—Live Stock—Fruit

The leading industries of East Tennessee are coal, iron, zinc, copper and marble mining. There are some very large textile mills. A great deal of blooded stock is raised in Tennessee. Poultry and small fruits are well-paying side lines. Large areas of Tennessee are devoted to burley tobacco growing and diversified farming. An abundance of cheap water power makes the Eastern section attractive to industries.

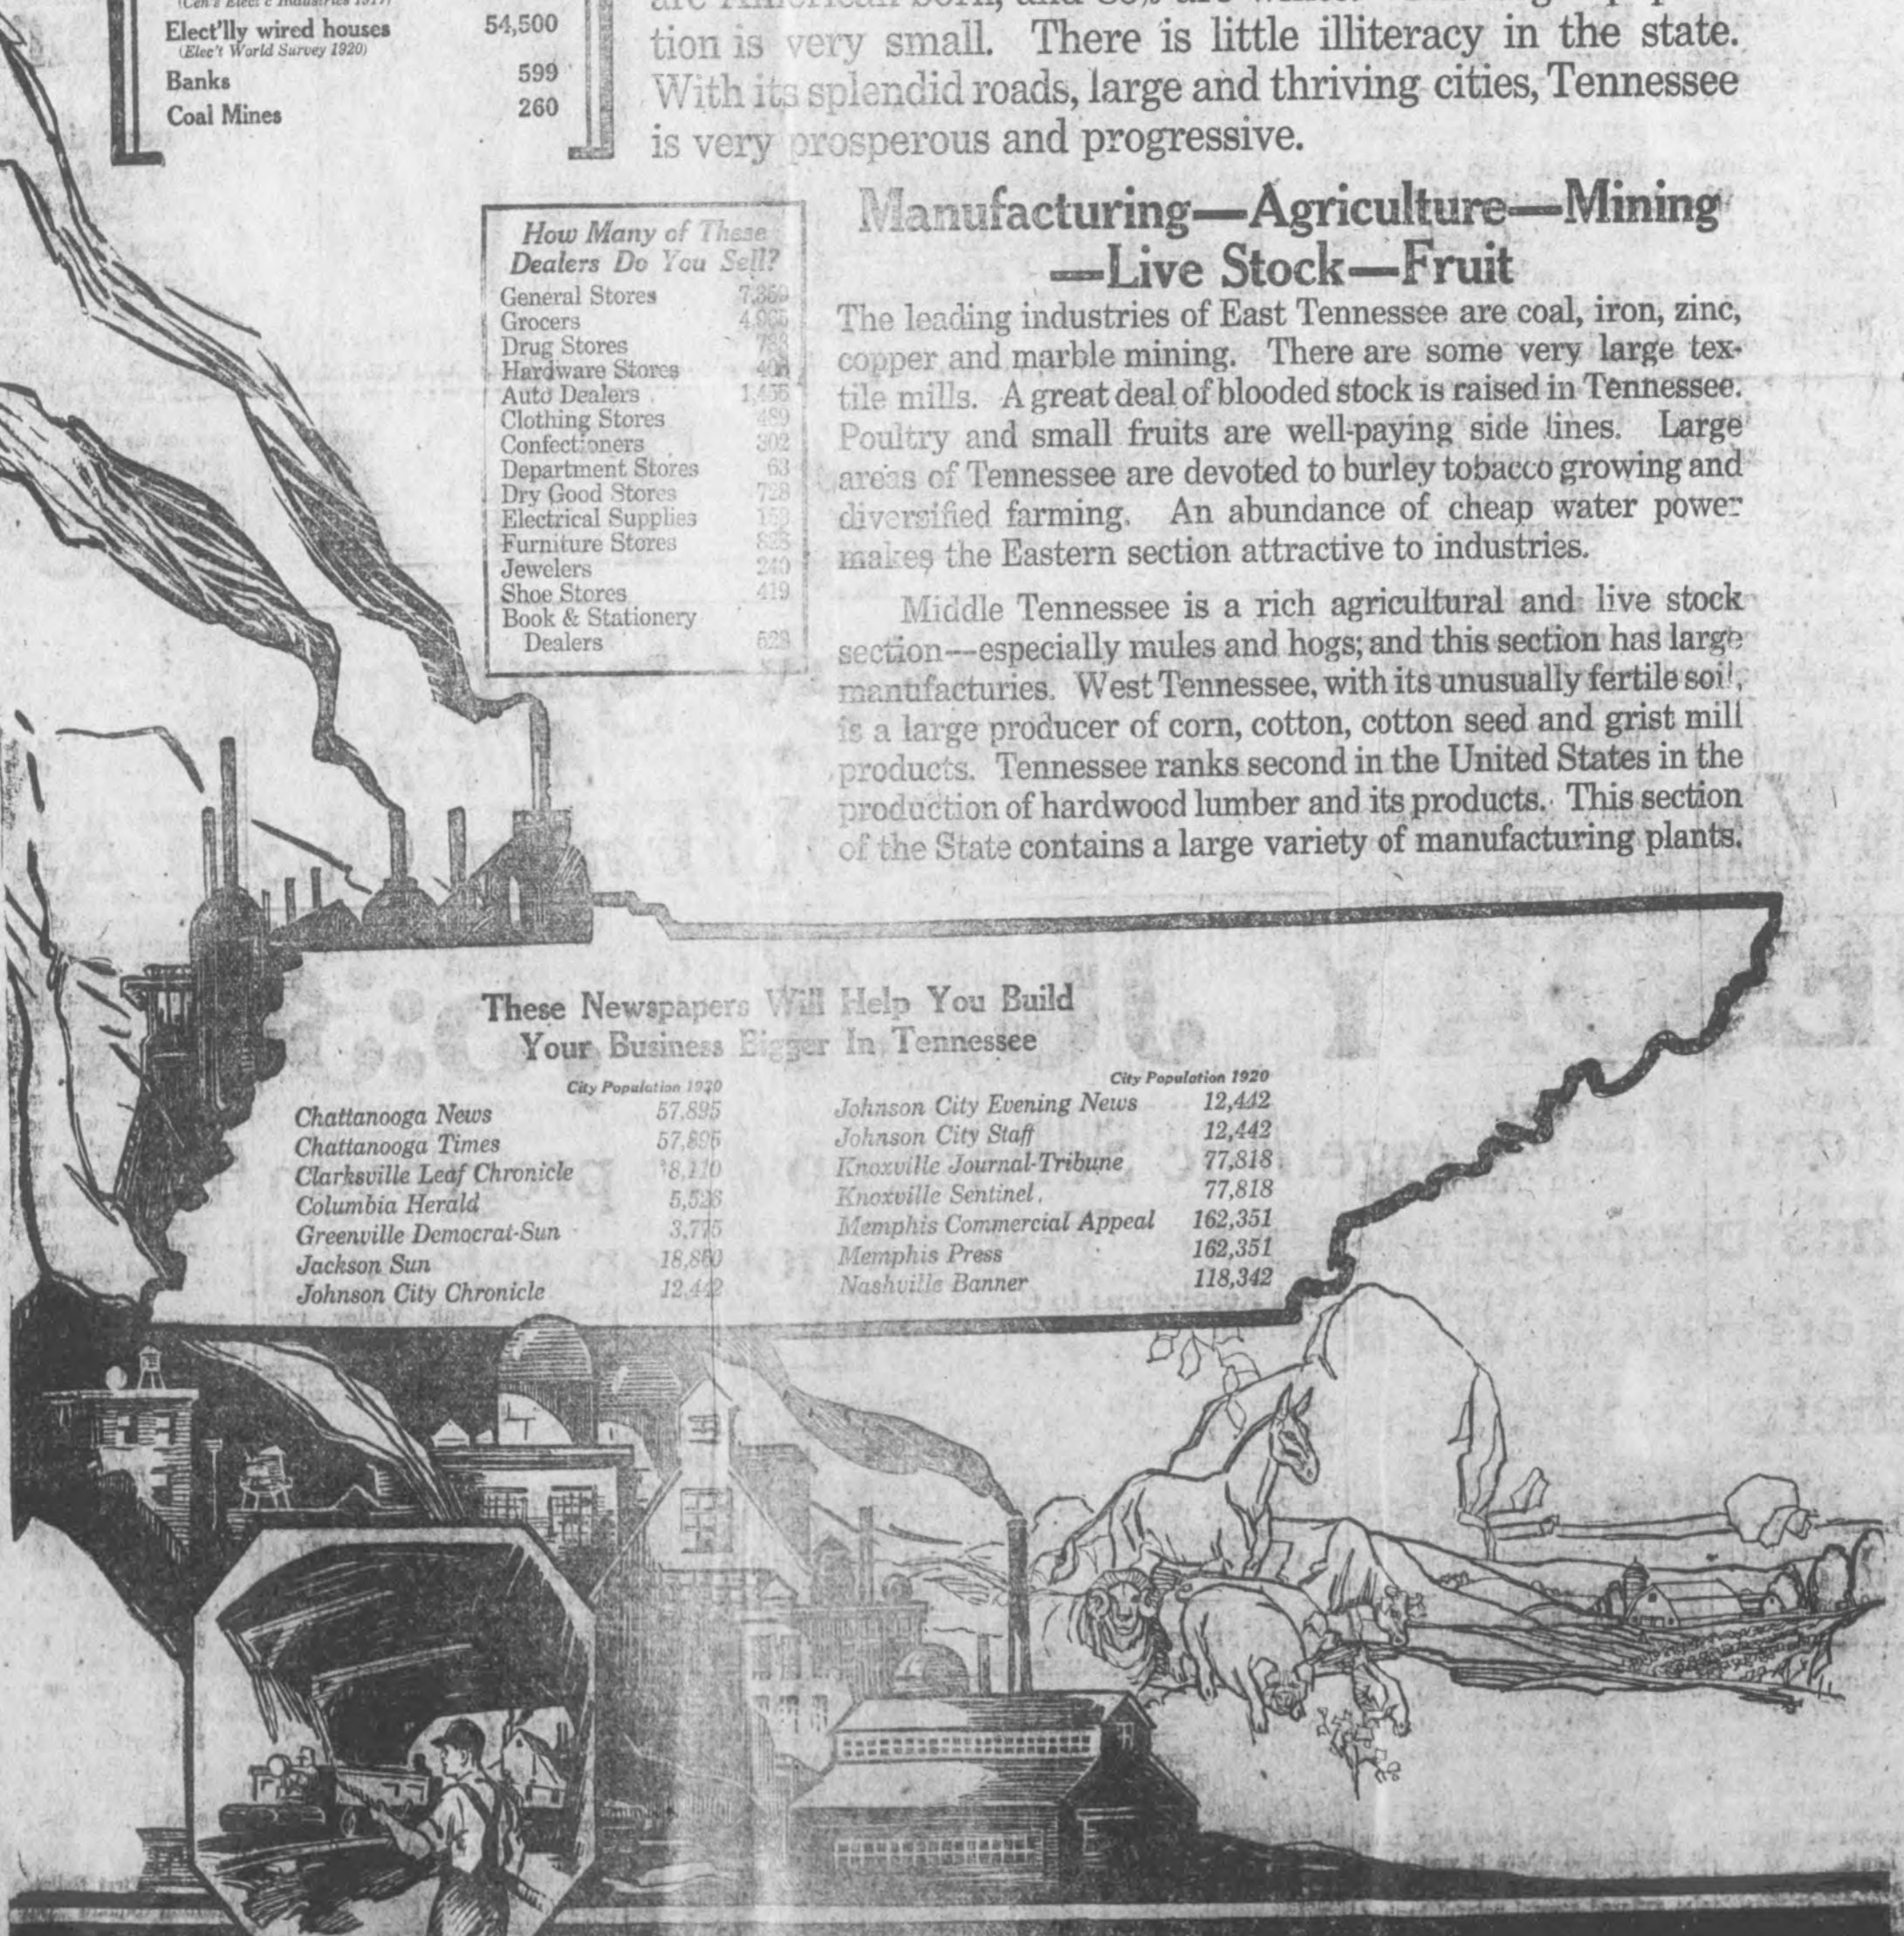

Middle Tennessee is a rich agricultural and live stock section—especially mules and hogs; and this section has large manufactories. West Tennessee, with its unusually fertile soil, is a large producer of corn, cotton, cotton seed and grist mill products. Tennessee ranks second in the United States in the production of hardwood lumber and its products. This section of the State contains a large variety of manufacturing plants.

The South is Your Best Market

MILITARY COURSE IS EDUCATIONAL SAYS BURTON

Chicago.—Such work as the military department offers in an educational institution, properly conducted, "has real educational value and is on that ground educationally defensible," said President Ernest DeWitt Burton, of the University of Chicago, in defining the university's position regarding military training policy and attitude.

Taking cognizance of agitation toward pacifism in some schools, President Burton said that if military work is put on a sound educational basis and conducted on that basis "it should have the unequivocal endorsement of the university."

"It is just neither to the government nor to the university or its students to continue it, as it were on sufferance, existing but without hearty approval," President Burton declared. "It does not follow that students should be urged to take this work in preference to other kinds of study, or in any way constrained or pressed, but there should be such a declaration of attitude as would leave the students in no doubt if they choose this work they have the university's full approval."

"We do not want war; we hope, and will do all in our power to avert it, even submitting to great loss if necessary, and using every possible effort to settle differences, domestic or international, without resort to force; yet we cannot shut our eyes to the fact that we may sometime be forced to defend ourselves against aggression, and that it is necessary for that reason to have a few men who have knowledge enough of military affairs to be fairly quickly convertible into officers capable of training and leading others."

Isolation of Lepers Is India's Big Problem

Manila.—Isolation of the leper is one of the serious problems of India, according to Dr. A. R. J. Douglas of Rangoon, Burma, who is in the Philippines to make a detailed study of conditions of lepers in the islands cleared from the earth within the next 50 years.

played at Cullon where 5,500 lepers are confined. "We have 100,000 lepers registered in India estimate that there are as many more unregistered," said Dr. Douglas. "There are 10,000 known lepers in Burma alone, with 10,000 more unregistered."

"Isolation of the leper is one of the serious problems of India. The country is in the throes of several upheavals at present and too much pressure by the British might bring condemnation from the natives. Complete isolation, as in the Philippines, would be almost impossible in India."

Dr. Douglas says tropical disease experts of India dispute the belief of some medical men that the chaulmoogra oil treatment for lepers is absolute, and that leprosy will be cleared from the earth within the next 50 years.

CHIEF FIGURES IN DAY'S NEWS.

From Mrs. Douglas MacArthur & Walter Hagen. Below: Warren T. McCray & Gen. Enoch Crowder.

Walter Hagen, famous American golf professional, for the second time in three years has won the British open golf championship, played at Hoylake, Eng. Mrs. Douglas MacArthur, daughter of Mrs. E. T. Stotesbury, Philadelphia society leader, and wife of the youngest general in the American Army, recently was commissioned a policewoman in Manila where her husband is stationed. Her first arrest was that of a driver for cruelty to his horse. The man paid a fine. Major-General Enoch H. Crowder, who had charge of the draft in the World War and who now is Ambassador to Cuba, suffered a deep cut over the right eye when he fell leaving the embassy building in Havana. Fifteen remaining indictments against Warren T. McCray, former Governor of Indiana, now serving ten years in Federal prison for using the mail to defraud, have been dismissed in Indianapolis as unnecessary.

PEARLS AND THE RISING FRANC MAKE THE TAHITIANS PROSPEROUS

Papeete, Tahiti.—The economic situation here has been improved by the recovery of the franc, a rise in the price of vanilla, success of the diving season in the pearl islands and a steady market for Tahitian produce.

Direct steamer service with France has been another element in trade revival, as many necessities from that country are available at prices much less than for similar goods from America and the British colonies. Merchandise from France escapes the heavy foreign duties.

One of the first signs of improved conditions has been the demand for lumber. During past years the poverty of the islanders had stopped building operations and caused necessary repairs to be neglected. For many months houses for rent have been almost impossible to find in Papeete.

A steady importation of motor cars continues, with the greater number of American manufacture.

If you thirst for knowledge, go to the library—if you hunger for pure foods come here.

AERIAL LUCK DESERTS THEM WHEN AIRMEN COME TO THE EARTH

Salt Lake City.—Lucky in the air but unlucky on land are Paul Scott and Kenneth Unger, crack pilots of government mail planes stationed here.

At Elko, Nev., recently Scott, in alighting from an automobile at the flying field, stepped into a gopher hole and broke a bone in his left ankle.

Unger, after being forced down near Elko, borrowed a mule from an accommodating farmer to travel to a telephone. Somehow the mule and Unger couldn't agree and the mail pilot was thrown, injuring his right foot.

Neither Unger nor Scott has suffered a scratch or a mishap in years of aviation.

Ward's Orange-CRUSH Lime-CRUSH and Lemon-CRUSH

"Just taste it— It's awf'ly good!"

When Tom shares his bottle of Ward's Orange-Crush with Little Sister, he's making a big sacrifice. For no one knows so vividly as he how good it tastes—to the last drop.

When there's such a delicious difference between the genuine and imitations, it pays to be insistent. Call for an Orange-Crush today—look for the Krinkly Bottle—and—be sure you get it!

Ward's Crushes are more than merely delicious—they are wholesome and have real food value. Read our formula. Here it is: To the natural fruit oils of oranges, lemons and limes are added citrus fruit juices, carbonated water, fruit acid, U. S. Certified food color and pure cane sugar.

The "Krinkly Bottle" insures a good drink—identifies the genuine, too.

TWO WAR SONGS

From the early days of the Civil War even to the present "John Brown's Body" has been a popular marching song. It was a song that caught the popular fancy in the stress of war and few, probably, thought or cared who wrote it. A Boston paper has delved into its origin and the result appears to be that it was not written by any one person, but, like Topsy it "grewed."

It had its beginning, according to the account given, with a glee club among soldiers on defense duty in Boston Harbor in 1861. It was not a spontaneous production. Several persons contributing. Thus it was an evolution with no thought, probably on the part of those who had a share in arranging it that they were producing a song that would be sung by many thousands of Union soldiers on many a weary march. An improvisation, it finally took form and was published and it survives to this day. The Boston soldiers went away singing "John Brown's Body" and it soon spread to all the loyal forces.

In the same connection the sitting that inspired Julia Ward Howe to write the "Battle Hymn of the Republic" is noted. In company with her husband and other friends Mrs. Howe attended some reviews in Virginia near Washington. Riding home at night through the Virginia woods with Union soldiers marching by their side singing "John Brown's Body" while the moonlight glittered on their bayonets, the spectacle provided the inspiration for the battle hymn. Thus there is a connection between the two famous songs, products of the civil conflict. The difference is that one grew, the other was an individual product.

The front porch is where they sit to await the car.

Women who want the "drunk" scene eliminated from motion pictures will have widespread support. It drives some men nearly crazy.

THE URGE TO "GET AWAY"

The battle of the vacation resorts is on with enough spoils for distribution to assure victory to all of the combatants. This annual battle is waged to decide whether the summer vacationists will go to the mountains, to the seashore, automobile touring, to the summer cottage, camping, transcontinental railroad sight-seeing or touring abroad. Next fall it will be learned as heretofore that the vacationists have gone to all of these places.

There are some people who enjoy going to the same resort, in the same way and at the same time every year, but the greater portion of the American populace has an insatiable appetite for the novel and strange in vacation resorts as well as in everything else. So nine out of ten of us will go to the seashore one year, to the mountains another year and motor touring on still another year.

Another phase of the summer vacation is that strange, unexplainable urge which makes everybody at vacation time wish to get away from the scene of his labors. People who live at the seashore 50 weeks in the year go to the mountains or abroad at vacation time. The mountain dwellers flock to the seashore resorts on the vacation excursions and the European and Asiatic probably come to America, while Mr. and Mrs. United States are vacationing abroad. A definition for the word "vacation" might well be "a sojourn away from home," although Webster's gives it as "an intermission from stated employment."

The only available explanation for the vacation wanderlust is the propensity of the American to become bored with his surroundings and to crave new "hunting grounds." Perhaps it is a twentieth century out-cropping of the pioneer instinct of the pioneer? DL of the pioneer instinct of our frontier-pushing forefathers.

If it is true that every time a child is born in Japan the father plants a tree, this Japanese problem will eventually solve itself, the Japs will be lost in an impenetrable forest.

If Emma Goldman does return to this country and ever does or says anything again to justify her sobriquet "Red Emma," it will be necessary merely to slip her a sailing schedule of the boats for Russia.

A German has invented a means by which grand opera may be transmitted by telephone, providing all the thrill for those not present except seeing how the women are dressed.

The weather man gets first attention these picnic days.

What has become of the beautiful legend that the presidential office seeks the man?

A man is old when he can quit a moonlit porch and retire to a hot bed without a sigh of regret.

WALTER P. CHRYSLER'S TRAFFIC TALKS

ORANGE TAIL LIGHTS
A. H. Rudd, chief signal engineer of the Pennsylvania Railroad System, advocates orange colored tail lights because a red light ordinarily means stop but not when attached to the rear of a vehicle.

During a single year nearly 100 of the Pennsylvania Railroad gates were crashed through by drivers who went to the left or the right of the red light, thinking they were passing cars.

A Northern Pacific train stopped at a crossing one time at night and while standing there one car ran into the left hand side and another ran into the right hand.

When you start to pass a red light know what you are doing.

SALE OF REAL ESTATE FOR 1923 TAXES TOWN OF GREENVILLE

By virtue of authority vested in me as tax collector for the Town of Greenville, and by order of the Board of Aldermen, I will on Monday, July 7th, 1924, at noon, in front of the Court House door in the Town of Greenville, sell to the highest bidder, or cash, the following real estate for town taxes for the year of 1923, plus cost.

All persons paying said taxes prior to date of sale will have their names dropped from the list and save additional cost.

Interest will begin on the date of sale and be charged against the said axes at the legal rate, whether taxes are bought by individuals or bid in by the Town.

TO THE VOTERS OF GREENVILLE TOWNSHIP

I wish to express to the voters of Greenville Township my thanks and appreciation for the support given me in Saturday's primary. To those who supported my opponents I have only the kindest feeling.

In Saturday's primary I was the leading candidate for Constable and as the voters thereby expressed their preference for me over the other candidates, I feel that my opponent should be willing to abide by the result of the first primary. However, Mr. Williams has asked for the second primary and I wish to ask my friends who supported me in the first primary for their continued support of me in the second primary and to my friends who supported my opponents, I solicit and ask your support in the second primary.

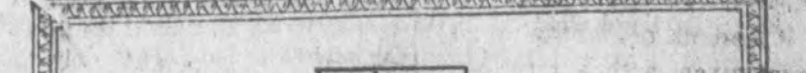

I feel that having been Constable for only two years after December of this year that I am entitled to the office of Constable for the usual two terms.

If elected I pledge myself to the earnest enforcement of the law and the faithful discharge of the duties incident to the office of Constable.

Thanking you for your support of me in the second primary to be held on the first Saturday in July, I am,

Respectfully yours,
HEBER T. SAVAGE, Constable,

To The Voters of Greenville Township

I feel most grateful for the loyal support given me in the primary on Saturday. Believing that those who know of the efficient and faithful service which I have rendered in the enforcement of the law in the past desire my election, I shall be a candidate for the office of Constable of Greenville Township at the second primary to be held on the First Saturday in July.

I ask the support of every voter who wants the law enforced and the duties of the office faithfully executed, and assure you that if I am the choice of the next primary, I shall worthily perform my trust.

Yours for service,
THAD J. WILLIAMS

DAILY COTTON LETTER.

New Orleans, June 30.—The trend of values continue downward under the depressing influences of favorable weather and crop accounts. Returns to the Memphis Commercial Appeal average the condition of the growing crop at 70.4, indicates an average increase in this year's acreage of 3 percent, pointing to a yield of 11,900,000 bales exclusive of linters.

In contrast to numerous other private reports, the New York Journal of Commerce returns average the condition of the crop at 63.3, or a deterioration for the month of 0.5 of a point. The weather Bureau report temperatures continued generally near or somewhat above normal during the last 48 hours with scattered showers Sunday from southeastern districts, mostly near the coast and numerous light to heavy showers with 1 to 2 inches at 12 stations Monday from southeastern Arkansas, the northern portions of Alabama and Georgia and from the Carolinas with light to moderate showers in southern Louisiana and at a few places in Mississippi and Oklahoma.

In early morning there were numerous reports of beneficial rains in Oklahoma and North Texas also at points in central Texas.

Prospects are for more moisture in nearly all sections of the cotton region, including Oklahoma and Texas, which would be beneficial, except perhaps in Alabama and other sections of the eastern half of the belt, where dry warm weather is needed instead.

The government's monthly crop report will be released on Wednesday July 2nd at 11:30 a. m. New Orleans time and will give the average condition of the crop, this year's acreage and indicated yield exclusive of linters. Returns will compare with 69.9 last year when the acreage was 88,709,000 acres and the 10 year average condition of 74.8. The government crop condition for May 25th of this year was 65.6.

In view of the general higher average of private crop condition returns and the privately reported records acreage and larger crop estimates, hope of a larger crop this year is reviving and would probably be realized with any thing like fairly good weather during July and Aug. For the making of a good crop, Texas and Oklahoma will need alternating rains during July and Aug, especially in west and northwest Texas where there is so much virgin land in cotton this year.

HUNDREDS DEAD, PROPERTY DAMAGE THIRTY MILLION RESULT OF STORM IN OHIO

(Continued from page 1)
 been demolished. At Sandusky it was found that only six persons were killed, although a hundred were injured and property valued at \$2,000,000 was destroyed.

There were seven fatalities in Cleveland although the property damage was small. Pittsburgh reported five persons killed, while Matus, Ohio, reported three dead, French Creek three, Weymouth two and Akron one. The death total in Iowa and Illinois was 12, making a death list of 109. The total property damage when reports from the rural regions are complete, will probably aggregate \$50,000,000. Despite the devastation at Lorain, where the tornado tore down a quarter of the city, organized rescue went forward smoothly and state troops kept order among the inhabitants, hundreds of whom were thrown out of their homes and had to be sheltered in tents and with friends.

The greatest loss of life at Lorain occurred in the State Theatre, a four-story building which partly collapsed and crushed many of the spectators at a motion picture show. As soon as rescue work was organized last night, a survey of the situation led to the deduction that many scores had been killed, for buildings had been shipped down over the heads of several fairly large assemblages. At a bathing beach house the structure was torn to pieces and it was announced that dozens had lost their lives.

Investigation today, when light permitted search of the ruins, showed that probably every one at the beach had escaped with his life. The fact that the tornado struck both Sandusky and Lorain while factories were empty on account of the Saturday afternoon holiday probably reduced the death toll by hundreds, for a number of manufacturing plants were torn down only a few hours after several hundred employees had left their work.

Student Repays College For Cost Of Education

Cambridge, Mass.—Should a college student pay the full cost of his education when it is demonstrated that it cost the institution more money than he has paid in tuition fees? There is one senior at the Massachusetts Institute of Technology who thinks so, and he has backed up his belief by sending the institute a check for \$1,052.50. His name is withheld.

Impressed by a suggestion made some months ago by Gerard Swape, president of the General Electric company and a member of the Technology corporation, that the tuition be raised to cover the full cost of education, the student asked the busar to figure out the actual costs. The busar complied and in a letter accompanying his check the student wrote:

"Current discussion regarding the 'Swope Plan' of tuition has opened my eyes to a moral obligation incurred when I accepted an education costing the institute about \$2,200 and paid but \$1,200 for it. Being fortunately in a position to do so, I am enclosing a check for \$1,052.50 which I trust you will accept in repayment of this debt."

He asked that the sum be invested, and after 25 years the principal and accrued income be turned over as part of the class of 1924 endowment fund.

"I realize," he concluded, "that there remains an unmeasurable obligation to those who have made sacrifices so that the high educational standards of the institute might be available to the greatest number, but this cannot be pecuniarily repaid."

FRENCH PRODUCTS GIVEN SPACE AT THE GERMAN INDUSTRIAL FAIR

Cologne.—France was well represented at the recent international industrial fair held in this city, in spite of the fact that the German managers of the undertaking were none too cordial to the Paris exhibits.

There was amazement when the first consignment of French goods arrived, and heated discussion as to what should be done. The managers said no one had invited the French to exhibit, but the French insisted the contrary was true. Cologne is occupied territory, so the Germans finally gave in and allotted space to exhibits of perfumes, textiles and other goods sent by French manufacturers.

SPANISH EDUCATOR CALLED TO COLLEGE IN LOUISIANA

Manila.—Dr. A. Alfageme, acting superior of the Dominican Corporation of the Philippines and former president of the University of Santo Tomas, the oldest university under the American flag, has been elected rector of the Dominican College at Rosaryville, Louisiana. He was born in Spain but has lived 30 years in the Philippines. Although he speaks English fluently he has never been in the United States.

Jim Democrat Stanch McAdoo Boomer.

JIM DEMOCRAT

Jim Democrat, 80 years old, of Atlanta, Ga., who ran for the doctor the night William Gibbs McAdoo was born in Marietta, Ga., attended the Democratic National Convention as the guest of the Georgia delegation, stopping in a luxurious hotel suite. Jim never attended school, but reads and writes fluently, and has educated his children highly.

the right of inspection, but that the actual business be continued in general as it is done by private corporations. Thus the wages and salaries of employees would no longer be decreed by the government, but would be agreed upon after bargaining by both sides. The workmen would, naturally, have the right to strike.

The program under the new scheme would be to conduct only such traffic as proves financially profitable, while at the same time only the covering of costs will be aimed at instead of high profits.

The administration of the railroads under the new plan is to be done partly by an assembly of 29 members, and partly by a board of seven directors. Nine members of the assembly are to be chosen by the government, eight by the riksdag, six by the employees, and six by various outside corporations which represent public traffic interest.

IF YOU SUFFER WITH INDIGESTION Give It a Trial B. S.

The great stomach and liver remedy. Relieves indigestion, gas, heartburn, constipation. Money back if not satisfied. **B. S. WARREN DRUGGIST**
