PRESIDENT ISSUES PROCLAMATION ON EDUCATION WEEK

Greenville Schools Will Observe Week With Special Programs; Parents Urged to Visit Schools

Carrying on the plan fostered by the American Legion and the National Education Association this week has been designated as National Education Week in the United States. Each day of the week has been set aside for the study of certain of the fundamental principles of true Americanism and in the local schools a program in keeping with the occasion has been arranged.

On last Friday President Coolidge issued the following proclamation officially designating this week as National Education week:

"Education for the children of all the people, extending from the primary grades through the university, constitutes America's noblest contribution to civilization. No child or youth in the United States need be deprived of the benefits of education suited to his age and degree of advancement.

Nevertheless, either through negligence or because of unfortunate circumstances, which might be controlled with sufficient effort, large numbers of children do not receive the full preparation for their life's work to which they are justly entitled. Many have reached maturity without even the rudiments of education.

This condition demands the solicitude of all patriotic citizens. It involves not only the persons immediately concerned and the communities in which they live, but the Nation itself, for the welfare of the country depends upon the character and the intelligence of those who cast the ballots.

Education has come to be nearer to the hearts of the American people than any other single public interest. The plan of maintaining educational institutions from public funds did not originally prevail in most of the States, and even where it was in use it was but feebly developed in the early days of the Republic. That plan did not arise spontaneously in the minds of all citizens. It was

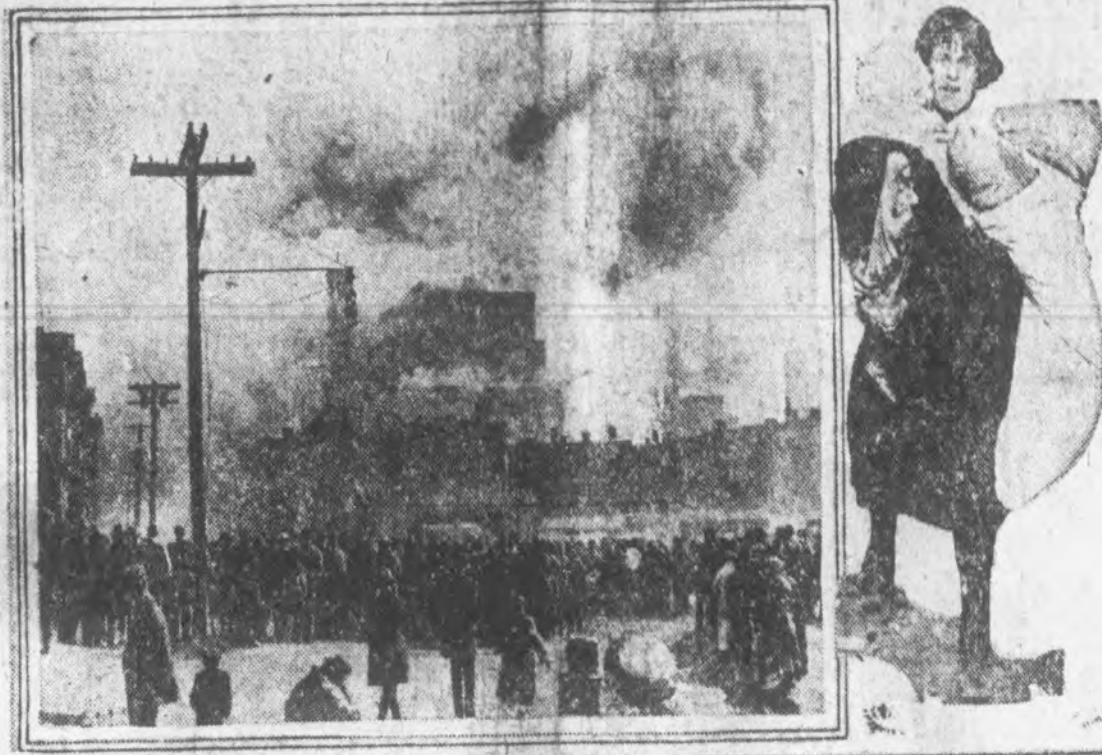

Raleigh Post Endorses Fletcher Commissioner Veterans' Loan Fund

Raleigh, Nov. 17.—The local post of the American Legion has followed the example set by a number of other posts of that organization located throughout the state and has endorsed Captain A. L. Fletcher, chief clerk in the Insurance Department, for the position of Commissioner of Veterans' Loan Fund which will shortly be established in North Carolina, as provided for in the Crist bill passed by referendum at the November 4 election. The endorsement was unanimous. Hesitancy was thought only once when the endorsement of Mr. Fletcher was brought before the post meeting and that was the grounds that the Legion should not enter into politics, but when certain members expressed the opinion that the peculiar position of the office placed it out of politics, the action was unanimous.

The position pays \$3,500 yearly and the Commissioner is to handle the loans made to North Carolina veterans of the World War for the purpose of building homes and purchasing farms. The fund is limited to \$2,000,000.

It was announced that the local post will seek the endorsement of State Commander Wade H. Phillips, of Lexington, for Captain Fletcher.

LOS ANGELES WATER SUPPLY WAS CUT OFF BY RAIDERS SUNDAY

Act is Result of Long Standing Water Feud Between the City and Valley Ranchers

Los Angeles, Nov. 17.—How to restore, without bloodshed, the flow of water through the Los Angeles aqueduct, diverted into Owens River yesterday by raiders who swooped upon the water gates near Lone Pine 200 miles north of this city in spite of protests of city employees and Inyo county officials, was a problem faced by Los Angeles authorities today.

The ultimatum delivered by the raiders was that the gates would open until Los Angeles had settled the Owens Valley water rights on a basis satisfactory to valley ranchers and business men.

No attempt at forcible ejection of the raiders will be made pending Governor Richardson's reply to an appeal for state troops, Los Angeles officials said, but 75 civil complaints have been prepared for filing in Superior court a king injunction to dispossess the raiders.

Bishop, California, Nov. 17.—The Los Angeles aqueduct waste gates near Lone Pine were captured yesterday by a small army of Owen Valley men who brushed aside city employees on guard and diverted Los Angeles' chief source of water supply into the Owens River.

Determined to keep the water flowing through the spillway until Los Angeles settles the long standing water feud with valley ranchers in a manner satisfactory to them the raiders defied authorities to drive them out.

The raid today had settled into an organized occupation effected by several hundred men and women. Sixty men were left on guard at the waste gate, last night and will be relieved by others today Harry Glascott, editor of the Owens Valley Herald and spokesman for the ranchers, told the Associated Press, and thereafter as long as is necessary the guard will be maintained being relieved by fresh men every 24 hours, he said. Should 60 men not be enough the force will be increased, he said. Yesterday 100 men held the gate.

Los Angeles' water supply is assured for 90 days yet from storage reservoirs at several places south of the aqueduct. County authorities have refrained from action pending an appeal by the sheriff for state troops. Ranchers insist that the aqueduct is robbing the ranchers of the valley of water necessary for irrigation.

COOPER FACES CROSS EXAMINATION ON THE WITNESS STAND

Examination at Times Takes Form of Heated Debate Between Defendant and Prosecutors

Wilmington, Nov. 17.—Admitting on the witness stand that there was a \$6,000 item not shown in the loans and discounts of the defunct Liberty Savings Bank, Thomas E. Cooper, former president explained on the witness stand today that the amount of the note was included in the bank's business for the day but that failure to list it must have been due to an oversight of the bookkeeper. Cooper was being cross examined in his trial along with Joseph C. Rourke, former cashier of the bank for alleged violation of the state banking laws.

Cooper was put through a grueling examination by Solicitor Kellum. At times debate between the witness and the prosecutors became heated. At one point Judge Henry A. Grady, before whom the case is being heard, ordered Cooper to sit down and answer questions. Cooper was endeavoring to explain why a \$6,000 note given by S. G. Pittman was not listed on the loans and discounts book. The defendant admitted that 19 other items listed for the day totaled \$3,729,744 for the day although the total at the foot of the page read \$9,729,744. He admitted that the figures add up \$6,000 less than shown by the total.

Another item upon which there was considerable discussion was a note for \$1,500 given by R. B. Stevens, president of the Bank of Cerro Gordo, and head of the Southern Brick Company, of Raleigh. Cooper explained that on July 31, 1922 this note had been transferred from the Commercial National Bank to his (Cooper's) credit in the Liberty Bank; that it was charged to his account at the Commercial bank credited at the Liberty. Cooper said that Stevens was probably worth \$250,000 and that Stevens and Ben Allen had been building 50 houses in Raleigh and Stevens had told him recently that he had made at least \$50,000 in the past six months and said the \$1,500 note would doubtless be paid by Stevens if it had not already been paid. Cooper asserted that the Stevens note was sold by the Commercial National Bank to the Liberty and denied that there was anything wrong with the transaction.

It is expected that the case will last several days longer, possibly throughout the week. Both sides have much rebuttal evidence to offer.

Attractive Book Display in Blount-Harvey's Window

Children and grown-ups have been attracted this past week by the display of books in Blount-Harvey's window. An attractive poster in the window stated that the gate way to Bookland lay through the Greenville Public Library.

The arrangement of the books was most attractive and artistic. Book trunks, a table and a quaint chair, with floor pillows and vases from the gift department of Blount-Harvey's store made a home-like setting. One could easily imagine the six year old sprawled on the floor, with his Mother Goose, which in these modern days has such colorful illustrations.

The colorful pages of the book was one of the attractive notes of the display. Many of the children's favorites from Mother Goose to Kipling's Jungle Stories were shown. A beautiful set of new books for the grown-ups, "The Romance of America," was displayed too.

The Woman's Club which sponsored the observance of children's Book Week is indebted to the firm of Blount-Harvey for the use of their window and to the firm of Quinn & Miller also for the several pieces of furniture which they contributed to the display.

Such popularity must be deserved

TO convert critics into enthusiasts, whether for a new school of music or for a cigarette, requires something more than luck. There's sound reason for every big swing in popular taste. So, to account for Chesterfield's swift rise, look to the cigarette itself, its tobaccos, its blending—in short, its taste. This one thing alone—its decidedly better taste—explains why thousands of smokers are changing from other cigarettes to Chesterfield.

PRESIDENT ISSUES

PROCLAMATION TODAY

(Continued from page 1) Only when the suggestion came force-fully, convincingly, and repeatedly from a few pioneers that popular interest was fully aroused. Vigorous campaigns were required not only to establish the idea of public education, but also for its maintenance, and for its important extensions. Campaigns of national scope in behalf of education have been conducted annually since 1920, and they have been increasingly effective with each succeeding year. They have concentrated attention upon the needs of education, and the cumulative impetus of mass action has been peculiarly beneficial. It is clearly in the interest of popular education, and consequently of the country, that these campaigns be continued with vigor.

In the last few years we have placed much emphasis on vocational training. It is necessary for men to know the practical side of life and be able to earn a living. We want to have masters of our material resources. But it is also necessary to have a broad and liberal culture that will enable men to think and know how to live after they have earned a living. An educated fool is a sorry spectacle, but he is not nearly so dangerous to society as a rich fool. We want neither in this country. We want the educated to know how to work and the rich to know how to think.

Now, therefore, I, Calvin Coolidge, President of the United States of America, do designate November 17 to 23, inclusive, as American Education Week. I urge that the citizens do all they can to advance the interests of education. It is especially recommended that the Governors of the States issue proclamations emphasizing the services rendered by their educational institutions and calling upon their people to observe the occasion by appropriate action. Further, I urge that all civil officers whose duties relate to education, and all persons connected with the profession of teaching, exert themselves to diffuse information concerning the condition and needs of the schools and to enhance appreciation of the value of education. Patriotic, civic, religious, social, and other organizations could contribute by conducting meetings and demonstrations to promote the desire for knowledge. Ministers of religion and members of the press are asked to exercise the means within their power to increase enthusiasm for educational advancement and to stimulate zeal for enlightened citizenship.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the City of Washington on this fourteenth day of November in the year of our Lord One Thousand Nine Hundred and Twenty-four and of the Independence of the United States the One Hundred and Forty-ninth.

(Signed) CALVIN COOLIDGE.

Methodist Prayer Week Being Observed Throughout Nation

Nashville Nov. 17.—Sunday marked the beginning of Methodist Prayer Week which will be observed by the churches of that denomination throughout the country in the drive to stimulate interest and gain strength for the missions. The call was issued by the Board of Missions of the Methodist Episcopal Church, South.

and the call is being further extended to the people through the 17,000 pastors of the denomination.

During the week, according to the plan, prayers will be offered for the missionaries at home and in the foreign field for protection and increased success in their work, and for the church at home that it may cooperate with missionary leaders. Supplications will also be offered for the entry into the missionary field of more men and women.

Each congregation has been requested to carry out a program that is most suited to its needs. The general rule, it was said, will be to have special prayers at the Sundays and mid-week meetings preceding Thanksgiving. At the close of the week a free-will missionary thank offering will be taken and sent by each church to the Board of Missions to be used for mission work.

It is expected that beneficial results will attend the week of prayer

and that it will revive interest in missions which the mission leaders say has sagged for some time past.

Officials of the board stated the recent mission collections have not been sufficient to maintain the extended work which has already been inaugurated in the eleven foreign and twelve home mission fields.

Luxurious Train to Coach Tourists to Interior of Cuba

Havana.—A new train with dining car, bar, baths and separate barber shops and smoking compartments for men and women will be put into operation between Havana and Santiago de Cuba in January, according to announcement by R. L. Brannen, general agent of the Peninsular and Occidental Steamship Company. Special coaches are being constructed by the Pullman Company and the promoters claim it will be the best appointed passenger train in the world.

The new service is designed to induce American tourists to visit interior points instead of spending all their time in Havana, as most of them do now, and the project is backed by several railroads in the southeastern United States as well as the steamship company and the

Cuban roads. The train will leave Havana on Mondays and return on Friday, making a number of stops en route.

VISIT YOUR SCHOOLS

This is American Education Week throughout the nation, so designated by the President in a special Proclamation. The slogan throughout the nation this week is "Visit Your Schools." The idea is that the American public is woefully ignorant as to the real work that the public schools are doing. It was the American Legion's idea that the people of America should spend one week finding out what the schools are doing. The Legion also realizes that the future safety of the nation is dependent upon an educated populace, and the Legion is, therefore, standing solidly behind the Public School system of America.

This week's different days are designated as follows:

- Monday, November 17, Constitution Day.
 - Tuesday, November 18, Patriotism Day.
 - Wednesday, November 19, "School" and Teacher Day.
 - Thursday, November 20, Illi cracy Day.
 - Friday, November 21, Physical Education Day.
 - Saturday, November 22, Community Day.
 - Sunday, November 23, for God and Country Day.
- In the Greenville Schools, special programs

are being prepared in accordance with the above days. There will be short talks by members of the American Legion and other prominent citizens. In the History and Civic classes lessons are being assigned which carry out the above ideas. On next Sunday the different churches and Sunday Schools will be asked to carry on the work, devising and carrying out programs embodying the idea "For God and Country."

The work in the classroom is the most important part of the school system. The school folks are anxious to show the public the work which is being done in these classrooms in Greenville. The citizens of Greenville will, no doubt, avail themselves of the opportunity presented this week to visit the schools.

Dr. Nichols, ex-president of the American Chemical Society predicts that within the next 20 years chemists and physicians will have perfected cures for every enemy of the human body, and no one will die until the machine is just naturally worn out. These same scientists and chemists also agree that the time is not far distant when the human race will be fed with prepared pills and powders. These things all sound so good that we would need wings to complete the round of life—and maybe another Henry Ford will spring up to supply them.

The League of Nations, now in session at Geneva, is making a strenuous effort to restrict the manufacture and sale of opium in China and India. Both of these countries are to suppress the traffic but certain governments that derive very large revenues from the business, stand in the way. The responsibility for this condition should be placed where it belongs and properly placarded by pillars of publicity.

During the year 1923 one divorce was granted for every seven marriages in the state of Illinois. During October last 83 divorces were granted in Reno, Nevada, while only 40 marriage licenses were issued. The new divorce system, however, does not seem to discourage the matrimonial inclined—it's a question if it does not act as a stimulant.

MRS. V. MARTIN VIEWS CONTENTEDLY TRIUMPHS WOMEN

London, Nov. 16.—The gift to the Anglo-American Association of an ancient English manor house to be used as a hostel by American pilgrims to Sulgrave Manor, the home of George Washington's ancestor, brings out of obscurity a woman once known from one end of the United States to the other.

For the honor of the manor house is the venerable Mrs. Victoria Woodhull Martin, candidate for the presidency of the United States in 1872 along with Gen. Grant and Horace Greeley. Mrs. Martin, then Mrs. Woodhull, was the nominee of the Equal Rights party. That was the year President Coolidge was born; Mr. Davis was not born until the following year; Gen. Dawes was leaving Sunday school texts and Mr. LaFollette was a youth of seven-teen.

Famous for her mavelous beauty not less than for her radical views on all questions, respecting woman's status in society, Mrs. Woodhull made a spectacular fight in a campaign which closed with the re-election of Gen. Grant and Greeley's tragic death. But she had demonstrated that a woman could run for president even though the women of the nation as a whole were not to receive the franchise until nearly half a century later.

But Mrs. Woodhull Martin has lived to see the suffrage won, not only by the women of her native America, but by English women as well, and from the retirement of her beautiful home at Norton Park, Bredon's Norton, up in Worcestershire, at the age of 86, she looks out upon a world which today cheerfully accepts for women the enlarged horizon for which she was fighting two generations ago.

To many the news of Mrs. Woodhull's latest gift will come as rather a surprising reminder that one who took such a prominent part in American politics of such a faraway time is still alive. Born in Ohio in 1838, she was the widow of Dr. Canning Woodhull when she made a speaking tour of England. One of her audience in old St. James Hall was the late John Biddulph Martin, English banker and philanthropist. Their marriage followed, and the woman who had started the United States by running for the presidency came to England to reside.

Through all the subsequent years, Mrs. Martin has lent her influence and expended her fortune liberally in all projects to cement friendship between the country of her birth and that of her adoption through marriage. She was a moving spirit in the purchase of Sulgrave Manor, the old Washington home, as well as a generous contributor to the necessary fund.

The manor house, which the aged lady now gives as a hostel where Americans visiting Sulgrave Manor can find lodging, was built about the time of Shakespeare's birth. It will offer accommodations for some 30 visitors and will supply a want at present lacking in this historic neighborhood.

Melancholy Reigns In Kazan of artery Once City of Wealth

Kazan, Tartar Republic, Russia, Nov. 7.—Nowhere in Russia is the blighting influence of the Russian revolution seen more strikingly than in Kazan, capital of the newly-created Tartar Republic and once one of the most prosperous cities in Europe. If death itself had overtaken the city, the ravages could not have been greater. The great factories are idle the stores empty and abandoned, the homes are crumbling to ruins, and the people seem stricken with hopelessness and despair.

The granite and bronze monuments to Alexander the Second and other historical figures of Russia have been wrecked and replaced with harsh Communist figures of workmen. From all flagpoles the red flag of the revolution flies. To many it is only the grim reminder of the spiritual death of the city, which has been in Russia's possession since the days of Ivan the Terrible.

The commercial life in Kazan is at a standstill. Half the population, finding conditions intolerable, have left for neighboring cities which promise a better existence. The roadways are so little used that grass and weeds are growing in the crevices between the paving-stones. Many of the stores are either shuttered or windowless. The quantities of leather, soap, candles, wheat and other staples which the city annually exported are but memories of its past greatness. It now has nothing to

export. It barely produces enough for its own maintenance.

The churches present an especially melancholy sight. They are in full process of decay. The clergy are too poor to repair them. Many of them have closed their doors. Others have been converted into Communist clubs or barracks. The correspondent visited the largest of the churches the famous Convent of the Virgin Mother, where mass was in progress. The priests and nuns were more numerous than the congregation, which numbered exactly six persons.

AMERICAN MONEY TO DEVELOP FISHING INDUSTRY IN IRELAND

Dublin.—Captain M. Brophill of the Irish Fisheries Association has said that American financiers have agreed to form a company with a capital of \$5,000,000 to develop the Irish fishery industry. The company will be registered in Ireland and the directors will be Irishmen, but the money will be floated in America. The money, said Captain Brophill, has been actually put up.

Tank ships will be procured for the purpose of placing Irish live fish on the British and Continental markets, and it is hoped to establish a large trade in cured fish in America.

Physical Education Given Incapacitated Students, He Says

Berkley, Cal.—The University of California's system of physical education has been expanded to include students who have physical defects, but are not necessarily required to forego all exertion conducive to building up their bodies.

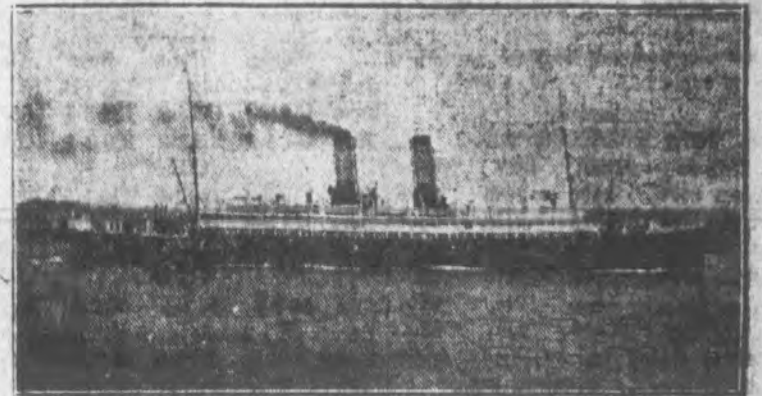

As Prof. Frank L. Kleeberger, chairman of the department of physical education, explained it: "Many students who are incapacitated in one way or another apply for permission to be excused from work in this department because they think that it is impossible for them to pursue such a course. Yet they are anxious to engage in something that would border along athletic lines. After we have secured permission from attending physicians, we have in many instances been able to place such students in special classes, with results very gratifying."

University gymnastic teams in recent terms have included three one-legged men. One student with a withered arm has become adept at bag punching.

"Physical education does not necessarily mean physical exercise," said Prof. Kleeberger. "Many times we recommend abstinence from physical exercise and advise certain regular living habits which tend to build up the nervous system. Diet also plays an important part."
