London, Nov. 14 .- (AP) - The woes of the organist in the village of Steaple Barton, near Oxford, have been considerably lessened by the removal from the church organ of a swarm of bees and 30 pounds of hovey three univellas and a number of careful y writteen sermons.

Difficulty had been experienced for some time in the intenation of the Vox Humana reed which hummed a little out of tune and continued to perform for some little time after the organist had stopped, often leading slow witted members of the congregation to continue into the first verse of the next hymn. Although learned men who have consorted long with bees maintain that these useful insects can hear no sound save their own buzzing, it is said that the bees of Steeple Barton clearly distinguished between various musical compacitions, greatly preferring to acd their humming contribution to bright and live y tunes. The honey obtained is of a very superior quality.

The presence of umbrellas in the melodious bowels of church organs is a continuous s'lent annoyance to the English users and clergy, and can only be effectually prevented by having the organ pipes open downward instead of upward. No one has yet been apprehended in the act of inserting his umbrella in the organ, an act which would probably come under the jurisdiction of the court of arches, but as a number of the umbrellas found are of the curved variety, not easy to drop accidental'y

"Capital Punishment"

A WARNING TO MOTHERS AND FATHERS

First we want you to agree with us that the neglect of children by both Father and Mother of today leaves a great responsibility upon the Parents.

Our first question is: Do you know the true comparions hip of your son and your daughter? Do you ever correct your children a: 1 advise them the necessities of life?.

Second: Do you know the whereabouts of your children each de-? You take the average mother, if her son is unfortunate enough to be sentenced to some penal Institution she will always say if I had only told him things he should know. There are a great many to thers and fathers who give their children the best that it in them, but through selfishness upon the children's part, they he situte to accept the advice of their parents. We would a vise you to witness this picture if you possibly can.

RA BOW IN "CAPITAL PUNISHMENT"-PREFERRED PICTURE

A WARNING TO YOUNG MEN

The average young man of today who becomes a criminal is not a criminal at heart. I can truthfully say that we have a large percentage of men and women in our penal institutions who should be set free and a large percentage on the outside in this world that should be committed. In presenting this production to you it calls to your attention the days when you were little tots sitting upon your mother's knee, then you grow up into manhood, and are thrown out into the world to make your own living. Probably your dear Mother and Father have gone before you and did everything in their power to bring you up in the right path. Then you fall into bad companionship, you are persuaded into evil habits by some man or woman. You are then arrested, tried and convicted and sentenced either for a long period in the penitentiary or electrocuted or hung. Then while sitting in your cell those dear memories come back to you when you were but a child. Probably some one individual on the jury or probably some witness who is offering evidence against you is your worst enemy and we feel in presenting a picture of this nature to you that it might save you many a heart ache and many unhappy hours, so we're going to urge you to see "Capital Punishment" if you never witness any other production.

TO THE YOUNG GIRLS

My Dear Young Ladies:

We urge you to witness this production by all means, and want your kind and devoted attention.

There are very few young girls of today who know the true character of the young man that is her companion. We feel in presenting this production to you that we can convince you that you have the wrong conceptions of life. In a great many cases there are some of our girls who have sent a great many innocent men to the penitentiary or to the the electric chair when it could have been avoided by telling the

and raids were common. Probably the best known of the early pirates was Alec MacLean, the Wolf Larson of Jack London's "Sen Wolf." His last tr'p to the Arctic was made on the schooner Comandia, a vessel loss querading under forged Mexican papers. One of his best known exploits was when he eluded a pursuing cutter and anchored two barrels of sea skins to a buoy. Later he returned and picked them up.

In 1911, all governments involved in the seal industries agreed to handle the killings themselves. Guards were stationed at the rookeries and sealing at sea was made unlawful. Th' treaty was drawn to run 15 years. The pact is expected to be renewed nex year, although British Columbia seal es are opposed

At present the entire patrol is can red on by four American coast guard cutters, whose greatest duties lie in administering rel'ef to northern residents. Justice and food stuffs are d'sensed by these guardians of the North, while poachers are of minor importance.

Wednesday will be given over to a special effort to have parents and business men visit the schools to learn more of actual teaching condi-

This portion of the program is considered by the Bureau of Education as one of the most important phases of the work, Commissioner Tigert holding that an intimate knowledge of the schools by school patrons will make for more rapid development.

CREATE FORE SCHOOLS FOR VAGRANT RUSSIAN CHILDREN

Moscow. - Vagrant children in Russia number more than 300,000, the commissar of education has found. He characterized it as a sotuation menacing the welfare of the country and accordingly has organized a new system of factory schools for homeless children.

The big centers, like Moscow, Leningrad, Kharkow and others are overrun by homeless waifs who sleep on the sidewalks, half naked and half starved. The "Central Lenin Fund" for vagrant children, to which the government contributed several milion roubles and to which another few millions have been added by voluntary contributions, has been found insufficient.

The factory school intends to teach the waifs various trades in addition to their general education.
