AIKEN DOUBTS AFFIDAVIT IS A GOOD FEATURE

Questions Constitutionality Of Part Of Labor Law As Test Case Looms

Washington, Sept. 18—(AP)—Senator Aiken (R-Vt.) said today the controversial non-Communist provision of the Taft-Hartley law is "silly" and possibly unconstitutional.

The Vermont lawmaker told reporters he favors elimination or at least clarification of the section.

Aiken made his views known a few hours after the National Labor Relations Board received the first test case on the issue, an appeal by the AFL Brotherhood of Electrical Workers.

The brotherhood asked the board last night to overturn a ruling by its Baltimore regional director that he could not handle a union petition because top officers of the AFL had not furnished non-Communist affidavits.

The union had petitioned for certification as bargaining representative for workers at radio station WURL in Arlington, Va.

The provision which has stirred such a storm required all officers of labor organizations to file affidavits denying membership in the Communist party and disavowing overthrow of the government by force.

Robert N. Denham, general counsel of the National Labor Relations Board, interpreted this to mean that all top officers of the AFL and CIO must file affidavits with the NLRB before any affiliated unions could qualify for the services of the board.

John L. Lewis, while he is an ardent anti-Communist, refused to comply. And since the United Mine Workers chief is an AFL vice-president, this prevented the formation of the executive council from meeting Denham's terms.

Gandhi Fearful Of War Between States Of India

New Delhi, Sept. 18—(AP)—Mohandas K. Gandhi declared today that unless Pakistan and India frankly confess their guilt for the grave communal atrocities committed in the Punjab and in Delhi war between the two new dominions appears inevitable.

He told a newly attended meeting here that if the two states persisted in their present attitudes toward the violence which has taken countless thousands of lives in communal strife between Moslems, Sikhs and Hindus, it would mean war.

Gandhi, the spiritual leader of the All-India Congress party, said he had come to this Indian capital in a "do or die" effort to restore peace to Delhi, which has just passed through a ghastly period of communal rioting, death, arson and torture.

Recession Trend Seen By Umstead

Lexington, N.C., Sept. 18—(AP)—Soaring prices of food and other commodities are signals of an economic recession that may come if the present inflationary spiral is not stopped, Sen. William B. Umstead, North Carolina Democrat, said here today.

He told the Lexington Kiwanis Club "the unselfish cooperation of industry, agriculture, labor, the public and the government will be needed to halt the upward trend of prices and assist in the stabilization of the nation's economic structure."

Marshall's Big Guns

U. S. Prepares To Assault Soviet Position Before UN Assembly With Violent Verbal Attack On Russian Policies; What He Said; The Perilous Road

By DEWITT MACKENZIE

Back in the days of World War I, when trench warfare was in vogue, a big offensive was launched with a terrific bombardment of enemy positions, after which the attacking troops went "over the top" in the grim, gray dawn—and generally it was only when close contact with the entrenched foe was established that the efficacy of the bombardment would be accurately estimated.

Yesterday in the U.N. Assembly the Western democracies opened up a fierce bombardment against the Russian bloc as a preliminary effort to force the latter to abandon its dangerous to world peace and re-habilitation. It was a violent assault, but we still have to get a view of the Red trenches before being able to determine what, if any, damage has been done in the way of focusing world attention on the critical situation.

Certainly some of the language was the product of shirt-sleeve diplomacy. U.S. Secretary of State Marshall of course was the big gun and he would seem to have made the Russian delegation take temporary cover.

Soviet Chief Delegate Vishinsky, who had been scheduled to follow Marshall yesterday, postponed his speech after having had a good preview of the text of Marshall's address.

Marshall—the general who had brought to do with the strategy which brought allied victory in the recent war—laid down a bold, concrete program that brought him a final burst of applause from all quarters of the great theater excepting those of Russia and her satellites. As was expected, he lashed out at Soviet "abuse" of the veto in the Security Council which has been virtually ham-strung. And he demanded that the assembly should create its own security council as a substitute which could not be interfered with by the veto.

That in itself was enough to stand the assembly on its head, but Marshall went the limit. He insisted that the U.N. save Greece from Communist aggression. He called on the assembly to pin hostile acts (Continued on Page Four)

Italian Troops Enter Gorizia

Italian troops of the Mantova Division ride an armored car into that section of Gorizia which reverted to Italian rule with final ratification of the Italian peace treaty in Paris Monday. Residents of the sector greet them. With British and American troops falling back from the old Morgan line, Italian and Yugoslav troops will be facing each other along the new French line. (AP Wirephoto via radio from Rome)

New Defense Plan Rushed Into Being

Washington, Sept. 18—(AP)—This country's new unified defense machinery went into operation abruptly today on radioed orders from President Truman.

The instructions sent by the President from the White House bearing from the Joint Chiefs of Staff in a conference on Western Hemisphere security came as a surprise to many top-rank officials.

Mr. Truman himself said his decision to have James Forrestal sworn in as secretary of defense yesterday instead of awaiting the Chief Executive's return, as originally planned, was because of the international situation.

This word, arriving late in the day, contrasted with an earlier explanation issued by the Navy. It said that prior to Mr. Truman's departure for Brazil it had been decided Forrestal would be sworn in about September 15 "or after the President's return, unless all preliminary arrangements had been completed earlier."

Aides accompanying Mr. Truman were quick to tell reporters aboard the battleship Missouri that Mr. Truman had no particular development in mind when he told the (Continued on Page Eight)

Appreciation For Vote Expressed By Sponsors

John G. Clark and Stuart Carr, two co-chairmen in the drive for the new county hospital which was heavily endorsed and approved in Tuesday's special election, today issued a joint statement of appreciation to the people of Pitt County for their record-breaking registration and balloting.

The election, which was the first step in the construction of a \$900,000 hospital for the county, now authorizes the issuance of \$351,900 in bonds as the county's share in the payment; the balance of which will be paid by state and federal funds.

"The Hospital Bond Issue is today a matter of record with the people voting almost ninety percent in favor of the establishment of a new \$900,000 Pitt County hospital. The County Commissioners are now authorized by law to issue \$351,900 in bonds, as the county's share in the payment.

"We want to take this opportunity to express our sincere appreciation to the numerous civic groups throughout the county for the excellent work done on the hospital program. Without the wholehearted support and untiring efforts displayed by various local clubs and organizations, the election could not have been carried by a large majority in every precinct. The results are a direct reflection upon the will of the people to work harmoniously on a project which affords (Continued on Page Four)

Taft Blames President For Climbing Prices

Boulder City, Nev., Sept. 18—(AP)—Senator Taft (R-Ohio) puts a brief inspection of the Colorado River development behind him today in anticipation of what may be the critical speech, in San Francisco, tomorrow, on his western sentiment-plumbing tour.

Before the Commonwealth Club there, where the late Wendell L. Willkie's presidential campaign was born in 1940, Taft will speak on what he has predicted may become the hottest issue of the 1948 campaign—the high cost of living.

In major speeches already delivered on this excursion to the west, the Ohio senator has laid most of the blame for skyrocketing prices at the door of President Truman.

Marshall Retains Expected Support

Overhauling Of UN Peace Machinery Unofficially Backed By Other Nations As Assembly Tensely Awaits Soviet Reply

New York, Sept. 18—(AP)—Secretary of State Marshall's plan to overhaul the United Nations peace machinery received small-power support today as the General Assembly waited tensely for an expected Russian attack on the U.S. proposal this afternoon.

After five speakers had delivered their countries' policy statements in the assembly's second day of general debate, it became clear that the United States was holding its expected support in the developing battle with Russia on the program for drastic alteration of the U.N. structure.

Canada and the Philippines formally threw their full support behind the Marshall proposal. Australia, while reserving decision on the details of the plan, agreed that the assembly must play a larger role in maintaining peace, a task now assigned primarily to the Security Council.

China avoided a direct reference to Marshall's plan to set up a special assembly committee of the 55 member nations to handle this problem, but joining the United States in expressing willingness to surrender at least a part of the big power veto privileges.

The delegates, however, were primarily concerned with what Soviet Deputy Foreign Minister Andrei Y. Vishinsky would say this afternoon. As the morning session opened, word quickly spread that Vishinsky would deliver Russia's basic policy speech about 3 p.m. (EDT).

It later appeared that the Soviet speech might be delayed an hour or so by refusal of three Latin American countries to yield their priority on the speakers' list.

El Salvador, Venezuela and Peru were listed as the first speakers of the afternoon session. A U.N. official said Vishinsky has sought unsuccessfully to get the opening spot on the afternoon program.

The assembly recessed at 1:10 p.m. and was scheduled to reconvene at 3 p.m. Opposition to the Marshall plan for a special year-around 55-nation assembly committee of the General Assembly developed meanwhile from the unexpected quarter. Australian Deputy Delegate Col. W. R. Hodgson called the proposal "unconstitutional" in an off the floor comment.

U. S. TO SERVE AS MEDIATOR

Washington, Sept. 18—(AP)—The United States was chosen today to serve as mediator in a three-member United Nations commission to assist in negotiating a settlement of the Dutch-Indonesian conflict.

The selection of the United States was announced in a joint statement by Premier Paul-Henri Spaak of Belgium and Dr. Herbert V. Ewart, Australian minister of external affairs.

They said the United States had agreed to serve on the commission. Its creation originally was proposed by Herschel V. Johnson, deputy U.S. delegate in the Security Council.

The commission is authorized to offer its "good offices" to the Dutch and Indonesians. The United States proposed the commission after the Indonesians had turned down a U.S. offer to use its own "good offices" toward a settlement.

Under terms of the council's resolution, The Netherlands and the Indonesian Republic each was permitted to choose a member of the commission and a third member, Indonesia picked Australia and The Netherlands chose Belgium.

More Teachers But Still Short

Washington, Sept. 18—(AP)—The supply of teachers for public schools will be "slightly better" this year than last, the National Education Association said today, "but there is little reason for rejoicing."

After a spot check of ten cities and five counties scattered from Maine to New Mexico, the Nea reported that a shortage of teachers still exists and more than 100,000 teachers hold substandard certificates. Last year 70,000 teaching jobs found no takers.

Expect FTC Hearing In Tobacco Co. Compliant To End At An Early Date

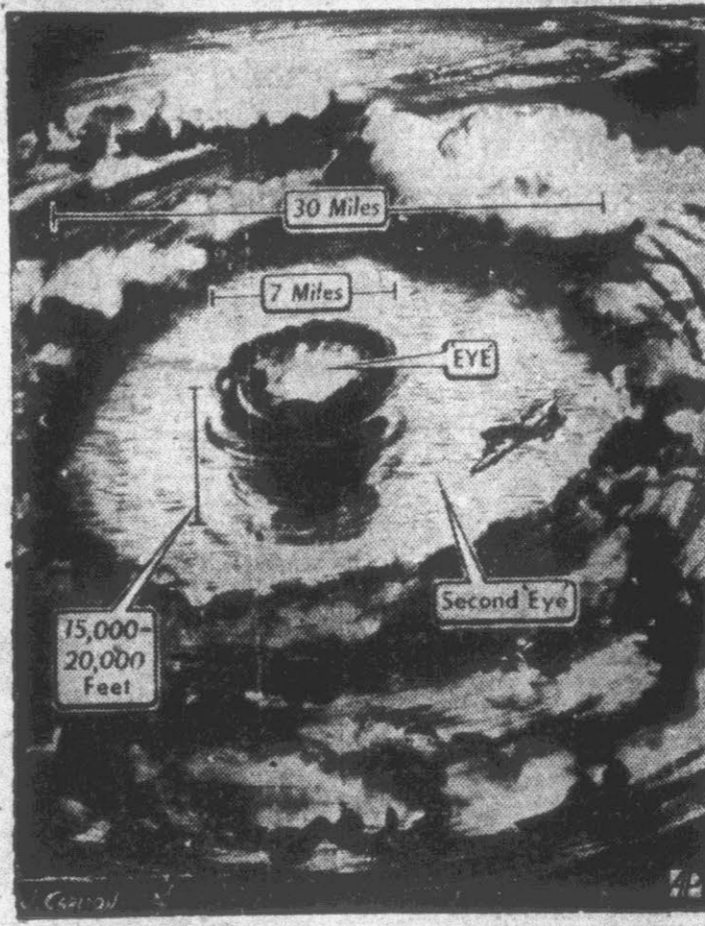

Washington, Sept. 18—(AP)—Hearings on the federal trade commission that the P. Lorillard Co., Inc. misrepresented the grade of tobacco in its Old Gold cigarettes are in recess until Oct. 3, when they will be resumed in New York City and are expected to conclude.

The commission, that the company misrepresented that Old Golds are made from "the finest money can buy" in tobaccos, was filed March 2, 1943. Hearings have been in progress intermittently since then.

Yesterday the commission reviewed the company's tobacco purchases over a seven-year period. The company, which was not represented (Continued on Page Four)

Florida Gulf Coast In Hurricane's Path

Hurricane With A "Double Eye"

This sketch by AP Artist John Carlton is based on a description of the Atlantic hurricane by Lt. Commander A. R. Fields, naval aerological officer based at Miami, who twice flew into the heart of the storm, and observed its "double eye." He likened it to a pool inside an empty bowl. Commander Fields described the center as a 30-mile "doughnut" surrounding the core estimated as seven miles in diameter. It resembles pictures of the atomic bomb explosion at Bikini. It is a fringed column of gray clouds extending from the ocean's surface up to 15,000 or 20,000 feet. Inside that column is the core of hazy, calm air, the true "eye" of the storm, now moving into the Gulf of Mexico. (AP Wirephoto)

Buyer Resistance Hits Cattle, Grain Market

Chicago, Sept. 18—(AP)—Prices slumped on the Chicago cattle and grain markets today and dealers attributed the declines to buyer resistance among meat consumers, plus the announcement of a sharp reduction in November grain exports.

Earlier in the week prices had declined somewhat on hogs and sheep, but today cattle prices dropped as much as \$2 a hundred pounds on some grades. At the same time, wheat and corn prices dropped the limit within a few minutes after the opening of trade, and the nervous grain market remained weak in later trading.

Grains regained fractions of extreme losses which were recorded shortly after opening of the Chicago board of trade. Wheat at one time was down 10 cents on all deliveries and corn down eight cents—both daily limits. Oats were off four to five cents at one time, with six cents the limit.

Meanwhile Attorney General Tom Clark sent the chief of his anti-trust division to Chicago to supervise a grand jury inquiry into the meat industry. Sixteen subpoenas have been issued for 42 representatives of the meat industry to appear before a federal grand jury Monday, and the attorney general's office said John F. Sonnett, assistant attorney general in charge of anti-trust cases, would report in Chicago on that date.

At the same time, assistant U. S. attorney F.W. Hotchkiss, in Chicago (Continued on Page Eight)

Tokyo Invaded By Flood Waters In Storm's Wake

Tokyo, Sept. 18—(AP)—Floods of rock mud and sand that buried most of Tokyo and two nearby villages, killing 182 Japanese and injuring 185.

Yokohama said cut of 600 houses in Toku-112 collapsed and the rest were covered with mud and sand. Huge boulders slid down in an avalanche on the villages.

Further north around the city of Sendai, belted dispatches said seven towns and villages had been flooded by the Kitakama River.

The Army was in the field for the second American disaster relief operation of the occupation—one which challenged its resources as much as last year's major earthquake in southern Japan.

As the muddy water swirled through the northern and eastern districts of Tokyo, the First Cavalry Division reported new floods of serious proportions were expected to hit the city shortly.

Upstream, landslides added to the horrors of four days of lashing rains and floods. A First Cavalry officer at Kumagaya, 50 miles northwest of Tokyo, reported light but threatening rainfall was beginning there in that heart of the disaster zone.

Kyodo News Agency and the newspaper Yomiuri said that farther north, Mount Akagi in Gunma prefecture let go with slides of tons of rock mud and sand that buried most of Tokyo and two nearby villages, killing 182 Japanese and injuring 185.

Residents Braced For Second Nightmare As Gigantic Storm Curves Savagely Northward; Truman Declares State Of Emergency; Agriculture Areas Suffer

Pensacola, Fla., Sept. 18—(AP)—Highway patrolmen raced through small towns and fishing villages along Florida's exposed but sparsely-settled northwest coast today, warning residents to flee before an oncoming hurricane.

The gigantic storm, which roared across southern Florida yesterday like a huge moving-machine, curved savagely northward in the Gulf of Mexico and drove again upon the mainland.

Gov. Caldwell's office announced that a state of emergency had been proclaimed in Florida by President Truman in the wake of multi-million dollar damage, and federal agencies were mobilized to aid the stricken areas.

Frightened residents of vulnerable coastal areas scurried into Pensacola and inland towns as winds began rising and the beach resort of Santa Rosa Island, and low-lying Destin, Fla., were evacuated.

In Mobile, disaster crews arranged to evacuate residents of low-lying areas of the Alabama Gulf Coast, including several hundred persons living in war-built frame apartments on Blakely Island.

Meanwhile, fresh word from the lower west coast indicated that Fort Myers was hard hit when the hurricane moved into the Gulf. High tides damaged the city water and sewer systems, and the sanitation problem was serious because of lack of drainage. City water was restored by noon.

Damage at Fort Myers was estimated at \$750,000, and the Miami Daily News set other damage at \$3,000,000 for the Boca-Raton-Miami Army Air Field; \$2,000,000 at Miami Beach, and \$1,000,000 at Del Ray Beach. There were no estimates for many communities.

Damage to agriculture was described as "enormous," with citrus groves the greatest casualties.

Weather advisories placed the storm roughly 60 miles off the mouth of Tampa Bay and forecasts indicated it would slam into the low-lying western Florida about midnight, between Pensacola and Apalachicola. Hurricane flags flew from Pensacola to St. Marks, and winds up to 100 mph were anticipated.

Civilians in the danger area were being moved to reinforced buildings and beach residents fled to town. Seven Cuban fishing boats landed at Alligator Point as their crews sought shelter. Tallahassee residents with beach homes rushed from the capital to batten down their cottages.

In Atlanta, the Federal Reserve Bank announced that credits would be extended to finance replacement of storm-damaged property and would be exempt from usual consumer-credit controls.

At Montgomery, Ala., Governor James Folsom offered all aid to Florida, and ordered 12 Alabama highway patrolmen into the threatened storm area for disaster duty. The Red Cross and other agencies braced for the newest blow.

Racing Against Time

Animals And Birds Can Travel Faster Than Man (On His Own Two Legs), But When Man's Brain Works On Speed There Appears To Be No Known Limits

By MAX HALL

Washington, Sept. 18—(AP)—An hour, the gazelle of the Gobi Desert 60, the jack rabbit 45, and the greyhound 36.

Record books indicate that a horse named Big Racket galloped 43 miles an hour for a quarter of a mile in 1945. The Great Equine averaged 38.1 miles an hour for a whole mile in 1932.

As for swimming the fastest fish is believed to be the tuna, which can do about 60 miles an hour. Among birds, the fastest known to the Smithsonian experts is the swift. In 1922 a flock of swifts was clocked in India at from 171 to 200 miles an hour over a two-mile course.

Now let us see what man can do with his brain as well as his feet. By fastening metal blades to his shoes, he has been known to average 243 miles an hour for 220 yards on the ice—considerably faster than he could have run the same distance.

A man riding a bicycle in 1923 averaged 28.5 miles an hour for a quarter of a mile.

Four men in a hobbled car in 1924 averaged 60 miles an hour for a quarter of a mile. (Continued on Page Four)

# Social and Personal

Mrs. Zilphia Rotoff has returned to Greenville from Atlantic Beach where she has been spending the summer.

Mrs. Frank Usery of Washington, N. C. spent Wednesday here with friends.

Billy Mac Bateleur returned to Duke University yesterday to begin his sophomore year.

Miss Bernadine Worsler left Monday for Emmitsburg, Maryland, where she entered St. Joseph's College.

Mr. and Mrs. Donald S. Miller left this morning for their home in Rochester, N. Y. after spending some time with Mrs. Miller's sister, Mrs. C. J. Moye.

Miss Doris Bizzell left Tuesday for Durham where she will begin her work as assistant pharmacist at Watts hospital.

## 40 Years Ago

THE DAILY REFLECTOR

September 18, 1907

While there was a large majority cast "for bonds" at the election in May last, still there was a very respectable vote "against bonds." Some of these gentlemen who voted "against bonds" have brought a suit to enjoin the board of county commissioners from issuing the bonds to aid in the erecting and equipment of the buildings of the teachers training school.

Junnie Smith has returned home after a two weeks visit with friends in Portland and Houlton, Maine.

Miss Joyce Corbett left yesterday to resume her studies at the University at Chapel Hill.

Dinner Compliments Bridal Couple—  
Eliet  
Mr. and Mrs. J. Ludlow Williams

entertained at dinner Friday evening at the Magnolia Room, Proctor Hotel, honoring their daughter, Sara Frances, and Hugh Rodney Ebert of Roanoke, Va. members of the bridal party and immediate families. Twenty-four guests were present.

**Birth Announcement**  
Mr. and Mrs. E. Johnston Dees announce the birth of a son, Charles Earl, on Wednesday September 17, in Pitt General hospital. Mrs. Dees is the former Miss Josephine Robertson of Greenville.

## Strength FOR THE DAY

### THAT MONSTROUS INCONVENIENCE

The English man of letters Gilbert Chesterton once remarked that it is false to say that Christianity has failed. What has happened, he avers, is that Christianity has been found to be inconvenient and has not been tried.

We are always attempting to excuse ourselves for our failings. Especially are we inclined to impute some defect or injustice to God when his teachings seem to make such slow progress. In the Parable of the Sower, God puts the blame where it belongs—on us. The fault is not with Him or with his seed, but with the soil.

Most of the reasons men give us for not being Christians boil down to this: It would cost too much to be a Christian—too much patience, too much faith, Christianity is a monstrous inconvenience for willful people, and it is for this reason that it is usually avoided or rejected, and not because of intellectual difficulties, strenuously though these difficulties may be set forth.

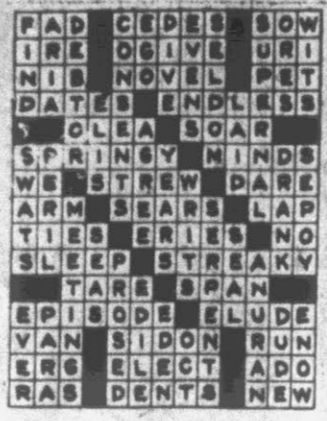

As Jesus said: "The way ye know. Our failure is not so often a lack of knowledge as it is an unwillingness to obey."

### Marshall's . . .

(Continued From Page One)  
against Greece on Yugoslavia, Bulgaria and Albania, and appoint a border commission to forestall further troubles in the Balkans. The general declared that unless Greece can be saved, no other small nation can feel secure.

### Racing Against . . .

(Continued From Page One)  
down a mountainside at around 60 miles an hour.

A German rode a motorcycle at 174 miles an hour in 1937.

Day before yesterday a new automobile record of 394.196 miles an hour was set by John Cobb of England. This figure was his average for two flashes across a measured mile at Bonneville Salt Flat in Utah. On the northbound run he reached a speed of 408.135.

On the water, mankind found he could row a boat faster than he could swim. And in the Poughkeepsie Regatta of 1922, the Navy crew averaged 13.27 miles an hour over a three-mile course.

But it was the speedboats that really led the fish benni. Sir Malcolm Campbell set the present world record of 141.74 miles an hour in his Blue Bird II.

In the air, the swifts of India could fly 200 miles an hour but mankind could beat that, too.

And on August 25, a U.S. Marine officer in a tiny, red, jet-powered plane averaged 639.6 miles an hour at Murco, California.

This is the fastest that mankind has yet gone—led himself.

But men have long been propelling other objects faster than they can move themselves. The St. Louis, Mo., man probably hurled a fast ball, and Bob Felier recently threw a baseball 98.6 miles an hour.

The Navy says a 16-inch shell travels about 1,550 miles an hour. A typical rifle bullet moves about 1,835 miles an hour.

And now, one type of rocket which has been developed is reported to zip at around 4,900 miles an hour. The earth itself moves around the sun at about 66,564 miles an hour.

### Appreciation . . .

(Continued From Page One)  
fects all of our people.

Many weeks ago we made visits to practically every section of the county to familiarize the people with the hospital program in its entirety and without exception the individual local groups pledged full cooperation. The results show that the people were fulfilled that the registration and vote was the highest of any special election ever held in this county.

Groups who materially assisted and who are responsible for the success of the election are: the Rotary, Kiwanis and Lions Clubs within the county, the Community Center at Grifton, the Business Men's Club of Meadowbrook. In addition to these there were several Greenville organizations: the Service League the Woman's Club, the Professional and Business Women's

Club, the Merchants Association, the Chamber of Commerce, the Junior Chamber of Commerce, Pitt County Medical Association. Also in Greenville, the A.A. Taxi, Elbert Moyer's Taxi and the Greenville city buses gave free transportation to and from the polls to voters on election day. The Junior Chamber of Commerce provided a very useful portable sound apparatus, operated most efficiently by Charles Cobb.

"The Daily Reflector and radio station WGTC were extremely generous with their space and time and without the splendid cooperation of both the full information on the program could not have reached the people.

Jimmy Smith's Printery and the Renfrew Printing Company, gave their services to the support of this worthy cause.

"It is difficult to say how the various civic groups in the county could have given this program better support. This is indeed a classic example of what our people can do when our efforts are combined toward a common cause. The results, to say the least, are most gratifying and our thanks go out to all of these many, many people who contrived time and effort.

"The Site Committee, appointed by the County Commissioners, will convene immediately to select a suitable location for the hospital. As soon as the location is approved by the Federal and State Hospital authorities, we hope that the detailed work on a building program can begin."

Kerosene lights are still used in some American lighthouses.

## Junior Red Cross Meets Friday Night

A teacher-sponsored meeting of the Junior Red Cross will be held at Proctor Hotel Friday night at 6:45. Mrs. J. Knott Proctor, Junior Red Cross chairman for Pitt county, will preside. Supper will be served.

**LEGION HOLDS MEET TUESDAY**  
Discuss Property Sale And Service Officer Appointment

Discussion on sale of the property and liquidation of the old Pitt County Fair Association, together with discussion of the recent appointment of the County Service Officers made by the County Commissioners, occupied a considerable part of the time when the Pitt County Post No. 39 of the American Legion held its September meeting Tuesday night at the armory where a barbecue dinner was served to the large gathering of members attending.

The Legionnaires were advised by James L. Jenkins, commander, that no reply had been received from the president of the Fair Association, nor advised that any action had been taken by his board in response to a resolution passed in July by Post No. 39 requesting the board to sell its property on the Falkland Highway and liquidate its affairs. After some discussion it was decided that the post would defer any further action until the 1947 fair might be held in October. Dr. Winstead, at a meeting of the Post's Executive Committee last Saturday, assured the post that the Fair Association would have a certified audit of its business to the post made at the conclusion of the 1947 fair.

A resolution was passed endorsing Greenville to the Veterans Administration for the location of the 1,000 bed hospital which has been allocated to Eastern North Carolina. Copies of the resolution were directed to our representatives in Congress.

Dr. Robert L. Humber, distinguished Greenville Legionnaire and distinguished Greenville citizen, made some very inspiring remarks near the close of the meeting. He referred to a Legion meeting as the finest example of democracy in action to be found in this country. He also pointed out that every member at such meeting always feels free to voice his opinions whether he is in the minority or majority.

The Building Committee was authorized to turn over to the Boy Scouts one of its huts now located at the airport, to be used wherever the Boy Scout Council sees fit. Adjutant W. C. Eagles advised the post that rifles and ammunition had been received from the Army to be used for the burial ceremonies in connection with the burial of deceased veterans at home and those whose bodies are to be returned home from overseas very shortly. Capt. J. B. Tyndal, commander of the Greenville National Guard, was appointed chairman of the Burial Ceremonial Committee and requested to secure and train a firing squad for ceremonial burials.

**Belvoir School PTA Supports New Principal**

By CHESTER WALSH  
 The Belvoir School Parent-Teacher Association Tuesday night started off the new school year with a gratifying attendance and an excellent program and pledges from school officials, teachers and friends of the school that they would support it in all of its enterprises. Mrs. Julius Parker, PTA president, presided. In her address of welcome she said she was speaking for the school committee, teachers, parents and children when she offered to the new principal, Fodie Hodges, loyal cooperation.

A pleasant feature of the meeting was the encouraging message given by Will R. Tyson, chairman of the school committee. Principal Fodie Hodges won the approval of the audience when he outlined the plans for the school year, and asked for the cooperation of all in keeping Belvoir up in the front rank of Pitt County schools.

Miss Jenkins' seventh grade class led in the percentage of parents present. Mrs. Evelyn Bullock, secretary, and Mrs. C. B. Spain, treasurer, made gratifying reports. The Membership Committee plans a drive for new members.

Rev. Henry F. Speight, Jr., Christian minister, led the devotional exercises. Janet Allen gave a recitation, "September."

The following committee chairmen were appointed: Program, Miss Pattie Jenkins; publicity, Mrs. Frances Tyson; recreation, Mrs. Nina Vainwright; hospitality, Mrs. Annie Ruth Cozart; health and safety, Mrs. Betty Credle; finance, Fodie Hodges; and membership, Mrs. Julius Parker.

**Buyer In Survey Of Peanut Farms**

W. M. Stephenson of Pendleton, who has been directly interested in peanuts by buying them for more than 45 years, said that "the 1946 crop of peanuts gave me considerable worry after it was called to my attention that they were showing a larger percentage of damaged kernels than peanuts from Virginia."

At that time he started a study as to the cause on his own farm. Examining others he found that people were using a sulphur mixture in order to make a thicker hull, heavier peanut, a greater yield, prevent disease, and to make a much finer hay crop which, in his opinion, it will do, but it will be very necessary to dig peanuts and let them cure and dry on the ground before stacking.

The farmers as a whole in North Carolina dug their peanuts and put them directly out of the ground into the stack without any chance to cure. The vines being full of sap its green foliage and dirt cause the

peanuts to go through a heat and damage.

He found that farmers in Virginia used the same sulphur mix-

ture and did not have the large percentage of damaged kernels. They dug their peanuts and let them dry at least a day and a half

or two days before stacking, which eliminated the damage.

Now he has just finished his tour of the peanut belts in North Caro-

lina and Virginia and reports the largest growth of vines we have had in several years. His advice is to let peanuts cure on the ground

before stacking. It will also prevent dirt in the stack.

His appeal to all farmers in North Carolina is to produce a fine qual-

ity of peanuts that will equal or better any other state.

# Congressman Blasts Launderettes

## Laundry Sanitation Unchallenged!

### O'Toole calls them Unsanitary! Sees threat of Epidemic

A Reprint from The A. I. L. Member - A Publication

The value of a research project carried out by the A. I. L. twelve years ago was again demonstrated last month when "launderettes" were denounced in Congress as a national health menace.

Representative Donald L. O'Toole of New York, an ex-washing machine salesman and bacteriologist, declared in the House of Representatives that launderettes were "glorified septic tanks" and "it may only be a matter of time before these machines cause a terrible epidemic, perhaps the worst this country has ever seen."

**Laundries Clean Bill Of Health Upheld**

Commercial laundering, which received a conclusively clean bill of health in a two-year study of laundry sanitation completed by the A. I. L. in 1935 was conspicuously omitted from Representative O'Toole's blast. His remarks were directed solely to the public "launderettes." It was another example of the general acceptance given to the public health role of reputable professional laundries.

**Congressman's Attack Not Inspired by the Institute**

(Many laundry owners after reading newspaper reports of the Congressman's attack on launderettes have asked whether his speech had been "inspired" by the Institute. The answer is "no.")

(A number of laundry owners have suggested the use of reproduction of newspaper reports of the Congressman's speech as bundle inserts. It is the Institute's opinion that nothing is to be

gained by using the competition's shortcomings as a promotion tool. The sanitary aspect of commercial laundering has been featured from a positive angle in a number of Institute promotions, but these have "steered clear" of comparisons with competitive washing methods.)

**Traces Epidemics to 'Communal Laundries'**

In his remarks before the House, Congressman O'Toole declared that many of the epidemics of dysentery that have occurred in apartment houses and infants' hospitals can be traced directly to the "communal laundry."

"Failure of local communities to supervise the sterilization of these machines properly is exposing millions of people to virulent diseases," he said.

Describing the launderette washing operation he said:

"Mrs. Jones comes in, deposits her coin, inserts her wash, and waits until it is finished. Mrs. Smith repeats the process and this is continued by family after family throughout the day.

**Says Methods Fail To Kill Bacteria**

"The average heat of the water in these machines is somewhere from 145 to 165 degrees Fahrenheit. Any physician, any bacteriologist, or public health official would inform Congress that such a degree of heat would not kill bacteria.

"In fact, in cases of certain species it might cause an acceleration of their growth.

"When you return to your communities next

week, awaken your health authorities to the danger that exists."

**Directs Appeal to U. S. Surgeon General**

In a letter O'Toole inserted in the Congressional Record, he asked Dr. Thomas Parran, U. S. Surgeon General: "Would it be possible for your service to recommend to the nation a course of procedure that would assure the complete obliteration of pathogenic germs in these machines? I honestly believe that unless some positive action is taken in the near future that this country may find itself suffering from some terrible epidemic."

O'Toole told reporters that the communal use of such washers has been troubling him since the days when he sold washing machines himself.

He said that a series of tests made by a New York laboratory under his auspices showed the bacteria count of items washed in these ranged from 610 to 500,000 per cubic centimeter.

**A. I. L. Study Proved Laundry Sanitation**

Results of the 1935 A. I. L. investigation of laundry sanitation were reported in Service Bulletin No. 53, which is still available to members upon request. The survey included thousands of tests not only at Institute headquarters, but also in many Chicago area plants. Some 250 additional laundry owners in other localities, both in the United States and Canada, cooperated in obtaining check data.

**Bacteria Count Ranges**

**From 31 to 71 per cc**

Among other things, the survey showed that the average bacteria count in the last rinse for colored loads as found in 109 commercial laundries was 71 per cubic centimeter as compared to 318,792 per cubic centimeter as found in 9 different homes in a total of 180 tests. For white loads in the same laundries the average count was only 31 per cubic centimeter.

**Importance of Correct Souring Is Stressed**

The report makes these conclusions:  
 1. The high temperature of washing formulas used for white cotton and linen lots and fast colors utilizes temperatures and holding periods that are sufficient to insure a safe procedure from the public health standpoint.

2. Low-temperature formulas require the use of the multiple-suds method in clean washers and correct souring to pH. 4.5 to 5.0 to insure low bacterial counts. Correct souring is particularly of importance in localities where the general practice is to under-sour.

3. Extraction and pressing removes or kills the residual adherent bacteria in all instances studied.

4. It is possible and practical for a commercial laundry to reduce the sour bacterial count to 250 bacteria per cubic centimeter of the rinse water. In order to do this, however, the cylinders must be cleaned and kept clean and the degree of souring must be low enough to be bactericidal.

**SICK!**

**SUFFERERS OF STOMACH AILMENTS, WEAK KIDNEYS, RHEUMATIC PAINS, ARTHRITIS, NEURITIS**

And other disorders, such as Headaches, Indigestion, Acids, Toxins, Bloating, Weak Back, Frequent Risings at Night, Bumbago, Leg Pains, Lack of Vitality and Energy, Poor Appetite, may be greatly relieved by the help of a Natural Remedy—GEO-MINERAL.

**Drugless Health!**  
NO MATTER how long you have been suffering from stomach, kidney and rheumatic distress, and what drugs you have tried before, you can, now, hope for relief if you take GEO-MINERAL. With your eyes SEE the results seven days after you start taking it.

**Amazing Results**  
WATCH your eliminations from your bowels two or three days after you start using GEO-MINERAL. The waste, black as coal, will break away and you will SEE it! Also examine your urine. You may see impurities—poisonous waste—coming out of your kidneys, and feel the relief. Be sure to watch for all this to realize its priceless value.

**DRUGGISTS, Chemists cannot make GEO-MINERAL. It comes from the earth—Nature's laboratory. Contains NO dope, NO alcohol, NO oil, ONLY nature's minerals—the oldest, most reliable remedy for rheumatism, arthritis, kidney and stomach ailments.**

**Wonder Minerals**  
FOR THOUSANDS of years sufferers, an advice of doctors, go to mineral springs to get cure, or relief. The late President Roosevelt used to go to Mineral Springs in Georgia. He was helped or would not have gone there twice a year.

**OUR GUARANTEE**  
WE URGE you to try GEO-MINERAL. Come to this drug store NOW and get one bottle. Use it seven days. If you are not 100 per cent satisfied, we will refund you money in full. TRY IT! It may be the remedy you NEED! ... and making the best investment for your health. It may do wonders for you—make you feel, eat, sleep, work and enjoy life better.

**NEWS FOR THE HARD OF HEARING.**

It's good news for the hard of hearing! Microtone's great new circuit amplifies wanted sounds powerfully, prevents louder noises from reaching painful level!

Quiet, comfortable hearing even in noisy locations! Microtone's full 30 volt power assures hearing faintest sounds. Automatic control—a governor on a hearing aid—makes this power usable without discomfort from noise.

Automatic control is Microtone's answer to the famous "Harvard Report" published following a two year government study of needed changes in hearing aids. Mail coupon for FREE CIRCULAR on this amazing development.

## Phantoms And Tarboro Open Season On Friday

By SPYRIDON SIDERIS  
Greenville's Green Phantoms open their conference slate Friday night when they take on the Tarboro Serpents in Tarboro, the game starting at 8:00 o'clock.

Usually one of the hardest games on the Phantoms' schedule, this year's game will probably be no exception. It seems that the Tarboro boys play their best game whenever they meet the Green wave and will be out to get revenge for the 21-7 whipping they suffered in Greenville last year.

Coach Farley knows all this and has put his charges through a rough week of scrimmages that, for once, haven't been hampered by rain. Emphasis on more speed in the backfield and on passing has been going on all week. The game with the Farmville club was too easy to render much information as to the Greenies' weaknesses. It is doubtful as to whether the Phantoms will have another opponent on their schedule this year as Farmville.

Following the Tarboro game the Greenville team will open their home stand against the New Bern Bears, conference champions last year, with Dunn, a newcomer to the Phantoms' schedule, and Elizabeth City's Yellow Jackets in that order. All the home games will be played at Guy Smith Stadium.

## UNC-USC Teams Rumored Clash In Secret Drill

Columbia, S.C., Sept. 16—(AP)—Palmetto State collegiate football circles were reverberating today to reports of a "secret" University of North Carolina-University of South Carolina two-hour practice game scrimmage at Columbia yesterday.

Neither school would admit the meeting, but Assistant Sports Editor Marion Culp of the State reported it, saying it was held at the university stadium behind locked gates, with even team managers excluded.

Culp said Charlie Justice got off several good runs, and that the North Carolina offense "looked good," but the South Carolina Gamecocks managed to run up three or four touchdowns on the Tar Heels, who reeled off five TD's.

## Hurls No-Hitter In Final Series Against Kinston

By the Associated Press  
Lefty Max Wilson joined the thin rank of hurlers who have pitched a no-hit, no-run game when he tossed a 1-0 win over Kinston last night in the opener of the final series of the Coastal Plain League playoffs.

In the game, which was played at Wilson before 2,654 fans, Wilson allowed only two men to reach first base, one in the first on a walk, and one in the fifth on an error. He faced only 29 batters, fanning one and walking one.

Wilson then proceeded to score the one run needed for his victory in the ninth. He led off with a double, only extra base hit of the game, and scored when Johnny Wolfe singled.

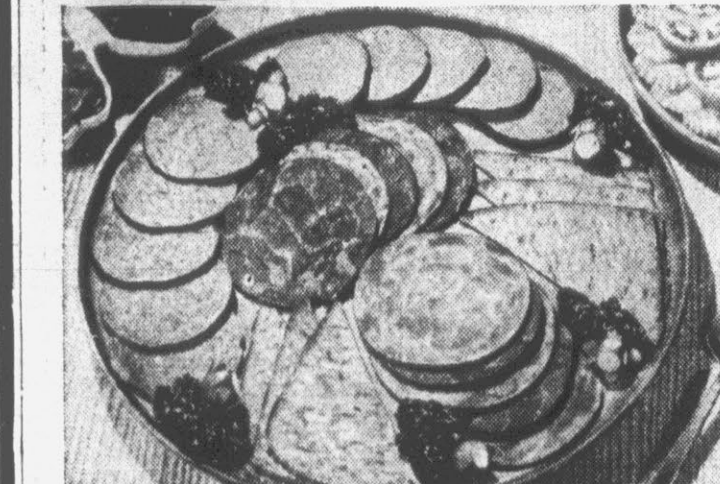

The second game of the series will be played at Kinston tonight.

**Wilson's Weekly Bulletin**  
By George Rector  
Food Consultant to Wilson & Co.

**Cold Cuts Make Economical Platter**  
Trying to hold your food budget down these days? Then serve a platter of assorted cold cuts. Let the temperature of the day decide the rest of the menu.

**Assorted Cold Cuts... for delicious economy**  
Reading clockwise: WILSON'S CERTIFIED BRAUNSCHWEIGER (liver sausage) in 12 o'clock position; half slices of DUTCH BRAND LOAF; alternate slices of NEW ENGLAND BRAND SAUSAGE and ROAST BEEF LOAF (repeated above); half slices of DUTCH BRAND LOAF; THURINGER.

**Fit Menu to Day**  
Cold cuts, potato salad or potato chips, sliced tomato and cucumbers, with a chilled beverage makes a refreshing main course for a hot day. If the temperature drops, substitute scalloped potatoes and a hot beverage and all will go well. For dessert, whatever the day, green apple dumpling with nutmeg sauce will be appreciated by all.

**Apple Dumplings Preferred**  
Green apple season is apple dumpling time. There are those who leave apples whole for dumplings, but I slice them so the "sugar 'n spice" in everything nice goes through the apples. Here's how! Make tender, flaky pastry with Advance Shortening, using 2 cups flour for 6 dumplings. Roll out and cut into six 6-inch squares. Pile sliced apples high in center of each square (you'll need about 4 cups), sprinkle with 1/2 cup sugar (or enough to sweeten) mixed with 1 tsp. cinnamon and 1/2 tsp. nutmeg, and dot with bits of Wilson's Certified Margarine or Clear Brook Butter. Moisten edges of dough, bring up over the apples, and pinch edges together leaving a small opening at top.

Yours for ease,  
George Rector
