

Mostly cloudy with scattered showers tonight. Sunday partly cloudy, turning cooler.

Senate Party Leaders Guard Against Absenteeism

Close Tax Cut Vote Looms

By JOE HALL WASHINGTON (AP)—The outcome of the Senate battle over an income tax cut appeared so close today that both Democratic and Republican leaders look steps to guard against absenteeism.

Other than the tax cut, there was little controversy over the bill, which would extend for one year corporation and excise tax rates now scheduled to drop on April 1.

Langer answered with a smile, "I'm lucky to have my own vote." Some Democratic sources were hinting they had some hope of picking up the vote of Sen. McCarthy (R-Wis). But McCarthy told a reporter he was not taking any position as yet.

Antarctic Mooring

The U. S. Navy icebreaker Atka is moored fast to ice in Admiral Byrd Bay during a two-month trail blazing expedition to the Antarctic in preparation for scientific studies planned for 1957-58.

Property And Crops Damaged Over Wide Area

Rash Of Storms Subsiding

By THE ASSOCIATED PRESS Storms which struck devastating blows in wide areas of the country yesterday, causing millions of dollars damage to property and crops, abated today.

have caused the heaviest monetary damage. In Colorado alone, the loss of half of the state's three million acres of winter wheat was estimated at \$60 million dollars.

thunderstorms which struck across Midwest and Eastern areas yesterday caused extensive property damage.

Defenders Of Formosa Regaining Confidence

By SPENCER MOOSA TAIPEI Formosa (AP)—Seven million Formosans and two million Chinese on this Nationalist island are regaining much of the confidence they lost through the recent withdrawal from the Tachens and Nanchuan Islands.

air raids by U.S. Air Force and naval planes. Another facet of increased confidence is the growing impression that this time the Nationalists mean business when they say they are determined to fight for the remaining offshore island groups of Quemoy and the Matsus if the Reds try to take them.

Confidence in the ability of the United States and Nationalist forces to protect Formosa against the Chinese Communists is indeed, so strong that repeated appeals to some residents to move from urban areas have fallen on deaf ears.

Moose Members From All Over North Carolina Converge Here

Moose members from all over North Carolina were arriving in Greenville this morning for the annual Mid-Year Moose Conclave and to see local Moose dedicate their new \$100,000 temple.

This morning a breakfast for the visiting Moose was held and an open forum followed by a luncheon. During the afternoon an officers conference was scheduled along with a ritual clinic.

ness session of the State Association at 11 a.m. At 1:30 p.m. a dinner meeting of the State Activities Committee Chairmen will be held at Respage-James followed by ceremonies dedicating the new building.

First Defendant Found Guilty Of Patterson Slaying

BIRMINGHAM, Ala. (AP)—With ex-Chief Deputy Sheriff Albert Fuller sentenced to life in prison, the state moved swiftly today to bring another defendant to trial for the murder of vice foe A. L. Patterson.

Prosecutor Cecil Deason said Arch Ferrell who is prosecuting attorney at Phenix City during the days when Fuller was chief deputy in the vice-infested town, probably will be tried in about two weeks.

Fuller was held in the Jefferson County Jail atop the courthouse where he was tried.

State's attorneys contended that Fuller, Ferrell, and Garrett conspired to kill the campaigning racket buster to keep him from carrying out his cleanup pledge.

Hodges To Speak At Farmville Fete

FARMVILLE — Gov. Luther Hodges will be the principal speaker at the annual Farmer's Day to be held here April 20, it was announced today by Charles S. Edwards, Chamber of Commerce and Merchants' Association secretary.

pointed out, and more are expected. A banquet will be held during the evening for the beauty entrants and their escorts.

Youth Died In Basketball Game

SYRACUSE N.Y. (AP)—Ronald Skinner, 15, collapsed last night while playing basketball at a school in suburban Mattydale.

Governor Feels Undiscouraged

RALEIGH (AP)—Gov. Hodges has not changed his opinion that the state can wind up its session about the end of April.

This Firefighter Hogged Spotlight

FITCHBURG, Mass. (AP)—When the alarm rang in the fire house, who—among others—answered the call with an extinguisher in his hand?

City Already Has Site For Disposal Plant

A bill introduced yesterday in the State Legislature which would prohibit pollution of the Tar River after January 1, 1960, would not catch Greenville napping if the General Assembly grants approval of the measure.

Good Old Boy

A drunk walked into the local police station this morning and sat down on a bench in front of the desk sergeant's reception window.

Coroner's Jury Recommends Grand Jury Action

By ROBERT SMITH Reflector Staff Writer A coroner's jury last night recommended that a 15-year-old Negro boy who did not possess a driver's license be held for grand jury action in Pitt Superior Court in connection with a traffic fatality near Fountain last Saturday.

'Mother Ship' Unit For Pacific Northwest

The Air Force has announced this will soon be a common sight in the Spokane area. The announcement told of activation of a unit, the first in the Air Force, teaming F84 jet reconnaissance fighters from Great Falls, Mont., Air Force Base with giant B36 bombers from Fairchild AFB in Spokane.

Smoke Screen Tried To Cut Heat Radiation

Fifth Atomic Test Set Off

LAS VEGAS, Nev. (AP)—Nevada's fifth atomic blast of the 1955 series rocked and illuminated the desert today while the Army Chemical Corps conducted an experiment to determine the power of a smoke screen to cut down heat radiation.

conducted. Of major interest was the test with a smoke screen. AEC officials said oil smoke screen generators were established on the upwind side of the firing area.

the firing area to take data on thermal radiation. No troops participated in today's test. However there were 65 aircraft in the air at the time of the detonation.

It was seen as a brilliant, short white flash in Las Vegas, about 75 miles away. In Los Angeles, some 250 miles distant, the flash was like a faint flicker of white light resembling a heat lightning flash.

Army officials have said that a smoke screen can be used to protect vital areas from thermal radiation of an A-bomb. However, they added, use of smoke screens will not stop the other two effects—blast or pressure wave and gamma radiation.

Personnel from Camp Desert Rock were stationed at nine different points in an observation exercise for the field artillery.

After the detonation the Atomic Energy Commission announced that 25 tests of developmental weapons and civil effects were

planned on the stream by the Stream Sanitation Committee.

Meanwhile surveys are presently being made concerning the proposed plant.

Anti-Pollution Bill For Tar

placed on the stream by the Stream Sanitation Committee.

be classified Class "A" down to Greenville and Class "B" below the city, thereby requiring less expensive sewage treatment plant.

and the money needed for other purposes.

The city now owns a tract of land near Greenwood Cemetery which has been set aside for a sewage disposal plant. Negotiations for the final purchase of the land were only recently completed.

Blomax said it is hoped that money for the plant can be set aside each year in order that a bond issue will not be required for construction of such a unit. However, that will depend on the amount of time before such a plant is required

preliminary studies to determine the most economical and most feasible outfall lines from present lines down to the sewage disposal property," Blomax revealed.

Italy Overrides Red Opposition To Pact

By ALLAN JACKS ROME (AP)—Italy lined up today with the nations backing West German rearmament as the Senate decisively approved the Paris accord over bitter Communist opposition.

After two weeks' heated debate climaxed by Red street riots, the Senate okayed the agreements last night by a vote of 139-82 making Italy the eighth of the 15 nations involved to complete parliamentary action. Italy's lower House approved the pact last December and they now await only the final signing by President Luigi Einaudi.

13 months ago. Scelba who will leave in about 10 days for visits to the United States and Canada, said after the ballot:

Such bills are frowned upon by the State Stream Committee whose job it is to classify all North Carolina streams. That group said in testimony before a Senate Committee recently that the Haw River bill probably is unnecessary since classification work is nearing completion on the Haw River and the remainder of the Cape Fear basin.

Provisions of the bill are patterned after a similar bill recently introduced to provide for cleaning up the Haw River in Alamance, Chatham and Guilford counties.

"The vote of the Italian Parliament after the ones in London and Bonn, represent the most important act in the history of European unity.

The committee said it expects to stop pollution of the Haw well before the 1960 deadline, and also expects to complete work on all other major river basins by that time.

Committee officials said the Haw River bill set a "bad precedent" if bills concerning other river basins were introduced a "hodgepodge" could result.

"The unity of the free world is the strongest defense of peace. Western European Union, with the Atlantic Pact, will assure men a peaceful future."

A sewage disposal plant for Greenville would cost between \$700,000 and \$800,000, Utilities Superintendent Leonard Blomax said today.

Blomax noted that Greenville is the last town on the Tar which takes its drinking water from the river. It is possible the river would be determined by the classification

Parliamentary action on the pact has now been completed by Italy, Britain, Canada, Greece, Iceland, Norway, Portugal and Turkey.

Coroner's Jury Recommends Grand Jury Action

By ROBERT SMITH Reflector Staff Writer A coroner's jury last night recommended that a 15-year-old Negro boy who did not possess a driver's license be held for grand jury action in Pitt Superior Court in connection with a traffic fatality near Fountain last Saturday.

Edwin Corbett of Fountain testified at the inquest last night that "when I saw the car it was in the air." He dived or jumped back or "did something" to escape the oncoming car. The car struck the now deceased man and the rear of a pickup truck also in the yard.

and pull the emergency brake. Gray had been driving the car on a paved road nearby, but when they arrived at the dirt road the driving was turned over to the 15-year-old boy who did not possess a driver's license, and was also not old enough to procure one under North Carolina law.

"I don't know what happened, I ducked, and then I heard the commotion and crash," Corbett elaborated.

Corbett described the weather condition as "good" that day, and the sandy road was in good condition, according to both Corbett and investigating Patrolman D. E. Perry. The accident occurred at about 11:30 a.m.

Cooper told the investigating patrolman that he was going about 40 miles an hour when the car left the road. The patrolman stated at the inquest that 40 miles an hour should have been top speed for the most experienced driver on a sandy road of that nature. The road was 26 feet wide.

Immediately following the accident, Corbett said he went to get a doctor, and was away from the scene of the collision for about 20 minutes.

Later Thomas Hinson and Earl Dall, nearby neighbors of the deceased man, came to the scene of the accident.

Gray may be brought to trial for knowingly allowing a juvenile to drive a car without a permit.

SOCIAL AND PERSONAL

published the following day. Dial 6166—9 a. m. to All items for this page received after 10 a. m. will be noon; 1 to 4:30 p. m.

Mrs. Gene Tucker of Belvoir is a patient in Edgecombe General Hospital, Tarboro.

Mrs. Lizzie Ann Sutton Davis (Mrs. John W. Davis), 1016 Ward Street, is seriously ill in Pitt Memorial Hospital.

Mr. J. Roy Martin Sr. is a patient in Pitt Memorial Hospital.

Miss Geraldine Mills, daughter of Mrs. Jessie Mills, both former residents of Greenville, has entered Presbyterian Hospital in Charlotte where she will undergo a slight operation and spine treatment which resulted from an accident at Christmas. Her address is 1237 Elizabeth Avenue, Charlotte, N. C.

Special Meeting of W.C.T.U. in Jarvis Memorial Church A special meeting of the Woman's Christian Temperance Union will be held Sunday afternoon at 3 o'clock at Jarvis Memorial Methodist Church.

Miss Jennie James of Charlotte, secretary of the L. T. L. (Young People's Union) of the W.C.T.U. and Mrs. T. H. Plemmons of Charlotte, editor of the State paper, "The White Ribbon," will be guest speakers. A special invitation is extended to the public.

Entertain At Bridge GRIFTON—Mr. and Mrs. W. M. January were hosts on Tuesday night at a delightful party at their home on Cannon Blvd. with players for three tables of bridge. In the playing rooms spring flowers made pleasing decorations. Prizes for the top scores went to Mrs. B. C. Troutman and Mr. Roger Johnson. Other players were Dr. Troutman, Mrs. Johnson, Mrs. and Mrs. Joe House, Mr. and Mrs. G. L. Tucker, Mr. and Mrs. Tom Gower and the hosts. A dessert with coffee was served at the refreshment hour.

Hosts To Couples Club GRIFTON—Mr. and Mrs. Thurman J. Williams entertained on Wednesday night at a bridge supper for members of their couples club. Lovely bouquets of daffodils and narcissi were placed throughout the home. Guests arrived at the appointed hour and supper was served buffet style. The table, covered with a dark green linen cloth, held a crystal bowl of daffodils and grape hyacinths. This was enhanced by tall candles in crystal holders. A delectable fried chicken supper was enjoyed followed by dessert and coffee.

Mrs. L. L. Mewborn was high scorer among the ladies and for the men, Cecil Cobb. Other players were Mr. Mewborn, Mrs. Cobb, Mr. and Mrs. W. I. Bissette, Mr. and Mrs. M. B. Hodges.

Immanuel Baptist Announcements This Sunday morning will be the beginning of the revival. Sunday School will be at 9:45, morning worship at 11:00. At the morning worship the choir will render the special music and the pastor will bring the message.

The Fellowship Supper for the Training Union is at 6 o'clock followed by the Training Union at 6:30. Evening worship is at 7:30 with the pastor bringing the message. A Church Conference will close the service.

On Monday night at 7:30 through Friday night the Rev. Frank E. Morris will bring the revival message. He will also be heard over WGTN each morning Tuesday through Friday at 9:30. All are invited to worship in these services and to listen to Rev. Morris each morning over the radio. Rev. Morris will be the speaker at the Monday Forum at the Student Center at 5:30. The Sunbeams will meet at the church Monday at 3:30 p. m.

BACK AGAIN LOUISVILLE Ky. — Mrs. Elizabeth Seelye left the hospital after treatment for an ankle fracture. Fifteen minutes later she was back with a wrist fracture suffered in an automobile accident on the way home.

Camp Hardee Camp Committee Camp Hardee Camp Committee will meet Sunday night at 7:30 at the home of Mrs. J. Knott Proctor on East Fifth St.

Christian Education Conference The First Presbyterian Church will be host to a Presbytery-Wide Christian Education Conference Sunday afternoon from 3 to 4 o'clock. The guest speaker will be Dr. Marshall Denny, from the Board of Christian Education in Richmond. The worship will be led by Rev. James S. Ficklen, pastor of Elywood Memorial Presbyterian Church in Tarboro. He will be assisted by the local church choir. Everyone is invited, especially if you are an elder, deacon, church school officer, teacher, adult advisor, minister, or help in any way in the educational program of your church.

St. James Methodist Church The third Sunday morning worship service to be held in the new St. James Methodist Church building, Forest at East 6th, will be held tomorrow morning at 11 o'clock. The sermon, by the minister, the Rev. J. Malloy Owen, will be taken from the 16th chapter of the Gospel according to St. Matthew, on the subject "THE CHURCH." The choir will sing a special arrangement of "Onward, Christian Soldiers." Miss Marie Eason will sing "The Holy City."

Persons interested in singing in the Passion Play Chorus April 6-8, regardless of their church affiliation, are invited to meet Dr. Kenneth Cuthbert at the Wright auditorium building Sunday at 4 o'clock. The St. James Methodist Youth Fellowship now meets every Sunday evening at 6:30 at the new church, in the Youth Division Assembly Room.

The Woman's Society of Christian Service will hold its General Meeting Monday night at 8 o'clock at the church. Methodist Men meet Tuesday evening at 7 o'clock at the church. The Rev. Leonard Wesley Topping, minister of the First Presbyterian Church, will speak, following the first fellowship meal to be served from the new kitchen. Members having children whom they wish to dedicate to God in Christian Baptism are asked to contact the minister or the secretary. The Sacrament of Holy Baptism will be administered Palm Sunday morning, April 3.

Memorial Baptist Announcements On Monday night the two business women's circles will meet at the church at 8:00 p. m. in a joint program, afterward they will meet in separate groups for their business meeting and social hour. The General Meeting of the W.M.S. will meet at 3:30 Monday afternoon in the Fellowship room of the church.

On Tuesday several of the Women will leave for the State W.M.U. Convention which meets in Asheville, N. C. for three days.

The next three Forums at the Baptist Student Center will be on Evangelism. The speakers are as follows: Monday, March 14th, Rev. Frank Morris—Revival speaker for Immanuel Baptist Church. Tuesday, March 15th, Rev. Howard Williams—Svan Quarter, N. C. March 28th, Rev. Percy B. Upchurch—Memorial Baptist Church, Greenville.

The Adult Choir will meet at the church Thursday evening at 7:30 p. m. All members are urged to attend. The Fidelis Class of the Sunday School will meet Thursday evening at 8:00 p. m. in the church parlor. Hostesses for the evening will be Mrs. J. H. Letchworth, Mrs. C. W. Dunn and Mrs. C. M. Jones.

Miss Catal Speaks To Newcomers At the luncheon meeting of the Newcomers' Club on Thursday, March 10, Miss Pauline Catal spoke on some of the differences and likenesses of the people of the United States and France, stressing particularly social customs and educational philosophy.

Miss Catal, whose home is Lyon, France, is a graduate student at East Carolina College on a Fulbright scholarship. She was introduced to the club by Miss Hazel Clark, chairman of the program committee.

Mrs. James Lafferty, president of the club, conducted the business meeting. The door prize was won by Mrs. W. M. Reading.

Plans were announced for a canasta and bridge party, followed by a luncheon, at the next meeting of the club at 10 a. m. Thursday, March 24. Newcomers to Greenville and members of the club are invited to bring \$1.15 to make reservations for the card party and/or the luncheon.

Greenville residents are reminded by librarian Elizabeth Copeland of the special group of books for Lenten reading now set aside in the Shepard Memorial Library. The books include works about the Bible scriptures, the life and ministry of Jesus, prayers, such as those by Peter Marshall, and religious biographies, including one on John and Charles Wesley.

Some of the volumes are "The Holy Bible in Brief," edited by James Reeves; "The Kingdom of God," by John Bright; "The Old Testament and the Fine Arts," by Cynthia Maass; "The Passion of the King, A Book for Holy Week and Easter," by Frederick Grant; and "The Renewal of Man; A Twentieth Century Essay on Justification by Faith," by Alexander Miller.

Beta Club At Grimesland High School

The Beta Club at Grimesland High School has been an active group this year. Officers of this club are Janice Tucker, president; Lou Hardee, vice president; Shirley Hardee, secretary; and Nancy Scherer, treasurer. Sponsor is Mrs. Clara Carr.

Polio Campaigners Presented Awards

Mrs. Clifton Baldwin and Mrs. Ruth Peterson were presented certificates of appreciation for their outstanding work in the recent March of Dimes campaign when the Business and Professional Women's Club, sponsoring organizations for the drive, met Thursday night. The awards were made on behalf of the National Foundation for Infantile Paralysis by Miss Evelyn Beasley, Pitt County Director for the March of Dimes.

Mrs. Baldwin was recognized for her work as chairman of the Griffith drive, while Mrs. Peterson, a had been collected as of March 10 cognized for her work throughout Greenville in organizing the Mother's March which netted an increase of \$200 over last year's receipts.

Other guests present who represented volunteers for the polio drive were Mrs. L. D. Whichard and Miss Jennie Outlaw of Grimesland, D. H. Conley, superintendent of Pitt County schools, and J. H. Rose, superintendent of the Greenville

Three From ECC In Raleigh Recital

Three East Carolina College faculty members will appear in recital in Raleigh Monday, April 4, at 8 p. m. in the Stephens Recital Hall. Their program of music for piano and violin will be presented before the Raleigh Music Club.

Elizabeth Drake and George E. Perry, duo-pianists, and Dr. Elwood Keister, violinist, will play selections ranging from Bach to Gershwin. Of particular interest among numbers chosen for the program will be the performance of a sonata for violin and piano composed by Mr. Perry Sonata in D Minor, op. 20, entitled "Summer, 1950," will be played by Dr. Keister and Mr. Perry. The sonata, a work in modern style, includes three movements—"June," "July," and "August."

Two-piano numbers by Miss Drake and Mr. Perry include "Six Chorale Preludes" by Bach; Schubert's "Rondo Brillante," op. 84, no. 2; Gershwin's "Three Preludes"; and selections by Mozart and Pinter.

The three East Carolina musicians have made frequent appearances before North Carolina audiences. Miss Drake and Mr. Perry have played for Raleigh audiences on two previous occasions and have given two piano recitals in Rocky Mount, Wake Forest, Farmville, New Bern, and elsewhere in the state. Dr. Keister is director of the East Carolina Choir which is now making a 1200-mile tour of North Carolina, presenting more than twenty concerts in twelve towns and television programs in Raleigh, Winston-Salem, and Greenville.

30 Years Ago Today

Washington—While awaiting more complete and authentic advice concerning the disarmament situation abroad, President Coolidge believes recent developments here as already indicated, a far more definite approach of another arms limitation conference to be called by the United States.

In their first game of the season the local golf club won yesterday from the Goldsboro club by the score of 24 to 5. W. W. Lee turned in the lowest score of the match, a 79, just seven points above the course par.

Quartet Cancels Its Scheduled Program

The Men of Song, male quartet scheduled as the final attraction of the 1954-1955 Entertainment Series at East Carolina College, will not appear at the college April 13 as planned. Chairman James W. Butler of the Entertainment Committee has announced. The quartet found it necessary to cancel the program because of booking difficulties.

Mr. Butler states that the Men of Song will be replaced by an attraction of equal merit. An early announcement of the new program and its date will be made.

Mrs. Bessie Scott Visits Local Library

Mrs. Bessie Scott, field representative with the North Carolina Library Commission, visited Shepard Memorial Library here yesterday. Mrs. Scott formerly was head librarian at the Shepard Library before she assumed duties with the State Commission in Raleigh.

More than 30,000 U. S. tourists visited Ireland in 1954 and spent an average of \$200 each.

SPACE STAR—Italian actress Gina Lollobrigida holds "Space Girl of 1954" award of Foreign Press Club in Rome for press space she garnered in foreign publications.

Teen-age Turnout

By MARY WILL LONG and FRANCES ADAMS The journalists who are having such a good time "gallivanting" around New York took time out Thursday to notify the rest of the Green Lights staff that the paper had received a first place rating at the Columbia Press Convention. The class is really proud of this honor. The vacationists also reported that they are having a wonderful time. We can't wait until they get back to hear about their experiences! (Something new happens every year.)

Brooks Wins Scholarship A distinctive honor has recently been bestowed upon an outstanding member of the senior class, John Brooks is the recipient of a Morehead Scholarship to the University of North Carolina. John is also a finalist for the Angier Duke Scholarship.

Attends Pledge Week-End A popular member of Greenville's younger set, Lou Cheatham, left yesterday afternoon for UNC at Chapel Hill. She is attending Pledge Week-End, a big event for those boys who are joining fraternities this year. As a guest of Billy Bost, Lou will take part in a number of festivities, including a banquet.

Routine Goes On In spite of mild cases of spring fever, G. H. S. students are still in the regular routine of school life. The most joyous (?) event at school this week was the issuing of the little yellow cards Thursday. This issuing of report cards was the fourth of the year and reminded students that there are only two more marking periods to go before that glorious day when school closes.

It does take a little excitement to keep things from getting too boring. The March winds have been whistling in the halls and around the buildings. There were quite a few cases of heart failure in Mr. James' home room yesterday morning when the door was blown shut so hard that the glass shattered. Most members of the fairer sex of G. H. S. aren't too happy about the windy weather. Their main complaint is that the wind makes their hair stand straight up.

Social Calendar

SUNDAY 4:00 p. m.—Rehearsals of the music for the Passion Play will begin in the Wright auditorium under the direction of Dr. Kenneth N. Cuthbert of East Carolina College. The Passion Play Chorus is open to qualified singers from any church choir in Eastern North Carolina.

SATURDAY 8:00 p. m.—Mr. and Mrs. Alfred Forbes Kennedy Jr., 300 S. Liberty St., will hold open house honoring Dr. and Mrs. Ledyard Etree Ross.

March Bride

Mrs. Dennis Lee Hardee who before her marriage March 5 was Miss Rosalyn Jean Phelps, daughter of Mr. and Mrs. W. R. Phelps of Greenville. Mr. Hardee is the son of Mr. and Mrs. G. C. Hardee of Ayden, N. C.

Film On Saddle Horses Shown At Meeting Of Lector Book Club

The Lector Club met at the home of Mrs. Hugh Winslow on Tuesday afternoon, March 1. The meeting was called to order by the new president, Mrs. Howard Waldrop, who presided. The new committees for the coming year were appointed by Mrs. Waldrop.

After a brief business session the program was turned over to Mrs. Hugh Winslow, who gave a most informative talk on horses, show horses in particular. She presented a 16 mm sound and color film made by the American Breeders Association on "The American Saddle Bred Horse." The "Horse America Made." This film presented the 5-gaited, the 3-gaited or walk-trot and fine harness horse in all their guises, both in regular and slow motion. Mrs. Winslow mentioned the famous white Lipizzan stallions of the Spanish Riding School of Vienna, these horses being noted as the world's greatest "Haute Ecole" or High School Horses. These are the horses Gen. George H. Patton saved from the Russians during World War II. She also explained the United States Equestrian Team, which is the team that represents this country in all international competition. During 1948, when the U. S. Cavalry was mechanized, it left this country without a team for two years, after which a few patriotic citizens, headed by Whitney Stone of New York, got together and raised funds to organize a U. S. Equestrian Team, and since 1950 we have been represented in all international competition. Mrs. Winslow also mentioned that the Tennessee Walking Horse was introduced to Brazil in 1950 by Sec. of State, Cordell Hull as a part of the Good Neighbor Policy which he inaugurated during his term of office.

Guests for the afternoon were Mrs. Ray Minges, Mrs. Carl Pierce and Mrs. J. B. Smith. The hostess served a delicious salad course with coffee, after which the meeting was adjourned.

Ayden News

Mr. and Mrs. J. O. Fort and daughter are visiting relatives in Lake Butler, Florida. Roy Wrenn is visiting relatives in Georgia. Warren Finch of Bailey visited Mr. and Mrs. T. G. Worthington Monday evening. Mr. and Mrs. Talmadge Benton of Cherry Point visited Mr. and Mrs. James W. Everett Sunday evening. Mrs. S. A. Jenkins has returned home from Pitt Memorial Hospital in Greenville and is visiting at the home of her daughter, Mrs. Alta Lee Worthington. Mesdames Helen Turnage and J. H. Coward left Wednesday morning for a visit with friends and relatives in Florida. Alex Cuthrell Jr. is ill at his home on W. Second Street. Mrs. Fammie Stokes is visiting relatives at Vanceboro. Mr. L. G. Baldrice is visiting relatives in Monroe this week. Wendell Dixon of Fayetteville spent the weekend here with his mother, Mrs. W. Harvey Dixon.

Musical Program For Exchangites Last Evening

The Greenville Exchange Club at its supper meeting last night, had a program of vocal and instrumental music and recitations by Mrs. Lee King, Welcome Wag on hostess, and Zof Potts of Washington. Mrs. King sang several songs and Mr. Potts played several piano selections. President Ed arkinson, who presided, announced that March 27 is the 40th anniversary of Exchange clubs. The Greenville club will observe the occasion March 25 with a banquet at which the members wives and sweethearts will be guests. Guests at last night's meeting were Beaufort County Health Officer Dr. Lee Kling and "Mac" MacKenzie, son of Exchangeite Ray MacKenzie.

Births

Kinlaw AYDEN—Born to Mr. and Mrs. Warren Kinlaw, a son, Harry Hilliard, on March 1 in Lenoir Memorial Hospital in Kinston.

The female phalarope (a small shore bird) does the courting, but after laying the eggs, she leaves and the male incubates the eggs and brings up the young.

# What The Gathering Of Moose Is Seeing In New Lodge

Above is shown a view of the auditorium of the new Moose Temple located on the Fernville Highway. The \$100,000 building is being dedicated in services tomorrow afternoon which will highlight the Mid-Year Conclave of North Carolina Moose.

Moose members are shown above as they lounge in the "Ko-Ko Room" of the temple. The lounge is set aside for Moose members and their wives and guests. Also included in the building is a ladies' lounge and a recreation room. (Reflector Photos by Alvin Taylor).

Above is pictured the kitchen which adjoins the auditorium in the front portion of the Moose home. Included in the kitchen are the store (pictured above), refrigeration facilities and other equipment for a modern up-to-date kitchen. Hundreds can be served by the kitchen.

Above is shown the television section of the new Moose Temple. Moose from all over North Carolina are inspecting the facilities of the temple during the three-day Conclave which ends tomorrow.

## 'Grail' Survives Forgery Studies

**AP Newsfeatures**  
**COLUMBUS, Ohio** — Publication of a 1941 report from a chemist has added one more item in a long dispute about the Holy Grail. The Grail is the cup from which Christ drank at the last supper. It has been sought for centuries and was the object of many romantic quests in the Middle Ages.

When the Chalice of Antioch was dug up in southern Turkey in 1910, some people said the battered inner cup of the 7 1/2-inch chalice was the Grail. These claims were later rejected by most authorities. The chalice is now on exhibit at the Cloisters in New York City and the museum officials say only that it is considered an early Christian object of the fourth or fifth century.

But in 1941, long before the museum acquired the chalice in 1950, it was taken to Dr. Earle R. Caley now an Ohio State University chemist. His report has now been published for the first time by the Princeton University Press. It is an appendix to a chapter by James J. Rorimer in "Studies in Art and Literature for Belle De Costa Greene."

Dr. Caley is widely known for his applications of chemistry to the field of archaeology. He does not say that the chalice is the Holy Grail, but he was able to refute the opinion that it is a modern forgery.

He says he could not take samples for analysis, but based his opinion on studies of the condition of its surface and metal. He considered the possibility that the cup might have been fitted together recently from pieces of old metal and said this was "altogether unlikely." The metal would be unworkable because of its condition, he says.

MYSTERY — The chalice of Antioch.

## Hull Of Old Confederate Cruiser Raised Out Of Mud

**By NATE WEGODSKY**  
**AP Newsfeatures**  
**MARION, S.C.** — The Confederate cruiser *Pee Dee*, which took three years to build and then made only one sortie of 100 miles, has been raised after lying in the mud of the *Pee Dee* River for 89 years.

The 170-foot steamship, hand-made by slave and volunteer labor, was scuttled in April of 1865 to keep her from falling into Union hands at the end of the Civil War.

Today her hull lies on the banks of the *Pee Dee* River at Mars Bluff.

Some of her hand-hewn curved timbers are 14 to 16 inches. Think of a 2 by 4 and multiply it 7 times on one side and 4 times on the other. That will give you an idea of what a stout ship she was.

Women contributed their jewels to help build the ill-fated *Pee Dee*. She made only one voyage, from

OUT OF THE MUD — view from the stern of the C.S.S. *Pee Dee* showing the dual fire boxes of the boiler and the network of beams in the hull.

## It Takes A Month For Baby To Smile

**By DOROTHY V. WHIPPLE, M.D.**  
**AP Newsfeatures**

When will your baby smile? At birth the baby's brain is all there but the nerve pathways are not hitched up and all his actions are automatic, on a reflex level, we call it. But by the time he's a month old the tiny nerves are beginning to carry messages. The baby begins to do things on purpose. The first nerves to work are those closest to the brain. The baby develops on a head-to-toe pattern.

The very first truly voluntary act of a baby is to smile. He usually does it at about a month of age. For a few days you notice the muscles of his face twist a little. It's as though he's feeling his way through an unblazed trail, he's trying to send a message down to the muscles of his face. Then finally he finds the way and bursts forth in his adorable toothless grin.

He smiles at you, at life, at anything that's good. He smiles because he wants to, because he feels good. He's not copying you because even blind babies smile. It's something that comes from inside your baby, that makes him able to express himself this way.

It's always seemed quite significant to me that old Mother Nature should have made this the first purposeful thing a baby does.

That first grin would melt a heart of granite. There is something so appealing, so friendly, so warm about it. It says "You're nice, I like you." And what happens? Why you smile back, maybe even you pick him up and hug him and you tell him he's nice too, you love him.

And that sly old Mother Nature, she did it on purpose. Because that's just what that baby of yours needs. He needs to be told in words and hugs that you love him. He needs to feel that he belongs here, that you want him around.

If there is but one single thing we have learned for sure from all our modern psychology it's the fact that a baby needs to feel wanted and loved. It's this way he gets the beginnings of confidence and security in the world. It's the way to start him toward a personality that will be an asset to him all his life.

And the baby does his part. As soon as he can do anything he smiles at you. And that smile makes up for all the time you've wakened up in the night, all the laundry you've done all the chores you've had to do. Just let yourself go and respond to it as Nature meant you should.

TROOPING TO POLLS IN INDIA — Supporters of Premier Nehru's Congress Party march to vote in Andhra State after government fell on a vote of no confidence. Andhra has 21,000,000 inhabitants and electorate of 11,000,000.

## Guests, On Film, Of Melrose Club

**MELROSE, Mass.** — Three British Rotary Clubs were the "guests" of Melrose Rotarians yesterday — but the Englishmen won't know what went on for a couple of days.

Tape recordings and movie films were made of the Melrose meeting to be air-mailed to clubs in Clapham (a suburb of London), Isle of Sheppey, Kent, and Sunderland, Durham.

## Smith Family Is Busy In Court

**LITTLE ROCK, Ark.** (AP) — In a recent decision of the Arkansas Supreme Court Chief Justice Griffin Smith wrote the majority opinion.

It affirmed a ruling by Chancellor W. Leon Smith.

The dissenting opinion was written by Associate Justice George R. Smith.

## Seven-Year-Old Starling Loves Classical Music

**NASHVILLE, Tenn.** — Rastus, a talking starling who digs classical tunes, is observing his seventh birthday.

Rastus' birthday isn't known exactly, but it has been fixed at about this time by his owner, Mrs. Harry Titus, who found him at her kitchen door with a broken leg in 1948.

Since entering the Titus household Rastus has been taught to speak English fluently — naturally, with a Southern accent.

Mrs. Titus says Rastus simply loves piano classics especially Schumann's "Traumerei" and Rachmaninoff's Prelude in C sharp Minor, and sits transfixed as they are played for him by her daughter Virginia.

Dr. George R. Mayfield author of an outdoor column in the Nashville Banner, says he's heard of talking starlings in Europe, but Rastus is the first to come to his attention in this country.

## Son Follows Father In Collecting Folk Music

**ROME** — Alan Lomax, a big, 40-year-old New Yorker, collects folk music. He believes a nation's civilization — particularly its attitude toward women — is reflected in its folk songs and in the way men sing them.

Lomax's father, the late John A. Lomax, was curator of folk music in the Library of Congress. Alan was assistant curator. With his father he traveled for thousands of miles in America recording the music of mountaineers, Negroes and Indians. He has edited 14 albums of folk songs, from Europe, Asia and America.

With his tape recorder Lomax came to Italy last July. Since then he has crawled up mountains, lurked in olive groves, rooked in boats and dodged traffic in cities with an ear to the sounds made by Italians.

"In most Italian songs you find one subject," he said. "They're about love. Even the work songs, the grain threshing songs, the chestnut harvesting song."

The Lomax theory about music and civilization shows itself strongly in Italy.

Northern Italy has no very starchy traditions about sex. Women are accepted as equals in most matters, and the attitude toward life is open and free. People like to sing together, and their voices are "open-throated, like laughter."

By contrast, southern Italy is bound by traditions. Many women wear veils, and they are regarded more as property than as equals.

"You can hear the difference in the folk music," Lomax said. "It's solo singing, and the songs tell of suffering. There's a whole form of song in Calabria reviling women who have disappointed men in love. The voices are closed and they don't blend. They sound more like cries, in Arabic style."

North of Florence, he heard what sounded like primitive opera — Ligurian peasants singing in chorus, waving their hands in operatic gestures.

"This may have been where opera was born," he says.

**Want To Change Code Instead Of Alabama's Flag**

**MONTGOMERY, Ala.** — Even though it looked a bit strange, the Alabama flag waving above the State Capitol yesterday seemed so inspiring that the Daughters of the American Revolution want to keep it that way.

Seems the Alabama state code specifies a square state flag and some keen-eyed DARs noted that the one atop the Capitol was rectangular.

That started an argument at the closing session of the state DAR convention here. Delegates finally voted to change the code instead of the flag when it was pointed out that a rectangular flag drapes better in a breeze than a square one.

The code change would have to be made by the State Legislature — and the United Daughters of the Confederacy might object since the square Alabama flag was modeled after the square Confederate battle flag.

# CONGRESS' OWN NEWSPAPER

With a contributing staff of 435 U.S. Representatives and 96 Senators, Congressional Record is one of the oldest dailies in the country. An official record has been published since 1799, but only since 1875 has it been called Congressional Record. Before that it had such names as Annals of Congress, Register of Debates and Congressional Globe.

Circulation of the Record is some 37,000, most of it among private citizens who pay \$1.50 a month for the privilege of keeping close tabs on the doings of their Capitol Hill representatives. Published at the Government Printing Office every night while Congress slumbers, the Record is on the breakfast table of every Senator and Representative the next morning.

In the pages of Congress' own newspaper are found a complete transcription of the proceedings on the floors of the two Houses, dutifully reported by a corps of "reporters of debate"—skilled stenographers who can take down verbatim remarks at speeds up to 400 words a minute. Throughout the day, messengers rush copy from Capitol Hill to the 33-acre printing office where, starting at 6:30 p.m., publication begins. A small regiment of linotypists and proofreaders prepare copy until 2 a.m., when the Record goes to press. Two and a half hours later the last copy rolls off, ready for mailing to subscribers all over the globe.

How the Congressional Record operates is pictured here.

Over his morning coffee, Sen. Karl Mundt reads the Congressional Record, just delivered to his home in Washington.

1. At government printing office, C.W. Patrick goes over stenographer's original copy as received from the Capitol. He slugs it for type size, length of takes, and logs it in.

2. Linotype operators at work printing the Record. Each one later must make whatever corrections are noted by proofreaders.

3. Linotypist Frank Melchert puts his type that has been revised into proper numbered galley. John Williams, right, locks type into place in galley and then brushes off the typeface.

4. Proofreader Lawrence Leff compares original proof, left, with revised proof, right. Copy is slugged "House" and "Senate."

5. First section of the Record comes off the press. This particular issue contained three sections, each containing 32 pages.

6. Senator Mundt takes copy of Record from mail box at Capitol Towers apartments, where he lives. Truck makes morning rounds of legislators' homes, delivering the Records.

## River Bill Demands Local Attention

A bill introduced in the Senate yesterday to clean up the Tar and Pamlico River should receive the careful study of Greenville officials as well as the members of the legislature from Pitt County.

While the pollution in the Tar and Pamlico does not approach the contamination in some other rivers of the state, most people have agreed the river needs cleaning up. Greenville's Utilities Commission for the past year has been looking to the day when Greenville would have to make an appreciable capital outlay for a sewerage disposal plant to replace its long practice of dumping raw sewerage into the river.

Under the proposal of the bill now before the legislature Jan. 1, 1960 would be the deadline after which it would be a misdemeanor to dump raw sewerage into

the river. It would mean that Greenville and other towns which have been dumping their sewerage into the river would have to have sewerage disposal plants in operation by that time.

The local Utilities Commission already has acquired the property for such a plant, and has begun its planning toward the project. Whether it can reasonably be completed by the deadline set forth in the bill we do not know.

Obviously it is to the advantage of the area through which the Tar-Pamlico flows to keep the river as sanitary and free from pollution as possible. How much it will cost the individual municipalities which will be affected and how long it will take to make the changes to comply with the bills provisions should be given careful study before the bill is passed.

## We Must Deal From Strength

The question of what is going to happen to the world in this atomic age has been pondered around the globe since the first atomic weapons exploded over Japan. Many people have come up with a number of pessimistic answers. A few have predicted (as was the case in the era when the new explosive dynamite was introduced) that the new weapon makes war so horrible no nation will attempt it in the future.

Although we question the latter statement, we hope those optimists are right.

It behooves the American people, however, to view realistically this delicate balance of nuclear power in the two major camps of freedom and slavery in the world today. In recent months it has been predicted that in five years Russia will attain sufficient proficiency in the nuclear field to balance the scale which has long been tipped in favor of the United States.

What then? Has the Kremlin avoided

an all-out conflict with the free world because she knew the free world arsenal held the upper hand in nuclear weapons? If the scales are ever balanced, will the Kremlin risk a nuclear war to gain her objective of world domination?

Hitler did in a day when block busters were as much feared as today nuclear explosives. But in the '30s in dealing with Hitler the free world was dealing from weakness rather than from strength.

In its dealings with the Kremlin since the close of World War II, the United States has held a sufficient balance of military power to deal from strength rather than from weakness. Unless and until the objectives of the Kremlin and communism are altered, the free world must at all times remain in a position to deal with the Reds from strength.

## They Are Off Base On This One

Congressmen who are hoping the new pay increase for military personnel is going to attract volunteers to make possible doing away with the draft are, in our opinion, whistling in the dark.

The pay increase voted by Congress this week is going to increase enlistments, and probably by the incentive which encourage many men already in service to continue their military career. We would be kidding ourselves, however, to think the pay increase will attract sufficient volunteers to do away with the draft.

After all, the idea of the present draft law is not only to maintain a sufficient number of men under arms, but also to create a large pool of reserve manpower with military training which can be called to active duty in a time of extreme emergency.

## Strength for the Day

By EARL L. DOUGLASS  
SALESMANSHIP IN RELIGION

One of the nation's top-ranking salesmen stood before a group of Christian believers some time ago and spoke, in substance, as follows:

"The trouble with you Christians is that you don't sell what you have; for, without any doubt, you have the best product that ever came on the market. You have truth, salvation, eternal life, joy, and triumph to sell. You have Almighty God behind you. You have the Bible—the greatest book that was ever written. It is your privilege to present to the world the greatest Man that ever lived—the wisest, the kindest, so much so in fact that He is acknowledged as the Saviour of the world. Yet to what extent are you selling what you have to sell? You need to get a hump on, to realize what your privileges are, and to begin selling what the world really wants. We are shoving you off the road today by the way we sell automobiles and carpets, dresses, perfumes, deodorants, and jewelry. Get busy—for God's sake (and I say it reverently), get busy. You really have a product to sell, and the people want it."

There is more to religion, of course, than merely selling it, but that the Church has a selling job no one can deny. The divine commission is that we go forth and be witnesses. There is no greater or more privileged duty than this.

## National Whirligig

## Reply To Provocative Letter

By RAY TUCKER

Every Saturday, Mr. Tucker answers readers' questions of general interest on national and international politics and personalities. Questions may be sent to him at 7008 Hillcrest Place, Chevy Chase, Md.

WASHINGTON—In 20 years of writing this column, I have been deeply impressed and extremely grateful for the kindness and thoughtfulness, the tolerance and understanding, of the vast majority of my readers. Even when they disagreed with me, they conceded that there are always two sides, as well as different viewpoints, to any question. Their attitude has been a real satisfaction and help.

AN INSULTING LETTER—The reason for inclusion of this personal note is an insulting and provocative letter from P. Q. of Albuquerque, N. M. After listing several questions he (or she) writes:

"No, Mr. Tucker, you won't answer one of these questions because you dare not face the truth, and if you did face it, you dare not print it because you would be among the unemployed tomorrow. But when you write the hogwash and twaddle you do, remember that there are people who read, who know our dirty history of the past 25 years, who know that Eisenhower is a New Dealer who know the New Deal will go to any length to keep up the New Deal practice of spending, taxing, and electing."

"We'd cut off our hands before we'd ever vote again. No, Mr. Tucker, we are not all morons. Disgustedly."

P. Q.'s questions and my answers follow.

"In what way does Eisenhower differ from Truman? Wasn't Eisenhower Truman's hand-picked successor?"

Answer: Truman once offered to help Ike get the Presidential nomination, but on consideration of course, that he run on a Democratic ticket. Truman dumped the country against Ike, and pulled no punches in supporting Adlai E. Stevenson. To the former President, even the humblest Republican is a political enemy.

IKE SEEKS TO HALT NEW DEAL TRENDS—It is certainly no New Dealer. It is true that he has obtained certain basic reforms—Social Security—collective bargaining, agricultural benefits, Federal support of education, health and the needy aged. No President, regardless of his social and economic philosophy, would dare to abolish them. And no major Party, either.

## Villain Or Hero?

## Somebody Told Me

## Making Hay While Sun Shines

Subject for today: kissing.

It seems that one of my biggest responsibilities as a father is to kiss. It's impossible for me to get out of the door without kissing and loving a four-year-old, two-year-old and their ageless mother. It isn't the mother's idea to get kissed, but the youngsters demand it.

And if there's anyone else around, as in the case of a cleaning woman one day, Nancy requests that I kiss and love her too, before I leave.

This operation is not confined to going to work in the morning by any means. In fact, it's impossible to predict the frequency of this occurrence. After lunch it happens, sometimes when I go out to put the car up it happens, and even when I go out to get

the newspaper.

Am I bragging or complaining? Bragging, of course! Since I am well aware that these days are numbered, I'm making hay while the sun shines.

At present I'm concentrating on getting away from the smack-in-the-mouth kissing. The two-year-old boy had always insisted on kissing right on the lips. So in order to de-emphasize this practice I'm now asking him where he wants to be kissed. It works, for each time he points to a different place.

Kissing is one of the most enjoyable pastimes known to man. What is the family man's approach to the pastime? In his wild oats days he kissed a few. Does he remember those kisses? Yes, a few of 'em. How vividly?

Not very, except how much fun it was. Does he get the same fun from kissing the babies? That's an unfair question. I object!

In my case, wild oats days were also World War II days. Every soldier faced the possibility that he might not come back, so most of us romanced all we could. This column is drifting in the wrong direction.

Kissing among families varies greatly. Some kiss each other if they've been apart for a few days, others do not, even if they've been apart for years.

Family kissing is important, for this reason: Anything that keeps the family close together is worthwhile. The outward display of an inward feeling will help unity! And I thank you. JACK EDWARDS

## What Other Editors Are Thinking

GRASS ROOTS REACTION  
(Henderson Dispatch)

Legislators returned to Raleigh the other day after the usual week-end at home and reported a sharp grassy reaction against additional taxes on food. From what they said in answer to questions, there was surprisingly little opposition to tobacco taxes except in the eastern tobacco belts. What that means as to the luxury levies is anybody's guess, but it still seems likely that the lawmakers will hesitate a long time before adding to the restraints upon one of the State's chief sources of revenue with the risk of getting even less than at present.

A large portion of the State is against tobacco taxes. Equally as many want no more food

taxes. Where, then, will the additional revenue come from that the spenders say must be had if the sky is not to come crashing down upon our heads?

One theory we have heard advanced is that of adding one cent to the current three cents sales tax and let it go at that in the certainty that it would produce much of the \$2,000,000 it is claimed the State must have over and above yields from present levies. But legislators might find the going pretty rough indeed if they resorted to that alternative.

What is the way out? In our judgment it is the same as we have thought all along namely, that when the money isn't at hand it must be done without and spending should be scheduled

on the basis of what is available. North Carolina wouldn't go to the dogs on its present income. The State has over-extended itself these past few years, and the time for retrenchment is at hand, as every one should have been able to see in advance when these heavy outlays were authorized.

We haven't been able to convince ourselves that there is widespread demand for new taxes. People who want these services the State has begun to provide should be willing to pay for them or else not pay without them. There is no such thing as something for nothing. Somebody pays for all that is done by government. And the less the government does the less the people will have to pay in taxes. It's as simple as that.

## Around Capitol Square

## Several Recommendations For Problem Of Delinquency

By LYNN NISBET

JUVENILES — "The overall juvenile delinquency problem is age-old, but no satisfactory cure-all has as yet been discovered. Locally hundreds of agencies, government and private, are seeking a workable solution." That is the opening sentence of the body of the report of the Commission on Juvenile Courts and Correctional Institutions filed with the Governor this week by its chairman, Terry Sanford of Fayetteville.

Somewhat localizing the situation the report says: "North Carolina's juvenile service system, including the creation and operation of the juvenile courts, detention of juveniles, education, training and supervision of juvenile delinquents, and their placement and confinement, is a hodgepodge of legislation which over the years, like Topsy, just grew."

Purpose of the study by the commission was to evolve some plan or system that would tend to alleviate the situation by converting the hodgepodge into some sort of co-ordinated program. To that end several recommendations were made, none of which contemplate legislation at this session. These include raising the age for juvenile court jurisdiction from 16 to 17 (or as the lawbooks have it from 15 to 16, the law contemplating that the person is 15 until after passing the 16th birthday); establishment of reformatories to bridge the gap between the open training schools and regular State prison or road camp; and larger control by welfare agencies over the activities of juveniles and juvenile courts.

The report based on a thorough study contemplates a co-ordinated program which should be carried along on all fronts, rather

than by piecemeal legislation. Meantime, House J-1 committee is considering another piecemeal bill purporting to raise the age limit for juvenile court jurisdiction to 17 without making any provision for effectuating its provisions.

OBJECTIONS — The bill HB-398 is now in hands of a subcommittee composed of Reps. Arthur Goodman, its introducer; Marcellus Buchanan and Thomas White, its chief sponsors, and will make it more acceptable. Objections arise from two sources: Those who sincerely believe that 17 is too old for juvenile treatment, and those who like the idea but think the present bill cannot do the job desired, mainly because of complete lack of facilities and machinery to make it work. Minor objection is that 17 is an odd place to stop. Nearly all other laws fix 14, 16, and 18 as the "breaking points."

Sam Leonard, state superintendent of correction, opposes the bill only because there is no place to take care of the older boys and girls, but in his statement to the committee he supported the position of those who oppose it in principle when he said that he has been in this kind of work for 25 years and the average youth of 12 today is more mature than the average of 16 twenty years ago. He conceded that 17 is an odd point, and would go along with an 18 age limit if—and only if—and when provision has been made for closed schools or reformatories. Even now many boys and girls who have been committed by the courts to training schools are roaming the streets because the schools are already overcrowded and they cannot be admitted.

Not very, except how much fun it was. Does he get the same fun from kissing the babies? That's an unfair question. I object!

In my case, wild oats days were also World War II days. Every soldier faced the possibility that he might not come back, so most of us romanced all we could. This column is drifting in the wrong direction.

Kissing among families varies greatly. Some kiss each other if they've been apart for a few days, others do not, even if they've been apart for years.

Family kissing is important, for this reason: Anything that keeps the family close together is worthwhile. The outward display of an inward feeling will help unity! And I thank you. JACK EDWARDS

## Business Today

## Solo Business Effort

By ELMER ROESSNER

It is still possible to start a one-man or one-woman business, make money at it and have fun at the same time.

Deponent today is Isabelle Kane, of Edwardsville, Ill., who once spent a sleepless night, got an idea that put her in business and is now moving toward large-scale national distribution.

Her product is the Toe Tent. On the sleepless night ("It was very cold," she recalls) she realized that when she was on her back the weight of the covers on her legs kept her awake. "The next morning I took the wire towel rack off the front of my son's bathnetette put several bends in it and stuck the ends into a 10-inch piece of flooring left over from our new home," she says. "Inserted in the bends, I put my hands on my hips and said to myself aloud, 'This is it!'"

She took the device to a machine shop and, without telling what it was, got bids on quantity lots. Then she tried it on the heels of her slippers as a test and when orders started rolling in, Mrs. Kane knew she was in business.

She calls her firm, "Toe Tent, Incorporated (not a corporation)." "The word 'Incorporated' is a class 'insert' in the business, but I didn't want to go to the bother of issuing stock and I certainly don't want to pay a corporation tax!"

Mrs. Kane is the wife of a successful architect and the mother of two boys, 10 and 12 years of age. The older son helps in the business, giving Mrs. Kane time to do a bit of personal promotion work.

Some people, she concedes, think she is a little queer when she opens conversations with "How do you sleep?" Most people sleep on their sides she finds, because the weight of covers hurts their toes when they sleep on their backs. When they agree that they would rest better on their backs, the sale of a Toe Tent is practically cinched.

WORTH THE RIDE

Most people named Joe get boiling mad when employees quit, start in business for themselves, and advertise. "Formerly of Chez Joe."

But not the proprietors of the Albert-Carter beauty salon in New York. In newspaper advertising, they say: "Formerly of Albert-Carter . . . you probably have seen this sign in many a beauty salon window . . . and we are proud of the fact that Albert-Carter has established such high standards that our employees boast 'formerly of' when they go out on their own."

ACCOUNTANTS DEFINE SYNONYMS FOR "GAIN" Do you know the difference between "proceeds," "revenue," "income," "profit" and "earnings"? In accounting, economics and law there is a lot of confusion, the American Institute of Accountants, points out. To clarify the situation it has issued a four-page bulletin defining each term. Copies are 25 cents from the I. A. C., 270 Madison Ave., New York 17.

WAGE, SALARY EARNERS MAKE LARGEST GAIN Despite present levels of unemployment, wage and salary earners are doing very well, according to accounting, economics and law there is a lot of confusion, the American Institute of Accountants, points out. To clarify the situation it has issued a four-page bulletin defining each term. Copies are 25 cents from the I. A. C., 270 Madison Ave., New York 17.

This category of course, includes top corporation salaries as well as hourly wages. ANTI-FALL-OUT FILTERS

With all the talk about the danger of radioactive "fall out" from the hydrogen bomb, air conditioner manufacturers are reported to be working feverishly on filters that will remove the hazard.

The first company to produce a conditioner with such a filter, with scientific approval, would gain a great market advantage.

## Chain Of Events Lead To Visit

By JAMES MARLOW

Associated Press News Analyst WASHINGTON (AP) — The United States will let 11 Russian student editors visit the United States but they'll have a hard time trying to find their own two best-known newspapers to read, Pravda and Izvestia.

The government bans both papers from general distribution in the mails in this country. The Post Office Department says only diplomats and registered foreign agents can get them.

Last year a group of undergraduate American school paper editors visited Russia. But for a year this country turned down the request of 15 Russian school editors, including the 11, to visit American schools.

Russian propagandists banged away at the United States for that and Thursday the State and Justice departments finally decided the 11 could come into the United States for 30 days. Then the Soviets asked permission for a group of Russian farmers to visit this country.

The editors range in age from 34 to 39, rather a high age to be school editors. But a State Department press officer, Henry Suydam, said they are really graduate students, editors of student publications.

Under this country's immigration laws both the State and Justice departments had to give approval. Suydam said the schools the 11 visit will be worked out by the Institute of International Education in New York City.

The immigration laws and the ban on Pravda and Izvestia were both criticized Feb. 25 at a conference held under that institute's auspices by Louis M. Hacker, dean of the School of General studies, at Columbia Un-

iversity, New York.

Hacker panned the restrictions of the immigration laws, particularly as they effect foreign scholars and scientists and the ban on the Russian newspapers for several reasons.

He mentioned that schools with Russian study programs have difficulty getting copies of Pravda and Izvestia which published in Moscow and are respectively the official organs of the Russian Communist party and the Soviet government.

In a letter to the New York Times last Sunday, George F. Kennan, former American ambassador to Moscow and an authority on the Russians criticized government authorities for making it difficult to get the two Russian papers.

Kennan served most of his State Department career under Democrats. The Post Office Department says the Eisenhower administration didn't ban the papers, that it is only carrying out a ban imposed under President Truman in 1950.

That was the department's explanation. In 1940 the attorney general ruled that foreign publications containing material prejudicial to the United States could be barred from the mails. He was aiming them at Nazi publications.

The ban lasted until 1946 by which time the Nazis had no publications. But under this same ruling of 1940 the ban was imposed in 1950 against not only the two big Russian newspapers but a number of Russian magazines and for the same reason the Nazis' stuff was banned before.

Some people, Hacker said, are convinced the attorney general in 1940 exceeded his authority in approving the Post Office ban at

# Scurf Is A Preventable Disease

Scurf, or "black skin," disease can drive a sweet potato grower out of business, but there's no reason for it, according to State College plant pathologists. It's easily preventable. Dark areas in the picture above shows the disease spreading from an infected plant into new roots. If you transplant diseased plants, you harvest a diseased crop. One of the best preventative measures is to produce your own plants. If you must buy, obtain only certified plants from growers who have followed recognized precautions against scurf.

RALEIGH: — A common disease of sweet potatoes, known as scurf or "black skin," threatens to force many growers out of production and discourages new growers trying the crop for the first time this year according to H.R. Garriss, head of plant pathology for the State College Agricultural Extension Service.

"This disease can easily break a sweet potato grower and give a black eye to our markets, but it can just as easily be controlled," Garriss declares.

"It takes only a little understanding of the nature of the disease and the application of a few simple common sense rules for sweet potato to produce a scurf-free crop," he believes. Garriss points out the disease is caused by a fungus that attacks only sweet potatoes; it affects only underground parts of the plant; the fungus is often introduced into plant beds and fields in contaminated barnyard manure; if diseased roots are bedded, disease plants will be produced; if diseased plants are taken to the field, a diseased crop will be harvested and the organisms will remain in the soil to attack subsequent sweet potato crops unless you follow adequate crop rotations.

The nature of the disease, Garriss says suggests practices to prevent it. Since scurf attacks the sweet potato only a three to four year rotation with any other crop will starve out the fungus. He advises farmers not to plant sweet potatoes on land that has been in this crop during the last three or four years.

Considering that the disease doesn't attack above-ground parts of plants, growers can avoid trouble by using out sprouts and vine cuttings for field plantings. But maintain your rotation!

Stable manure being a carrier of the disease, if you use it as a source of heat in plant beds, maintain a four-inch layer of clean soil between the bedded roots and manure; don't ever use stable manure in fields the same year that sweet potatoes are grown. Allow two years after application before planting sweet potatoes.

Garriss points out one of the most effective things a farmer can do to avoid scurf is not to bed diseased potatoes. "Seed selection and seed treatment are the first steps in being assured of bedding healthy roots."

When selecting seed, dip potatoes in water to remove dust. This makes it easier to see scurf, decayed spots and bruises. Pick up each root, one at a time and inspect the entire skin surface. Discard all roots showing smutty patches of skin, decayed spots, bad bruises, or shriveling, Garriss advises.

Garriss quotes Henry Covington, extension horticultural specialist, on the subject of seed selection. Covington stresses the importance of having roots for bedding that are 1 1/2 inches in diameter or larger. Don't bed "strings" because the plants they produce are weak and spindly, Covington warns.

He further advises care in selecting the right color of sweet potato for best marketing qualities. Don't bed roots showing light skins or light streaks. Sprouts from these light streaks will produce all light-skin potatoes rather than the copper-skin market demands. The color of the sweet potato flesh is important, too, Covington points out. A normal Porto Rico has a deep salmon-pink to orange

flesh, extending from the stem end to about two-thirds the length of the root. When selecting roots for bedding, cut a small shallow smooth nick about one-quarter inch deep on the shoulder of each root near the stem end. Save only those roots showing the desired normal color. This "peep hole" will not cause a rotting if potatoes are treated the same day, according to Covington.

Seed treatment, which kills disease organisms that may be on the potato surface. Such treatment involves a one-minute dip in an organic mercury solution (one pound of chemical to 7 1/2 gallons of water). This is no substitute for seed selection, Garriss stresses.

"Don't take disease plants to the field," is his final warning. "One of the most common ways of running into scurf is through the purchase of cheap plants. Don't ever shop for the cheapest plant; these are usually the most expensive in the long run. Do your own seed growing, seed selection and plant growing, if possible. If not, buy only those plants certified by state agencies and then only from those growers you know have employed the proper practices of selection, etc."

## How To Control Wildfire In Bed

RALEIGH — Not only can tobacco wildfire kill plants in the bed, infected plants when set in the field may cause heavy losses in yield and quality, according to Howard Garriss, head of extension plant pathology at State College.

If used properly, a bluestone-lime mixture will control wildfire in the tobacco plant bed, he adds.

Two treatments of the mixture are required for effective control. The first application should be made when the first true leaves are forming. The second application should come 10 days later. The mixture should be applied through the cotton cover with an ordinary sprinkling can or an old bucket with holes punched in the bottom. One quart per square yard is the recommended dosage.

Garriss made the following suggestions to Tobacco Farmers: (1) ditch well around bed to keep surface water from flowing over it; (2) cut weeds instead of pulling if possible; (3) don't mix nitrate of soda with bluestone-lime mixture; (4) allow an interval of one to two days between wildfire and blue mold treatments; (5) get fresh hydrated lime each year; (6) prepare fresh mixture for each treatment and use immediately; and (7) follow directions closely.

## Dog And Chicken Living Together

CONNEERSVILLE, Ind. (AP)—Some time ago, Bob Murray's coon hound killed some of his chickens. The dog has been kept chained to his doghouse since.

The other day a pullet decided she would rather live in the doghouse with the hound than in the chicken house. The two get along fine, Murray says.

## Cooler Brooder For Turkeys Is Said Desirable

RALEIGH Experiments have shown that turkeys brooded at cooler temperatures than 95 to 100 degrees usually have a little better feed conversion and feather better than their warmer counterparts, according to W.C. Mills, extension turkey specialist at State College.

However, the turkeys themselves are still the best guide to correct brooding temperatures, Mills says. They should always be kept comfortable. If poult goes off feed, slightly higher temperatures are required than normally.

Mills adds that although there have been few new discoveries to pass on to turkey growers, the basic points can never be over-emphasized.

First of all, there is no compromise for good stock. The turkey producer should begin with the best available poults and give it plenty of room to grow. The poults must have plenty of good food and clean, pure water. Two or three, four-foot feed hoppers should be kept full of feed for each 100 poults, while four waterers, four feet long, will take care of 100 poults during the brooding season.

The brooder house and equipment should be thoroughly cleaned and disinfected before the poults arrive.

No set rule can be made for ventilation of the turkey brooder house because of differences in structure and location. The best guide to go by is to keep the ammonia fumes out, keep the air moving so as to remove the moisture-laden air, and allow sufficient air to pass through the house to keep the litter or manure dry.

When transferring turkeys from the brooder house to the range, they should be vaccinated for fowl pox.

Turkey growers interested in wing-knotching their young poults may contact their county agent for details on this process, which makes birds easier to control on range.

## Sweet Potato Electric Hotbed Has Advantages

RALEIGH — If you plan to bed sweet potatoes this spring, don't overlook the possibility of using an electric hotbed.

E.S. Coates, extension agricultural engineering specialist at State College, says that worries about getting plenty of potato sprouts on time disappear with the uniform heat provided by electric cable and thermostat of the electric hotbed.

He says that many farmers have found that they can get well over 5,000 plants per bushel of potatoes and that less labor is required in caring for the bed when it is heated electrically.

Here are the steps recommended by Coates in preparing an electric hotbed:

1. Decide on the size of bed and order equipment immediately. A six by six foot bed needs one 60-foot length of lead cable or 400 watts heating capacity from any other cable. A 15 by six foot bed

needs two 60-foot lengths of lead cable or 800 watts of heat.

2. Select site for bed close to good water supply, electric service, with a "southwest" exposure, and where the soil drains well.

3. Build the frame six feet wide and as long as needed, usually in multiples of three feet to take care of glass sash or frames covered in glass substitute for covers. The bank of the bed should be 18 inches high; the front sash 12 inches high.

4. Dig two or three inches of soil out of the frame.

5. Place one inch of sand in the bottom of the bed to reflect heat upward.

6. Place cable in bed uniformly spaced, and cover with one inch of soil. Put thermostat bulb halfway between cables.

7. Select good seed potatoes, free of disease. Treat them and place them in the bed carefully, close together but not touching.

8. Cover potatoes with one inch of soil.

9. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

For more information, county agents of the Supply Agricultural Engineering Leaflet No. 8 on electric hotbeds and plans for construction of such a bed.

10. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

11. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

12. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

13. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

14. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

15. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

16. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

17. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

18. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

19. Place covers over bed and fasten so that wind will not blow them off. Bank the soil well around the frame for insulation and help with drainage. Aerate the beds on warm days and water beds regularly.

# Local Bankers Attended Ass'n Meet In Goldsboro

J. H. Waldrop, J. R. Mays, R. E. Stason and James M. Mays of the local Guaranty Bank and Trust Company attended in Goldsboro this week a quarterly meeting of the Eastern North Carolina Conference of the National Association of Bank Auditors and Comptrollers.

Waldrop, vice president and comptroller of the local bank, served on a panel which answered questions pertinent to bank operations. Other panel members included E. A. Rhinehart, vice president and comptroller of the Fidelity Bank in Durham; and W. H. Stanley, vice president and cashier of the Peoples Bank and Trust Company, Rocky Mount. Moderator was Junius W. Tillery, executive vice president of the Commercial and Industrial Bank of Henderson, who also served as program chairman for the conference.

Some 130 bankers representing 47 different banks in the Eastern conference attended the meeting, at which Bruce W. Riley, executive vice president of the National Bank of Wilson, presided.

Host banks for the session were the Branch Bank and Trust Company and the Bank of Wayne of Goldsboro.

# Kiwanians Hold Show Rehearsal

The Greenville Kiwanis Club, at its weekly supper meeting last night, used the program period for the chorus of 50 Kiwanians and college students and four end men to rehearse for the annual Kiwanis Minstrel Show at the college next Wednesday and Thursday nights at 8:15.

Producer Ed Bloom is directing rehearsals. Proceeds of the show are for the Kiwanis Club's Underprivileged Child Fund. The cast of over 100 includes a chorus of singing and dancing girls from East Carolina College, Miss Marydum Beatty is directing the dancers and will do a specialty number. A college orchestra, with Mrs. Lena Tyson at the piano, will provide music for the show.

Tickets are on sale by Kiwanians and at J. Hicks Corey's office, 521 Dixon Avenue.

President Charles V. Wilkerson announced that a delegation of Greenville Kiwanians will attend the meeting of the clubs of the Seventh Kiwanis Division of the Carolinas at the Kiwanis Club of Washington March 22. District Gov. S. Preston Douglas of Lumberton will speak. Lt.-Gov. Roland Modder of Washington is to preside. The banquet will be held at the Washington Country Club at 6:30.

# Colored News

The Ladies Social Sorority Club observed its fifth anniversary at Club 264 on March 10. The dining room was beautifully decorated with the club colors, black and white. The club flowers were gladioli. All members wore black party dresses and white and black corsages. Guests first had to find their name before they could be seated. Grace was said by Mr. Willie B. Morgan, then chicken salad, potato chips, pickles, ribs and soft drinks were served. Mr. Charles Basnight was after-dinner speaker. Hostesses were Mrs. Willie Hines and Miss Rosa Moore. Members present were Mrs. Reatha B. Tall, Mrs. Marie Jones, Mrs. Novella Hopkins, Miss Ida Dawson, Mrs. Hatie Williams, Mrs. Mary E. Sherman, Mrs. Mary F. Wiggins, Mrs. Geneva Morris and Mrs. Elizabeth Forbes.

# Anniversary Of Girl Scouts Today

Today Girl Scouts all over the world are joining hands to celebrate the forty-third birthday of that organization.

Locally, Pitt County Girl Scout and Brownie troops have observed the occasion all during this week with individual birthday parties within their own groups.

On each cake has burned one candle, signifying "one to grow on" for the Scouts and Brownies. The candle also burned for the Juliette Low Birthplace Fund. Juliette Low founded the Girl Scouts in 1912, and the organization is now buying and restoring her birthplace in Savannah, Ga.

Also, at the birthday parties a penny offering has been collected in each troop to be designated for the International Friendship Fund which helps sponsor Girl Scouting throughout the world, aiding lone troops and lone members and fostering the exchange of girls from other countries as well as sending American Scouts abroad.

The anniversary today of the founding of the organization climaxes an entire week of activity by the Girl Scouts, as they have been observing National Girl Scout Week, March 6-12.

**TIED TO WORK**—Germany's safest truck driver, Martin Eicher, 63, and his wife celebrate award given to him for driving 1,568,000 accident-free miles in 41 years.

# More Realism

WASHINGTON (AP) — Val Peterson, civil defense administrator, disclosed President Eisenhower has suggested "more and more and more" realistic evacuation tests to prepare the nation in the event of nuclear attacks.

Peterson made the comment at a Senate Armed Services subcommittee hearing on civil defense. He told a reporter there was no urgency attached to the President's suggestion.

Peterson also said another mock nuclear raid on the United States and Canada is planned for June.

Peterson also recommended civilian garden type shelters stocked with enough food and water for five days in the event of a nuclear attack.

# Butler Making Series Of Talks

Alumni Secretary James W. Butler of East Carolina College began a series of talks Thursday night, March 10, which will take him to various towns of the state for appearances before alumni, church, and civic organizations.

Mr. Butler was a guest Thursday of the Wilson County unit of the North Carolina Education Association in Wilson. He spoke on East Carolina College's Services to Education. Mrs. D. H. West, school principal, was chairman of the program committee for the event.

On Friday night he spoke before the Youth Temperance Council in Charlotte. At a meeting of the South Piedmont District of the East Carolina Alumni Association Saturday in Charlotte, Mr. Butler discussed with members a program of support for the J. Y. Joyner Library and its book collection at the college and for the college scholarship fund for needy students.

He is scheduled to speak Sunday morning, March 13, at the Couples Class of the Myers Park Baptist Church in Charlotte. Eloys Britt of the Associated Press staff in Charlotte is in charge of arrangements for Mr. Butler's appearance as guest speaker.

Mr. Butler will meet with Washington County alumni of East Carolina in Plymouth Tuesday. Mrs. V. Gaylord will act as chairman of the meeting. That evening he will speak before Rotarians at Plymouth and will be introduced to his audience by Roy F. Lowry, superintendent of schools in Washington County.

# Discusses Home Sewing At Meet

RED OAK — Red Oak Home Demonstration Club clothing leader, Mrs. Lizzie Vandiford, gave a demonstration on home sewing at the monthly club meeting held this week in the community building.

Eighteen club members and one new member witnessed the demonstration, in which Mrs. Vandiford displayed belts, buckles, and pocket books, noting a number of sewing secrets that will make home sewing easy and also give it a professional look.

Two reports were given during the afternoon, one by Mrs. Thurman Paige on health, and one by Mrs. J. T. Manning on family life. Mrs. Paige pointed out the necessity of having regular physical check-ups, while Mrs. Manning stressed the importance of an understanding nature.

Devotional for the afternoon was offered by Mrs. John Crawford. Mrs. Jarvis Tripp Sr. presided at the meeting.

After the business session was adjourned, the club members enjoyed a social hour, with refreshments served by the hostesses, Mrs. John Crawford, Mrs. Lizzie Vandiford and Mrs. Jarvis Allen.

# School Menu

The following menus will be served in the Greenville city schools next week:

Monday: Spaghetti with meat balls, string beans, sliced beets, biscuit, butter, cookie, milk.

Tuesday: Hot dog in roll, slaw, buttered peas, ginger bread with honey and butter icing, milk.

Wednesday: Orange juice, macaroni and cheese, tomato cup, pinto beans, onion rings, home made rolls, butter, peach halves, milk.

Thursday: Vegetable soup, crackers, pimento cheese and jam and butter sandwich, pineapple cake, milk.

Friday: Fish sticks, creamed potatoes, cabbage salad, corn bread, butter, lime Jello, milk.

Mrs. Louise Rush is supervisor of Greenville city school cafeterias.

# Grifton News

Mrs. J. W. Scarborough is spending some time in Stems with her daughter, Mrs. Julian Daniel and Mr. Daniel.

Mrs. Mesdames R. C. Mooney, Claude Hart, George Lehman, W. E. Rasberry and Cecil Cobb were in New Bern on Tuesday to attend an Institute for Vacation Bible School workers which was held at Centenary Methodist Church.

Mrs. Walter Murphy and daughter, Shirley, Mrs. Woodrow Smith and daughter, Brenda, spent Wednesday in Goldsboro.

Little Miss Brenda Mumford is recuperating at her home here after a tonsilectomy at Pitt Memorial Hospital in Greenville on Wednesday.

Mrs. L. C. Patrick is a patient at Memorial Hospital in Chapel Hill, she was admitted on Thursday.

Mrs. Charlie Rasberry has returned to her home in Farmville after a visit here with her son and daughter in law, Dr. and Mrs. W. E. Rasberry.

Mrs. Gladys Harrison of Enfield is a guest in the home of her daughter, Mrs. Bill Rae and Mr. Rae on Patrick Street.

Mr. and Mrs. E. B. Bright and family have moved their residence from Pitt Street to 505 Queen Street.

A project has been set up to make a study of Scandinavian influences in Nebraska.

# THERE OUGHTA BE A LAW By FAGALY and SHORTEN

# GHS Spring Concert To Have Varied Program

A varied program, featuring sacred and secular numbers, folk songs, spirituals and popular selections, will be presented by the Greenville High School Glee Club and other music groups at their annual Spring Concert Tuesday evening at 8 o'clock in the high school auditorium.

Opening the program will be a prelude selection by the mixed chorus and junior music classes, "How Firm a Foundation," arranged by Ringwald.

The first portion of the concert will consist of five sacred selections. The mixed chorus will sing "Two Kings," by Clokey; "Christ, Our Blessed Saviour," by Schutz; and "Early in the Morning," an Easter selection by McCormick. "Adornatus Te," by Peri will be sung by the girls glee club, while the boys group will render "Come, Sweet Death," by Bach.

Secular numbers include "Ho! Ho! Ho!" by Curran; a 3-6 "Happy Wanderer," both sung by the fourth and fifth period girls Tuesday classes; and "Spirit Flower," by Campbell-Tipton.

The mixed chorus will render two folk songs, "He's Gone Away," arranged by Clokey; and "Polly Wolly Doodle," arranged by Ray Charles. Another folk number, "Working on the Railroad," arranged by Childe, will be sung by the boys glee club.

The remainder of the program will feature the mixed chorus in two spirituals, "Deep River," E.T. Burleigh; and "Goin' to Heaven, Anyhow," arranged by Smith; and a popular number, "Italian Street Song," by Victor Herbert.

Postlude selection will be the "Benediction," by Lutkin.

The entire program will be conducted by Miss Ora Shinder, high school music instructor. Piano accompanists will be students Sue Tucker and Nina Overton.

Tickets are now on sale for the concert at 25 cents for children, 50 cents for adults. They may be purchased from any music student at the high school.

All proceeds from this entertainment will be used for the benefit of the high school music department.

# Friday's Cases In Police Court

In Police Court Friday, Judge Charles H. Whedbee disposed of seven cases, four of them involving motor vehicle and traffic law violations.

Cleveland E. Stevenson, Negro, Rt. 2, Greenville, improper muffler, 30 days in jail, suspended on payment of \$5 costs. The court ordered him to "remove that horn from that car by midnight Friday."

Wesley R. Stevenson, Negro, Rt. 2, Greenville, unnecessary horn blowing, 30 days suspended on payment of \$5 court costs and he is to "remove that horn by midnight Friday."

Turner S. Williams, Rt. 1, Greenville, paid \$5 on court costs for having improper equipment.

Kirby McLawhorn, Rt. 2, Greenville, following too closely, was taxed with court costs.

Tom McLawhorn, Negro, Rt. 2, Winterville, drunk, was called and he failed to answer. An instant car was issued for him.

Frank Gray, Negro, 1202-A West Fifth Street, disorderly conduct, prayer for judgment was continued on payment of \$5 on costs. The judgment provides that he is not to visit Romy Theater for 30 days and shall remain of good behavior.

James Washington, Negro, 316 Reads Street, assault, 30 days in jail, suspended on payment of \$25 fine, costs deducted. The judgment also provides that he is to remain of good behavior and not threaten or harm Lillian Washington, Negro.

The Boy Scouts now have a merit badge for railroading, the qualifications including identification of different types of trains and locomotives.

# Trench Silo May Cut Expenses

COLUMBUS — Here's a farmer who admits that he hasn't discovered the cheapest way to feed beef cattle. In fact he says, "I do know that the way I've been feeding mine this year must be the most expensive."

Polk County Assistant Agent Robert D. Flake says that Bob Cooley, an unusually frank person to admit such a thing, has been feeding heavy on grain and hay. But he plans to put in at least one and possibly two large trench silos this spring and hopes that will help the situation.

# District Engineer Would Abandon Constant Attendance At Draw Bridges

The office of the District Engineer U.S. Army at Wilmington has given notice that the North Carolina State Highway and Public Works Commission has requested permission to abandon constant attendance of draw-tenders at the following bridges:

Across Pamlico River at Washington, and

Across Tar River near Grimesland.

The State Highway Commission desires to open the bridges to navigation only upon 24 hours advance notice.

The engineer's office requests that it be advised of any objections to the abandoning of constant attendance at these bridges, or of any person, firm or association which may be opposed to such action.

Objections, if any, will be received at the engineer's office in Wilmington until April 8, District Engineer Col. R.L. Hill stated.

# Robinson Union School Choral Club To Give Concert Sunday Afternoon

WINTERVILLE — Robinson Union School Choral Club will present its annual spring concert at the school Sunday afternoon at 5 o'clock. The public is invited.

The program opens with Music in the Air by the Mixed Chorus.

A group of religious songs including: Beautiful Savior by the Mixed Chorus, Love Ye the Lord, by Iris Patrick, Set Down Servant, Chris Chorus, Nobody Knows by Calvin Henderson, and Joshua Fit De Battle by the Girls Chorus.

Humorous songs: Short'nin' Bread, Will You Marry Me? and Three Blind Mice by the Girls' Chorus. Next will be The Happy Wanderer and Chorus Dance.

During the intermission, Mr. David Henderson, president of the Parent-Teacher Association, will speak briefly.

Next will be Whither Thou Goest by Juanita Evans, Let Me Go, Lover, Smoke Gets In Your Eyes and You'll Never Walk Alone by the Girls' Chorus. Then When It's Springtime in the Rockies by the Mixed Chorus, and May the Good Lord Bless and Keep You, with the audience standing.

Mrs. T. A. Lawrence is director of the spring concert. Miss A. D. Ricks is accompanist. J. W. Mays is principal of Robinson Union School.

# Red Cross Drive Solicitations In Farmville Begun

FARMVILLE — Local volunteers have begun solicitation for the annual Red Cross drive, now being conducted in Pitt County.

Farmville's overall drive is being directed by Ed Davenport. L. B. Johnson Jr. heads the special gifts committee, while J. D. Dixon, Jack Tyson, Joe Joyner and Charlie Rasberry are in charge of canvassing the business district of the town. Residential campaign is headed by Mrs. J. M. Gibbs and Miss Agnes Quinley.

Red Cross workers soliciting in the residential areas include Mrs. Lyman Bass, Mrs. Ed Davenport, Mrs. R. D. Rouse Jr., Mrs. E. B. Humphrey, Mrs. Charlie Rasberry, Mrs. R. E. Pickett.

Mrs. Ted Albritton, Mrs. Robert Pierce, Mrs. Harry Harper, Mrs. Chester Outland, Mrs. Bruce Pope, Mrs. Johnny Williams, Mrs. Hume Cox, Mrs. Irvin Morgan Jr., Mrs. Mark W. Joyner, Mrs. Carroll Ogden, Mrs. Larry James, Mrs. Paul Allen.

Mrs. Allan Drake, Mrs. J. Joe D. Joyner, Mrs. John B. Lewis, Mrs. Ed Nash Warren, Mrs. J. D. Andrews, Mrs. Tammy Tucker, Mrs. L. T. Pierce Jr., Mrs. Carl Beaman, Mrs. W. C. Hathaway, Mrs. J. W. Miller, Mrs. Tommy Lang, Mrs. T. Foye Styers.

Mrs. B. S. Smith Jr., Mrs. L. T. Lucas, Mrs. Leroy Bass, Mrs. Le-laid Flanagan, Mrs. Marvin Speight, Mrs. Harold Ross, Mrs. Herbert Moore, Mrs. Bill Kennedy and Mrs. L. S. Wroughly.

# Court To Involve Two Counties

RALIGH — If a new recorder's court is set up in Grifton, parts of both Pitt and Lenoir counties would be included in its jurisdiction.

Yesterday Rep. Thomas White of Lenoir moved to see that both counties get their fair share of the fines and forfeitures from that court. He offered a bill that would turn the money over to the county in which the case originated.

Legislation to allow a recorder's court to be set up in Grifton had already been introduced. The five-mile jurisdiction of that court would extend into Lenoir.

The White bill was also signed by Rep. Sam Worthington of Pitt.

Another bill was introduced by Rep. Walter Jones of Pitt, redefining the corporate limits of the town of Winterville.

# Probe Cause Of Crashlanding By Plane Thursday

The pilot and passenger in a plane which crash landed in a field near Greenville on Thursday night, are now investigating to determine the cause of the crash landing.

The pilot of the plane was Mitchell Johnston of Greenville. John Messick, 27, who is a nephew of East Carolina President J. D. Messick, was the passenger.

The plane was damaged an estimated \$200. Messick suffered minor lacerations and bruises.

The two men had been working on the motor of the plane in Rocky Mount. It was understood that the plane had been damaged during the recent hurricane winds.

The plane was enroute from Rocky Mount to Greenville when it crashed landed in a plowed field one mile east of Belvoir near the Old River Road.

# Abandoned Farm Planted In Trees

HAYESVILLE — An old worn-out piece of land and some pine trees don't sound like much. But add a few live-wire Boy Scout troops and you've got something else.

Clay County Agent R.G. Vick says that Jimmy Hilton of Murphy bought an abandoned farm not long ago and decided to plant it in pine trees. Hilton made an agreement with county Scout leaders for the boys to set pine each Saturday. This way the land is put into production and the Boy Scouts earn money to buy their camping supplies.

# PARIS-BOUND

LONDON (AP) — Mrs. Eleanor Roosevelt left by plane today for Paris after a four-day visit to Britain.

# Card of Thanks

We wish to thank our many friends, both colored and white, for their kindness during the illness and death of our mother, Mrs. Louise Jones.

The Langley & Jones Families

The Pastor's Aid Club of Sycamore Hill Baptist Church will meet at the home of Mrs. Ocoma Wilson, Falkland Highway, Monday night.

The Ladies Sociable Club will meet at the home of Mrs. Martha Boyd, 217 W. 1st St., Tuesday at 8:30 p.m.

IT WAS INSURED AGAINST FIRE BUT HE HAD NOT INCLUDED IN-INSURED COVERAGE FEATURE, WHICH WOULD HAVE GIVEN HIM PROTECTION AGAINST HAIL, HURSTON, EXPLOSION, SMOKE, NEUTRALITY, AIRCRAFT... LET US CHECK YOUR POLICIES FOR COMPLETE PROTECTION.....

**Moseley Bros., Inc.**  
Dial 3070

# NOTICE!!

The Pitt County Board of Equalization and Review will meet at the Pitt County Court House March 21st, beginning at 10 o'clock, for the purpose of hearing complaints concerning the assessed valuations of property in the following townships:

1. Greenville Township
2. Arthur Township
3. Fountain Township

Pitt County Board of Commissioners

# THE WORLD THIS WEEK

## Reds Not Expected to Back Down on Invasion Promises

### Need for Nuclear Controls Growing

By TOM WHITNEY  
AP Foreign Staff Writer

THE absence of any agreement at all on international control over nuclear weapons becomes more and more glaring as more and more countries enter the atomic field. In 1945 only one country—the United States—had produced an A-bomb.

By 1949 the Soviet Union had increased the number to two.

By 1955 Britain had not only long since become the possessor of A-bombs, but had also launched a program to produce H-bombs similar in destructive power to those already possessed by the Soviet Union and the United States.

Not only was atomic energy no longer a monopoly of one country, it was well on the way to becoming accessible to any power interested in developing it. Atomic materials had turned up nearly everywhere. Atomic techniques had turned out to be not nearly so expensive and complex as they once were pictured.

Last Monday President Marshal Tito said Yugoslav scientists are engaged in atomic research and soon will seek to generate nuclear power for productive purposes.

Whitney

#### Know-How Spreading

On the same day more than two dozen foreign scientists from 19 countries arrived in Washington to get knowledge on the peacetime uses of atomic energy as a first step in President Eisenhower's atom-for-peace plan.

In late February U.S. Secretary of State John Foster Dulles offered nuclear fuel for atom research reactors to SEATO nations.

Practically every country of Europe inside and outside the Iron Curtain was active in atomic research and development in one degree or another and many countries outside Europe were following suit. Most news of atomic development from countries other than the big three—the United States, Britain and the U.S.S.R.—concerns research and development for peaceful uses of atomic energy. But peaceful uses for nuclear power go hand in hand with military uses. It has become abundantly apparent that no great gap exists in terms of technique, skills and equipment between output of atomic electric power and atomic explosives. Plutonium, the explosive for one type of atomic bomb, is under one system a byproduct from atomic electric power production. Plutonium can be used to trigger thermonuclear (hydrogen-bomb) explosion of much greater size than an A-bomb.

#### Unregulated Field

There are no international conventions to prevent, to regulate or control production or use of nuclear weapons by any country able to make them, except the ex-enemy countries, such as West Germany, pledged in agreement not to make them. The only regulatory force of any sort at large in the world is public opinion. It is a formidable thing to be sure, this public opinion, but it has no staff of inspectors, no rules, and it provides no real insurance against insane, irresponsible or suicidal absolute rulers who might in the future come to possess nuclear weapons.

Competent scientists have claimed that there are nuclear weapons within the range of possibility now which could depopulate whole continents.

The question immediately arises as to just what would have happened to the world had Adolf Hitler had at his command such a weapon of annihilation?

Chaos of the Future  
Can the world actually count on the forbearance, say, of the rulers of Communist China when they get atomic weapons too—a matter certainly of not many years?

What about certain smaller power disputes over which great heat is generated? Might not there come a day when some smaller powers be tempted to use such weapons?

The United States and the U.S.S.R. as the two great opponents in the atomic race have all along been assuming the only atomic threat to each came from the other. Will this always be true? Might not both be menaced by a third power equipped with nuclear weapons? All these are relevant ques-

### Dates

Wednesday, March 16  
Opening Elementary School Principals (NEA) convention, Chicago.

Thursday, March 17  
St. Patrick's Day  
Secretary of State Dulles arrives Ottawa.

Friday, March 18  
Meeting of National Council of Presbyterian Men, Chicago.

### Atomic

#### From Border to Border

The biggest blast of the spring series of atomic tests on the Nevada proving grounds was set off this week, and it turned out to be the most spectacular—although not the most powerful—of the 35 atomic devices so far detonated on Yucca Flat.

The brilliant pre-dawn flash was seen in all the 11 Western states, from the Black Hills of South Dakota more than 800 miles northeast to points across the border in Mexico.

Two factors were advanced in explanation of the extreme distances at which the burst was visible: the 500-foot size of the shot tower (the previous high was 300 feet) and the unusually clear weather.

A sudden wind shift forced more than 100 Atomic Energy Commission scientists and 575 Army and Marine personnel to evacuate Yucca Flat 10 minutes after the detonation. However, possibly dangerous radioactive fallout from the lower part of the bomb cloud failed to materialize.

Speculation on the device itself centered on the possibility it was a new atomic trigger for the hydrogen bomb. The AEC would say only it was a major effort for the Livermore, Calif., Laboratory, with an assist from Los Alamos, N. M. Livermore in the past has specialized on H-bomb developments.

The explosion was not of a hydrogen device, since the AEC tests such weapons only outside the United States.

### BUSINESS: Giants Battle

#### Tough Job Ahead

Production records in the auto industry point to a tougher sales job for the nation's new car dealers.

Right now U.S. factories are producing at the rate of more than nine million cars a year. For some weeks now, output of passenger cars has shot past the 170,000 mark. The nearest the auto manufacturers ever came to equalling that weekly record before was back in 1950—the industry's top production year.

Not even the wildest optimists in the industry expect the present sizzling production pace to continue indefinitely. If the usual pattern is followed, the assembly lines will start slowing down around the middle of the year. Labor trouble, of course, could bring on a slowdown even sooner.

In the first two months this year, U.S. auto plants rolled out 1,335,560 cars for the highest January-February production ever accomplished. This month they expect to build 770,000 more. That means the total for the first quarter should hit more than 2,100,000.

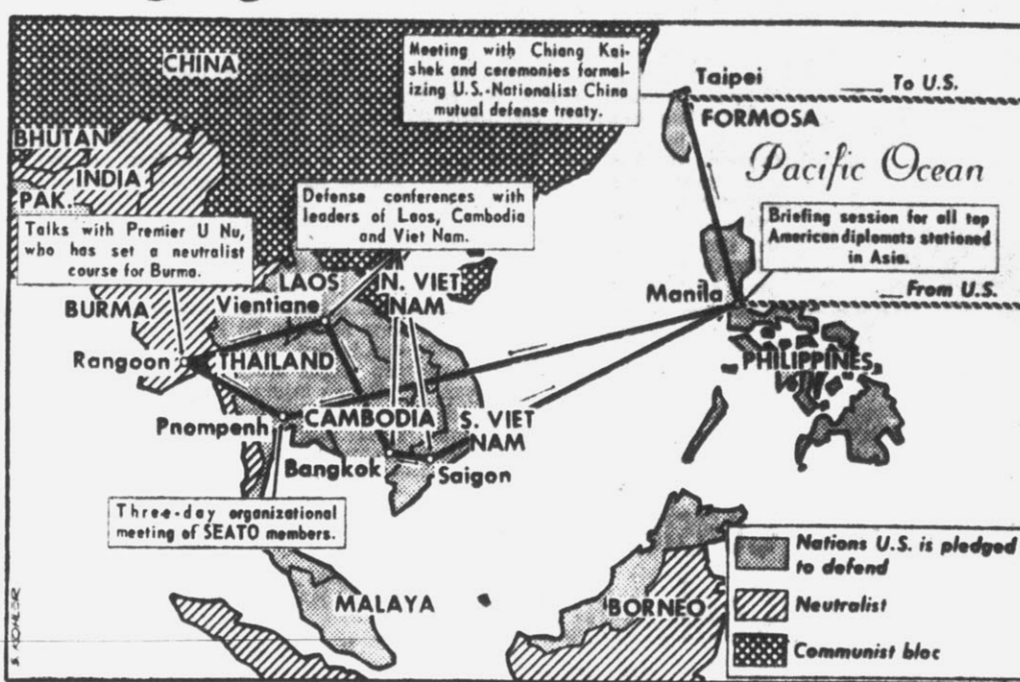

Will sales keep pace? That's what the dealers would like to know. New car inventories in dealers' hands are currently estimated at 600,000. So far, the souped-up 1955 models with the

fancy paint jobs, rich upholstery and rakish lines have been selling like hot cakes. And, say manufacturer spokesmen, the peak spring selling season is yet to come. Dealers admit the cars are selling fast. But, they complain, with high trade-ins and price reductions being offered almost everywhere, it's getting tough to operate at a profit.

Meanwhile the consumer, with bargains all around him, can cheer quietly from the sidelines, and pray that Detroit's production war will continue.

### Highlights of Dulles' Far East Tour

### Economist Warns of Bust

#### The First "Bear"

After several days of testimony from stock exchange officials, the Senate Banking Committee this week heard from the first economist to appear in its study of the current stock market boom.

From exchange officials, senators got generally "bullish" estimates of the future. Both Keith Funston, president of the New York Stock Exchange, and Edward McCormick, American Stock Exchange president, testified the market was basically sound. McCormick's opinion was that stock prices are "definitely not" too high and "have not reached the danger point."

However, a drastically different estimate came from Harvard economist John K. Galbraith. He told the committee the United States may be in the early stages of a boom-and-bust cycle that could end in a 1929-style crash.

Perhaps influenced by Galbraith's testimony, prices on a New York Stock Exchange broke sharply after he appeared before the committee.

Galbraith agreed with previous witnesses who argued that the American economy is far stronger now than it was in 1929. He also agreed there now are safeguards against a new crash, among them curbs on "wholesale market rigging and fervent salesmanship."

But the Harvard economist

listed as danger signs such factors as these: the increase of credit buying, the influx of newcomers into the market, and the growing gap between the sale price and the book value of shares.

Granting the safeguards set up since 1929, Galbraith claimed that "the fundamental problem of containing a speculative orgy, once it is well launched, remains essentially unsolved." He continued: "We had a bad speculative outbreak once before with most disagreeable consequences. Obviously what has happened before—more than once before—can happen again. . . . The prime need is to act early rather than late."

Galbraith offered recommendations about what the government should do if there be a resumption of the fast upward movement of the past year in the weeks or months ahead. They included: temporary abolition of margin trading, "specific and reiterated" warnings by the government of the danger of runaway speculation, and as a last resort "more drastic measures involving the tax power."

Indicted: Mrs. Marie Natvig, who set off a sensation in a Federal Communications Commission hearing by denouncing her own testimony, on nine charges of lying under oath.

Approved: By the Senate Rules Committee, requests for \$1,104,600 to finance investigation, by Senate committees this year.

Suspended: Academy Award nominee Grace Kelly, by MGM for her refusal to make a movie called "Jeremy Rodock."

Married: Mrs. Marie Natvig, who set off a sensation in a Federal Communications Commission hearing by denouncing her own testimony, on nine charges of lying under oath.

### ROYALTY: Plans Reported

#### Does Love Triumph?

An informant in touch with the British royal family said this week that Princess Margaret intends to marry 40-year-old RAF Group Captain Peter Townsend this fall.

It was the first time an air of authenticity was given recurrent speculation in the British press and elsewhere that the gay young princess was serious about her romance with the dashing air officer.

Townsend, who is divorced and the father of two children, would say only "There can be nothing said until the time is ready or somebody else does something."

The 24-year-old Princess is expected to renounce her right of succession to the throne to smooth the way for her mar-

### Dulles Sees Real Threat to Formosa

By SIGRID ARNE  
Associated Press Newsfeatures Writer

SECRETARY of State Dulles made it plain to the American public this week that there is more than mere bluster in Red China's repeated claims it will forcefully expel Chiang Kai-shek's Nationalist government from the island of Formosa.

There have been recent reports of assessments by neutral countries which maintain diplomatic contact with the Chinese on the mainland that Premier Chou En-Lai actually meant what he said in apparently wild propaganda promises to "liberate" Formosa. Despite this there has been a tendency to think of the threat only in terms of Chiang's island outposts on Quemoy and Matsu.

Dulles made clear it is with this type of power the United States expects to disprove the Reds' portrayal of Uncle Sam as a "paper tiger," adding: "We must always remember that the free nations of the Western Pacific and Southeast Asia will quickly lose their freedom if they think that our love of peace means peace at any price. We must, if occasion offers, make it clear that we are prepared to stand firm and, if necessary, meet hostile force with the greater force that we possess."

Dulles put an official stamp on the "accept at face value" evaluation of Chinese intentions by declaring flatly: "The Chinese Communists seem determined to try to conquer Formosa."

All Bombs Aren't Big  
He also reminded the American public, which has been get-

ting a heavy dose of instruction on the facts of life in the atomic age recently, that there is an extreme in atomic warfare opposite thermonuclear weapons capable of devastating entire continents with radioactive fallout. At the other end of the scale from these nightmarish behemoths, there are atomic weapons with power so restricted they can be pinpointed on a military target "without endangering unrelated civilian centers."

Addressing the nation in his radio-television report to the people on results of his tour of the Far East, Dulles put an official stamp on the "accept at face value" evaluation of Chinese intentions by declaring flatly: "The Chinese Communists seem determined to try to conquer Formosa."

### Sidelights

When sudden high winds swept New Orleans' Lake Pontchartrain this week, a Coast Guard crash unit and a police patrol boat sped out to give any needed aid to pleasure craft. A Coast Guard boat wound up high and dry on a jetty; the police boat broke down and had to be towed to a boat yard. These were the only two casualties of the storm.

Policemen in Nashville, Tenn., play no favorites. While lawyer Dave Alexander was arguing for city police who claim they are due about \$300,000 in back pay, one of them put a \$1 parking ticket on his car.

## BASEBALL TEAM IN GREENVILLE NEEDS AID

For slightly over two summers now the fans of Greenville have not had any sort of professional or semi-professional baseball in Greenville. All the thrills of the national pastime have had to come from the Little League and Pony League teams of the city.

Now, for the first time in quite some time, some baseball fans of Greenville are trying to bring the sport back into the city. Floyd Nichols and Pete Carraway started the movement to get a Greenville team into the Bright Belt League, which has a 60 game schedule and is a semi-pro league. These two rounded up other baseball enthusiasts and the future team has gone all in their efforts to give the city a team.

Many problems came up about purchasing uniforms, catching equipment, balls, bats, and getting a good place to play. Guy Smith Stadium had to be improved and the fences straightened out again. The lights had to be adjusted and fixed. Little or no assistance came from the townspeople but the determined organizers followed through. At the present they have purchased 19 uniforms and all the catching equipment needed for the season. They also have some bats and balls but will need more before the season is up.

The team has gained entry into the strong Bright Belt League which fields eight teams and will play every Wednesday, Saturday, and Sunday. The cost of operating the team for the rest of the season will be high. The players can not do it by themselves. Finances must come from outside sources and the people of Greenville should be proud to contribute something in order that some sort of baseball will come into the city.

A drive has been started to help the players get the necessary money. The drive called "Greenbacks for the Greenies" is expected to bring enough money to the Greenies to get the season started. Anyone wishing to contribute to the team should send a contribution to "Greenbacks for the Greenies" in care of Bill Stuckey at television station WNCT.

The Greenies will also start selling season tickets for the games shortly. The prices for the games will be fifty cents and twenty-five cents. There will be thirty home games and the Greenies are selling their season tickets for ten dollars, or one-third off. Tickets may be bought from any member of the baseball team or any official of the team. Anyone wishing to buy a season ticket should contact Floyd Nichols at the Sandwich King Restaurant in Greenville.

If the citizens of Greenville really are interested in having a baseball team they will back this drive and help the players out. The players are not organizing this team for their own personal gain because none of them will be paid for playing. The team is just trying to break even and keep from going into the red. This department of the Daily Reflector urges Greenville to support this team and bring the grand old game of baseball into Greenville again.

## KINSTON IN FINALS OF STATE TOURNEY

Kinston's Red Devils are enjoying themselves up at Sanford now as they have breezed through two straight opponents and are now in the finals against Clinton tonight. The Red Devils are favored to cop the title over the Dark Horses.

Coach Amos Sexton of Kinston pulled a rare statement when he praised the Greenies in today's News and Observer. Sexton said, "Whether we win or lose in this tournament, I still think Greenville is better than any of the clubs that played here yesterday."

We were just wondering if Coach Sexton included Kinston in that statement since the Red Devils played there yesterday. Anyway Coach Sexton did give the Greenies a nice comment, and we hope the Red Devils come home with the state championship.

# Mallory Pretty Certain Of His Buc Baseball Starters

By BRUCE PHILLIPS  
Reflector Sports Editor

Head Coach Jim Mallory said today that he was pretty certain who his starting lineup will be come March 23. The genial East Carolina mentor pointed out that, although several of the positions are still much contested for, one player at each post appears to have the inside.

At third base and rightfield, Mallory is hesitant in singling out a definite firststringer although he will tell you that Charlie Cherry is looking better than ever at the hot corner and Tommy Jenkins is very impressive in right. Cherry's rival, freshman Bucky Reep, has a better throwing arm than Cherry but the

latter is superior at the plate. Both are about even as fielders. Jenkins is getting stiff arguments from letterman Bob Penley and rookie Bill James. "We plan to alternate Penley, who is a capable fielder and pretty consistent hitter at centerfield and right," Mallory said. James, the Tarboro strong-boy, has been shelling pitchers with his booming drives, but is weak on defense.

The new keystone combination of Cecil Heath and Jerry Stewart brings Mallory forth smiling. Here, he has developed what Mallory terms "a great combo." Heath, the veteran second baseman, has been a big asset in East Carolina's baseball fortunes for the past three years and Stewart, an All-State high schooler at Sanford last year, promises to become one of finest fielding shortstops in the conference.

Heath has twice been chosen to the All-North State Conference team and is a veteran of fast Canadian semi-pro ball. Stewart has a beautiful arm and possesses quick hands. He hit clean-up for Sanford's six champions last year.

Mallory has no worries at catcher and leftfield, because Gastonia's Cline boys, Bill and Gaither, have

these positions well-fortified. Gaither, who is the oldest, was hampered by an injured foot last season and never came up to par. This season he is fully recovered and is looking out of school to go into the Army during the fall quarter, is back and his booming bat is making the hurlers run for cover. He starred in Canadian ball last summer. He hit over 300 and pounded out seven home runs even though he played 11, by 100 games.

Nick Smathers, big Campbell transfer, seems to have the upper hand at first base. The towering junior is a long ball hitter and is learning the defensive play well. He is a converted catcher. Gene Turner has the jump on the center fielders. As a matter of fact, he has ousted Penley, the regular there last season. Turner, just a freshman, has been outstanding in practice. He has hit several out of the park already in intrasquad games. Last summer he hit 11 home runs and batted way over 300 in a semi-pro league around Morganton.

Unless injury or bad luck hits the team, East Carolina should have the power and speed to hold their own against North Staters this spring.

## Coastal Baseball Conference Will Play 20 Games

The 1955 Coastal Conference baseball schedule, which includes 20 games, is announced by Sam D. Bundy, president of the conference.

No games are scheduled on Mondays. Afternoon games will start at 3:15 p.m. unless the time is changed by mutual consent of the coaches involved. Night games are at 7:45 p.m. All games at Farmville are night games. Games at Contentnea, Robersonville, Ayden and Vanceboro are afternoon affairs.

At the end of the season the team with the highest percentage is the automatic conference champion.

The complete card:

Thursday, March 24—Robersonville at Contentnea, Vanceboro at Ayden.

Tuesday, March 29—Farmville at Ayden, Robersonville at Vanceboro.

Thursday, March 31—Contentnea at Vanceboro.

Tuesday, April 5—Farmville at Contentnea, Robersonville at Ayden.

Thursday, April 7—Contentnea at Ayden.

Friday, April 8—Farmville at Robersonville.

Tuesday, April 12—Farmville at Vanceboro.

Thursday, April 14—Contentnea at Farmville, Ayden at Vanceboro.

Tuesday, April 19—Vanceboro at Robersonville.

Thursday, April 21—Ayden at Robersonville.

Friday, April 29—Vanceboro at Farmville.

Tuesday, May 3—Ayden at Farmville, Contentnea at Robersonville.

Thursday, May 5—Ayden at Contentnea.

## Kinston, Clinton Play For Crown

SANFORD, N.C. (AP)—Two eastern teams, Kinston and Clinton, will meet tonight to decide the championship of the North Carolina Class AA high school basketball tournament.

They won their way to the finals last night at Kinston, where Kinston, favored to squeak past Clinton, 67-62, and Clinton upset second-seeded North Davidson by a surprising 91-62 margin.

Chapel Hill and Laurinburg will decide the tourney's consolation honors. Laurinburg won an exciting 50-48 exhibition over St. Stephen's Hickory while Chapel Hill easily dispatched Harding High of Charlotte, 61-44, in semifinals yesterday afternoon.

Kinston had to call on all its power to win its 24th game of the season against two losses. Canton held a 29-26 margin at halftime and was ahead 50-48 at the end of the third period. Forward Paul Rochelle poured in 19 points to spearhead the win.

North Davidson's center Carol Youngkin gave the day's sharpest exhibition as his senior fall before Clinton. Youngkin collected 33 points, more than a third of the North Davidson total.

Clinton sealed the North Davidson squad from the basket for the opening five minutes of the game and led 27-14 at the end of the first quarter. They maintained the pace to route the Davidson County team.

The consolation routine provided one of the day's thrillers as the Laurinburg Scots edged St. Stephen's by one point. The Hickory defending champion and first day leader with 17 blew to 40 on the back nine for a 77 and dropped to fifth place with 148. The Georgian went over par on five of the last nine holes.

Rounding out the top 10 in the blue ribbon list of 44 entries were pretty Marlene Bauer of Sarasota, Fla., (78-71-149), low amateur Pat Lester of Settle (75-74-149), Mrs. Zaharias (75-75-150), blonde Marilyn Smith of Wichita, Kan., (74-77-151) and amateur Gloria Armstrong of Oakland, Calif., (79-73-152).

GOOD CONNECTION — East Carolina catcher Bill Cline takes a healthy practice swing in the photo above as the First basemen bear down for their March 23 opener. The man in the mask is Dick Mondis of Dunn. Cline and Mondis are the Nos. 1 and 2 catchers on the squad. (Reflector Sports Photo by Bruce Phillips).

# Greenville Midgets Playing Clinton In Tourney Finale

## GHS Track Meet Date Is Postponed

Greenville High School's first track meet of the 1955 season has been postponed until later in the month announced Coach Bill Kittrell who said that "neither us nor Henderson is in top shape for a track meet."

The Greenville cinder coach has been working his squad at the Guy Smith Stadium track all week and should have them in top condition for the first meet. Coach Kittrell said the first meet probably would be with Raleigh and Henderson in Greenville about March 31. That would give the Greenies more than two weeks to get in top form.

"This year's team is the largest we've ever had at Greenville High School," commented the Greenville coach. "We are highly optimistic of this team and hope it goes a long way."

The team has many veterans from last year returning and a huge crop of freshman runners. The Greenies have three players who are potential state champs for this year according to their past performances. Harold Edwards won the state high jump title last year. James Speight finished fourth in the broad jump last year and is one of the top favorites to win it this year in the state meet. Wayne Bishop finished fourth in the mile two years ago and, after laying off a year due to a knee injury, is the favorite to win it this time around in the state meet.

Other Phantom letterman hopefuls are Edwin Wilkerson, one of Greenville's finest half-mile prospects ever; Larry Powell, shot-putter; Mitchell Johnson, Joe Taft, Tommy Smith, Pete West, and Bob Shackelford.

Freshmen Robert Howell and Bobby Edwards are expected to bolster the sprint events. The large crew of freshmen are untied but are expected to help in future years.

Miss Berg, seeking her sixth titleholders victory, needed the brilliant route to climb ahead of long-striding Mary Lena Faulk of Thomasville, Ga., who added a 73 to her first round 72 for 145 and retained the runner-up spot.

In third place after a torrid 69 was Betsy Rawls of Spartanburg, S.C. with a total of 146. Her three titleholders record, set last year in the second round by Babe Zaharias, old record. Steady Jackie Pung of Honolulu, who leads the money winners on the current winter tour, was fourth after hanging a 74 on her first day's 73 for 147.

Louise Suggs of Sea Island, Ga., defending champion and first day leader with 117 blew to 40 on the back nine for a 77 and dropped to fifth place with 148. The Georgian went over par on five of the last nine holes.

Rounding out the top 10 in the blue ribbon list of 44 entries were pretty Marlene Bauer of Sarasota, Fla., (78-71-149), low amateur Pat Lester of Settle (75-74-149), Mrs. Zaharias (75-75-150), blonde Marilyn Smith of Wichita, Kan., (74-77-151) and amateur Gloria Armstrong of Oakland, Calif., (79-73-152).

## Bobo Rated 10-1 Favorite Tonight

HOLLYWOOD (AP)—Although his opponent doesn't figure to be around at the finish, middleweight champion Carl Bobo Olson probably will attract a \$30,000 gate at Hollywood Legion Stadium tonight for his scheduled 10-round non-title fight against Willie Vaughn of Los Angeles.

The odds-makers say Olson should be 10-1 to win and 3-1 to win the second round by Babe Zaharias, old record. Steady Jackie Pung of Honolulu, who leads the money winners on the current winter tour, was fourth after hanging a 74 on her first day's 73 for 147.

Louise Suggs of Sea Island, Ga., defending champion and first day leader with 117 blew to 40 on the back nine for a 77 and dropped to fifth place with 148. The Georgian went over par on five of the last nine holes.

Rounding out the top 10 in the blue ribbon list of 44 entries were pretty Marlene Bauer of Sarasota, Fla., (78-71-149), low amateur Pat Lester of Settle (75-74-149), Mrs. Zaharias (75-75-150), blonde Marilyn Smith of Wichita, Kan., (74-77-151) and amateur Gloria Armstrong of Oakland, Calif., (79-73-152).

Vaughn, at 22, is four years younger than Olson. He has plenty of courage and he has been known to rally from a knockdown and punch his way to victory. He usually makes his best fight against what is regarded as superior opposition, and against Olson he may make things interesting as far as the fight goes.

Quick Hat Trick Is Seldom Seen  
BOSTON (AP)—Hockey's "hat trick"—scoring three goals in one game—has been done many times but probably never as quickly in a college game by Jim Pope of Rensselaer Polytechnic Institute.

The RPI defenseman in a game with Northeastern University scored three goals in a minute and 40 seconds.

His rapid fire goals gave RPI a 5-2 win.

Warden Caught Attracting Deer  
BRATTLEBORO, Vt. (AP)—Jacking deer proved costly for a part-time deputy game warden.

William Townsend, 26, was fined \$300, plus court costs of \$8.05, and was given a suspended sentence of 60 days in jail.

Jacking is the illegal practice of attracting deer by spotlight for the kill.

# Two West Coast Giants Matched

By ED WILKS  
The Associated Press

San Francisco and Oregon State, two Pacific Coast giants who have fought where they are by contrasting routes, put their big men against each other tonight in the top game of the National Collegiate Basketball Tournament quarterfinals.

San Francisco, the No. 1 team in the Associated Press poll, has been in the limelight most of the season. The Dons have rolled to the nation's longest winning streak (23 games) on defensive excellence and the peculiar perfection of All-America Bill Russell, the 6-10 guy who slams in field goals "like he's stuffing clothes in a suitcase."

But while the Dons received a gill-edge invitation as an NCAA all-star pick, Oregon State had to struggle all the way to gain attention. The Staters, with 7-3 Swede Halbrook and 6-7 Tony Vlastelica, were snubbed by the experts, and only gained the No. 10 spot in the poll this week after disposing of

UCLA, ranked No. 8 previously, with ease in the Pacific Coast Conference title playoff.

San Francisco, which gave up its lone defeat to UCLA then avenged it and dumped Oregon State 60-34 for good measure all in a week's time at season's start, kept moving right along by bouncing Utah 78-59 last night. Russell, bothered with a cold, got 13 points and sat out most of the second half after the Dons had piled up a 41-20 halftime lead.

Halbrook, who scored 21, and Vlastelica, who totaled 14, were on the bench much of the second half in the Corvallis doubleheader as Oregon State defeated Seattle 83-71. The Staters were hot, getting 51 per cent of their shots.

The other second round competition went like this:

At Philadelphia — Defending champ La Salle smothered Princeton 73-46 and Canisius held out to defeat Villanova 73-71.

At Evanston, Ill. — Marquette disposed of Kentucky 79-71, snapping the Wildcats' NCAA winning string at 12 games, and Iowa out-gunned Penn State 82-53.

At Manhattan, Kan. — Bradley jumped Southern Methodist 81-79 and Colorado beat Tulsa 69-59.

The winners play tonight with the survivors meeting in the semifinals next Friday at Kansas City for the East and West titles. The Friday winners then play Saturday for the national title.

All-America Tom Goia was the guy who pulled La Salle along. He had 24 points.

A Canisius freeze left Villanova out in the cold. John McCarthy dribbled the final 2 minutes drew a foul on a last ditch shot and sank his two free throws for the triumph. McCarthy was the scoring leader with 28, one more than Villanova Capt. Jack Devine.

Marquette's victory was only a minor surprise. Coach Adolph Rupp has been sobbing all week over injuries and ineptibility losses suffered by his Kentuckians. It was touch-and-go, though, until Marquette broke it open with 7 minutes left to topple the No. 2 team in the Associated Press poll.

CECIL HEATH

GAITHER CLINE

## S.C. Cage Squad Given Drubbing

CHARLOTTE (AP)—The second annual Kiwanis Carolinas Basketball Classic was history today but the 114-81 drubbing the North Carolina team handed the South Carolina squad may be a mark to stand a long time.

Taking advantage of sharp shooting ability, the Tar Heels broke the charity game wide open in the second half here last night to win going away.

The game pits picked squads of high school seniors with all proceeds going to the Charlotte Spastics Hospital.

At the end of the first half, which was fairly close, the North Carolinians led, 43-35. In the second half the Tar Heels unleashed a 71-point scoring barrage.

Eight North Carolina players hit in the double figures with Greensboro forward Larry McCranie high for the night with 18 points. Bob Jenkins, 6-7 center from Blue Ridge, and Donnie Arant of Columbia Olympia paced the Sandlappers with 16 points each.

McCranie was voted the sportsmanship award for the game and guard Semi Mintz of Raleigh was named the game's best defensive player. Center Joe Ladd of Lowell named as a replacement on the South Carolina team earlier in the week, was voted the Charlotte News' outstanding player award.

The game was played in the North Central YMCA before 800 fans.

## Perez Bows To Ryff In Fancy Ring Exhibition

NEW YORK (AP)—Youthful Frankie Ryff showed his class last night in easily outpointing Danny Joe Perez, his New York rival, in a bloody 10 rounder at Madison Square Garden.

Winner in 60 of 63 amateur bouts and maten now in 17 pro starts, the 22-year-old Bronx lad demonstrated to a national television audience and an in-person turnout of 4,597 why he is regarded as the best lightweight prospect in years.

Turning what had been heralded as a neighborhood feud into what amounted to a good workout, Frankie opened a cut over Perez's left eye in the first round and proceeded to virtually toy with Danny Joe the rest of the way. Referee Ruby Goldstein, Judge Harold Barnes and the AP each gave Perez nine of the 10 rounds.

Judge Artie Alda called it 8-1-1. Perez' handlers were unable to stop the flow of blood. Stung time and again by Frankie's lefts, Danny Joe's face became a scarlet smear. Frankie himself suffered two small cuts in the first and last rounds.

# This Year, Yankee Joe Collins Won't Make First Base Post

By ED CORRIGAN  
The Associated Press

Every year the past five years, Joe Collins has had to fight for the first base job on the New York Yankees. Each year he's come out on top of the heap, though.

It's going to be the same old story in '55, except that there probably will be one little variation—he won't make it.

Right now, you could ask Manager Casey Stengel:

"Who's on first?" and you'd get a straight answer—Bill Skowron. The job belongs to Skowron so long as he proves he's a big leaguer.

Skowron's a bulk of a youngster, who used to play football for Purdue. He hit .340 for the Yanks last year, playing only off and on. Stengel was impressed with his work with the bat, but the professor was concerned over Bill's main fault—the same one which has kept many other guys out of the majors—poor fielding.

The St. Louis Cardinals polished off the Yanks for the second time in a row yesterday, 3-1, but Skowron looked as though he had been studying George Sizer movies. He fielded flawlessly, looked sharp handling bunts and smashed down the line and, to top it all, made seven assists.

Otherwise, Stengel had little to cheer about. His men outhit the Cards, 9 to 3. Wally Burnette, a rookie pitcher, lost the game for the bombers in the seventh when he yielded two runs on two hits and walk.

The Cincinnati Redlegs, out to show the National League they can come through with a lineup of sluggers, polished off the Baltimore Orioles, 7-5. Bob Borkowski and Ted Kluszewski accounted for three of the Redlegs' runs with homers.

Hank Aaron, who is making a determined effort to nudge Andy Pafko out of his outfield post with the Milwaukee Braves, hit a two-run homer to provide a 4-2 triumph over the Brooklyn Dodgers.

Lew Burdette and Humberd Robinson each tossed three scoreless innings for the Braves.

The world champion New York Giants continued their hex over the Cleveland Indians with an 8-3 massacre. That makes it five in a row for the Giants, including the four straight in the World Series last fall. Willie Mays and Eric Rodin hit home runs for the Giants while Al Dark went three-for-three before retiring in the fifth.

Already consigned to the National League basement, the Pittsburgh won its second one-run decision in a row by turning back the Washington Senators, 8-7.

The Detroit Tigers defeated the Boston Red Sox, 4-1, behind some nice pitching by Bob Miller. Frank Lary and Billy Hoelt, each of whom gave up only one hit. The Sox only run was unearned.

Bobby Morgan knocked in the winning run to give the Philadelphia Phillies a 4-3 triumph over the Chicago White Sox.

THE UMP IS STEPPING OUT: — Umpire Ed Hurley steps from behind the plate to catch a ball during instructions in St. Petersburg, Fla., for the New York Yankees' squad on new baseball rules. He is showing how a catcher should call for a pitchout or an intentional walk, may step from his 43-inch wide catcher's box to receive the ball after it has been released by the pitcher. Yogi Berra, Yankee catcher, steps intently at left. (AP Wirephoto).

COURT CAPERS — Columbia's Ed Dwyer (5) and Pennsylvania's Joe Sturgis appear to be wrestling a split second before they spilled while chasing a loose basketball in New York. Pennsylvania won the Ivy League game, 62 to 54.

# Tomorrow's Gardens

By The GREENVILLE GARDEN CLUB

Several years ago the Greenville Garden Club used as a slogan "Greenville, City of Sunshine." In keeping with the idea planting of forsythia and jonquils was given special emphasis. Many of the large bushes now blooming were planted at that time and many more might well be planted now.

Coming into bloom with the early daffodils there is nothing lovelier or more heart warming than a full graceful bush of forsythia. True neither its blooms nor the daffodils last very long but coming at the very beginning of spring they bring more joy than almost any flowering shrub. They will bloom in sun or shade and are not particular about the soil but never put them where they will require drastic pruning.

There are other deciduous shrubs, some less well known, which bring singular beauty to our gardens. One of the best of these is *Exochorda* or Pearl Bush. The buds look like large pearls hence its name. The flowers when fully open are equally lovely and the whole bush when in bloom looks as if covered with snow.

All of the sprays are nice and one of the best is *Reeves Spirea* (double). When planted with *Van-houttea* it extends the blooming season by two weeks or more. These sprays and old fashioned Philadelphia, syringa, mock orange, rock rose (all various names for the same bush) bloom with the dogwoods.

Picture for yourself a garden with dogwood in full bloom, white flowering shrubs at another level and azaleas to accent and complete the pattern.

So much can be gained by careful grouping that it seems too bad to spot things here and there without some attempt to achieve a good over all effect.

Many combinations are beautiful. Try red bud forsythia with yellow and white jonquils. See how lovely a flowering crab apple tree can be with tulips of almost all colors. Silhouette a flowering shrub against a dark evergreen. None of these combinations is expensive. It's just a matter of bringing together the right garden companions in the right place and at the right time.

Some beautiful shrubs are native to our section. Huckleberry is beautiful when in bloom and has the added advantage of brilliant fall foliage. Aronia or chokeberry is plentiful and easy to transplant. The spring flowers are delicate pink and white, very fragrant, and are followed in the fall by red berries in large clusters.

Not found in the woods but plentiful and easily divided is old fashioned First Breath of Spring. It takes up quite a bit of room and is not for the small or formal garden.

All shrubs mentioned previously are deciduous but one of the very best for early spring bloom is *Viburnum Tinus* or Laurustinus. It is an evergreen with very dark shiny foliage and may be pruned freely. Often it blooms in January but this year is just now coming into full bloom. Flower buds are deep pink and open into delicate flowers of pink and white with a delightful fragrance. The individual flowers are tiny but are formed into clusters about three inches across. The effect of the delicate color against the dark foliage is quite wonderful.

If a garden is very small perhaps there is room for only one flowering shrub but even one well chosen and well grown will give a great deal of satisfaction and pleasure.

## Ayden News

Melvin Lang of the U. S. Army spent the week end with his parents Mr. and Mrs. Jessie Lang.

Jamie Lang was shut in at home last week due to illness.

Riley Tripp a student at State College spent the week end home.

Miss Barbara Bradshaw enrolled as a student at East Carolina College last week and is staying in the dormitory.

Mr. and Mrs. Cornelius Woolard of Norfolk, Va., spent Sunday with Mrs. Charlie Tripp, Sr.

Mr. and Mrs. Stuart Tripp and Mr. and Mrs. Nobles Craft attended the basketball game on Friday night in Raleigh.

Little Miss Beth Woolard of Norfolk, Va., is visiting her grandmother, Mrs. Charlie Tripp, Sr.

Troy Jackson of the U. S. Coast Guard, stationed in Jacksonville, Fla., is home visiting his parents, Mr. and Mrs. C. L. Jackson of Grifton.

Mrs. Shade Hardee of Rt. 2, Ayden had the misfortune of falling and breaking her arm Tuesday.

Mrs. Fred Stauffer and daughter Ruth, were guests of Mr. and Mrs. E. G. Hardee Saturday. Mr. Stauffer has served with the navy department in Washington, D. C. until his retirement on Feb. 28 and has come to N. C. to reside near Swansboro.

On Friday night at her home near Ayden Mrs. Clarence Hart entertained for her bridge club members. At the end of play a pocket kit was given Mrs. Leslie Stocks high, while costume jewelry was given Mrs. Marvin McCormick runner-up. Low, costume jewelry, was won by Mrs. Wilbur Dunn. Hand cream was given Mrs. R. H. Worthington, guest high.

The hostess served strawberry shortcake with coffee to the following: Mesdames Stocks, McCormick, Dunn, Worthington, Dixie Harris, Chester Hart, Joe Tripp, and Tucker Tripp.

Next meeting of the Association will be held April 14 at Respass-James.

Moore stressed the importance of furniture merchants obtaining adequate information when making a sale, in order to prevent, for example, forged checks. Pertinent information on a customer should include, he said, age, address and occupation.

Next meeting of the Association will be held April 14 at Respass-James.

## Magistrate and Attorney Speak At Dealers Meet

Milton Williamson, local attorney, and Luther Moore, justice of the peace, were guest speakers at a meeting of the Greenville Furniture Dealers Association Thursday night at the Bilo Restaurant.

The two men were introduced by chairman Robert E. Tunnell as authorities on claim and delivery papers and judgments.

Williamson outlined for the group the various types of credit, setting forth the statute of limitation on open accounts, contracts and sealed notes.

Moore stressed the importance of furniture merchants obtaining adequate information when making a sale, in order to prevent, for example, forged checks. Pertinent information on a customer should include, he said, age, address and occupation.

Next meeting of the Association will be held April 14 at Respass-James.

## Dog Turned Up At His Old Home

DECATUR, Ill. (AP) — Skippy, a little mongrel dog who came north from Billie Mae, with his master, Bill Sewell, for a visit with relatives disappeared and was missing for 18 days.

Then one evening he was whining at the front door of the James Welppmann, where he had lived for only one day.

'SNOW' FROM THE OCEAN — George Strobeck and Ty Gregory enjoy three-and-a-half feet of seafoam whipped up from Atlantic Ocean by a storm at Jacksonville Beach, Fla.

## West Indies Strive For Attempted Federation

By SAM SUMMERLIN  
PORT OF SPAIN, Trinidad (AP)—Leaders of Britain's Caribbean possessions gather in Trinidad Monday for talks which may weld their islands into a federation. The islands see federation as a step toward a Caribbean dominion with self-governing status within the British Commonwealth.

The British West Indies are blessed with rare beauty but plagued by poverty. They sprawl over 2,500 miles of blue-green waters. The three million inhabitants are largely descendants of west African slaves, but also include East Indians, Chinese, Latins and Europeans.

Despite their melting-pot populations, these islands all hail one queen, Elizabeth II. All have expressed belief in federation, but each has its peculiar problems. A delicate task of finding some formula to satisfy everyone lies ahead.

The island leaders are meeting Monday to seek a solution to the toughest problem—movement of persons within the projected union. The islands now are strict about letting settlers move about.

Lord Lloyd, parliamentary undersecretary of state for the colonies, will be chairman of the Trinidad conference. Norman Washington Manley looms as a leader in the negotiations. Manley, Oxford-educated, vaulted to power as chief minister of Jamaica a month ago. He has pledged to "throw the full weight of the Jamaican government" behind proposals for federation, with the goal of status within five years.

## First Cowboys Were In The East

CHICAGO (AP)—The cowboy is thought of as a symbol of the West, but the American Meat Institute says that the first cattle drive was in the East.

It took place along the Old Bay Path between Springfield and Boston Mass., in 1655 under the direction of John Pynchon, son of William Pynchon, the first American meat packer.

## Oil Featured In Endowment Fund Stock Dealings

By SAM DAWSON  
NEW YORK —What stocks do the big brains at the colleges buy for their ivy-covered strong boxes?

The Senate Banking Committee is asking both college professors and practicing stock brokers to appraise the value of stocks in the bull market that started 18 months ago.

A look at the common stock holdings in the endowment funds of colleges might give a clue as to their assessment of various stocks.

The New York Stock Exchange analyzes the holdings of four Ivy League colleges in the March issue of its magazine *The Exchange*, out today. It finds that 11 utilities and eight oils win the popularity contest. Harvard, Princeton, Yale and Columbia.

There have been shifts in the portfolios in the last two years. But in the main the colleges have proved the dictum of a leading New York broker this week in telling the senators that few institutions sell stocks once they buy them.

Twenty-seven different issues are found among the 10 largest blocks of stock held by each of the four college endowment funds. And you won't find a "penny stock" speculation in the lot.

Among them the four schools hold 148,760 shares of Jersey Standard Oil with market value of around 17 million dollars. Total holdings of General Electric come to 238,088 shares (largest of any stock) with market value around 12 1/2 million dollars. Six of the GE holdings is probably influenced by the 3 for 1 stock split last June.

Other large blocks held among the four are: Texas Co., nearly nine million dollars; California Standard Oil, 6 1/2 million; Socony-Vacuum, six million; Middle South Utilities, five million; Gulf Oil, four million; Westinghouse Electric, three million.

Utilities held in addition to those named above include: North American, New England Electric, Niagara Mohawk Power, Columbia Gas, Carolina Power & Light, Ohio Edison, Southern Co., El Paso Natural Gas, Southern Natural Gas and Northern States Power.

Additional oils in the four schools' big 10 in stock holdings are: Continental, Tide Water and Atlantic Refining.

## 'Guff' Found Not Doing His Stuff

NEW YORK (AP)—"Stuff" and "Guff," bronze figures which appear to strike the hours on a Herald Square clock tower, will be inactive for a couple of weeks because "Guff" is not doing his stuff.

The figures each weighing half a ton, swing hammers every hour on the hour from 8 a.m. to 10 p.m. The actual ringing is done by twin hammers within the bell.

Recently passers-by noticed that, although the clock sounded the hour, Guff was not doing any work. Guff's ailment was diagnosed as "cable-titis."

About 30 miles above the earth, the air is hot — about 170 degrees Fahrenheit.

## Had 154 Arrests During February

A total of 154 arrests were made during the month of February by the Greenville Police Department, the largest number of which involved larceny (60), violation of driving and motor vehicles laws (28), and drunkenness (24).

According to the Police Department monthly report, there were 7 arrests for aggravated assault, 4 for burglary and breaking and entering, 1 for auto theft, 9 other assaults, 5 forgery and counterfeiting, 5 offenses against the family and children, 3 disorderly conduct, and 2 driving while intoxicated.

Of 166 cases known to the police, 154 resulted in arrests, and 92 percent of the cases were cleared by arrest.

The police department recorded 35 cases for other authority; and 41 arrests were recorded for other authority.

A total of 102 Negro males were arrested, 44 white males, 4 Negro females, and 4 white females.

Traffic cases involved: speeding, 3; careless and reckless driving, 2; improper or defective lights or sign, 5; improper registration or license, 4; all other violations, 10.

1. MR. MILES SEEMED LIKE A REAL NICE MAN, BUT HE'S CALLING THE POLICE! WELL, THEY WON'T CATCH ME!

2. THAT'S RIGHT, OFFICER...THE LITTLE BOY SAYS HIS NAME IS BUBBO B. BUBBO...I NEVER HEARD OF ANY BUBBO FAMILY AROUND HERE!

3. BUBBO? HOW DO YOU SPELL IT? UH-HUH... WELL, I NEVER HEARD OF THAT FAMILY, EITHER... WHERE'D THE BOY COME FROM? WELL, HE JUST SORT OF LANDED HERE... OUT OF THIN AIR!

4. WHAT DID YOU SAY? SORRY, OFFICER, THERE'S A LOT OF NOISE ON THIS LINE... GUESS I'LL HAVE TO YELL...I SAID HE JUST LANDED HERE...SAYS HE'S A MAN FROM MARS!

5. IT'S A PARTY LINE...SOME FOLKS LISTEN IN... YES, OFFICER, THAT'S WHAT I SAID, 'A MAN FROM MARS.'

6. ON A PARTY LINE, NOTHING IS SACRED... HOW'D HE GET TO YOUR FARM, MR. MILES? I DON'T KNOW... HE SAID HE CAME IN A FLYING SAUCER!

7. AFTER MILES COMPLETES HIS REPORT TO THE POLICE THE GOSSIP STARTS BUZZING ALONG THE WIRES... CAME ON A FLYING SAUCER! LANDED AT MILESTONE! HE'S ONLY THREE FEET TALL! WEARS A PLASTIC SPACE HELMET!

8. WELL, RUSTY, THE POLICE ARE CHECKING...I EXPECT THEY'LL SOON FIND OUT WHERE BUBBO CAME FROM AND RESTORE HIM TO HIS PARENTS...SAY! WHERE IS HE? JEEPERS, HE CAME IN WITH ME...MUST'VE SLIPPED OUT AGAIN!

9. A LITTLE LATER, IN A RADIO STATION... LOOK AT THIS... HALF A DOZEN PEOPLE CALLED UP TO REPORT IT! MAN FROM MARS, EH? MUST BE ANOTHER PHONY. NO TIME TO CHECK WITH MILESTONE... WELL, I DON'T BELIEVE IT, BUT I'LL MENTION IT FOR WHAT IT'S WORTH!

10. HELLO THERE, MR. AND MRS. WORLD... HERE'S THE LATEST FLYING-SAUCE REPORT! A MAN FROM MARS IS SUPPOSE TO HAVE TURNED UP AT MILESTONE FARM...THIS IS VERY LIKELY A HOAX, FOLKS!

# DICK TRACY

**CRIMSTOPPERS** TEXTBOOK

WHEN IT IS SUSPECTED A VICTIM MAY HAVE BEEN MOVED, THE SHOES SHOULD ALWAYS BE DUSTED FOR FINGERPRINTS. MOST SMOOTH LEATHERS HOLD FINE PRINTS.

THE WIG WITH ITS STRANGE NOTATION

TRACY AND SAM FIGURE IT SAYS "SEVENTEEN RIVETS DOWN FROM JOINT - SECOND WIRE UNDER THE WATER."

THE "RIVETS" WOULD REFER TO IMPRESSIONS OF RIVETS IN THE CEMENT MADE BY THE STEEL FORMS. "JOINTS" WOULD BE THE EXPANSION JOINT IN THE TOP.

YEAH—HERE WE ARE.

WHAT? THERE'S SOMETHING DOWN THERE, ALL RIGHT.

WHAT DOES IT FEEL LIKE, SAM? RUBBER! IT'S THE REST OF THAT INNER TUBE WE FOUND LYING ON THE GRATING.

LIKE A SAUSAGE.

SHOE LACES! TIED WITH SHOE LACES! THAT'S WHY RUGHEAD'S SHOES DIDN'T HAVE ANY.

LET'S GET IT OUT IN THE DAY-LIGHT, SAM, AND TAKE A LOOK.

APPARENTLY, HE FOUND THIS OLD INNER TUBE IN THE WATER AND CUT IT IN TWO WITH HIS POCKET KNIFE.

HE FELT HE WAS SAFE BEHIND THAT BEND IN THE CULVERT.

SEALING UP THE MONEY BY TYING THE ENDS WITH HIS SHOE LACES WOULD KEEP IT DRY, HE FIGURED, TILL HE COULD RETURN FOR IT.

HIS ASSAILANT'S AMMUNITION WAS ALMOST SPENT. RUGHEAD SAW VICTORY AHEAD—THEN ONE RICOCHET BULLET.

YES, TRACY, THEY CAN'T WIN!
