

## Restless Congress Goes Into Overtime Sessions

### McGovern Hits Effort

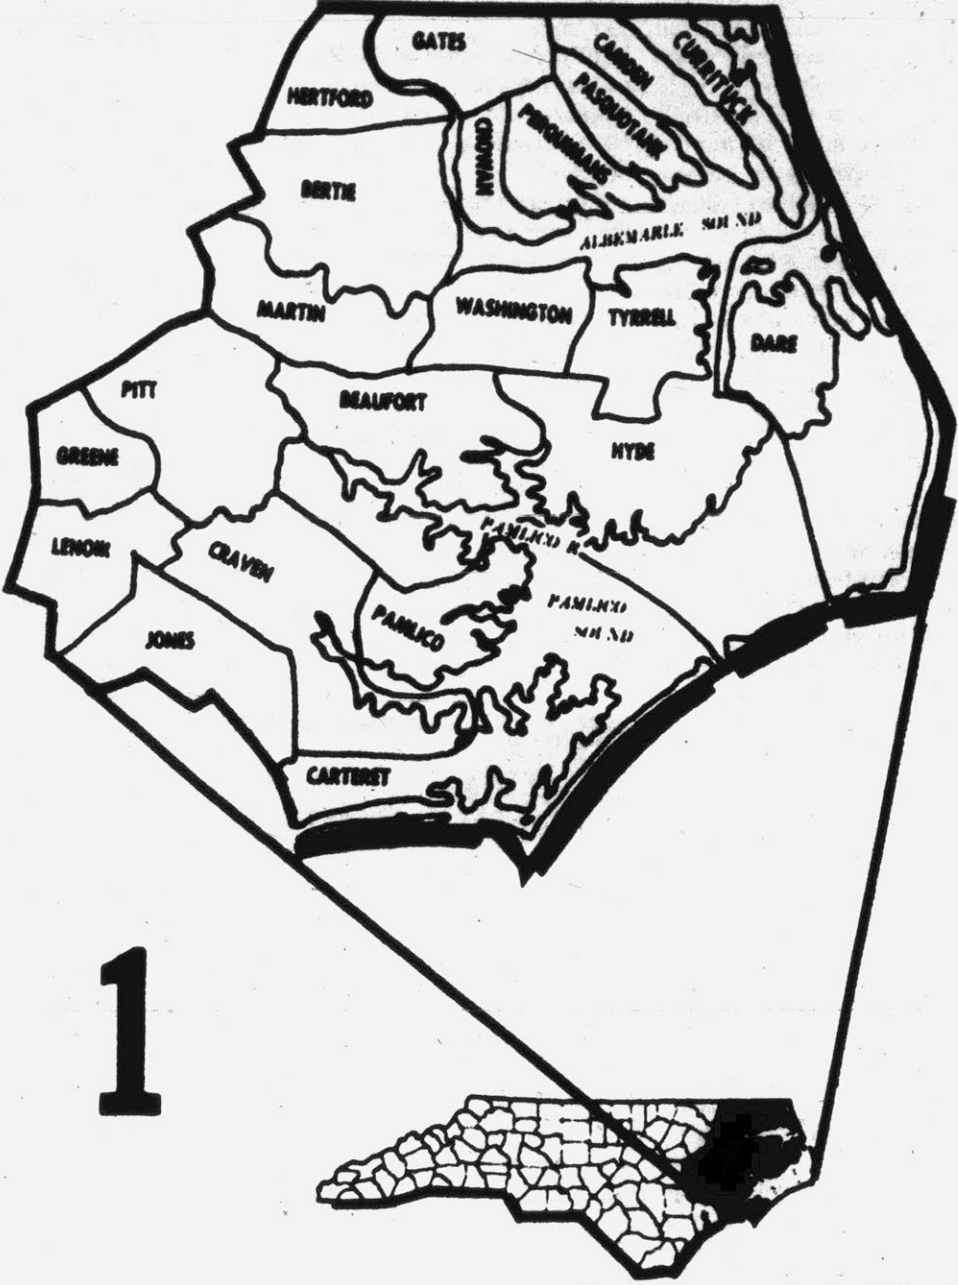

By CARL P. LEUBSDORF  
Associated Press Writer  
LOS ANGELES (AP) — Sen. George McGovern charged today that the Nixon administration has hired 50 people "to sabotage and corrupt our political process" but only 13 to develop peacetime jobs.

cerns." And he charged that "Republican scaremongers" are contending that his economic proposals will cost jobs when his conversion plan is designed to insure a job for every defense and aerospace worker laid off because of military cut-backs.

By MARGARET SCHERF  
WASHINGTON (AP) — Congress went into overtime today with members, itching to hit the hustings, facing the possibility of long debates over two of the biggest bills of the dying session. Senate Democratic Whip Robert Byrd of West Virginia predicted lengthy debate on the compromise versions of the Social Security bill and one giving President Nixon extraordinary powers to cut spending. Both houses had set their sights on adjourning last Saturday. But the Senate had to carry over business to today and the House is to

return Tuesday after frantic but futile efforts to finish their business in sessions that lasted until early Sunday. Conferees sent to the two chambers for action a compromise version of the Social Security bill, stripped of all welfare reform but expanding some benefits and increasing payroll taxes to pay for them. The payroll-tax boost provided by the bill would mean that a person earning \$10,800 in 1973 would have to pay \$631.80 instead of the \$468 maximum withheld this year. The bill also would: —Raise from \$1,680 to \$2,100 the amount a retired

person could earn without reducing Social Security benefits. —Set a new \$170-a-month minimum for persons who worked as long as 30 years in covered employment. —Slightly increase benefits for men by extending to them an unintended advantage women enjoy under present law in calculating their old-age insurance payments. —Raise widows' payments to 100 per cent of their husbands' basic entitlement. —Extend Medicare to persons retired for disability as well as for age, and federalize programs for about 3 million aged, blind and disabled persons. Conferees also agreed to put substantial limitations on sweeping powers which the House voted to give Nixon to enforce a \$250-billion ceiling on government spending for the fiscal year ending next June 30. Under the compromise, Social Security and other retirement payments, veterans' benefits, judges' salaries and several other items would be exempt from cuts. The bill would permit reductions up to 20 per cent in 50 categories of programs. It would allow funds for specific programs within a category to be deleted entirely. Although administration spokesmen indicated dissatisfaction with the compromise, a presidential veto was seen as unlikely since the bill also contains a \$15-billion increase in Treasury borrowing authority that is deemed essential.

FIRST CONGRESSIONAL DISTRICT of North Carolina involves a lot of counties and a wide area for campaigners to cover. (AP Wirephoto Map)

## A Traditionally Uphill Struggle Faces Young 1st District Challenger

By TOM BAINES  
Greenville Reflector Writer  
A young politician faces the traditionally difficult task of unseating a veteran incumbent in this fall's campaign for the North Carolina 1st District seat in Congress. Democrat Walter B. Jones of Farmville, 58, has served three terms. His challenger is J. Jordan Bonner, a 26-year-old Republican from Hertford.

foreign affairs and providing a more powerful defense force. The Hertford resident, who has a bachelor's degree in sociology, said in the primary campaign that one of his qualifications was the "ability to establish an individual rapport with the people, gain an understanding of their needs and find quick and effective resources for solutions." On the specific subject of helping industry cope with rising standards of air quality, Bonner said, "Because of my belief in limited government intervention in private and individual matters, I feel that the only true incentive the government should put forth would be in terms of penalties. A positive incentive from the federal government... would curb growth of smaller companies which are under antipollution restrictions, and if larger companies are subsidized by the government, this would deter growth in smaller com-

panies already forced to comply with government regulations..." Bonner discussed the Vietnam war in his campaign, saying he does not believe in setting a date to end the war "as long as we have prisoners and as long as men are dying over there." He said President Nixon is doing "an excellent job of bringing the boys home now." Jones is running on his experience with the district and is not making many position statements. Neither has campaigned extensively. The realigned 1st District has 21 counties covering most of the northeastern part of the state. Added are Carteret and Greene to the district, which also has Pitt, Jones, Currituck, Martin, Beaufort, Bertie, Camden, Chowan, Craven, Dare, Gates, Hertford, Hyde, Lenoir, Pamlico, Pasquotank, Perquimans, Tyrrell and Washington counties. County commissioners have been planning the land fill operation for some time and the Littlefield site has been designed as a pilot operation on which to base the county's future involvement in sanitary land fill operations. Present plans call for the landfill to be operated five days per week — including Saturdays — from 8 a.m. until 4:30 p.m. Items such as household trash and garbage will be accepted for disposal. Things such as junked cars will not be accepted.

## Thinking How Best To Spend \$590,000 Allotted Greenville

City Manager William (Bill) Carstarphen today confirmed that Greenville is due to receive approximately \$590,000 in federal revenue sharing funds. The new city manager, just beginning his second week in this position in Greenville, said "the mayor and city council members are giving individual thought to various alternatives and needs for which the money can be spent." "The main objective," Car-

starphen noted, "is to make sure the money is spent in the most constructive way in keeping with the intent the federal government has for such funds." Carstarphen said he understands "the first half of this amount is expected during November, with the second half to be received in January. The new city manager says he expects proposals for use of the money to be taken up by the mayor and city council at an early date.

## Staged Manila Raids

MANILA (AP) — The Philippine armed forces arrested an undetermined number of men and confiscated sophisticated sniper equipment and explosives in raids in the greater Manila area, Information Secretary Francisco S. Tatad said today.

The raids followed reports that dissident suicide squads were in the city to assassinate President Ferdinand E. Marcos. No further details were available, Tatad told newsmen. Earlier, Marcos told municipal police chiefs and executives to uphold the law with courtesy and absolute fairness because the Philippines' fight against what he called a Communist rebellion may well be won or lost "in the hearts and minds of the people." The president, who proclaimed martial law almost a month ago "to save this republic" from communist forces "and form a new society," spoke to 1,500 police chiefs and other local officials at the presidential palace. He said the law must be upheld without exceptions. If law enforcers are unfair and abusive in performing their duties, the people will lose trust and confidence in the government, Marcos told the police officials. He asked them to cooperate in establishing a new society by giving top priority to the following basic reforms: —Promote and maintain peace and order by breaking up criminal syndicates, especially smuggling and narcotics trafficking. —Restore the respect of the people for law by being courteous and righteous. Marcos allowed the opening of a new English-language daily newspaper called the Times Journal to be run by former staff members of various major newspapers shut down after the imposition of martial law. He authorized the release of seven newsmen in Naga City, 170 miles southwest of Manila. They had been detained under martial law.

## Coach Fired

BALTIMORE (AP) — Don McCafferty, who directed the Baltimore Colts to a Super Bowl title as a rookie head coach in 1970, was fired today by the National Football League team.

The announcement came one day after the Colts lost their fourth straight home game in five starts, the worst losing streak since 1962. McCafferty, 51, took over as head coach in 1970 after Don Shula left to become head coach of the Miami Dolphins. McCafferty previously had been a Baltimore assistant coach for 11 years. Defensive line coach John Sandusky, who like McCafferty has been with the Colts since 1959, was named head coach for the remainder of the season. The announcement of McCafferty's dismissal was made by Joe Thomas, who took over as the Baltimore general manager this season when Robert Irsay purchased the franchise. "This is a decision that had to be made for the good of the club," Thomas said. "We can't play football the way we've been playing." Thomas said he decided to relieve McCafferty and Irsay "agreed with me 100 per cent that the move should be made." Defensive line coach John

## Sen. McGovern Inching Up In Gallup Findings

By GEORGE GALLUP  
Copyright, 1972. Field Enterprises, Inc. All rights reserved. Republication in whole or part strictly prohibited, except with written consent of the copyright holders.

PRINCETON, N.J., Oct. 15 — The latest nationwide trial heat shows Nixon winning the support of 60 per cent of registered voters to 34 per cent for McGovern, one per cent for other candidates and five per cent undecided. While these findings, based on interviewing conducted September 29-October 9, represent virtually no change from the previous survey, conducted September 22-25, McGovern has

registered a gain of four percentage points during the six weeks since the GOP convention in late August. The President holds the lead with all major population groups, with the exception of blacks and new voters. Democratic defection remains a serious obstacle for McGovern, with approximately one Democrat in three (32 per cent) currently defecting to Nixon. Voter preferences differ little by region of the nation, although McGovern is slightly stronger in the Far West than in the other three major regions. The East at this point in the race is no more Democratic than other regions

of the nation, in contrast to other presidential election years. Importance of High Turnout for McGovern The problem for the McGovern forces between now and election day will be to persuade as many of the registered Democrats as possible to get to the polls on election day. The importance of turnout for McGovern is revealed in the following table which shows that among persons with a low likelihood of voting, the race is closer than among those with a high likelihood of voting. In the latter group, Nixon leads by more than a 2-to-1 margin. (Continued on page 8)

## Landfill Is Open

AYDEN — The Pitt County-operated land fill began operations this morning at Littlefield, between Ayden and Grifton. Charles Gaskins, chairman of the Board of County Commissioners was on hand for the 10 a.m. opening as were county manager Reginald Gray and Pitt County planner Phillip Michaels.

## Capitol Square Music Festival

RALEIGH (AP) — A week of country music and dancing began today on Capitol Square in Raleigh. Gov. Bob Scott recently proclaimed October as Country Music Month and told his staff to line up the week of performances.

## Texas Democrat Urges 'Facts' On Watergate

WASHINGTON (AP) — Rep. Wright Patman, chairman of the House Banking Committee, says Americans are "screaming out" to demand the facts in the break-in and alleged bugging of Democratic National headquarters here. Patman said Sunday his committee has documents which show that Nixon campaign funds were used to buy elec-

tronic equipment from James W. McCord, one of five men arrested inside the Democratic offices on June 17. He said the equipment was described as "audio-countermeasures radio receiver and alarm." He added: "My understanding is that it's a bugging device." But he acknowledged he didn't know to what use the equipment was put. The Texas Democrat said he has not given up on hopes for the banking committee to conduct a full investigation of the case, even though a majority of the committee has disapproved such a probe. "The American people are screaming out, 'We want the facts, we want them before the election,'" Patman said in an appearance on the CBS TV-radio program "Face the Nation."

Meanwhile, presidential aide John D. Ehrlichman said a story in The Washington Post which suggested a link from Nixon's appointments secretary, Dwight L. Chapin, to a political spying and sabotage operation is "hearsay about four times removed."

## Sheriff Says Gang Looked For Someone To Kill

CHICAGO (AP) — Sheriff Richard J. Elrod says eight members of a black terrorist gang charged in the recent murders of nine persons were apparently "roaming the countryside looking for someone to kill." Authorities said apparently not all of the eight men charged had participated in all slayings. Elrod told newsmen Sunday the nine white victims, including the members of two separate families, apparently were randomly selected by a Chicago street gang which he said called itself "De Mau Mau."

Elrod said, "I can see no other apparent motivation." Six men are being held without bond, two others are still being sought. Elrod, the Cook County sheriff, said the De Mau Mau organization apparently was founded several years ago by Vietnam veterans who had been dishonorably discharged. The most widely reported of the murders was the killing of a retired insurance executive and three members of his family Aug. 4 in the wealthy Chicago suburb of Barrington Hills. Paul Corbett, 67; his wife, Marion, 57, and his sister-in-law, Dorothy Derry, 60, were found shot

through the backs of their heads. Corbett's stepdaughter, Barbara Board, 22, was found dead a few feet away. She had been shot through the heart. A month later, three members of a rural Monee family were found shot to death in their farmhouse. Police managed to get a deathbed statement from another victim, Army Spec. 5 William E. Richter, 25, who was attacked while sleeping in a parked truck on the Edens Expressway near the northern Chicago suburb of Highland Park. He told authorities he had been awakened by three men and was shot during a struggle with them.

The earliest slaying linked to the charges filed Sunday was that of Michael Gerchenson, 19, a Southern Illinois University student whose body was found May 3 some 40 miles from the Carbondale campus in the southern part of the state. Elrod and other law enforcement officers, including Chicago Police Supt. James B. Conlisk and Cook County State's Atty. Edward V. Hanrahan, told newsmen that the connections between the murders spurred a police dragnet throughout the South Side. Elrod admitted, however, "the big break in this case came this week on information provided by a reliable informant."

Elrod admitted, however, "the big break in this case came this week on information provided by a reliable informant."

## One Injured In Accidents

Police reported that three traffic accidents late Friday afternoon and early Saturday morning caused an estimated \$3,500 damage. One person was injured.

Police charged Carson Stanley Tyson of Rt. 2, Roanoke Rapids with failure to see safe movement when the car he was driving collided with a car being operated by Jacob Bennet of Raleigh. The accident occurred at 12:30 Friday afternoon on Elm Street near 10th.

Damage to the Bennet car was \$1500, while damage to the Tyson vehicle was \$500.

Police also charged Wilbur D. Jarman of Rt. 5, Greenville, with failure to yield the right of way when the car he was driving collided with an auto being driven by Ronald Gene Edwards of 503 Mumford Rd. Damage to the Jarman auto was \$350, while damage to the Edwards auto was \$300.

The second accident occurred at the intersection of Gum Road and Allen Street at 7:05 p.m.

John Clifton Davis, 23, of Rt. 1, Pink Hill, was injured when the motorcycle he was riding according to police, went off the pavement, struck a guard rail and came to rest on the shoulder of the highway. The accident, which occurred at 1 a.m. at the intersection of E. 10th and Forest Hill Drive, caused an estimated \$800 damage to the bike.

## LPN Ass'n Will Meet Thursday

The Pitt County Licensed Practical Nurses' Association will meet Thursday at 8 p.m. in the Educational Building of Pitt Memorial Hospital.

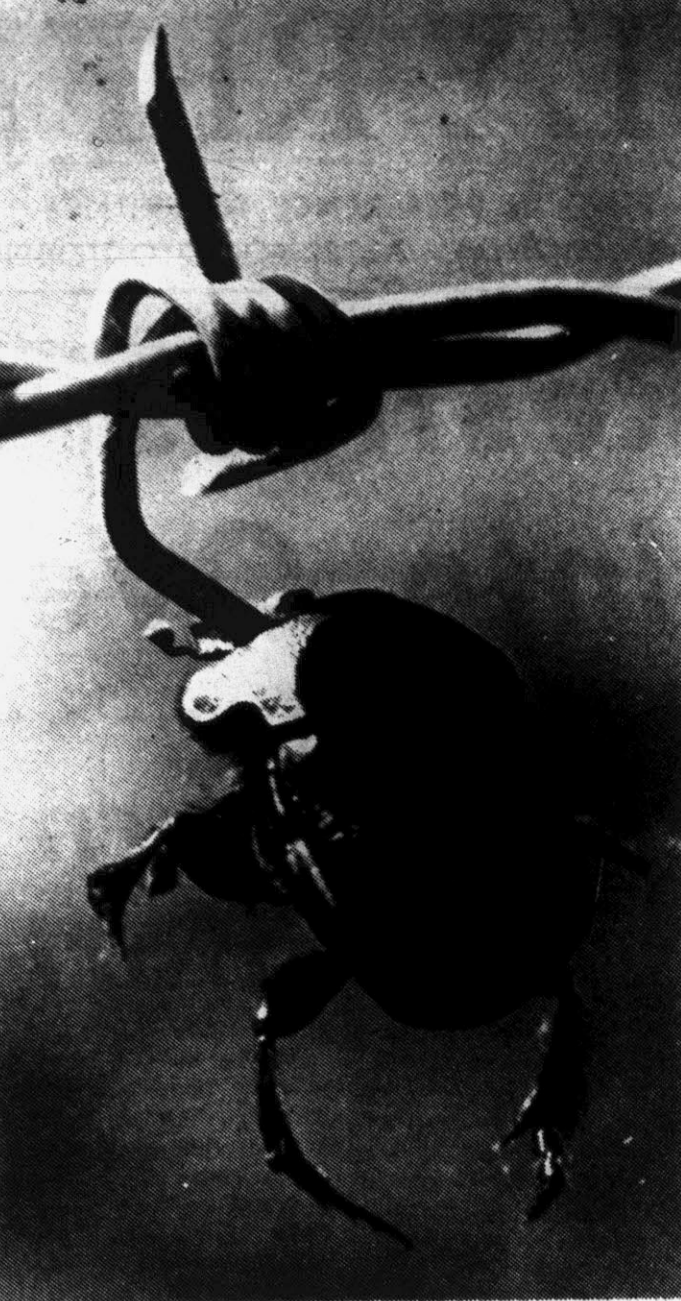

Pitt Memorial Director of Nurses Jean Owens will speak on "The Role of the LPN at Pitt County Memorial Hospital." She said she is allowing time to answer any questions LPNs of this area may have pertaining to employment at the hospital.

All area LPNs are urged to attend.

## Fair Crowds

RALEIGH (AP) — Aided by warm, sunny weather, the North Carolina State Fair attracted large crowds Sunday, the third day of its nine-day run.

Publicity director Bob

**WRONG TARGET . . .** Something must have gone wrong with this beetle's directional device. A clumsy flyer, this unlucky insect either did not see the sharp barb or mistook it for a new kind of flower. Whatever the reason, the end result was a final flight for the June beetle. (Reflector photo by Jerry Raynor)

Wills said Sunday's attendance was expected to total 50,000 or more.

The fair attracted 126,573 persons Saturday, the largest in history.

A feature of this year's fair is a special space show, "Returns From the Future."

## Three More Killed In Belfast Over Weekend

BELFAST (AP) — Gunmen killed three Roman Catholics in Belfast during the weekend, and militant Protestants vowed they would prevent local elections from being held in Northern Ireland in December.

The deaths brought Northern Ireland's confirmed fatality toll to 606 in more than three years of communal violence. Security forces believed the weekend's victims were killed by murder squads thought to be responsible for 63 unsolved killings since July.

Two of the men were serving customers in a liquor store Saturday night when two hooded gunmen burst in and opened fire on them. Two other men were seriously wounded. Another man was found shot through the head in another part of Belfast.

The elections were announced by William Whitelaw, Britain's chief administrator for Northern Ireland, for Dec. 6. With them he hoped to end the political vacuum that has existed since the British government suspended the Protestant-dominated provincial parliament and assumed direct rule in March.

But militant Protestants op-

posed the proportional representation system and demanded that any elections be preceded by a referendum on whether the province should be united with the Catholic Irish Republic in the south. The Protestant majority would undoubtedly reject union.

Billy Hull, leader of the Protestant Loyalist Association of Workers, told a weekend rally, "The elections will not be held."

Elections are also opposed by the Ulster Defense Association, a Protestant vigilante group which claims it can field an armed force of 50,000, and the Vanguard Movement, which claims a following of 200,000 Protestants.

The UDA claimed it was using American veterans of the Vietnam War to train its men, but British military authorities discounted the claim.

During the night gangs of Protestant youths rioted in East Belfast and threw stones at troops. The youths also

broke into a drugstore and stole acid.

A soldier was seriously injured in Armagh when a booby trap bomb exploded in an empty house.

## TENSION?

If you suffer from simple every day nervous tension then you should be taking B.T. tablets for relief.

Call on the druggist at the drug store listed below and ask him about B.T. tablets.

They're safe non-habit forming and with our guarantee, you will lose your every day jitters or receive your money back.

If you haven't seen the new Brody's, you haven't seen Brody's.

# Miss Rebecca Cannon Is A Nurse By Any Other Name Is Still A Nurse Bride Of Kenneth Beaman

Miss Rebecca Ann Cannon became the bride of Kenneth Wade Beaman on Sunday at 4:00 p.m. in the First Christian Church. The Rev. Dana Hunt performed the double ring ceremony.

Mrs. Eloise Jackson presented a program of organ music.

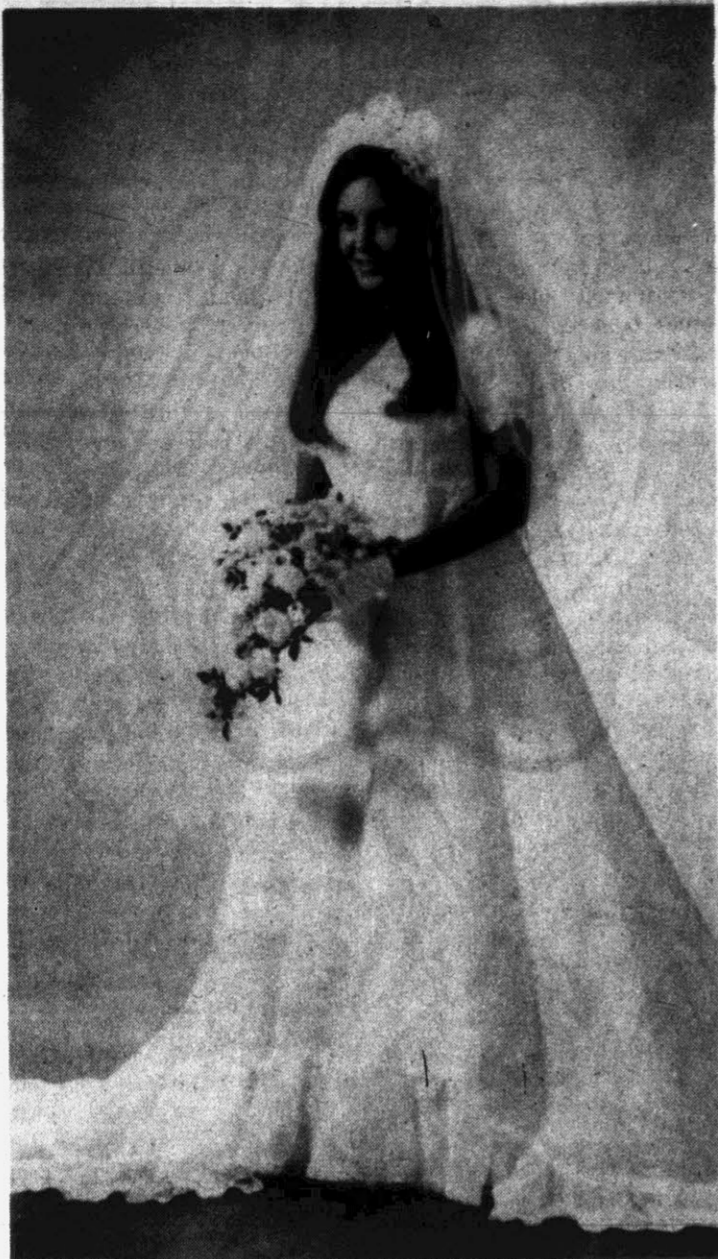

The church was decorated with traditional green and white. On the Communion table in the center of the background was a brass cross flanked by two candle holders and two standards of white gladioli, mums and pom poms. On either side of the choir loft were seven branch candelabra holding lighted candles. At the altar was a prie-dieu where the bride and bridegroom knelt for the closing prayer and benediction. Pews were marked with white satin bows.

Daughter of Mr. and Mrs. Jimmie Bradford Cannon of Greenville, the bride was given in marriage by her father. She wore a floor length gown of traditional white voile and val lace with an attached chapel train. The shirred bodice featured rows of val lace, a high neckline with a mandarin collar and cap sleeves. Val lace encircled the collar, sleeves and empire waist. The bouffant floor length skirt and chapel train were encircled with a flounce hemline edged in val lace.

The bride wore a bouffant tiered veil of illusion attached to a face frame design headpiece of val lace petals etched with seed pearls.

Mrs. William R. Denton of Fayetteville, sister of the bride, was matron of honor. She wore a formal length gown featuring a lime green shirred bodice accented by a lime velvet ribbon at the waistline, short puffed sleeves and a flared skirt of aline green crepe. She carried a yellow mum tied with lime velvet ribbon.

Bridesmaids were Miss Gail Garcia, Miss Cathy Smith and Miss Vandy Beaman, sister of

MRS. KENNETH WADE BEAMAN

the bridegroom, all of Greenville. They were dressed identical to the honor attendant.

The bridegroom is the son of Mr. and Mrs. Edward Malcolm Beaman of Greenville. His father served as best man.

Ushers were Malcolm Beaman of Virginia Beach, Va., and Jeffrey Beaman, brothers of the bridegroom, Al Gurganus and Grant Jarman, all of Greenville.

For her daughter's wedding, Mrs. Cannon wore a light blue long sleeved knit dress and a matching coat of lace. She wore matching accessories and a white mum corsage.

The mother of the bridegroom wore a hot pink knit dress with long sleeves and matching accessories. She wore a white mum corsage.

The couple received in the vestibule of the church. Mr. and Mrs. Churchill Gorham of Washington presided at the guest register.

Mrs. Connie Sutton directed the wedding. After a wedding trip to unannounced points, the couple will reside in Greenville.

The bride is a graduate of Rose High School and is attending East Carolina University. The bridegroom graduated from Rose High School and is employed by the Division of USI, Farmville.

The parents of the bride and Mr. and Mrs. E.M. Beaman entertained at a rehearsal party.

The serving table was covered with a floor length white cloth edged in wide white lace. The centerpiece was an arrangement of bronze and yellow pom poms flanked by two silver candelabra holding yellow tapers.

After the bridal couple cut the first slice from the three tiered wedding cake, Mrs. Cannon, mother of the bride, served the cake. Punch was poured by Mrs. Beaman, mother of the bridegroom.

Mr. and Mrs. Malcolm Beaman of Virginia Beach, Va., said the good-byes.

## Bridal Couple Entertained

GOLDSBORO — Miss Jan Ellington, bride-elect of Greenville, and Phil Phillips were entertained at a steak dinner held here last night.

The dinner was held at the home of Mr. and Mrs. Ray Herring, step grandparents of the bridegroom-elect. His parents, Mr. and Mrs. Rudy Phillips, were special guests.

The honorees were remembered with a gift of silver in their chosen pattern by the host and hostess.

By Abigail Van Buren

DEAR ABBY: I am a registered nurse, and my pet peeve is one that is shared by many in my profession. It is being called "NURSE."

We all wear name pins. Why can't people take the time and trouble to look at them and call us "Miss Jones" or "Mrs. Smith"? A nurse would never call a patient, "Patient," or a visitor, "Visitor."

Please print this. It might penetrate. Thank you.

IRKED IN N. J.

DEAR IRKED: I found it difficult to believe that the majority of nurses shared your feeling, so I conducted a mailpoll. Here are the results:

The Cleveland Clinic, Cleveland:  
"We questioned approximately 300 nurses, and

"[a] More than 90 per cent were 'not irked' by being called nurse. While they all wear name badges, many patients are not wearing their glasses, others are preoccupied with their illnesses, and some never even notice the name badge.

"[b] Virtually all of our nurses would be 'irked' by being called by her first name unless it was by a patient who happened to be a friend.

"[c] The nurses would prefer not to be called 'Miss or Mrs.'

"[d] Our conclusion is that nurses are proud of being called nurse, a title which designates a high level of achievement and respect."

Century City Hospital, Los Angeles, Cal.:

"We asked 44 nurses how they felt about being called

## Reports Given Household Hints Welcome Wagon Club Members

The monthly luncheon of the Greenville Welcome Wagon Club was held Wednesday at the Greenville Country Club.

Mrs. Harry Hastings' president reported a trip to Edenton sponsored by the GAD-About Group will take place Wednesday Oct. 18.

Mrs. Rolf Kannen 758-0383 is in charge of reservations. Plans for a Christmas dance to be held at the Elks Lodge on Dec. 9 were also discussed. New club booklets were issued by Mrs. Thomas Martin.

Mrs. William Heymann explained the work of WICs (Women in Community Service) and the need for volunteers.

Following the business meeting Mrs. John Huber and Mrs. Rolf Kannen conducted a white elephant and bake sale.

Mrs. Hastings introduced new members: Mrs. Bill Rodgers Mrs. Charles Coble; Mrs. Harry Battersby; Mrs. Charles DeShaw; Mrs. Joseph Condra; Mrs. Baxter Richardson; Mrs. Phil White; Mrs. Bill Schlundt; Schlundt;; Guests were: Mrs. Kim Newsom; Mrs. John Vick; Mrs. Jeannette Callahan; Mrs. Margaret Burch; Mrs. Robert Barath; Mrs. David Stephenson; and Mrs. Charles Adyette.

Rinse your hands in cold water when you are shaping meat balls.

Cook sliced zucchini and onion strips in olive oil in a skillet. Add canned stewed tomatoes and reheat. Serve in sauce dishes.

To remove discoloration from a pyroceram or glass coffee pot, fill with a liquid chlorine bleach solution and let stand overnight. To make the solution, use one part bleach to eight parts water.

Keep the sensing device on your range-top unit clean; a mild abrasive may be used.

## DECORAMA

EASTERN CARPETS, INC. 264 BY-PASS THE WONDER WORKER

Color is just that! It is the magical weapon of the decorator with a problem and a tight budget. The right color mix can make a room smaller—or larger, can separate areas—or tie them together. It can also stimulate or subdue. Colors in the home have a definite affect on the emotions, attitudes and behavior. And color, in paint, paper and fabric, can be one of the most economical ways to achieve major decorating changes in your home. Let this wonder worker work for you in your own home. Color is a wonder worker especially if it's your favorite and you are showing it off in new wall to wall carpet. We are specialists in this field and serve both residential and commercial. ## Have Your Furnace, Air Ducts & Chimney Cleaned Before The Heating Season Begins!

LEON L. MOORE OIL COMPANY

## ARCO Heat Service

...now includes

HANDYMAN POWERVAC FURNACE CLEANING

MAKE YOUR HOME CLEANER... WARMER AND HEALTHIER.

Power vacuum furnace cleaning is the ideal way to clean your heating system. Accumulations in air pipes, flues and chimneys are completely removed without raising dust or causing a mess. Our powerful Power-vac Furnace Cleaner does a fast thorough job. From chimney top to heat exchanger, your heating system is cleaned just as you would clean in vacuum your rugs and furniture.

THERE ARE MANY ADVANTAGES IN HAVING YOUR HEATING SYSTEM CLEANED:

GREATER HEATING EFFICIENCY

Your system works better, conserves fuel thereby lowering fuel bills, and you enjoy warmer, healthier air in your home.

LESS INTERIOR DECORATING

Your painted walls and ceilings, wall-paper, rugs and furniture stay cleaner longer. You spend less money on decorating and cleaning bills. Daily dusting and cleaning is easier too.

FEWER REPAIR BILLS

With your heating system working at top efficiency there is less danger of breakdown, fewer repair bills to pay. It also reduces fire hazards caused by accumulated dust and soot.

# Extreme Care Must Be Taken

The damaging of the French mission in Hanoi last week is a regrettable thing and something that great pains should be taken to prevent in the future. Recognizing that North Vietnam is a nation at war, and by its own choosing, it is still important that United States aircraft make every effort to avoid striking consulates in the North Vietnamese capital.

Apparently the consulate was located 2 1/2 to three miles from the military targets of that day. Assuming the blast was not caused by a North Viet

missile, it is obvious that an error was made in targeting.

Nations who maintain missions in Hanoi must recognize there is some risk involved in that capital of a warring nation, just as there is risk from Communist missiles which land on Saigon.

Nevertheless, when American bombs hit the diplomatic mission of a neutral or friendly nation it is bound to put a strain on our relations. Add to this the belief that the French are helping out in extremely critical negotiations on a war settlement and the situation becomes even more complicated.

Mistakes happen in war and usually with tragic results. However, the United States should redouble its efforts to see that only strategic military sites are the objectives of bombing strikes in North Vietnam.

# Eure Running For 10th Time

By BRYAN HAISLIP  
RALEIGH — Debonair Thad Eure, North Carolina's durable Democrat, is a candidate on the general election state ticket for the 10th time.

Herbert Hoover and the Republicans carried the state.

### GOP Swept In, Out

When young Eure took his seat in the 1929 General Assembly he was serving with 40 GOP members. The next election, he noted with satisfaction, their number was reduced to six. They were swept in, and swept out. Republican membership in the legislature hasn't been so high or so low since that time. No significant change, Eure added, will come out of the fall election.

President Nixon's coat-tails won't be broad enough, he ventured, to make gains in GOP state legislative strength. They will win more, and maybe less, than the 30 seats they held last time, he predicted.

Eure sees the McGovern candidacy on the ascendancy in North Carolina. The picture won't be so dark by the time Nov. 7 rolls around, he said.

"I don't say he's going to win. I don't say how close it will be. But a lot of folks are going to be surprised at the vote McGovern gets," he declared.

Democratic registration (three-to-one over Republicans), newly eligible voters, a more active black constituency are factors favoring the McGovern campaign, he explained.

### Early Political Start

Eure got into politics before he was out of his 20's. His first public office was mayor of his hometown of Winton.

His name went on the state ballot in 1936 when he was elected to begin his long tenure as secretary of state. He's run and won every four years since.

In those days, the state Democratic campaign was a team affair, conducted through a series of Congressional district rallies. The whole ticket assembled to appeal to the voters in concert.

For Eure's first race, Clyde R. Hoey of Shelby was the candidate for governor and campaign team quarterback. Gray locks flying, long-tailed coat waving, Hoey would mount the platform to rouse the voters with splendid rhetoric. In turn, he introduced each candidate in high-sound accolades.

"Everybody would raise sand and have the best time in the world," Eure recalled. Something of the color and excitement has gone out of politics with the passing of the old style, he agreed.

"I think it has something to do with the apathetic picture we get today," Eure speculated. "People don't get stirred up by a candidate on TV in their living room like they did at a rally with a brass band playing and a good speaker on the platform."

BRYAN HAISLIP

Campaigning when he first ran was oratory and historicisms, a roadshow that attracted crowds to rallies to eat barbecue and see the politicians perform.

"They'd hollar and stomp," Eure recalled with relish. "And the more hell you gave the opposing party, the better folks liked it."

Nowadays running for office is bumper stickers and filmed TV spots, a pale and stale comparison to the fireworks of yesteryear.

Changing times have brought Eure, at 72, into the thick of the new politics. His opponent is a woman in the race for secretary of state.

Gallantry is his reaction. The observation he makes of the Republican candidate is what a fine lady she is, how talented and lovely.

"I understand she is a very good soloist. I hope to the Lord she keeps on singing," he remarked.

Mrs. Grace Rohrer of Winston-Salem is the only woman running for statewide office. How much the equal rights wave will wash into her column the votes of women in both parties could be a key to the outcome.

Eure said a woman Democrat, active in the bipartisan women's political caucus, told him she couldn't vote for him because of the group's goal to elect a woman. "I didn't argue with her," he commented.

### Party Loyalty Constant

Whatever else changes, party loyalty is the constant in the Eure career. He'd as soon throw away his trademark bowties as split a ticket.

He was running for the legislature from Hertford County in 1928 when Al Smith as the Democratic presidential nominee created consternation in the state party.

The comparison to 1972 with George McGovern heading the ticket is obvious, except it was worse back then, Eure said. "Prohibition and Catholicism were rampant in the land," he remembered.

Eure was among the candidates and Democrats who held fast. Sen. Furnifold Simmons, kingpin of Tar Heel politics, defected.

# Ho Hum Of The Week: Voting Allowance Hike

Last week's ho hum was the revelation that the House Administration Committee had voted a boost from 26 to 38 the number of trips home for which a House member may claim reimbursement during the 93rd Congress two years.

Members who do not go home often or live nearby may take \$2,250 in cash rather than the present \$1,500 allowance for the two years. Stationery allowance is to be hiked in January from \$3,500 to \$4,250 for each year of the new Congress. Such generosity is overwhelming.

# Pres. Nixon's Vietnam Cards

By ROWLAND EVANS and ROBERT NOVAK  
WASHINGTON — Although President Nixon has been pressuring North Vietnam for an "honorable" settlement of the war at least since Henry Kissinger's first secret mission to Paris in 1969, the hot tempt of the Paris talks can be traced not to Mr. Nixon so much as the Communist party politburo that runs North Vietnam.

Powerful signals that Hanoi really wants to find a compromise solution to the endless, bloody war have been crowding into the White House for months, including hints two months ago that Hanoi might accept the presence of South Vietnamese President Nguyen Van Thieu in some form of coalition government.

But for Hanoi, the bitter irony is that North Vietnam, not the U.S., has now become the most ardent suitor for peace in a dramatic reversal of roles. That reversal was unimaginable last spring when Hanoi was putting final touches on its massive Easter weekend offensive across the demilitarized zone.

With the antiwar movement then making dramatic gains in the U. S. Congress, the Hanoi scenario was transparently obvious: exploit the peace movement by bloodying the war in the midst of the American election, thus compelling Mr. Nixon to come to terms or risk losing to a Democratic party peace candidate such as Sen. George McGovern.

But what happened? Mr. Nixon unleashed the bombers, mined the harbors of North Vietnam and flew off to a glorious summit conference with Hanoi's allies in Moscow. Now, five months later, U.S. casualties are minuscule, and the peace movement is quieter than at any time since 1969. Most important, political pressures on the President are actually operating against a pre-election settlement in favor of a post-election settlement.

The reasons for that are also obvious. If Mr. Nixon announced a settlement before Nov. 7, political critics would charge that he had deliberately timed it for maximum personal gain just

before the election, raising the old specter of "Tricky Dick" Nixon.

Moreover, if the settlement contained elements of genuine compromise — as Presidential advisers have long hinted it must — right-wing conservatives in both parties might seek revenge on the President. In California especially, where McGovern has a chance to win, the Presidential nominee of the American Independent Party, right-wing Republican Rep. John Schmitz, could cut deeply into Mr. Nixon's conservative support.

Accordingly, the President has elbow room to spare. The odds today are that the secret negotiations between Kissinger and Le Duc Tho will not resolve even the main issues — such as Thieu's future, the question of U. S. military aid to Saigon and the withdrawal of all "foreign" troops — until December at the earliest.

In short, neither the election campaign nor the date of the election has real bearing any longer on the negotiations, depriving Hanoi of what it had long regarded as Mr. Nixon's most vulnerable pressure point. Yet Hanoi is indisputably eager for a settlement, despite all its rhetoric about protracted warfare. The main reason: the effects of the mining and bombing on its supply systems.

In an article signed by the North Vietnamese minister of materials and published in a recent issue of Hoc Tap, the party's theoretical monthly, the impact of the materials shortages was starkly revealed:

"In the new situation, management of the supply and technical materials is an extremely heavy task which entails overcoming all enemy-caused difficulties and delivering on time all necessary equipment and materials to serve combat and production."

The article traced grave distortions in the storage and supply of scarce materials and warned party cadres to guard against thievery and hoarding. In a "fierce" war situation, it said, "each

# Who Killed Cock Robin?

WASHINGTON — When Det. Reilly walked into the Rotunda of the Capitol he was aghast. Lying there on the floor were the bodies of the Welfare Reform Bill, the Consumer Protection Agency Bill, the Mass Transit Bill and the Minimum Wage Bill. "Geez," whistled Reilly. "This is worse than the St. Valentine's Day massacre." He went over to his assistant, Det. Monday. "What happened?" Reilly asked.

"I don't know," Monday said. "They were all alive and healthy one day, and the next moment they were all killed. Nobody saw anything."

Reilly went over to the Welfare Reform Bill and pulled back the sheet. It was mangled and torn beyond recognition. Reilly almost got sick to his stomach. He asked Monday, "Anybody identify the bodies?"

"Someone said they were all related to a guy named Nixon who lives at 1600 Pennsylvania Avenue. We sent for him. He should be here any minute."

Just then, two policemen brought in a dark-haired man with a heavy 5 o'clock shadow.

Reilly went up to him. "Mr. Nixon, sorry to bother you at this hour, but we were wondering if you could identify any of these bills lying there on the floor."

Nixon, without looking, said, "I never saw any of them before in my life."

Det. Monday referred to some notes. "Witnesses say you introduced these bills and then killed them."

"It's a lie," Nixon said. "I haven't been up here on the Hill for months."

"Well, let me ask you this. Did you know the deceased at all?" Reilly asked.

Nixon said, "You can't pin this one on me. Congress killed them. I had nothing to do with it."

"We're not accusing you of anything, Mr. Nixon," Reilly said. "We're just trying to put the pieces together." He pulled the sheet back from the Consumer Protection Agency Bill. "Do you recognize this one?"

"I don't remember," Nixon said.

"What about the Mass Transit Bill over there?" Monday asked. "Your man John Volpe testified last month you supported this bill."

"Volpe doesn't know what he's talking about."

"And I suppose you know (Continued on page 5)

# Other Editors Say Timely Warning

(Chapel Hill Newspaper)

As the moment of truth gets closer for the state's new higher education system, it is encouraging to have still another political leader rear back and call for a little legislative restraint.

The moment of truth comes early next year when the Legislature sits in Raleigh. The test will be in whether the new higher education system will be able to withstand legislative assaults—the sort of thing that brought on the new system in the first place—and in whether the legislators will be able to contain their natural tendency to meddle.

Governor Robert Scott a week or so ago took the occasion of a Chapel Hill meeting to warn legislators to keep their hands off the new system. As the catalyst for higher education reorganization, his concern for the health and welfare of the system is more acute than most.

This week Jim Holschouer, who would like to succeed Scott as Governor, also took the occasion of a Chapel Hill meeting to urge legislators to put aside regional pride and ambitions and give the system a fair chance to work.

It was a near-miracle that the system ever emerged from the Legislature, Mr. Holschouer said, and at that point is still largely on paper.

"Politicians have got to be willing to leave higher education alone for the moment and stop trying to make changes on the basis of regional pride and practical politics," he went on.

"When the politicians come to town next January, if we try to change the University's priorities or the makeup of the Board of Governors, we will find ourselves in very serious trouble. It's time we started letting educators have a real voice in the priorities."

The reorganized University can succeed, he said, only if politicians forego political expediency, even to the extent of letting the Board of Governors make a mistake or two.

Mr. Holschouer's chances of being the first Republican governor elected in this century, and of being in position to stand as a buffer between the Legislature and the Board of Governors, look remote. Even so, his stern warning was timely and well-spoken and we applaud him for it.

# Strength For Today

### BEAUTY

Many people do not appreciate the place which beauty occupies in life and how truly this beauty reveals the greatest love of God.

There is probably no reason why the natural words should be the beautiful place it is save that God wants to make us happy by our contemplation of these natural beauties. Except for the fact that they devour great numbers of harmful insects and aid somewhat in seeding and cross-fertilization of plants, there is probably no other practical utility in the world for birds. But how much more cheerful life is for all of us because God has given us the beauty of bird life and the quiet inspiration

of their song.

In architecture God has revealed through men — particularly through the Greeks — a sense of proportion which makes built things beautiful. Add to all these things the beauty of home life, the glorious contribution which music and art make to our lives and we see how gracious God is in this gift He has given us.

The poet Keats summed it up when he said: A thing of beauty is a joy forever. Ugliness is not of God. There is nothing in the created world which is ugly save as man has made it so. God has made all things beautiful. He looked upon his creation and said, "It is very good."

# Plague Year For Mutual Funds

By JOHN CUNIFF  
AP Business Analyst

NEW YORK (AP) — The mutual fund industry is experiencing a bad year, not so much in respect to investment choices, but because of the decision of so many fund holders to redeem their shares.

The redemption plague that began in May 1971 seriously hampers the investment style of funds. If they have to pay those who redeem their shares it leaves that much less to invest in stocks and other securities.

Sometimes a fund might even have to sell some of its holdings, and this in turn, it is feared, can cause a depression of stock market prices. It has worried a lot of

Wall Streeters.

One firm that isn't worried is Blyth Eastman Dillon. From their research department there came during the past few days a report entitled: "Mutual Funds and The Stock Market: Debunking a Myth."

The report claims that the ability of mutual funds to influence stock prices is grossly overstated. "It is a tribute to the funds' press agency," says BED.

Last year, it notes, the total transactions of mutual funds amounted to about \$50 billion, or barely more than one-sixth of the \$294 billion in purchase sales on the New York Stock Exchange.

An even better indicator of the inability of funds to affect prices, says BED, has been

witnessed in the market advance from a Dow Jones Industrial Average of 790 last November to a high of 970 this year.

"This entire rally phase has been accomplished while the funds have been pressured by net redemptions for the first time in history."

The truth of the matter, says BED, is that even if the funds were forced to liquidate their entire holdings over the next five years their selling would equal only 6 per cent of NYSE volume.

"If the Dow Jones Industrial Average hits 1,000 soon it is a signal to beware," says Albert Sindlinger, whose continuous telephone surveys show a marked relationship between consumer con-

fidence and the stock market.

"Recent findings have not turned up the economic support needed to propel the market past the 1,000 barrier and sustain it in new high ground," Sindlinger told his investor clients recently.

Market turns, he said, generally lag changes in the consumer confidence level by about eight weeks.

Confidence now is sufficient to sustain the market at its present height, he feels. But if it exceeds 1,000 — it began this week at 930.46 — "the more it will attract the 'sucker group' that is waiting to get stuck with more overpriced stock."

His conclusion: "The higher the Dow goes over the 1,000 mark, the harder it will fall."

# Learn It All By Mail

By HAL BOYLE  
NEW YORK (AP) — Things a columnist might never know if he didn't open his mail:

Civilization is now threatening to bury itself in its own debris. Each American generates a ton of solid waste, or garbage, a year. The total would cover Manhattan Island 13 feet deep.

If you had a headache in ancient Greece, the physician might try to cure it by drawing blood from your head.

HAL BOYLE

In the 19th century two miners in Nevada built a house made of stones encrusted with "black stuff." The next year they learned that the black stuff was a rich silver ore, and they mined their home for \$75,000. Which proves the adage that you don't have to travel far to find opportunity.

If you received an invitation in a message signed "Potus," would you accept it? You'd probably be sorry later if you didn't. In the Morse Code, "Potus" stands for "The president of the United States."

Animals don't seem to be affected by poison ivy, but people can get a rash from touching the fur of a dog that has wandered through a patch of this three-leafed plant.

Who really runs your household? In old Bulgaria, after their marriage, the bride and bridegroom each took hold of a piece of wedding bread and tugged hard. Whoever broke off the bigger piece was supposed to be the boss in the family.

Quotable notables: "An optimist is someone who tells you to cheer up when things are going his way."—Edward R. Murrow.

Sweet labor: It takes a lot of work to make honey. One study indicated that 40,000 bee-loads of nectar were required to produce a pound of finished honey. Another study by the U.S. Department of Agriculture, in which the bees had to make a 16-mile round trip for each load of nectar, estimated they flew 640,000 miles to create a pound of honey.

Shape of what's to come: Will the American woman of the future be shaped more like a giraffe? Probably not, but if present trends continue, as studied by the U.S. Department of Agriculture, she will be taller and, in proportion to her height, she'll have a smaller bustline, waist and hips.

Worth remembering: "This you can believe: When a youngster today hears a bad word, it goes in one ear—and comes out his mouth."

Fact file: A tree soaks up about 1,000 tons of water to make a ton of wood ... Foot-ball's first mascot was Handsome Dan, a bulldog adopted by Yale undergraduates in 1890 ... Some kinds of goldfish are gray, and some oriental varieties have been known to live 70 years ... Fish, like people, catch colds and get upset stomachs. Among their other possible ills are dropsy and tubercularis.

It was Jules Podell, owner of the Copacabana night club, who observed, "A genius is someone who can get his name off a mailing list for junk mail."

# Peace Corps Emphasis To Skilled Workers

By TOM SEPPY  
Associated Press Writer  
WASHINGTON (AP) — Ljubomir Ivanovich and Beth McCammon are from different worlds, different generations. But they have one thing in common: Both are members of the Peace Corps in the small, developing West African nation of Dahomey.

In a sense, they symbolize the change that has come over the Peace Corps in the second half of its nearly 11-year-old history of volunteer service in foreign countries. The emphasis on recruiting has shifted from the liberal arts-educated teacher to the skilled worker.

Ivanovich, a 60-year-old native of Yugoslavia who became an American citizen six years ago, is a supervisor of heavy equipment for the massive

Lower Oueme River Valley development project in southern Dahomey.

Ivanovich and his wife, Stefanie, 57, also teach—he, English and she, cooking.

On the other hand, Miss McCammon, a 26-year-old native of the Los Angeles suburb of Hawthorne, has followed her love for animals and the countryside into the Peace Corps.

She is setting up an experimental animal-husbandry project in the same lush, tropical valley as Ivanovich where a large-scale development program initiated by the United Nations' Food and Agricultural Organization is under way.

Unlike Ivanovich, who learned his profession on the job in Venezuela where he went after World War II, Miss McCammon first tried raising a steer and sheep in a high school animal-husbandry course, and continued in the field through seven years and two degrees from the University of California at Davis.

Ivanovich and Miss McCammon illustrate the experienced, skilled volunteers being recruited under the policy established by former Peace Corps Director Jack Hood Vaughn and intensified by his successor, Joseph Blatchford.

Even though the vast majority of its 7,500 volunteers are still classified as generalists, the corps is proud of its record of placing volunteers with rare and unusual skills overseas

during the past year.

Among them are a former staff member who volunteered to help the Cameroons set up a national museum; six applicants with extensive Boy Scout and leadership experience to organize scout troops in Ecuador; a specialist in rice processing for Brazil, and an architect for the government in Morocco.

The Peace Corps was begun on a high note in the Kennedy administration with Sargent Shriver, now the Democratic vice-presidential candidate, as the first director.

Much was expected of it: One official predicted 100,000 volunteers in the field; another said it would herald a "social revolution" throughout the world.

The high of 15,000 volunteers was reached in 1966. By the time Blatchford arrived, how-

ever, the number of volunteers was down to 7,000 and nearly half of those were coming home before their two years were up.

"Peace Corps had no definition," Blatchford says. "Love or production, no one could agree which. The fact that everyone should be so confused struck me."

"There were a lot of general ideas about peace without specific ideas of what to do with the Peace Corps. We had an unbelievable job to do, and whenever you take a fresh look, it's painful for the people on the other end."

Shortly after taking over, Blatchford issued his "new directions" calling for more highly skilled volunteers, increased participation by the host country, more diversified programs and more multinational and international efforts.

Blatchford denies that these ideas subverted the goals of the Peace Corps, which was merged with several other volunteer service agencies in July 1971 under the name of "ACTION."

"I believe the New Directions will have saved Peace Corps overseas," says Blatchford. "Within six months the regions were doing their jobs and we were getting more requests from the countries."

He also says the downward trend of applications has been reversed and a new flood of interest is cresting.

## 3-D Look At The Weather Slated

VANDENBERG AIR FORCE BASE, Calif. (AP) — Scientists will get a three-dimensional look at the world's weather with a satellite launched for the National Oceanic and Atmospheric Administration, officials said.

The satellite, called Itos-D, was launched Sunday. It has heat sensing instruments to scan the earth and measure temperatures of the atmosphere and the ocean.

A launch spokesman said Itos-D should provide four times more detail than earlier weather satellites, which were able to send back only cloud cover pictures. The satellite is about 910 miles above the earth.

## Meet Again In Hospital Room

MURRAY, Utah (AP) — On New Year's Day nearly three years ago Mrs. Greg Soffe of Murray and Mrs. Aage Giessing of Orem, Utah, met in the recovery room of Cottonwood Hospital.

Mrs. Soffe had given birth to a daughter and Mrs. Giessing bore a son.

Sunday, the two women met again in the same recovery room. Mrs. Soffe had a new son and Mrs. Giessing a daughter.

What about the husbands? Soffe is a mortician and Giessing works for a headstone firm.

Oklahoma City is more than half as large as the state of Rhode Island.

## Buchwald . . .

(Continued from page 4)

nothing about the killing of the Minimum Wage Bill either?"

"I told you, I don't know nothing!" Nixon shouted. "You can't pin a thing on me!"

"There is no sense getting excited," Reilly said. "Let me ask you this. Do you know of any lobbyists who would want to have these bills eliminated?"

"I refuse to answer on the grounds it would incriminate me," Nixon said.

Just then a detective rushed in. "Someone's just killed congressional investigation of the Watergate bugging incident in the House Banking Committee."

Reilly asked Nixon, "You couldn't shed any light on that one, could you?"

Nixon wiped his lips nervously. "It comes as much of a surprise to me as it does to you."

# George McGovern isn't the only one with a Credibility Problem. Meet Nick Galifianakis.

**"Nick's doing nothing but spreading lies."**  
—Sen. B. Everett Jordan<sup>1</sup>

Tough talk? Sure.

Especially coming from a respected, mild-mannered man like Sen. Everett Jordan.

Remember the primary election? That's when Nick Galifianakis distorted Sen. Jordan's record.

Not once. But time and time again.

For example, Mr. Galifianakis ran radio ads all over North Carolina. He claimed the endorsement of Sen. Sam Ervin.<sup>2</sup> People trusted those ads.

Those same people voted for Mr. Galifianakis—because of those ads.

The ads were not the truth.

Sen. Ervin said he "repeatedly informed" Mr. Galifianakis that he was for Sen. Jordan.<sup>3</sup> But the truth never caught up with Mr. Galifianakis' tall tale.

Mr. Galifianakis won the primary election. Sen. Jordan lost.

# "Galifianakis can't be trusted in anything he tells you."

—Sen. B. Everett Jordan<sup>8</sup>

Mr. Galifianakis spread another story. He said that Sen. Jordan would step down once he was re-elected.

That hurt the Jordan campaign.

"That is nothing but a vicious political lie," Sen. Jordan said.<sup>4</sup>

But the truth never caught up with Mr. Galifianakis' wild charge.

Mr. Galifianakis spread other stories about Sen. Jordan. He said Sen. Jordan was against Social Security.<sup>5</sup>

He also said Sen. Jordan was against the farmer, and that he had done little or nothing for rural North Carolinians.<sup>6</sup>

Sen. Ervin pointed out that Sen. Jordan has been a friend of the farmer in Congress.<sup>7</sup>

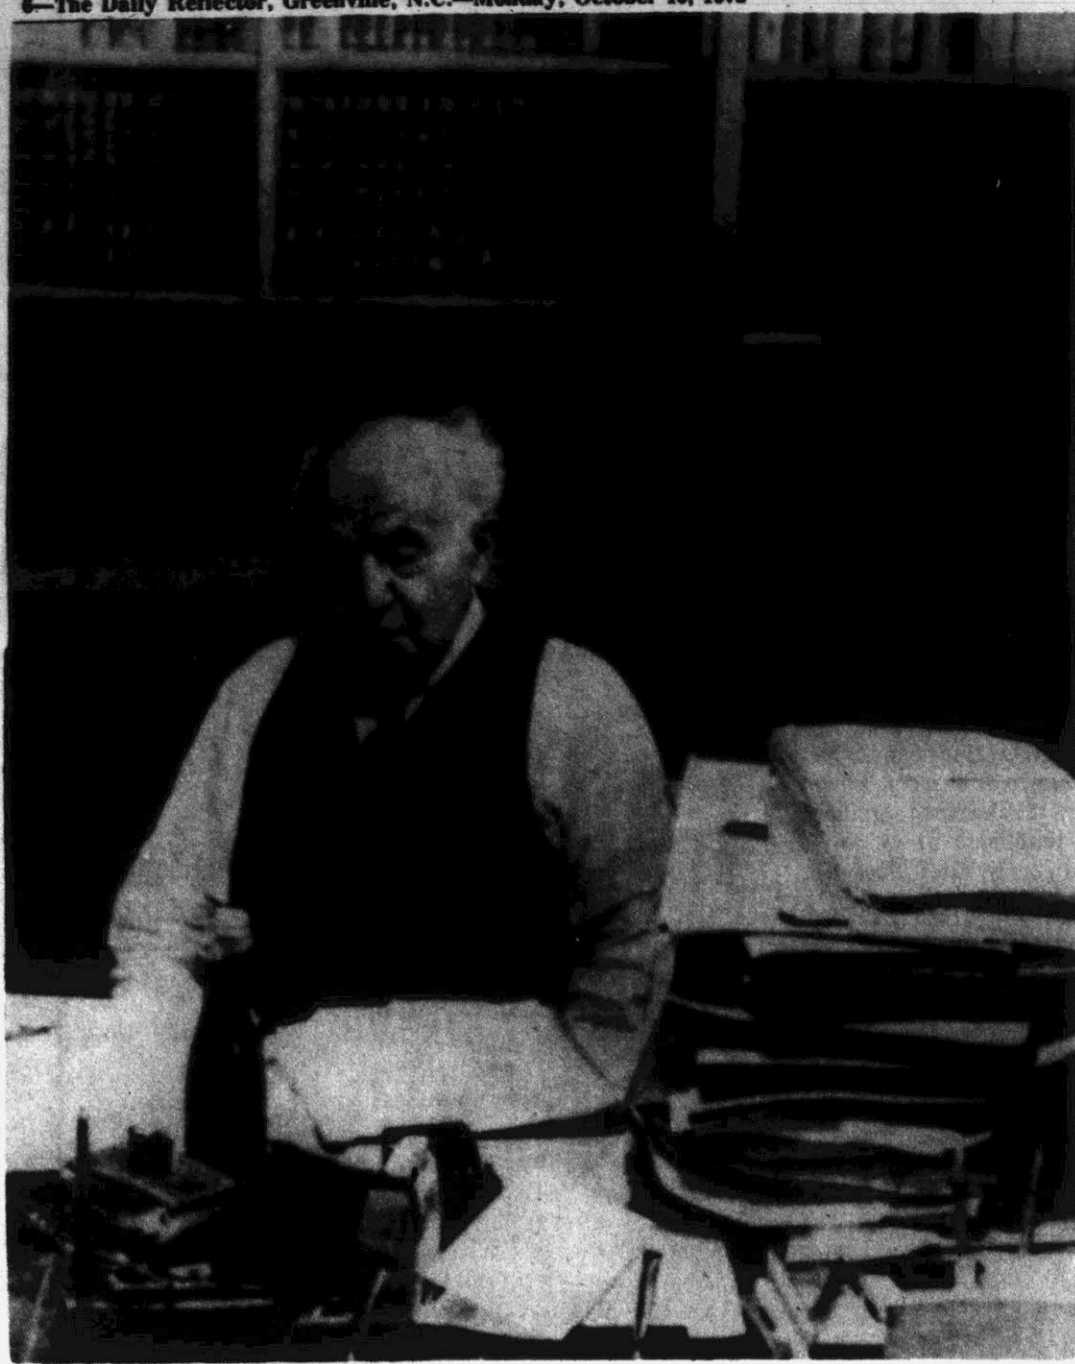

But too many people believed the slick politics of Mr. Galifianakis.

Remember Sen. Jordan pointed out that Mr. Galifianakis "can't be trusted in anything he tells you."<sup>8</sup>

## Ben Gurion Marks 86th Birthday With A Dream

By DAVID LANCASHIRE  
Associated Press Writer  
SDE BOQUER, Israel (AP) — The architect of modern Israel, David Ben-Gurion, spent his 86th birthday today alone in a little wooden cottage with his dream of making the desert bloom.

"The main problem facing Israel today is to bring more Jews to build the country... This is a desert, but it can be changed... We need at least five or six million Jews more," Ben-Gurion said Sunday at his home in this pioneer farming outpost. He shrugged other problems aside. His lion-like face beneath the twin tufts of white hair shriveled but still lively, the Israeli patriarch now pays scant attention to the world issues he once helped influence or even to Arab threats of war against the Jewish state. Working against time, he is concerned with writing history instead of making it, compiling

### Could Prevent Much Blindness

DALLAS (UPI)—Fifty per cent of all new cases of blindness developing in the United States each year can be prevented, the head of the National Society for the Prevention of Blindness says.

"We find ignorance and neglect are our leading causes of blindness, not diseases per se," said Mrs. Virginia S. Boyce, executive director of the organization.

"If people would only pay as much attention to their eyesight as they do their cosmetic appearance much of it could be detected as it develops and be stopped or cured."

an 11-volume account of Israel's pioneering years. "I want to tell our youth what has been done so far in Israel," he said, so the new generations of Jews can understand their heritage and develop it.

"Peace with the Arabs? Once we were at peace, and we worked together... There will be peace again. I am not certain it will happen in six months or a year, but we will have it.

"For the time being, I think there is peace." As he spoke, Israeli jets were raiding guerrilla bases in Lebanon and Syria, but Ben-Gurion, is no longer in touch with the government and did not know it.

Is Premier Golda Meir's government correct in forbidding counterterrorist attacks in Europe against such Arab guerrillas as the Munich Olympic killers?

"I am against 'an eye for an eye' general," said Ben-Gurion. Israel should ask European governments to stamp out Arab terrorists abroad, he went on, but "if for some reason they cannot do it — and there may be some governments who say it is not their business — then we will have to do it... How? I prefer not to speak about that."

Ben-Gurion was Israel's first prime minister and its dominant figure for its first 15 years as a nation. He left the government in 1963 and quit the Knesset, the Israeli parliament, in 1970. Today he works in solitude in this Kibbutz settlement in the Negev Desert.

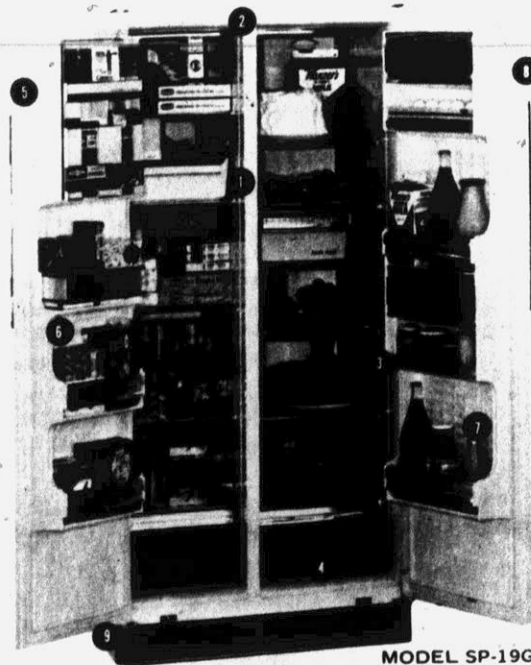

Sde Boquer symbolizes his dream of developing the Negev — a dynamic village whose green fields, manicured lawns and agricultural college contrast starkly with the surrounding wasteland.

His green house with its screened porch resembles an unpretentious American summer cottage. Outside three armed soldiers stand guard among the struggling trees, at the end of a little street marked "No Entry — One Way Only."

Ben-Gurion was born in Plonsk, Poland, on Oct. 16, 1886. But neither he nor Israel is paying any attention to the anniversary. His birthday was celebrated quietly on Sept. 25, the Hebrew calendar date for the event.

# Weekend Mishaps Fatal To 20

By THE ASSOCIATED PRESS  
The North Carolina Highway Patrol reported today that weekend traffic accidents took at least 20 lives in the state, pushing the state's 1972 traffic death toll to 1,535, 125 more than for the corresponding period of last year.

Most of the victims died in one-car accidents, but at least five pedestrians were killed, in-

cluding a 15-year-old boy struck by a car which troopers said was drag racing.

Mike Zander Mitchell, 15, of Bolton, died when struck by one of the cars reportedly involved in the drag race on a Columbus County rural road five miles north of Lake Waccamaw.

Joyce Watts Millikan, 42, of Rt. 3, Leesburg, Fla., was

killed in Transylvania County when her motorcycle collided with another vehicle.

Benjamin Alfred Stover, 30, of Newport News, Va., was killed on N.C. 133 two miles west of Southport when his motorcycle ran off the road and overturned.

Roy Lee Baker, 20, of Sanford was killed near that town when he sideswiped a tractor-trailer rig.

A hit-and-run accident in Harnett County was fatal to Sandy McDougald, 48, of near Lillington, a pedestrian. His body was found beside a road about halfway between Lillington and Erwin. A search for the driver of the car was continuing.

Two men were killed when the car they were in ran off U.S. 117 in Pender County about 11 miles south of Burgaw. The dead were identified as Thomas Teachey, 45, of Wilmington, and Hugh McLean, 50, of Rocky Point.

Allen Patterson, 45, of Rt. 2, Tabor City, died when he was run over by a car on N.C. 904 a mile west of Tabor City in Columbus County.

A 2-year-old Saxapahaw child, Curtis Keith Neil, was killed when he was run over by a car he was playing in front of on a rural road in Alamance County 12 miles south of Graham.

A young Alabama boy, Lunde Randolph, 8, of Mobile, was killed when the car he was a passenger in ran off I-85 and overturned about three miles south of Charlotte in Mecklenburg County.

Johnny Maxie Barnes, 24, of Hildebrand, was killed when his car went out of control and smashed into a tree at the edge of the city limits of Hildebrand in Burke County.

Three members of a Dallas, N.C., family were killed when they failed to stop at a railroad crossing and their car was struck by a train in the town of Alexis.

Fatally injured were Betty Roper Propst, 24, William Edward Propst, 10, and Jeffrey Propst, 18 months.

Two teenagers were killed when their car ran off N.C. 73 an overturned near Mount Pleasant in Cabarrus County. They were identified as Nancy Rose Neicase of Rt. 1, Mount Pleasant, and Billy Joe Upright of Rt. 3, Albemarle. Both were

## Honorary Degree For Gov. Scott

FAYETTEVILLE, N.C. (AP) — Gov. Bob Scott, who bows out of office in less than three months, will carry with him an honorary doctor of laws degree from Fayetteville State University.

Scott received the honorary degree Sunday at a special convocation in the Cumberland County Memorial Auditorium. It was the first honorary degree ever given by the University.

In accepting it, the governor said he was aware "you are recognizing certain accomplishments of my administration, in particular the restructuring of state-supported higher education."

"I would remind you," he said in a prepared talk, "that such accomplishments are the work of many persons, not of one man. So, I gratefully accept this honor, not for myself alone, but on behalf of all who labored with me."

The 1971 General Assembly restructured higher education, placing 16 state-supported institutions under the University

of North Carolina system and creating a board of Governors to supervise and control the programs at the schools.

Scott said that in higher education the Fayetteville region is the most under-developed in North Carolina.

He told the audience that University of North Carolina President William Friday and the board of Governors "are aware of the urgent need for broader educational opportunity in this part of the state, and I am sure that the long-range plan devised by the board will have much to say about this problem."

"I am pleased," Scott said, "that during my administration many of the inequities that have affected Fayetteville State adversely in the past have been remedied."

He said that under restructuring "no institution, no faculty and no department will ever get everything it would like to have. But by working together on a well-developed plan, we can all ultimately achieve our objective."

## TVA Silent On New Rate Rumor

NASHVILLE, Tenn. (AP)—A Nashville newspaper has reported that the Tennessee Valley Authority will increase its wholesale power rates by 7 to 17 per cent by mid-1973.

A TVA spokesman in Knoxville refused to confirm or deny the report published by the Tennessee Sunday, saying that rates for the first quarter of the year won't be set until the TVA board of directors meets in November.

However, a spokesman for the Tennessee Valley Public Power Association—an organization of power distributors—said last week that the TVA has notified its wholesale customers to expect higher rates "no later than May."

And, in the TVA's annual report, issued a week ago, the agency said it had suffered a drop of \$7 million in revenue during the last fiscal year.

According to the Tennessee's report, the TVA's wholesale power rates will be increased because of higher fuel costs and environmental

protection expenses.

The agency had reported earlier this month that the cost of reducing air and water pollution at its power generating plants would be about \$1 million a week during the current fiscal year. The costs are expected to jump to \$2 million a week during the following fiscal year.

The TVA has increased its power rates two times since 1968. If another increase is put into effect, the cost of the average residential electric bill will have almost doubled in the past four years.

One of those who have expressed concern about the effects of another rate increase is Rep. Joe L. Evins, D-Tenn., who is chairman of the House Public Works Appropriations Committee.

Evins said he had offered TVA Chairman Aubrey Wagner a hearing before his committee on legislation to adjust the agency's repayments to the treasury.

18. A 62-year-old East Bend woman, Nell B. Hall, was killed when she lost control of her car on N.C. 67 seven miles north of Booneville. Troopers said she was thrown from the vehicle when it struck a tree.

A pedestrian, John Milton Council, 21, of Rt. 1, White Oak, was killed when a car ran over him on rural road 1302.

Jimmy Ray Crane, 50, of Rt. 4, Marshall, was killed when his car left a rural road near Weaverville in Buncombe County and struck a tree.

Does your ring slip off your finger easily—or does it hopelessly get stuck below your knuckle during the days of the pre-menstrual and menstrual period? It may tell whether you are retaining fluid in the system—body-bloating fluid that often builds up due to overtiredness, stress during the menstrual stages. Amazing new X-PEL "Water Pills"—a gentle diuretic—helps you lose as much as 5 pounds of this water-weight gain, and helps to relieve body-bloating puffiness when body-water retention "swells" your waist (thighs, tummy, legs, arms). # Old Capital Of Hue Slowly Edging To Normal

**HISTORICAL SETTING** — Ancient guns once guarded the Citadel at Hue, there, and young ladies come to see the guns. (UPI Telephoto)  
Now a S. Vietnam soldier is on watch

**HUE, South Vietnam (UPI)**—Six months ago this former imperial capital of Vietnam trembled at the immediate prospect of capture by advancing North Vietnam divisions.

Hue then was the object of a drive that already had rolled over Quang Tri City 32 miles north and several artillery bases within earshot of Hue itself.

During the day, refugees and fleeing soldiers clogged the streets and two big bridges leading south over the Perfume River. At night, aerial flares glowed over the mountains to the west and the thunder of American B52 heavy bombers made buildings shudder.

Now it almost seems as if those things never happened. Hue is tentatively but steadily edging back to normal. A big factor in restoring normalcy was the recapture of Quang Tri City and the bases west of Hue.

**No Artillery Threat**  
The South Vietnamese 1st Infantry Division, based at Hue, has regained all the territory lost west of the city. One of these was artillery base Veghel, 15 miles southwest, captured by the North Vietnamese on March 26, four days before the Communist offensive went into high gear.

The recapture of Veghel puts all the North Vietnamese artillery out of range. This includes, for all practical purposes, the formidable Soviet-built 130mm gun.

Hue now enjoys security from bombardment. No artillery has hit the city or fallen within the walls of its great brick 19th-century citadel in more than a month.

Street markets thrive. Women in conical straw hats and black pajamas or varicolored blouses and slacks and plastic sandals sell everything from gasoline to lottery tickets.

About 1,000 citizens of Hue who were rounded up in the scary early days of the offensive on suspicion of Communist sympathies have quietly been released.

The University of Hue is about to reopen. A number of its professors and students were among those held in preventive detention.

## Find No Bombs In Ship Search

**LONDON (AP)** — "Absolutely nothing" has been turned up in the search for bombs aboard 29 freighters owned by the Cunard Line after an extortion threat was made, a company spokesman said.

An unidentified extortionist demanded \$1 1/2 million Thursday in exchange for information on which of the company's freighters a bomb allegedly had been planted.

The line alerted Scotland Yard and police on five continents, including the FBI.

A telephone threat was received by Cunard's London office last May 17 saying that the firm's flagship, the Queen Elizabeth 2, would be blown up unless \$350,000 was paid.

No bomb was found aboard the liner and a man was arrested the next month in New York and charged with the extortion attempt.

**Residents Less Fearful**  
"For the last four months I was scared that a second Tet offensive would come," said Le Van Truc, 53, a businessman with vivid memories of Tet, 1968, when Communist forces captured much of Hue and held it for weeks of all-out warfare and mass executions.

"I was afraid there would be terrible murders and the Communists would bury people alive," Truc said, sipping a glass of dark coffee. "Now the people living in my area are very happy."

"I am sure the Communists won't be able to launch a heavy attack on Hue now because their strength has been broken for good."

Tran Van Phuoc, 72, a farmer

at the village of Phong Dien, Tri, had two soldier sons killed in action in the past few months. These days he joins a crowd of military dependents at weather-faded government buildings in Hue to receive 14,500 piasters (\$28.50) for each of the dead boys every three months.

**Growing Confidence**  
"I do not think the Communists can recapture Quang Tri or take Hue," Phuoc said. "All their forces were destroyed."

These statements could be premature or optimistic. But the North Vietnamese Army (NVA) has been badly hurt.

More important, the NVA has lost the bases it needed to launch an attack on Hue.

One American official here said, "Right now the NVA would be hard-put to get in here quickly. The ARVN (Army of the Republic of Vietnam) is fanned out over the approaches. "We don't want to gild the lily, but the leadership in Hue feels pretty confident now about the city's safety."

Hue is taking on more of its old atmosphere as a center of books and urban beauty. The place where the first two presidents of North and South Vietnam, Ho Chi Minh and Ngo Dinh Diem, respectively, were educated.

## Get Credit For Apollo Launch

**CHICO, Calif. (UPI)**—Up to 95 science students will get university credit for watching the launch of Apollo 16 scheduled from Cape Kennedy Dec. 6.

The special class is being offered by the California State University to send the students to the Cape in a flying classroom. They'll be given lectures on the way to watch the moon shot and on the way back will fly over parts of Arizona and New Mexico where geological features are similar to those of the moon.

## Rat Knocks Out Fastest Trains

**TOKYO (AP)** — The world's fastest trains have fallen victim to a rat.

The rodent gnawed through an electric cable Sunday and caused a short circuit that knocked out a signal system on the superexpress route between Tokyo and Osaka.

The Japan National Railway halted 12 of the 100-mile-an-hour express trains for 30 minutes while workers repaired the cable.

Maggie is now employed at Tom's Restaurant, West End Circle. She would like to invite all of her friends to stop by and visit.

Now you can find Olga lingerie foundation At Brody's DOWNTOWN PITT PLAZA

## Two New TV Westerns Said Worth Inspecting

By JAY SHARBUTT  
AP Television Writer  
**NEW YORK (AP)** — Two new television Westerns are well worth inspecting this year, but you'd better have a friend addicted to checking program listings. The shows aren't weekly events.

The only thing one can safely say about "Hec Ramsey" and "Kung Fu" is that the former appears once or twice a month on Sunday at NBC and the latter once a month on Saturday at ABC.

The networks say four "Ramsey" and three "Kung Fu" episodes are finished. But ABC says no decision has been made yet on Fu's future. NBC is waiting to see if "Ramsey" star Richard Boone wants to do more shows and if the ratings warrant it.

The indecision is maddening because both shows are pretty good.

"Kung Fu" checked in last Saturday night. It starred David Carradine as a wandering Western mystic who carries a week's supply of profundity but no pistol.

Carradine is "Caine" — Kwau Chang Caine, a half-Chinese, half-American graduate of a Chinese school where kung-fu is taught. Kung-fu is a blend of philosophy, judo and karate. The students are told never to use it except for peace

of mind or dire emergency. Caine has come West with a price on his head — \$10,000 alive, \$5,000 dead. The bounty was posted by a Chinese emperor angered because Caine had to kill a royal nephew in self-defense.

He meets a young boy whose father has been slain by marauding Indians who also carried off his mother. Caine and boy run into baddies on the trail who suspect they are carrying cash.

Threats ensue. Caine could kung-fu them, but a film flashback brings the advice of the headmaster of his old school: "The supple bough does not contend against the storm, yet it survives."

And so forth. It sounds just awful, but the show has a stately, stilled Oriental charm about it that works if the viewer is willing to accept the mystic spirit.

"Hec Ramsey," which aired Oct. 8 and returns Oct. 29, features Boone as a sardonic, shaggy 1901-model lawman moving from the code of the Old West to scientific detection in New Prospect, Okla.

His intuition and a primitive crime lab help solve a stock detective saga about the apparent suicide — it really was murder — of a poor rancher believed to have killed his wife.

The plot was routine, but the

dialogue better-than-average. And Boone, who could put life into a reading of the Dow-Jones report, had good support from colleagues cast in stock roles.

About the only real gripe one could find with "Hec Ramsey" and "Kung Fu" is that both had young, pretty widows to tenderize the proceedings.

Young, pretty widows are a glut on the Western market and should be replaced with guitars or something.

Easy to understand information about no-fault insurance.

## If you think a threshold is something to carry a bride over, you're in the same boat with a lot of people who don't understand no-fault automobile insurance.

An understanding of the term "threshold" is most essential to an understanding of no-fault automobile insurance.

Why? Under the present system in North Carolina, a person injured in an automobile accident has the right to sue the person responsible for his injuries and collect for all his damages, including such intangible damages as pain and suffering.

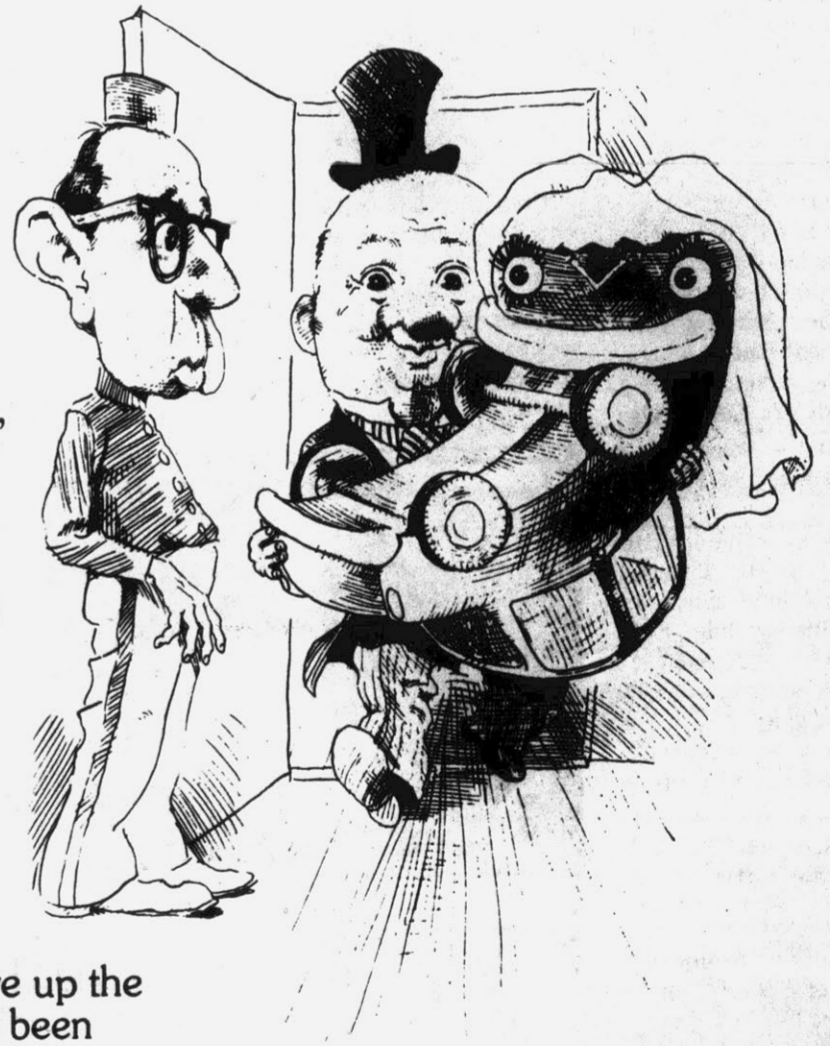

No-fault insurance would eliminate many of the suits that result from traffic accidents, thus reducing the cost of settling claims and the cost of the insurance.

However, most people do not want to give up the right to collect for damages when they have been seriously injured in automobile accidents.

So to provide for quick and convenient payment of small claims and still preserve the right of the seriously injured person to collect for damages, most no-fault insurance plans specify a threshold of loss, which, when exceeded permit the injured party to sue in order to obtain compensation for pain and suffering.

The no-fault insurance plan submitted to the Governor's Auto Insurance Study Commission by Independent Insurance Agents of North Carolina contains a threshold provision. Under our plan, a seriously injured person can sue to collect damages for pain, suffering, mental anguish and inconvenience due to bodily injury, sickness or disease if medical expenses resulting from the accident exceeded \$1,000. An injured person also can sue for damages if the accident causes permanent disfigurement or there is permanent injury and for certain types of serious injury.

The threshold provision is one way of establishing what is a serious injury and what isn't. It is an important part of a no-fault insurance plan because it serves to eliminate much of the cost of settling many insurance claims while preserving the right of the seriously injured to be fully and adequately compensated.

# Stock And Market Reports

NEW YORK (AP) — Stock prices took another turn for the worse today, heading into a fourth straight day of declines. Today's losses, however, appeared less deep than those suffered last week.

The 11:30 a.m. Dow Jones average of 30 industrial stocks was down 1.58 to 928.88. Trading was slow, and declines held a 541-to-497 lead over advances on the Big Board with 1,432 issues traded.

The New York Stock Exchange index of some 1,400 common stocks was down .05 to

59.05, while at the American Stock Exchange the price-change index was off .01 to 25.79.

General Motors, hit by strikes at three plants, was off 1/4 to 74 1/2.

Most active on the Big Board was Pacific Petroleum, down 3 1/2 to 40 1/2. Stock and oil analysts were left without any immediate explanation for the sudden activity and stiff drop.

RCA, which announced higher quarterly earnings recently, was up 1/8 to 33 1/2. Two stocks hard hit last week made comebacks attributed by analysts to "bargain hunting," as Polaroid gained 3 1/2 to 11 1/2, while Amerrada Hess was up 1/4 to 41 1/2.

RALEIGH (AP)—(NCDA)—North Carolina's hog markets are mostly steady today with instances of 25 cents lower. Tops of 27.50-28.50 at Wilson; 28.75 Clinton, Fayetteville, Dunn, Elizabethtown, Pink Hill, Pine Level, Chadbourn, Ayden and Laurinburg; 27.25-28.25 Kinston, New Bern, Benson and Lumberton; 26.50-27.50 Bethel; 26.25-27.75 Tarboro; 27.00-28.00 Siler City and Denton; 28.50-29.00 Rocky Mount; 28.50 Mt. Olive and High Falls; 28.00 Salisbury; 27.75-28.50 Whiteville.

RALEIGH (AP)—(NCDA)—North Carolina hens: Prices stronger on heavy type. Supplies of heavy type adequate and demand fair. Light type are too few to released prices. Heavies, at farm, 15 1/2 cents per pound. North Carolina f.o.b. dock broilers: Prices steady. Supplies adequate and demand fair to good. Weights irregular but mostly desirable.

**JOINS BOARD**

DURHAM, N.C. (AP) — Former associate editor of the Charlotte Observer David E. Gillespie has joined the senior staff of the Southern Growth Policies Board, organized to seek solutions to growth oriented problems common to 12 member states.

# No Decision On Repaying

DURHAM, N.C. (AP)—Former Democratic presidential candidate Terry Sanford says no decision has been made on whether to pay back the \$300,000 loan from a tobacco heiress that financed his campaign.

Sanford, president of Duke University, received the loan from Mrs. Anne Reynolds Forsyth, a member of the Reynolds tobacco family. Sanford ran unsuccessfully for the democratic presidential nomination in the North Carolina primary.

He said in a recent interview that some decision will have to be made on whether the loan will be repaid or whether Mrs. Forsyth will have to declare it a gift.

Guilford Waddell III, Sanford's business manager, said the campaign was "planning on giving her whatever was left out of the campaign."

Sanford's bookkeeper, however, refused to disclose how much of the loan is left.

# Obituaries

**Adams**  
Funeral services for Mrs. Beulah Mae Adams will be conducted tonight at 7 p.m. at Phillips Brothers Mortuary Chapel by the Rev. F. C. Mitchell. Burial will be Tuesday morning in Brown Hill Cemetery.

Mrs. Adams is survived by her husband, David Lee Adams of the home; a son, Anthony Adams of the home; her mother, Mrs. Jean Smith of Greenville; three sisters, Linda, Carolyn, and Brenda Smith, all of Greenville; a brother, Lennon Smith of Greenville.

**Forbes**  
Mrs. Hattie Forbes of 705 Tyson Street here died Sunday night in Pitt Memorial Hospital. She was the sister of Mrs. Elizabeth McGlone of Greenville. Funeral arrangements are incomplete at Flanagan and Parker Funeral Home.

# Double Shooting At Kure Beach

KURE BEACH, N.C. (AP) — Police Chief Roy Jones reported today he found Mrs. Ann McLean, 26, fatally shot in the chest, lying on a front room couch in her Kure Beach home Sunday morning.

The chief said he found her estranged husband, Ronald McLean, 27, sitting up against the wall, a feet feet from Mrs. McLean, shot in the head. He was taken to a Wilmington hospital in critical condition.

The chief said a Ft. Bragg soldier, Philip Fisher, 21, was found in a car outside the house, also shot. He was taken to the hospital, where his condition was not believed serious.

The chief was continuing his investigation, aided by the New Hanover County Sheriff's Department and the SBI. Tests were to be made to determine whether a pistol found in the house inflicted the wounds.

Less than one per cent

Today's results are based upon personal interviews conducted in approximately 350 scientifically selected localities with 2,650 registered voters out of a total sample of 3,339 respondents. Interviewing was conducted September 29-October 9.

This question was asked: If the presidential election were being held TODAY, which candidate would you vote for — McGovern, the Democrat, or Nixon, the Republican?

The trend in voter preference since the Democratic convention is revealed by the trial heat results reported below. The first measurement showed Nixon leading McGovern 56 to 37 per cent with 7 per cent undecided. McGovern lost strength following the Eagleton incident. The GOP convention gave Nixon a boost, while McGovern's strength remained about the same. In surveys since the GOP convention, however, McGovern has started to close the gap, as seen below:

—Nixon Versus McGovern Trend—		Other %
Nixon %	McG. %	Un-dec. %
Sept. 29-Oct. 9	60	34 6
Sept. 22-25	61	33 6
Aug. 26-27	64	30 6

# Turning Back The Clocks One Hour Will Take Place Oct. 29

NEW YORK (AP) — Americans in 46 of the 50 states will turn their clocks back one hour at 2 a.m. on Sunday, Oct. 29, when Daylight Saving Time officially ends this year.

It was not until 1967 that the U.S. Congress passed legislation requiring that all states observing DST do so uniformly from the last Sunday in April to the last Sunday in October.

# Aim High In Fund Drive

The North Carolina United Fund campaign for this year is underway with aggregate goals for 1972-73 totaling \$15,572,757. According to North Carolina United, headquartered in Charlotte, there will be 70 United Fund campaigns completed in North Carolina. The overall goal, it was noted, represents a six per cent increase over the \$14,687,774 set for last year.

To date, North Carolina United reported, one campaign has already exceeded its goal, several others are at mid-point and nearing completion, and others are about to be started.

The Pitt County campaign, with Karl E. Faser as campaign chairman, is underway and aiming for a goal of \$157,526. With several industries expected to report soon, the campaign has collected to date approximately \$51,186 or 32 per cent of the fund goal.

# Tests Might Affect City's Water Pressure

Fire Chief Ray Smith said today that Greenville residents might experience some change in their water pressure this week as representatives of the Insurance Services Organization make water flow tests on water mains throughout the city.

The tests, according to Chief Smith, are conducted every few years by ISO. The organization, he explained, conducts studies about every five years on the fire fighting and fire prevention capabilities of the local department. Results of the study affect fire insurance rates for Greenville residents.

Chief Smith noted the water main tests would be conducted over a two-day period during the week, possible Tuesday and Wednesday.

In addition to a change in pressure, the tests might affect the clarity of water.

However, the idea was first proposed by Ben Franklin, who pointed out back in the 1700s that it would be smart to save an hour of daylight by "postponing nightfall."

Franklin's towering reputation as a scientist had been so great in America and in Europe, where he had been the first American to receive an honorary degree from Oxford University and was the first American Minister to France, that nearly everybody believes that his proposal of DST was for purely scientific reasons.

Actually he was a lively night owl who loved the ladies, particularly after his wife Deborah died in 1773. Bulova Watch Co. researchers report, and he frequently rose very late in the day. He developed this habit in Paris at the French Court dominated by the fun-loving Queen Marie Antoinette. Not unnaturally, Franklin regretted that he thus missed so many of the summer's daylight hours.

Franklin's suggestion was not accepted until World War I—and then only as a wartime measure—when various nations, including the United States, legislated Daylight Saving Time during the summer to cut electric power costs in war industries and to make blackouts more effective.

Before the 1967 Uniform Time Act became effective, only 18 states observed DST on a statewide basis, 18 other states observed it in some manner during the summer, and 14 states did not observe it. Of the 130 U.S. cities with more than 100,000 population, 71 observed DST and 59 did not.

When the federal act became law all states but Arizona and Hawaii accepted DST, but it has since been dropped by Michigan and Indiana.

In 1968, DST was defeated in a popular referendum in Michigan by only 488 votes. Many observers credited farmers and their wives with the defeat. This defeat encouraged an anti-DST campaign in nearby Indiana, which like Michigan, has a large farming population.

Some Michigan farmers' wives claimed that their husbands would be more irritable in the morning if they got up an hour earlier, the researchers reported, and that they would be excessively tired at night. Many farmer husbands, on the

other hand, pointed out that "changing the clock" wouldn't change the time the chickens and the cows woke up and needed tending. In addition, some rural Fundamentalists still challenge Daylight Saving Time as a sacrilegious "tampering with God's time," thought up and promoted by Godless city slickers.

But for most Americans today, Daylight Saving Time is a common sense way of making better use of the longer hours of daylight from spring through fall.

However, despite the federal law, cities and other communities are perfectly free to observe or not observe DST in any way they prefer. There are communities, for example, that observe what is called "Wildcat Daylight Saving Time" during the summer months without any formal legislation, and others, in Alaska, that have their clocks running two hours ahead of Standard Time all year round. Few of these communities are served by regularly scheduled trains, planes or buses.

# Top Country Music Awards Set Tonight

NASHVILLE, Tenn. (AP)—Country music will honor its best tonight in a televised presentation of the annual Country Music Association awards from the stage of the famed Grand Ole Opry House in Nashville.

Glen Campbell, the Delight, Ark., guitar-picker and singer, will host the show which will be televised live on CBS beginning at 9 p.m. (CDT).

Loretta Lynn, nominated for awards in five categories, is the first woman to be in the running for the Entertainer of the Year award—considered the top prize in the 10 categories.

Also nominated for the top entertainer award are Merle Haggard, Freddie Hart, Country Charlie Pride and Jerry Reed. Haggard and Jerry, country music's first nationally recognized black artist, are former winners of the award.

Pride is in the running in

## Davidson Offense Finally Clicks Against Furman

By MARSHALL JOHNSON  
Associated Press Writer

Nobody really expects Davidson, now a surprising third in the standings, to win the Southern Conference football championship, for the Wildcats—after two nonleague games—close out the season against William and Mary, Richmond and The Citadel.

But Coach Dave Fagg, in the wake of the Wildcats' wild 51-35 victory Saturday over Furman's Paladins that boosted their league record to 2-0-1, says "I think our offense has finally come of age."

The triumph left Davidson trailing East Carolina's unbeaten Pirates, whose 27-21 victory over The Citadel's Bulldogs was their fifth in a row over-all and fourth in league play, and William and Mary's Indians, who are 2-0 in the conference.

William and Mary dropped a

21-17 nonconference decision to Vanderbilt, one of four defeats league teams suffered at the hands of outsiders. Richmond's Spiders were mauled by Southern Mississippi 34-9 and Virginia Military's Keydets were routed by Virginia 45-14.

While technically Appalachian State's 41-7 shellacking at South Carolina was to a non-league foe, the game counted in the conference standings for the Mountaineers, who finished 0-4-1.

Quarterback Scotty Shipp completed 22 of 30 passes for 309 yards and two touchdowns and ran for a third, and Dave Ingold scored twice—once on a 55-yard punt return—as Davidson three times came from behind against Furman. Davidson had 560 yards in total offense.

"The turning point in the game was when we held them after the second half kickoff and took the ball in for scores

the first four times," said Fagg. "That was as good an exhibition of ball control as I've seen out of a Davidson team."

Furman Coach Bob King said "we tried everything we could to stop them, but nothing worked. We scored enough points to win, but we couldn't stop them."

Donnie Griffin ran 22 times for 169 yards and one touchdown and Mike Bartik caught a pair of scoring passes from Charlie Elvington for the Paladins. Woody Montgomery kicked a school-record three field goals for the Wildcats.

East Carolina ran up a 20-0 halftime lead over The Citadel, but Coach Sonny Randle said "we stunk the joint up. I can't

explain why we played the way we did. It was not one of our better performances. We knew at halftime we had to come back and play ball some more, and we did not do it."

Quarterback Carl Summerell ran for 82 yards and one touchdown and hit four of nine passes for 67 yards and another, while Carlester Crumpler gained 131 yards on 38 carries and scored once for East Carolina. Freshman Rick McLeste kicked two field goals.

All-Southern quarterback Harry Lynch completed 13 of 29 passes for 206 yards and all three Bulldog touchdowns, but Coach Red Parker thought the turning point was a lost fumble at the East Carolina 13.

"They were satisfied to go with Crumpler and let Summerell keep," said Parker. "But if we had scored that time, the game would have been different. They would have had to come out."

Appalachian, which hasn't won since its opening game, was down 34-0 at South Carolina before Steve Loflin hit Clinton Bradshaw on a nine-yard scoring pass in the final quarter. The Mountaineers fumbled six times, losing one, and had two passes intercepted.

It was still another fourth quarter defeat for William and Mary, which led at one time 14-0 on Bill Deery's 59-yard run and his 28-yard pass to David Knight. Terry Regan gave the

Indians a 17-14 lead with a fourth period field goal, but they couldn't hold it.

"We're just going to have to rekindle," said W&M Coach Jim Root. "We've still got a lot to play for... a conference championship, a winning season."

Southern Mississippi turned loose Doyle Orange and Buddy Palazzo on Richmond after the Southerners had used two interceptions and a fumble recovery for three touchdowns. Palazzo passed for 163 yards and two touchdowns, Orange ran for 143 yards and two scores.

The Spiders pulled to within 14-9 at halftime on Phil Burkhalter's nine-yard pass to Billy Harris, but Eugene Byrd in-

tercepted one of his passes and ran it back 30 yards to start the rout.

"They're a good football team, one of the really best around, and we're not very good right now," said Spider Coach Frank Jones. "We can't seem to make us go."

Freshman quarterback Scott Gardner came on for Virginia early in the second period, ran for 61 yards and two touchdowns and passed for 186 yards and two more in Virginia's romp over VMI, which now has lost 16 in a row. Two Gerard Mullins punt returns didn't help the Keydets.

"I think we played a good football game, but we certainly have room for improvement,"

said Virginia Coach Don Lawrence. VMI's Bob Thalman said "we were up coming into this game, but Virginia just took it away from us superbly."

## Week Of Work Lies Ahead Of ECU Pirates

By WOODY PEELE  
Reflector Sports Editor

There used to be an old saying during the barnstorming days of early aviation: Any landing you can walk away from is a good landing.

And Coach Sonny Randle of East Carolina University might well apply that to last Saturday's 27-21 victory over The Citadel.

The Pirates just did get by the Bulldogs' second half effort, which saw them striking for the go-ahead score as the horn went off. Fortunately Buddy Lowery and Joe Tkach were dogging Citadel quarterback Harry Lynch down to the ground before he was able to get that final pass off.

"We just broke down," Randle said of his team's second half effort. The Pirates had played well during the first half, collecting 20 points while holding The Citadel scoreless and with hardly any offense, just a mere 66 yards.

But in the second half, "we made some glaring mistakes," Randle said. That coupled with the fact that the Bucs "just ran out of gas" set

the stage for The Citadel's big comeback that almost pulled it out.

"We are as in as fine a condition as any team in this part of the county," Randle pointed out, "So when you do run out of gas, you've got to look for a reason." That reason, Randle believes, was the lingering effects of a bout with the flu by over a dozen members of the team.

"We never doubted that Lynch was a great quarterback," Randle said. "He had an excellent afternoon. He was the reason they were fourth in the nation in total offense last year, and we know once they got their offense going, it would be hard to stop."

Randle also pointed out that the Bucs had played the way they had wanted to for the past four weeks, and that a bad game had to show up sooner or later. "Fortunately we were able to have it and still win. But from the comments of some of the people around, you'd have thought we lost it."

The Pirates didn't pass at all in the second half, keeping the ball strictly on the ground. "We felt we were in command, and we wanted to control the ball," Randle said. "We didn't want to do anything foolish, and this dictated staying on the ground more than we would normally."

Randle also feels that the defensive publicity of the past few weeks with the Pirates ranked atop the nation in rushing and total defense is over, but this may not prove true. The Pirates gave up only 80 yards on the ground and probably will hold to first or second in the category. Their total offense should also leave them high in the standings.

"I hope the bubble has burst," Randle said. "Now maybe everyone will stop reading their clippings and go to work."

The work will have to be done this week. The Pirates face N.C. State in Raleigh on Saturday, and if Randle termed The Citadel's offense explosive, he might call State's atomic. They have one of the nation's leading passing attacks, and the secondary will have to be ready for the pass again if the Bucs are to pick up their sixth straight this year.

## Upstarts Boast 2-0 Edge Oakland Set On Home Grounds

By KEN RAPPOPORT  
Associated Press Writer

OAKLAND (AP) — The Oakland A's were home today with a 2-0 lead in the 1972 World Series with hopes of polishing off the Cincinnati Reds with the same combination of pitching, power and fielding expertise that won the first two games.

Gene Tenace's slugging and Vida Blue's golden arm in relief won the opener of the baseball classic 3-2 in Cincinnati Saturday. And the upstart A's made it two straight Sunday with a 2-1 triumph behind Jim Hunter's right-handed brilliance and a sparkling defense.

"I'm not ready to panic yet," said Cincinnati Manager Sparky Anderson, whose National League team was favored to beat the American League champs. "I'm close, though."

Dick Williams, the Oakland manager, was naturally happy about taking a commanding lead back to his cozy home park, but he is an uneasy front-runner in the best-of-seven series.

"We'd had some outstanding pitching, sure," said Williams. "But, heck, they've hit some balls real hard and we've had to come up with good fielding plays to stop the Reds."

Standing-room-only crowds for the first two games—including a Riverfront Stadium record 53,224 Sunday—saw the kind of baseball Williams was talking about.

They didn't have too much to cheer about, though, because the A's took an early lead on Hunter's run-scoring single in the second inning and Joe Rudi's bases-empty home run in the third off Cincinnati starter Ross Grimsley.

Hunter, the A's ace, protected that 2-0 lead until the ninth when the home team gave its fans some action. Tony Perez opened the final inning with a hard single to left center, then Denis Menke launched a tremendous drive that Rudi collared while leaping and banging into the left field wall.

Rudi clutched the baseball at

the tip of his glove, supported himself and fired a bullet back into the infield. The relay almost nailed Prez, who strayed far off first.

It was plainly the play of the game, although the A's had another gem for the Oakland fans to savor when Mike Hegan, defensive replacement at first base, knocked down Cesar Geronimo's line drive for the second out of the inning.

Williams said that Rudi's was the best catch he'd ever seen in a World Series game, giving it a better rating than Willie Mays' much-publicized catch of a ball hit by Vic Wertz in the 1954 classic.

The game was still in doubt though, because the Reds had a runner on second base after Hegan's diving stop of Geronimo's knee-high drive to his right.

Hal McRae hit the fourth straight shot off Hunter, a single that drove home Perez with the Cincinnati run. It

brought the whooping fans to their feet and also stirred Williams from the dugout. He wanted Rollie Fingers to pitch to pinch-hitter Julian Javier.

Oakland's fine reliever retired Javier on a harmless foul ball to Hegan. The reserve first baseman clutched the ball and hugged it to his chest while the A's rallied around Fingers and pumped hands. The scene was similar on Saturday when the American League champions beat the favored National Leaguers with the same type of

baseball.

Tenace, who only hit five home runs all season, hit two and drove in three runs in the opener. His first homer gave the visitors a 2-0 lead. Tenace then belted a line-hugging drive into the left field seats to break a 2-2 tie.

Anderson, hoping to reverse the trend, will start Jack Billingham against John "Blue Moon" Odom in the third game of the Series at the Oakland Coliseum Tuesday night. Don Gullett was named by Anderson to

oppose Ken Holtzman in the fourth game. The fifth game will also be played in Oakland, if needed, and the sixth and seventh will go back to Cincinnati next weekend if necessary.

All games in Oakland start at 8:30 p.m., EDT. All will be televised nationally.

# Dolphins Lose Griese, Find A Winner In Morrall

By BRUCE LOWITT  
Associated Press Sports Writer

"The mark of a good football team," Miami Coach Don Shula said, "is what it can do under adverse conditions—and you can't get more adverse than having a quarterback out there lying on the field."

It was Bob Griese who was lying out on the Orange Bowl's

artificial turf Sunday, the victim of a Deacon Jones tackle that resulted in a fractured leg and dislocated ankle which will likely keep the Dolphin quarterback out of the rest of the National Football League season.

The crowd of 80,000 was silent as the stretcher was brought onto the field to carry off Griese. But it was cheering wil-

dly a few minutes later when backup quarterback Earl Morrall, doing the kind of thing he's been paid to do the last few years, threw two touchdown passes to carry the Dolphins to a 24-10 victory over the San Diego Chargers.

In Sunday's other games, Dallas silenced Baltimore 21-0, Pittsburgh beat Houston 24-7,

the New York Jets blasted New England 41-13, the New York Giants slipped past San Francisco 23-17, Los Angeles walloped Philadelphia 34-3, Washington slammed St. Louis 33-3, Cincinnati stung Kansas City 23-16, Chicago humbled Cleveland 17-0, Minnesota overhauled Denver 23-20, Oakland defeated Buffalo 28-16 and Atlanta

topped New Orleans 21-14.

In tonight's game, the Green Bay Packers face the Lions in Detroit.

Morrall completed eight of his 10 passes, two of them for touchdowns of 18 yards to Howard Twilley and 19 yards to Paul Warfield. Before he'd come on, Miami and San Diego had traded field goals and safe-

ty Dick Anderson had put the Dolphins on top 10-3, racing 35 yards with a recovered fumble for a score. The Chargers' only touchdown came on a three-yard John Hadji-to-Cid Edwards pass in the fourth quarter.

Craig Morton of Dallas had what he called "my best day in quite a while" as the Cowboys smothered the Colts.

He completed 21 of 30 passes—10 of them in a row in one stretch—for 279 yards. Among them were touchdown strikes of 17 yards to Calvin Hill and 44 yards to Ron Sellers. Hill also punched over from one yard out for a touchdown.

Pittsburgh found itself trailing Houston 7-0 thanks to Ward Walsh's blocked punt, which he recovered for a touchdown, then Franco Harris cranked up the Steeler machine.

"Franco did some things on his own that picked us up," said Coach Chuck Noll after the rookie fullback ripped through the Oilers for 115 yards, one of them good for the go-ahead touchdown. Terry Bradshaw passed 11 yards to Frank Lewis for Pittsburgh's second touchdown and ran eight yards for the final one.

New England Coach John Mazur figured the Jets would "try to ram the ball down our throats"—and that's exactly what New York did. Emerson Boozer and John Riggins combined for 318 yards and four touchdowns on the ground, outdoing the Patriots' entire offense.

The Giants' winning drive in the closing minutes was triggered by Pete Athas' interception and climaxed by Charlie Evans' four-yard run. San Francisco got a pair of touchdowns on John Brodie-to-Gene Washington passes covering 10 and four yards. But the 49ers may have lost Brodie for a while. He suffered a severe ankle sprain in their futile last-minute drive.

The Rams could do virtually nothing wrong against the Eagles. Bob Thomas, Willie Ellison and Jim Bertelsen plowed in for short-yardage scores, Roman Gabriel passed 19 yards to John Love for a touchdown and David Ray booted two field goals.

Charley Harraway slammed

over for a pair of touchdowns and Curt Knight kicked four field goals to lead the Redskins' romp over St. Louis.

Coach Paul Brown said his Bengals "have come of age," after they rallied twice from 13-point deficits to defeat the Chiefs. Quarterback Ken Anderson was the chief architect of the victory, throwing touchdown passes of 65 yards to Essex Johnson and seven yards to Steve Thomas. Horst Muhlmann added field goals of 46, 13 and 16 yards.

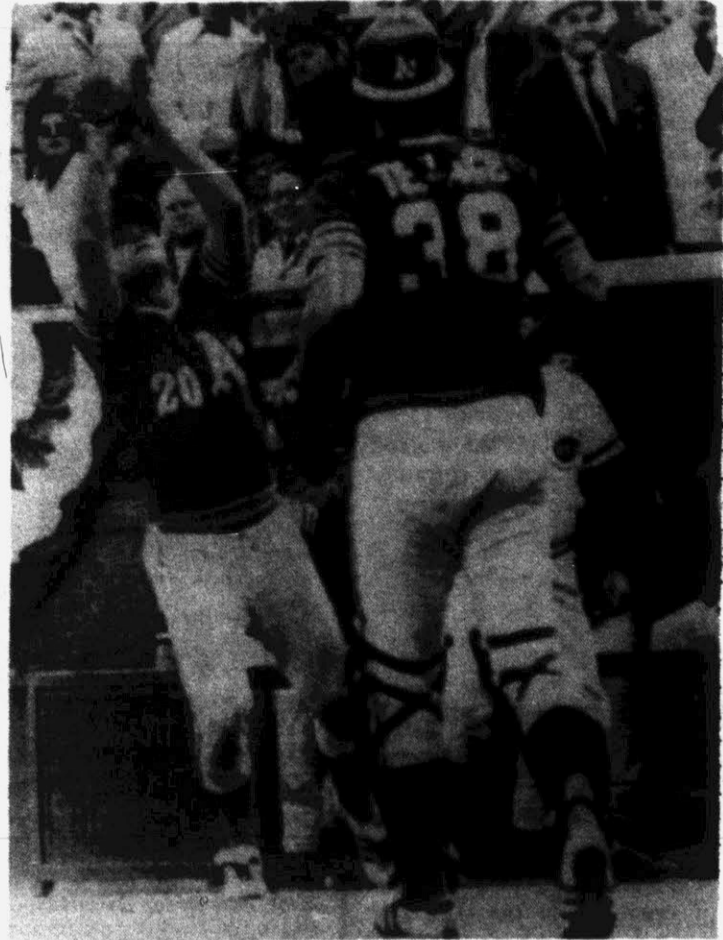

Abe Gibron gave Bobby Douglass the game ball for Chicago's victory over the Browns—and the Bear quarterback handed it right back to Gibron. "It was Abe's first victory as head coach," Bobby explained. "I think he deserved it." Douglass deserved it, too, though. He passed 41 yards to Earl Thomas for Chicago's first touchdown, then raced 57 yards

for the other one.

Persistence paid for Fran Tarkenton and the Vikings. Trailing Denver 20-16 in the closing minute, he twice tried to connect on passes to Gene Washington. And twice he failed. But on the third try, Washington hauled it in for a 31-yard game-winning touchdown with just 17 seconds to go.

The Raiders didn't wait quite so long to turn things around. "We were just mad at ourselves at halftime and came out and did something about it," Coach John Madden said after Oakland, trailing 13-0 blasted the Bills the rest of the way.

The Falcons fumbled twice to give New Orleans the chance to grab a 14-0 lead. Then Bob Berry threw for three touchdowns—five and 10 yards to Jim Mitchell and the 22-yard winner to Ken Burrow.

Ended With A Pop-Up

THE GAME'S OVER—Oakland A's Mike Hegan (20) catches pop-up of Julian Javier to end the second World Series game at Cincinnati Sunday. The A's defeated the Reds 2-1. At right is A's catcher Gene Tenace. (AP Wirephoto)

## Might Be Last Year For Stan

By ENRICO JACOMINI  
BUCHAREST (AP) — Stan Smith led the United States to victory in the Davis Cup for the fifth straight year and then said it might be his last appearance in the tennis tournament.

"I am overwhelmed by my victory here," the big star from Sea Pines, Calif., said Sunday after beating Ion Tiriac 4-6, 6-2, 6-4, 2-6, 6-0 and pacing the Americans to a 3-2 victory over Romania in the final.

"But if the format of the Davis Cup is not changed next year I just cannot see myself doing it again."

"I figure the four U.S. players involved in the Davis Cup for the American team this year have potentially lost \$150,000 in tournament money. That is big money."

Smith, however, said it would be very sad if he leaves the U.S. team.

"I am an avid backer of the Davis Cup. It gives you a feeling those who have not been in it cannot understand. It is like competing in the Olympics, you are the best in your sport. I hope the U.S. Federation can work out a suitable program for next year."

Smith said this referred only to financial problems.

Smith said his immediate plans were to leave the Army in a few weeks and then take a long rest.

After winning both singles against Ilie Nastase and Ion Tiriac and starring with Erik Van Dillen in the U.S. doubles triumph, Smith emerged as the No. 1 man in 1972 tennis.

"I should be extremely happy, but I am also upset. I'd rather never be in this situation again. The Romanian crowd did not bother me but the line judges did. It was the worst officiating I have ever had," Smith said.

Smith's victory over Tiriac gave the Americans a decisive 3-1 lead. Nastase, who had failed earlier to find his winning form, pulled one back for Romania by downing Tom Gorman of Seattle, Wash., 6-1 6-2 57-10-8.

## Dakin Wins In Bristol Drag

BRISTOL, Tenn. (AP)—Pat Dakin, driving the Repp and Dakin fueler special, clipped off a quarter-mile at 6.45 seconds Sunday to win the top fuel division of the 6th annual IHRA Drags at Bristol International Dragway.

Dakin, of Dayton, Ohio, defeated the Graham and Groom entry from Oklahoma City, Okla. His finish line speed was a sizzling 217 mph.

Don Schumacher of Park Ridge, Ill., won the funny car class of the three-day meet by defeating Shirl Greer of Warner Robins, Ga., in the finals. He was clocked through the trap at 217.91 mph just 6.62 seconds after leaving the finish line.

In the pro stock class, Don Carlton of Lenoir, N.C. defeated the Sox and Martin entry from Burlington, N.C., with a 9.39-second e.t. and 146.10 mph finish.

## Catfish Recalls When A Dream Seemed Ended

By RALPH BERNSTEIN  
Associated Press Sports Writer  
OAKLAND (AP) — Jim "Catfish" Hunter remembers lying in a hospital bed and crying: "I'll never play baseball again."

Hunter turned his memory back nine years and recalled looking at his shattered right foot, the little toe gone, the one next to it useless and the rest broken.

It all came back to the 26-year-old right-handed pitcher of the Oakland Athletics after he beat the Cincinnati Reds 2-1 Sunday, giving the A's a 2-0 lead in baseball's World Series.

Hunter relived that day in 1963, when he and his older brother, Pete, went hunting rabbits and ducks in the woods

near their Hertford, N.C., home. The two walked side-by-side when Pete's gun accidentally discharged.

"Damn you came close to my foot," Hunter said he told his brother. "Then I looked down and saw holes in the boot everywhere. There was blood, blood. I said to Pete, 'Damn, damn, damn, you shot me.' Then Pete fainted."

Hunter refused to quit the baseball career he wanted even more than his childhood dream of being a game warden. He recovered from the shotgun accident to pitch again. He led his high school team to the North Carolina state championship, but pro baseball was wary.

It was at that time that

Charles O. Finley also was hunting. He was looking for young players for his Athletics, then based in Kansas City. Finley sent scout Clyde Klutz to watch the strapping farm boy in Bear Swamp, near Hertford.

The scout thought enough of Hunter to send for Finley.

The Athletics signed Hunter for a \$75,000 bonus and never had to regret the trip to Bear Swamp, a community of some 2,500. Within three years, despite no minor league experience, Hunter was an American League all-star, a guy who pitched the 11th perfect game in the history of baseball.

After he explained that he got the nickname "Catfish" when his parents found him fishing for catfish when he should have been in school, the 6-foot, 192-pounder talked about Sunday's game.

He pitched shutout ball until the ninth when the Reds reached him for a run and had the tying runner at first base with two outs. Oakland Manager Dick Williams called for reliever Rollie Fingers.

Hunter didn't want to leave the game. He asked the manager to let him finish. Williams, however, felt that Hunter had enough. It had taken a spectacular catch by Joe Rudi against the left field wall and an excellent play by first baseman Jim Hegan to get the two outs.

Fingers did the job, retiring pinch-hitter Julian Javier to end the game.

Hunter pitched a six-hitter, made a fine play in the field and drove in the first Oakland run with a single.

## Won Honors In Tarboro Play

TARBORO — The East Carolina Ladies Golf Association held their monthly tournament at Hilmer Country Club in Tarboro Friday with 64 people taking part.

Eight of those playing were from Brook Valley, and the following were prize winners: B flight, Sandra Smith, low net; C flight, Jane Worsley, low gross; E flight, Mary Peterson, low gross; Ruth Billica, second low gross.

The next tournament will be November 9 at Johnston County Country Club in Smithfield.

# One Insect Conquering Man's Habitat In Africa

UNITED NATIONS (UPI)—The bleak picture of insects conquering man's habitat is not science fiction—it is happening in tropical Africa and could happen throughout the tropics of the world.

In the vast belt of tropical Africa people are abandoning fertile areas along river banks and moving to less productive regions inland to escape a small, ugly black fly. The fly, named simulium, is the carrier of river blindness, a disease that ravages village populations in a slow and cruel manner.

The fly has made its appearance in a vast African area bordered by the 15th latitude between Senegal and Ethiopia in the North and a line running from Angola to Tanzania in the South. It is also spreading in South America and if there is no concerted effort to control it, experts at the United Nations fear, it may cover the entire tropical belt of the globe.

Its main effort is focused on seven countries in the Volta River basin which the organization says, "contains the worst onchocerciasis area in the world and has a growing problem of depopulation."

"When we enter a village or fly over it, we can usually tell at once if the simulium has struck," James Wright, WHO chief of Vector Biology and

Control, said. "Neglect, dilapidation, lack of care are sure indications that the fly has invaded. In its first stages the disease carried by simulium makes people tired, apathetic, kills their working spirit."

**Tale of Hopelessness**  
If nothing is done, the place will wind up like many other river bank villages. One of them, where the fly took its toll, is described in a WHO study: "Named Arabe, the village is located five miles from the Red Volta River, close to the border between Ghana and Upper Volta. Two hundred people live here. Twenty of them are blind and the others are nearly all suffering from the same disease that could make them blind. Arabe children, often only toddlers, guide blind men who should be in the prime of life. And some years from now, unless they desert the village, these toddlers will themselves be clutching the end of a walking stick and be helplessly led around."

During a brief visit to U.N. headquarters, Wright told United Press International in an interview that more than a million people were infected with the disease in the Volta River Basin alone. "People are abandoning their villages in the fertile river bank areas and resettling 30 miles or more inland to escape the fly," he said. Wright, who is in charge of the anti-onchocerciasis program in the area, estimates that it would take four years to control the fly and 15 years to wipe out the disease if proper financing were obtained. His team is operating with a few small planes and helicopters to explore the vast area as to the spread of the disease, chart it, test insecticides and prepare an all-out campaign to eradicate the fly.

**No Effective Vaccine**  
He explained that simulium poses particular problems since its larvae cling to rocks under river rapids. To wipe them out, the health teams must drop effective insecticides that spread in the water and are carried over the rocks directly above the rapids.

"These insecticides must be potent enough to kill the larvae, and on the other hand rapidly dissipate and lose their toxic effects once they have passed the rapids," Wright said. "Otherwise they will damage life and environment further downriver."

He added that WHO believes it has found two chemicals that fill the bill. No effective vaccine for mass inoculation against onchocerciasis has been found.

Scientists in West Germany, Britain and Canada also are looking for a way to attack the simulium fly ecologically—literally, where it lives—through the use of parasites and predators that might be its natural enemies, through chemical sterilization of males and larvicides to kill its young.

If the actual fight against the disease is successful, a large scale rehabilitation program for the affected populations must be organized and the United Nations Development Program and the Food and Agricultural Organization will be called upon to participate.

The WHO study underlines the need for a broadscale program because the flies can travel distances up to 100 miles "and if a single river is dealt with in isolation, reinfestation will take place quickly and inevitably."

## Superior Court

Judge Winifred T. Wells disposed of the following cases at the September 25 term of Superior Court in Pitt County.

James Walter Lloyd, violation of probation, six months jail.  
Kent Waller, temporary larceny of auto, no pros with leave.  
Kent Waller, hit and run, 60 days jail suspended on payment of \$25 and costs.  
Elmer Willoughby, driving under the influence, 60 days jail suspended on payment of \$25 and costs.  
Donald Ray McNair, forgery, no pros with leave.  
Donald Ray McNair, forgery, two years jail.  
Noah Radford, driving under the influence, 30 days jail suspended on payment of \$100 and costs.  
Chester Williams, discharging firearms into occupied building, pled guilty to forcible trespass, one year jail suspended on payment of \$100 and costs, not operate a motor vehicle for one year, placed on probation for two years.  
Arnold Lee Baker, discharging firearms into occupied building, pled guilty to forcible trespass, one year jail suspended on payment of \$100 and costs, not operate a motor vehicle for one year, placed on probation for two years.  
William Franklin Cannon, speeding, 10 days jail suspended on payment of \$50 and costs and not operate a motor vehicle for 60 days.  
Isaac Lee Whitten, breaking, entering and larceny, no pros with leave.  
Jimmy Williams, leaving scene of accident, no pros.  
Jimmy Williams, driving while license permanently revoked, not guilty.  
Levi Johnson Tyson, public drunk, no pros with leave.  
Leticia Pitt, simple assault, six months jail suspended on payment of \$100 and costs and restitution.  
Mrs. Olive Nichols, fraud, no pros.

Glenn R. Carroll, possession of marijuana, six months jail.  
Glenn R. Carroll, growing marijuana, no pros.  
Bobby Ray Grizzard, driving while license revoked, six months jail suspended on payment of \$200 and costs, probation for two years.  
Jeffrey Sidney Crawford, growing marijuana, no pros.  
Jeffrey Sidney Crawford, possession of marijuana, six months jail for one year.

James Doffer Mathewson, driving while license suspended, six months jail suspended on payment of \$250 and costs, not operate a motor vehicle for two years.

Johnnie L. Cox, false statement, prayer for judgment continued on payment of costs.

Bobby Ray Grizzard, aiding and abetting operating vehicle without registration plates, no pros.

Clarence Roberson, driving under the influence, pled guilty to careless and reckless driving, 30 days jail suspended on payment of \$50 and costs and not operate a motor vehicle for two years.

Arthur Sullins Boone, trespassing, no pros with leave.

Gregory Bryant, breaking, entering and larceny, pled guilty to breaking and entering, five years jail suspended on payment of costs, probation for five years, pay restitution, be at home by 11 p.m. and spend weekends in jail for two months.

Amos Jordan, breaking and entering, five years jail suspended on payment of costs and restitution, spend weekends in jail for two months, be at home by 11 p.m. and probation for five years.

William C. Shiver, breaking, entering and larceny, pled guilty to breaking and entering, five years jail suspended on payment of costs and restitution, spend weekends in jail for two months, be at home by 11 p.m. and probation for five years.

Ricky Williams, breaking, entering and larceny, no pros with leave.

John Williams Jr., hit and run, 10 days jail suspended on payment of \$50 and costs.

John Williams Jr., no operators license, no pros.

Mike D. Vigneauff, breaking, entering and larceny, pled guilty to breaking and entering, three years jail suspended on payment of \$50 and costs.

Dawne Falcons, attempted robbery, 30 days jail.

Dawne Falcons, assault with a deadly weapon with intent to kill, no pros with leave.

Clarence Williams, accessory after fact of assault with deadly weapon, two years jail suspended on payment of \$100 and costs and probation for five years.

Marvin Earl Williams, accessory after fact of assault with deadly weapon, two years jail suspended on payment of \$100 and costs and probation for five years.

Robert Allen Baker, robbery, pled guilty to larceny, 30 days jail suspended on payment of \$50 and costs.

Ruby Edwards, murder, pled guilty to manslaughter, eight to 12 years jail.

## Royal Couple To Visit Belgrade

BELGRADE (AP)—The Yugoslav government says Queen Elizabeth II of Britain and her husband Prince Philip will arrive Tuesday for a state visit which will last through Saturday.

Princess Anne will accompany her parents on the visit, being made at the invitation of President Tito, the government said Sunday.

It will be the first visit of a reigning British monarch to a Communist country.

## 30 Million Sufferers

River blindness, onchocerciasis, does not immediately deprive a victim of his eyesight. Its first symptoms are apathy and general deterioration of health. Then it gradually dims the eyesight and eventually causes total blindness if the victim remains under continued exposure to the fly.

According to an estimate of the World Health Organization (WHO), there are about 30 million onchocerciasis sufferers in the world. WHO is now organizing a multiagency program "to save countless further millions from the torture of the simulium fly" and eventual blindness and hopes that sufficient funds will come from interested governments to complete it.

Its main effort is focused on seven countries in the Volta River basin which the organization says, "contains the worst onchocerciasis area in the world and has a growing problem of depopulation."

"When we enter a village or fly over it, we can usually tell at once if the simulium has struck," James Wright, WHO chief of Vector Biology and

Control, said. "Neglect, dilapidation, lack of care are sure indications that the fly has invaded. In its first stages the disease carried by simulium makes people tired, apathetic, kills their working spirit."

During a brief visit to U.N. headquarters, Wright told United Press International in an interview that more than a million people were infected with the disease in the Volta River Basin alone.

"People are abandoning their villages in the fertile river bank areas and resettling 30 miles or more inland to escape the fly," he said. Wright, who is in charge of the anti-onchocerciasis program in the area, estimates that it would take four years to control the fly and 15 years to wipe out the disease if proper financing were obtained.

He added that WHO believes it has found two chemicals that fill the bill. No effective vaccine for mass inoculation against onchocerciasis has been found.

## Chiang Missed Welcome Rites

TAIPEI (AP)—President Dawda Kairaba Jawara of Gambia arrived in Taipei today for an eight-day state visit to Taiwan, but President Chiang Kai-shek missed the welcoming ceremony.

Chiang apparently skipped the ceremony because of advice from physicians that the 84-year-old Nationalist China leader avoid outdoor activities.

Sources close to Chiang said he is still weak from a cold he suffered last month.

Jawara, accompanied by his wife, was greeted at the Taipei airport by Vice President Yen Chia-kan and Mrs. Yen.

## Band Weekend

CULLOWHEE, N.C. (AP)—High School bands from five states, with more than 3,000 students, are expected to participate Saturday in the third annual Western Carolina University Marching Band Festival.

High school bands from North Carolina, Georgia, Kentucky, Tennessee and Virginia will compete in the festival for trophies.

Bands will be judged on the basis of their playing, marching and showmanship.

## Mrs. McGovern On Trail Again

WASHINGTON (AP)—Eleanor McGovern will be back on the campaign trail again Tuesday after a weekend in the hospital.

The wife of Democratic presidential nominee George McGovern was released from Washington's Georgetown University hospital Sunday after doctors said she had fully recovered from an attack of abdominal pains.

"Any wife in a presidential campaign deserves a weekend in bed now and then," Mrs. McGovern quipped as she left the facility.

Hospitalized last Thursday night, she said she had spent part of her time in the hospital working on a speech she is to deliver at a dinner in her honor at Woonsocket, S.D., Tuesday night.

## New Trends Described

Joe Frankford, director of the Coastal Plains Mental Health Clinic here, spoke on new trends in services for the retarded to the Pitt County Association for Retarded Children Wednesday.

He said that home living and day activity centers will bring some of the retarded back into the more desirable community living environment from institutional settings.

Charles Ross, director of elementary education for the Greenville City Schools, told of the services available for exceptional children in the city schools. Mrs. Ann Harrison explained the pre-vocational program at Third Street School and Mrs. Barbara Luce told of her program of identifying and working with children who have learning disabilities.

A nominating committee to select officers for the coming year was appointed. A publicity committee also was named to bring before the public the needs and potentials of the mentally retarded during the month of November, which has been designated as "National Mental Retardation Month."

## State Employees Finish Seminar

Twenty-nine North Carolina state employees have completed a Management Development Seminar sponsored by the state Personnel Office and the East Carolina University Division of Continuing Education.

The week-long program was held last week in Reidsville. Its purpose was to help participants establish in their respective offices a work climate which encourages the growth, development and effective utilization of the employees.

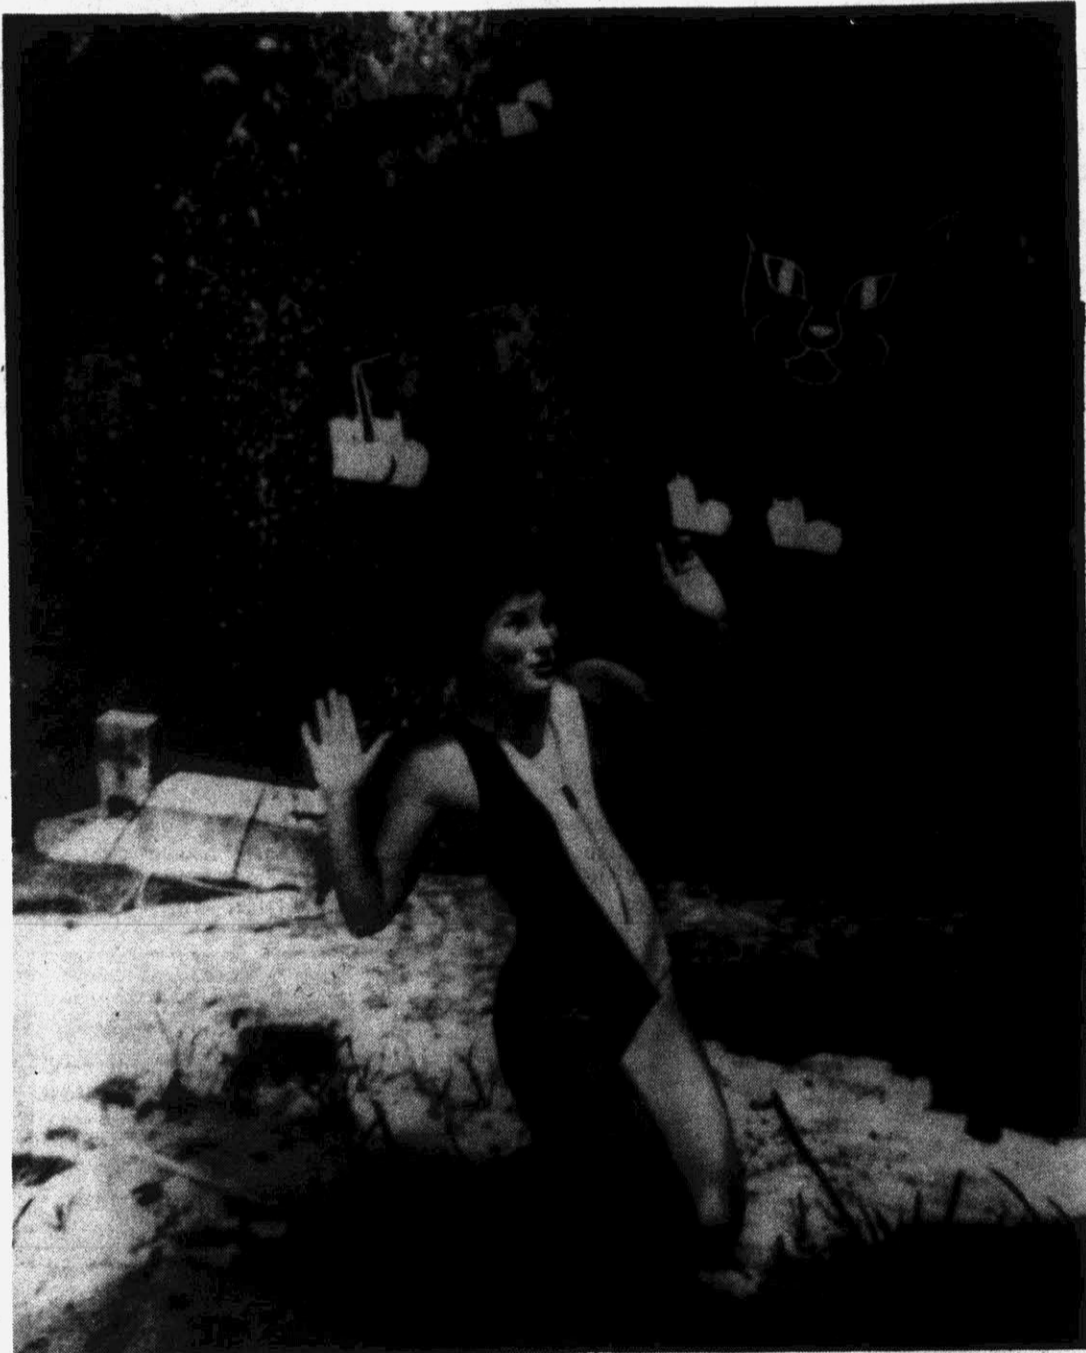

Most of the seminar participants are employed in a management or supervisory capacity.

ALLIGATOR CATCH  
GRAND CHENIERE, La. (UPI)—A 13-foot, seven-inch alligator was the top catch of the 13-day alligator hunting season which ended Sept. 18. The season was the first legal alligator hunt in the United States since 1965.

HALLOWEEN TREAT—There is no trick to this Halloween treat which is just around the corner on October 3

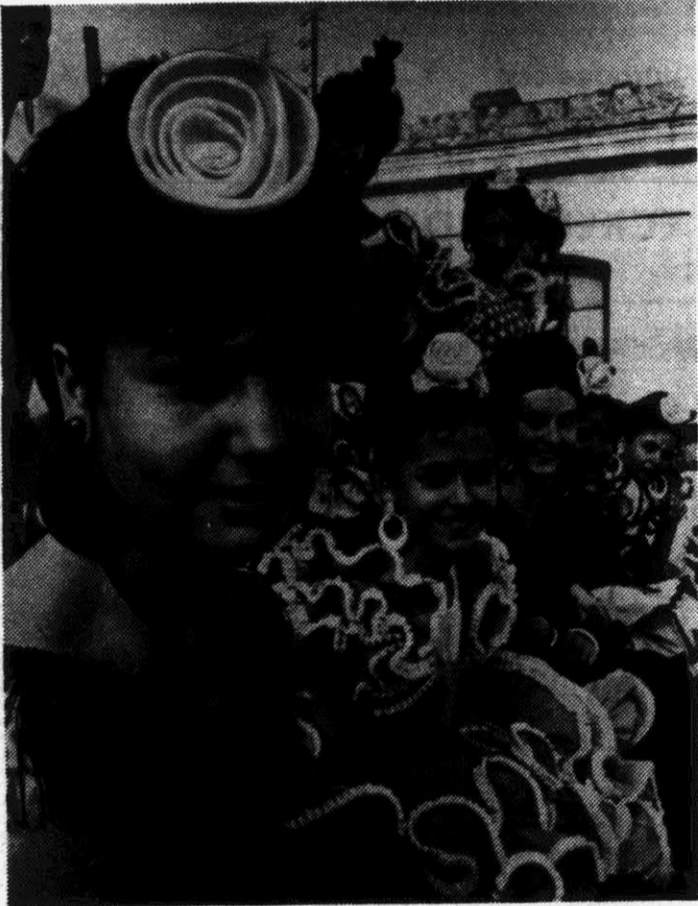

# Vendimia

These scenes of life in the countryside and small towns of the south of Spain reflect the present season very clearly. For this is the wine producing region of Andalucia centered around Jerez de la Frontera—which has given its name to the venerable wine, sherry. The "vendimia," the time of the grape harvest and the pressing of the first grapes, is a time of hard work, and of rejoicing. There are fiestas, large and small, personal and public, traditions rooted in instincts as ancient as the invariable arrival of harvest time itself. There's a decorous gaiety tempered with solemn thanksgiving for the season's bounty. And there's a sense of a beginning as well as an end to one year's toil, as the wine stored in its tiers of casks receives new pressings to blend with the old, ensuring continuity over the years to come.

The "vendimia"—grape harvest.

Photographed by Bob East.

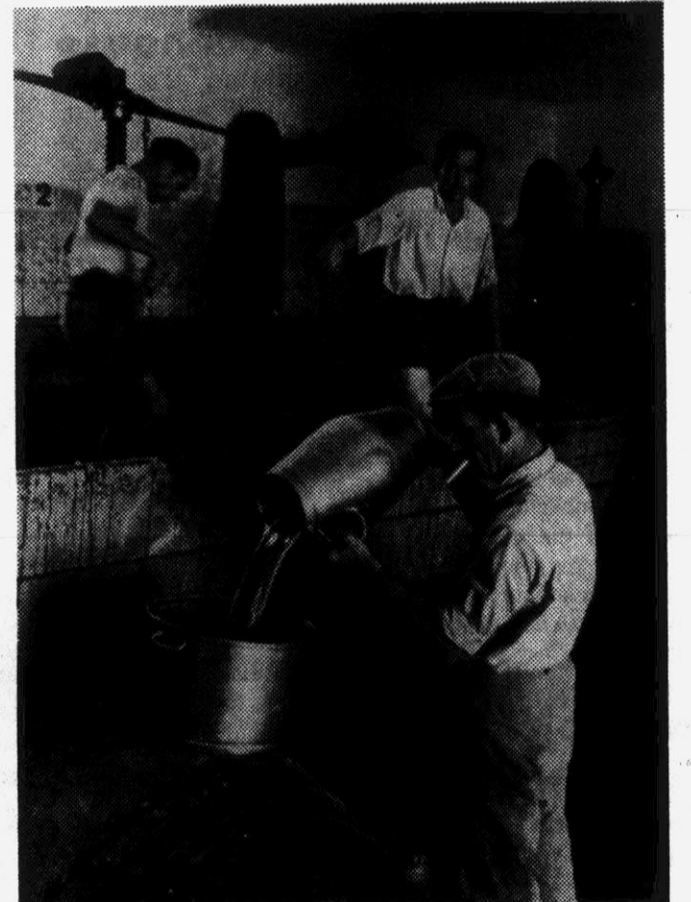

The girls dress up in their prettiest traditional costumes, to join the fiestas and watch parades.

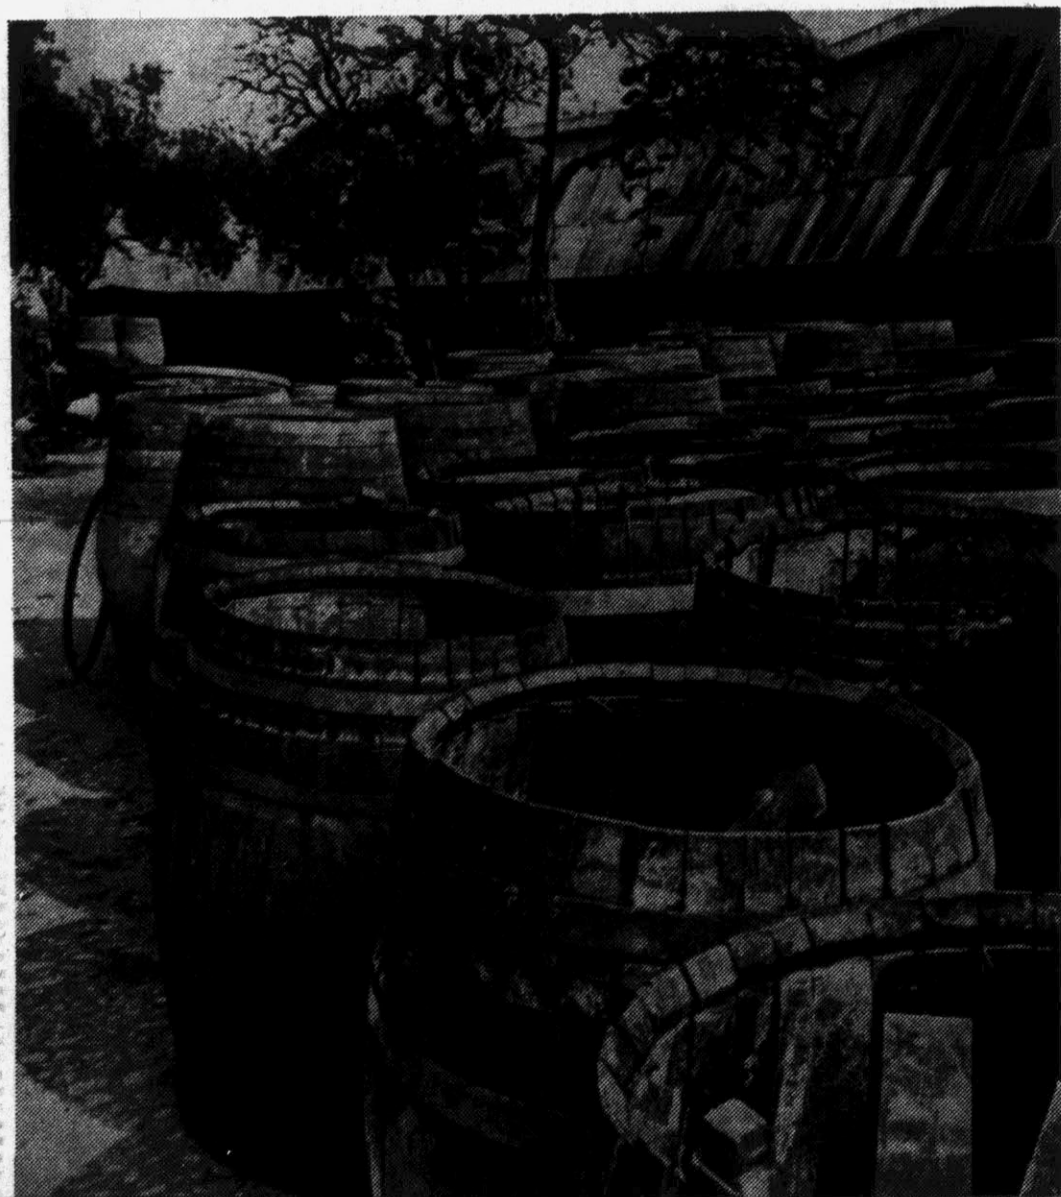

The sherry-producing country: a private road crosses an estate through lush vineyards.

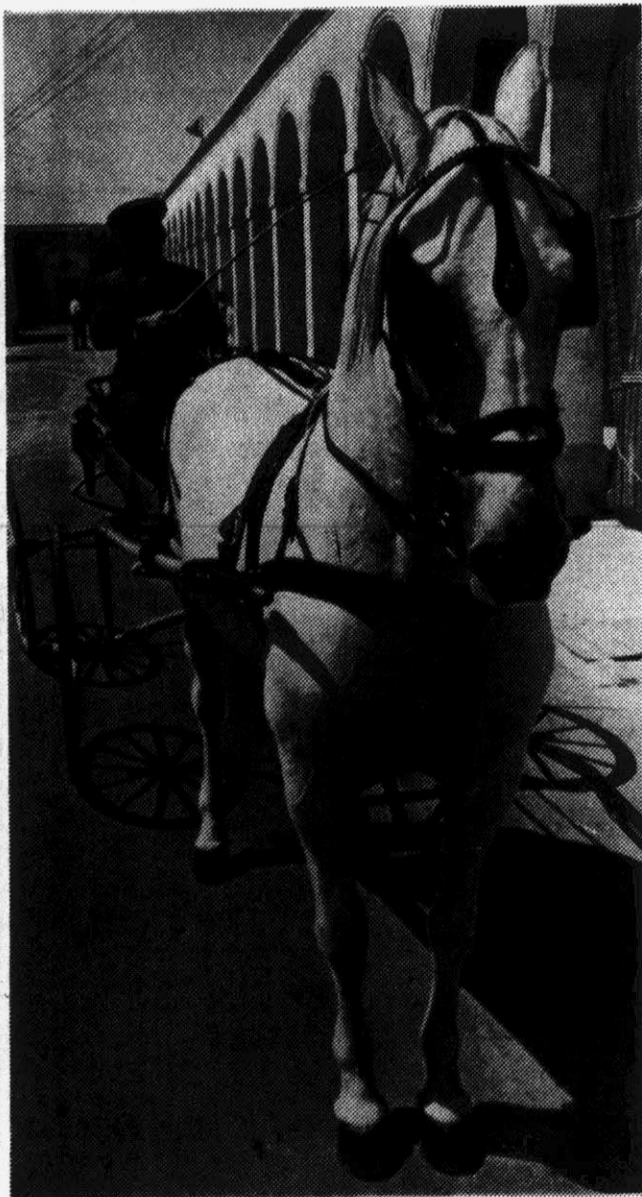

Specially nailed cowhide boots are still used in some vineyards for traditional pressing.

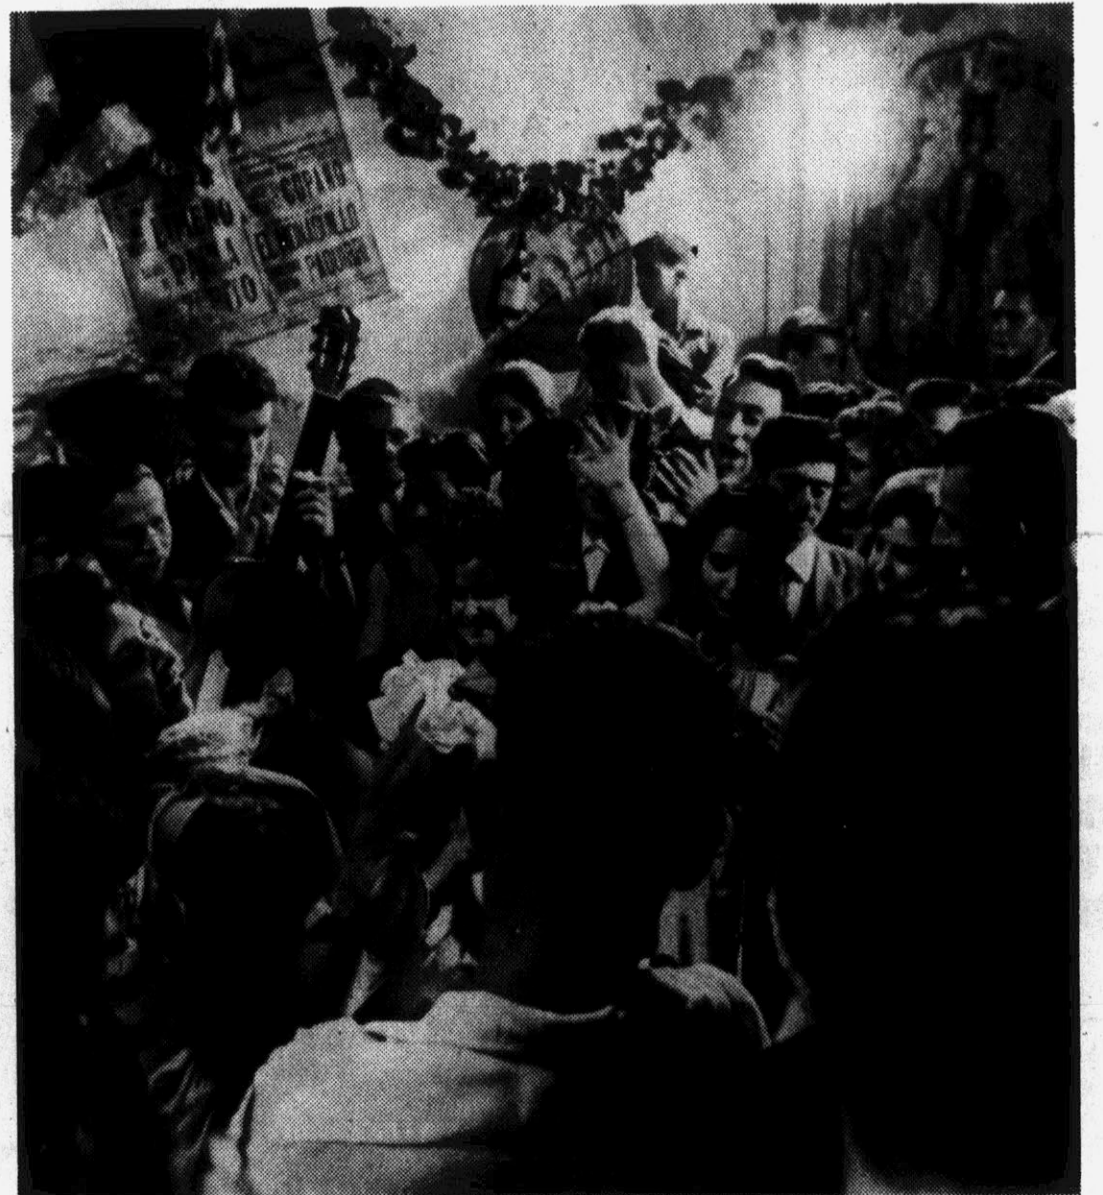

Workmen in press-house tread grapes in wooden trough—and the first wine flows.

Used sherry casks of American oak go to Scotland to hold aging Scotch whisky.

Andalusian horse—pride of vineyard owner.

The year's work culminates in rejoicing, flamenco music and dancing.

# CARROLL RICHTER'S HOROSCOPE

from the Carroll Richter Institute

**GENERAL TENDENCIES:** An unusual day when you have the opportunity to make new acquaintances and can direct your thoughts on activities that are most important to your personal goals. Let others know about your aims and some will help you obtain them. Be very social and enjoy outside delights.

**ARIES (Mar 21 to Apr 19)** If you cooperate more with others, you can gain your aims easily. Make certain you know what your ambitions are, then come to right decisions. Obtain data for the results you desire.

**TAURUS (Apr 20 to May 20)** You can contact higher-ups and get the backing you need for a worthwhile project you have in mind. Engage in civic work that you enjoy. Don't act in an impulsive manner. Be considerate.

**GEMINI (May 21 to June 21)** You have fine ideas that can be put in motion most intelligently now, so don't delay. You can get good results by discussing matters with experts. Show that you have wisdom.

**MOON CHILDREN (June 22 to July 21)** It's important you carry through with promises you have made to others. Mate is most favorable toward you now, so make the most of it. Show that you are kind and considerate person.

**LEO (July 22 to Aug 21)** You have the right ideas for improving a relationship that means much to you, so carry through with them. You can benefit also by carrying through with a civic matter which you enjoy.

**VIRGO (Aug 22 to Sept 22)** You can quickly put in motion those fine creative ideas you have and get excellent results. Get together later with congenials and have a delightful time. Don't be extravagant, though.

**LIBRA (Sept 23 to Oct 22)** Think over well what it is you want the most, then contact right people and gain their backing. Showing particular affection for loved one is wise. You can get the added support you want.

**SCORPIO (Oct 23 to Nov 21)** Study the situation at home and you will know exactly what it is that should be done. Plan the new items you want to purchase so that your home becomes more charming and comfortable.

**SAGITTARIUS (Nov 22 to Dec 21)** A good day for shopping and taking health treatments, after taking care of routine work. Also, a good time to have a talk with associates and make plans for the future.

**CAPRICORN (Dec 22 to Jan 20)** Make plans with associates to increase mutual benefits in the near future. Carry through with an idea for cutting down on expenses and adding to income. The night is for romance.

**AQUARIUS (Jan 21 to Feb 19)** You can exercise a liking for being with people today, so get an early start, whether making contacts in business or socially. Group affairs are especially good at present time.

**PISCES (Feb 20 to Mar 20)** If you have a more modern appearance, you find you can have greater progress in the days ahead. Obtain data you need, but do it quietly. Show that you are a constructive thinker.

**IF YOUR CHILD IS BORN TODAY**... he or she will be one of those cheerful young people who wants to be helping others with their problems, so direct education along humanitarian lines, such as medicine, teaching, social work, etc. Give fine spiritual training early in life and plenty of exercise at schools. A lover of pets here.

"The Stars impel, they do not compel." What you make of your life is largely up to YOU!

Carroll Richter's Individual Forecast for your sign for November is now ready. For your copy send your birthdate and \$1 to Carroll Richter Forecast (name of newspaper), Box 629, Hollywood, Calif 90025.

## Will Tell Women Of Tactics To Protect Selves

"To Be or Not To Be Raped—Prevention of Assaults on Women" is the title of Frederick Storaska's lecture to be given at East Carolina University on Tuesday at 8:00 p.m. in Wright Auditorium.

One of the six lecturers appearing this season at ECU, he noted authority on self defense will tell how women can employ tactics used in the defense arts of Karate, Jujitsu and Judo to improve their ability to protect themselves if the need ever arises.

A holder of the black belt in Karate, he has instructed local, state and national law enforcement personnel in self-defense Karate.

Witnessing, one evening in the fall of 1963, a brutal assault of a young girl by several boys, Storaska fought off the assailants, but not before the girl was seriously injured.

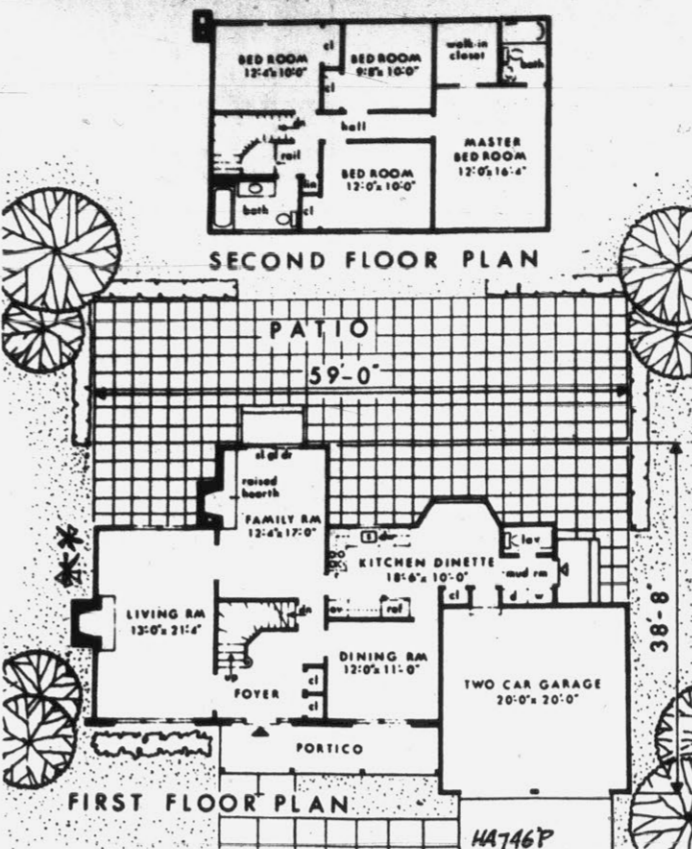

Wits incident making a deep

impression on him, Storaska traveled to several universities seeking information on assaults, but found that little or no research existed. This led him to devote his resources and energies to the understanding and solving problems of assaults on children, women and men.

In the past five years, Storaska has lectured to nearly a quarter of a million students at over 200 colleges and universities in 36 states. Six years of research on thousands of assault cases will culminate in the lecturer's forthcoming books slated for publication later this year.

Admission to the lecture, sponsored by the Student Government Association, is \$2.00 for the general public, or by season subscription. Tickets are now available at the Central Ticket Office or can be purchased at the window prior to the hour of lecture.

## HOMES FOR AMERICANS

ONE ENTERS this cheerful home, Plan HA746P, through a sheltered portico to a roomy reception foyer featuring a circular stairway leading to the second floor. The living room to the left, with its cathedral ceiling, has windows front and rear. A fireplace is optional. To the right of the foyer is the dining room. Ahead is the family room with sliding glass doors leading to a rear patio and another optional fireplace. The efficient kitchen is adjacent to family and dining rooms. A bay-windowed dinette overlooks the patio. One enters from the patio through a mudroom which has a half bath. Upstairs are four bedrooms; the circular stairway terminates at a balcony with a railing overlooking the entrance foyer. Architect is Samuel Paul, 107-40 Queens Blvd., Forest Hills, N.Y. 11375. The first floor has 1,085 square feet of living space and the second floor, 908 square feet. Anyone interested in the plan can write to the architect.

## Unusually Good Crops Indicated

North Carolina and the other four states to the north have experienced unusually good crops this year, according to Julian Mann, Director of the Five State Raleigh Service Center of the Federal Crop Insurance Corporation. He based his opinion on the number of claims received and reports from local personnel in this state and the states of Virginia, Maryland, Delaware, and Pennsylvania served by the Raleigh Center. The Raleigh Service Center has as its chief function the adjustment of losses submitted by policyholders of FCIC.

Recent estimates indicate the amount of claims at nearly a million dollars in North Carolina; about one-quarter million dollars in Virginia; about \$80 thousand in Pennsylvania; and about \$20 thousand in Delaware; and about \$20

thousand in Maryland. Nevertheless, a large percentage of premiums — in excess of 3 million dollars — paid by policyholders will go into the Federal Treasury this year as a reserve to pay future losses. Such a sound financial operation rebounds to the benefit of policyholders in reduced premiums or increased guarantees as exemplified in the fact that the premium rate on tobacco in N.C. is the lowest of any crop in the United States.

Tobacco is the insured crop which is dominant in the Five State Center with \$155 million of insurance in that crop of the total of \$176 million insured in all five states of the Center. North Carolina has over \$130 million of protection in tobacco alone.

The aftermath of Hurricane Agnes in the Piedmont plateau of North Carolina and Virginia caused most of this year's claims. Counties worst affected are Yadkin, Surry, Stokes, Forsyth, Wilkes, and counties in that general area of N.C. and Franklin, Pittsylvania, and others in Va.

Other damages in the Center occurred to insured commercial apples in western N.C. and to crops affected by the hurricane in Pennsylvania.

## Rabbits Adapt To All Climate

CHICAGO (UPI) — Whether it's wet, dry, cold or hot, rabbits don't seem to mind the climate — they're probably the world's most adaptable animals.

Among all animals, according to Encyclopaedia Britannica, the European rabbit holds the most spectacular case history of naturalization. They have been successfully colonized in places ranging from equatorial Uganda to the bleak Tierra del Fuego, Chile, and from the rain forests of northern Tasmania to the semidesert areas of Australia.

## Roof Covered By Aluminum Foil

MOSCOW (UPI) — Engineers in Bukhara, Soviet Central Asia, have covered the roof of the local cotton factory with 10.8 acres of aluminum foil, the Tass news agency said.

The mirror-like surface is intended to protect the workshops from heat by reflecting away 40 per cent of the sun's heat radiation. The cotton factory is one of the largest in the Soviet Union, Tass said.

Tornadoes have impaled splinters of wood in metal, lifted a railroad car off its tracks, and leveled neighborhoods.

## 'Nonpartisan' But Beer In His Hair

ROCKVILLE, Md. (AP) — Where Ethel Kennedy and Eunice Kennedy Shriver were concerned, singer Neil Diamond wasn't about to take sides. And he ended up with his hair soaked in beer.

Rock star Diamond was one of the big attractions at a Democratic fund-raising party Sunday on the lawn of the home rented by vice-presidential nominee Sargent Shriver.

Mrs. Shriver introduced Diamond by requesting "Sweet Caroline." "I've asked him to sing the song first of the woman he loved most," she told the crowd.

But Mrs. Kennedy had other ideas. She wanted to hear "New York Boy." "This is a terrible predicament," Diamond moaned and decided to delay both tunes. "I'm chicken is what I am," he explained.

After an interlude of several songs, Diamond broke into his top-selling "Sweet Caroline."

Mrs. Kennedy, who had been picnicking on the grass near the stage, quietly walked up behind him and emptied a big paper carton of beer over his long hair.

Smiling, she ambled offstage. Diamond dried his hair, and promptly the audience recognized the strains of "New York Boy."

Earlier, Shriver made a handshaking spin through the bring-your-own-food crowd, which paid \$15 per family to get in, as Secret Service agents, newsmen and autograph-seekers trampled many a lunch.

Campaign souvenir stands run up land-office sales. Small tablecloths sold for \$1.50; the large ones went for \$3.

Sen. Edward Kennedy, D-Mass., and his wife, Joan, made brief appearances — he to watch the Irish dancing near

## DEAR FOR A DROP

LONDON (AP) — Cups of tea for three workmen cost a bank more than \$100,000.

The workmen left a security door open at the Oxford Street, London, bank when they went for tea. Three armed bandits dressed as workmen, walked in, broke into a locked room, held up staff counting money and helped themselves to \$104,000.

## Prison Polling Freed Inmates

LANSING, Mich. (UPI) — The Michigan Department of Cor-

rections has drawn up a questionnaire it's giving to men leaving Michigan prisons to find out what they think of prisons and what improvements should be made.

"It's probably too much to hope that men still in prison and awaiting release will be totally candid in their remarks, but results so far indicate their comments can identify some areas where improvements can be made," says Gus Harrison, director of the department.

## SILENCE PREVAILS

LONDON (AP) — Bus driver Edward Couchman and his wife, Rose, have not spoken to each other for 25 years — and they maintained their silence when they faced each other in the divorce court.

They married in 1936 and have three grown children. They separated in 1947. Couchman was granted a divorce because he had not lived with his wife for more than five years.

## Mouse Might Be Friend To Man

CHICAGO (UPI) — He is roundly condemned throughout the world but the mouse, on balance, may be a friend of man.

Mice, according to Encyclopaedia Britannica, are indigenous to almost every land area, and constitute the most important prey group of any mammal.

It is this reason of being the world's favorite prey, says Britannica, that gives mice an economic importance, for they form the bulk of the diet of most fur-bearing animals and of predators that otherwise prey on more valuable species, including livestock.

## Watch Your FAT-GO

Lose ugly excess weight with the sensible NEW FAT-GO diet plan. Nothing sensational just steady weight loss for those that really want to lose.

A full 12 day supply only \$2.50. The price of two cups of coffee. Ask at Eckerd's drug store about the FAT-GO reducing plan and start losing weight this week. Money back in full if not completely satisfied with weight loss from the very first package.

DON'T DELAY get FAT-GO today. Only \$2.50 at ECKERD'S

ECKERD'S  
Pitt Plaza

## Greenville Utilities Commission

Effective with all billings on or after October 20, 1972

Natural Gas rates under Schedule N-1 & N-2 will be increased 0.1 cents per hundred cubic feet, to compensate for the same increase in cost of Natural Gas received from our supplier.

### Schedule N-1

	Present Rate	New Rate
First 200 cubic feet	\$1.50 min.	\$1.50 min.
Next 800 cubic feet	.258 per ccf	.259 per ccf
Next 2,000 cubic feet	.218 per ccf	.219 per ccf
Next 47,000 cubic feet	.158 per ccf	.159 per ccf
Over 50,000 cubic feet	.118 per ccf	.119 per ccf

### Schedule N-2

	Present Rate	New Rate
Interruptible Gas	61¢ per MCF	.62¢ per MCF

## Farm Tips

By Dr. J. W. Pou  
Agricultural Specialist  
Wachovia Bank & Trust Co., N.A.

It's that extra step farmers take that puts crop yields in the "bragging" category.

Tarheel crop producers who go that extra step of assuring proper soil pH by using lime often are the ones who have something to brag about at harvest time.

Even the farmer who applies an adequate amount of fertilizer, plants good seed and controls weeds isn't assured of high yields. Other factors will hold them back.

"Strongly acid soils may limit yields for several reasons," notes Dr. Jack Baird, extension soils specialist at North Carolina State University. "Poor root development is one symptom of soils that are too acid," he added.

Fertilizing acid soils is often a money-losing proposition in that plants will not respond satisfactorily to phosphorus and potassium when the soil is too acidic.

Lime makes fertilizer work more effectively, Baird pointed out. Therefore, lime should be applied as the first step in soil improvement.

In many instances, if lime were used to correct acid soils in North Carolina, cotton yields would be increased as much as one-half bale per acre, peanut yields as much as one-half ton, corn yields as much as 30 bushels and pasture production could be doubled, Baird believes.

The best way to determine if lime is needed is to take a soil sample. If it is needed, the lime should be applied and mixed with the soil at least three to four months ahead of the growing season for best results.

The traditional way of fertilizing tobacco has worked well for lime-cured growers but some are beginning to see the economic advantages of making a change.

This change is to higher analysis material, such as going from a 3-9-9 analysis to a 6-12-18.

Since the old method has worked so well, some farmers are reluctant to change. For one thing, it means using less total pounds of fertilizer.

"All last spring and summer, I was very leary about my crop," said Mayo Brown, Rt. 2, Clarkton. "I had never used so little fertilizer and I knew I would be short on pounds and quality."

But he wasn't. On a crop that received 600 pounds of 6-12-18 per acre, Brown produced enough to sell the 10 percent allowance over his quota — and the price was good.

Charles D. Raper, Columbus County extension chairman, commented that "a few farmers, like Mr. Brown, are being convinced that the higher analysis fertilizer will work, and that it costs them less to fertilize an acre using the higher analysis."

North Carolina State University specialists have compared crop performance using different analyses and rates of fertilizer and generally conclude that there is no significant difference in yield and quality. At the same time, the total fertilizer cost is slightly less with the higher analysis.

2:00 p.m.—Gym Open (Free Play)

Soybeans are near harvest. The North Carolina Soybean crop now reaching harvest stage is a large one, topping a million acres for the first time since 1967 and promising a yield of 25 bushels per acre or better. Farmers are keeping a close watch on two things: the market and the weather.

**Good Signs**  
Soybean prices held up unusually well going into October, the normal beginning of harvest time in the Mid-West. This is regarded as a good market sign. Less certain is the weather. Fresh in growers memories are the terrible losses they suffered last fall when a hurricane caught them at harvest time with a bumper crop in the field. Thousands of bushels of beans, along with much of the peanut, corn and cotton crops, were washed away or reduced in quality. The beans are in the field. It's just a matter of saving them. And it looks like prices are going to hold up well. Growers in some areas may run into soybean handling problems as harvest gains momentum. It should be pointed out that corn and bean crops are unusually large, and hauling and storage may be a problem at times.

## Jenkins Will Greet Group For McGovern

East Carolina University Chancellor Leo Jenkins will launch Sen. George McGovern's "grass roots" campaign in eastern North Carolina Thursday.

Jenkins will greet the Senator's daughter Terry and other members of a campaign tour on the second leg of a five-state tour through the South.

Scheduled to arrive on the ECU campus at 10:30 a.m. are Liz Carpenter, former secretary to Lady Bird Johnson; Frances (Cissy) Farenthold, primary candidate for Governor of Texas; and a number of other McGovern supporters who hope to bring his message to the Southern states.

According to Janice Hardison, Pitt County Chairman of the Citizens for McGovern, the Greenville stop is the first of five visits scheduled for North Carolina.

Dr. Jenkins, a member of Gov. Scott's campaign steering committee, will greet four members in the lobby of ECU's Wright Auditorium. The tour then moves to Wilson and on to Raleigh, where Gov. Scott will meet the group at the State Fair.

A stop on the Chapel Hill campus of the University of North Carolina and dinner with Duke University President Terry Sanford are also on the day's itinerary.

## Might Assure Prompt Workers

INDIANAPOLIS (AP) — The director of the department of administration for the city of Indianapolis may have stumbled across a way to get city hall employees to work on time.

Owen H. Meharg, director of the department, in reshuffling parking spaces in the City-County Building garage, decided to form "pool" parking spaces—150 spaces for 200 persons on a first come, first served basis. Meharg is now worried over the early rush to get the "pool" spaces, but admits it might result in employees getting to work earlier.

## Large Cotton Crop Predicted

WASHINGTON (AP)—Cotton production this year is estimated at 13.7 million bales, the largest crop since 1965, when 14.9 million bales were harvested.

Based on Oct. 1 field conditions, the Agriculture Department has estimated the South Carolina crop at 300,000 bales and the North Carolina crop at 130,000 bales.

## COINS FOUND

AALESUND, Norway (AP) — Three frogmen have recovered more than 440 pounds of gold and silver coins from a Dutch ship which sank off the Norwegian coast in 1725. The value of the coins has been estimated at more than \$30,000.
