Dr. Clarence Dennis
Professor of Surgery
450 Clarkson
Brooklyn, New York 11203

Dear Dr. Dennis

Dr. A. Kantrowitz talked to me about a possible association at Maimonides Hospital, which I understand is affiliated with your department. I am most anxious to get back into a situation where I could do investigative work and thought that it may be worthwhile looking into it. Even though I have a very rewarding practice of cardio-thoracic surgery, you well can imagine that it is difficult to blot away the investigative itch.

I wonder whether I could inconvenience you and ask you about information concerning the situation and people associated with it and gain advise from you? Enclosed is my curriculum vitae and bibliography if it should be of any value of evaluating a possible relationship to Maimonides. Many thanks!

Sincerely

Karel B. Absolon, M.D.
