Dr. Clarence Dennis  
Professor of Surgery  
450 Clarkson  
Brooklyn 11203, New York

Dear Dr. Dennis

Dr. Wangenstein tells me that you reviewed approximately a year ago the subject of myocardial infarction excision and Dr. Murrey's work on it.

I have recently excised an anterior myocardial infarction, implanted the left ventricle with two internal mammary arteries, etc. I thought that it may be an interesting case to publish. Could you inform me about any pertinent published material available to you.

With best personal regards.

Sincerely

Karel B. Absolon, M.D.
