Dr. Richard L. Varco  
Professor of Surgery  
University of Minnesota  
Minneapolis, Minnesota

Dear Dr. Varco

Enclosed are some reprints of our much too abortive effort on transplantation. I was shaken to hear that Kelly just as lightly as he accepted his position he also gave it up. How much more could have been created.

I thank you for giving a helping hand to Patrick Hagihara. He is a good fellow. Be good to your colleagues now that you have become the link between the two eras of surgery in Minnesota.

Sincerely

Karel B. Absolon, M.D.
