John Perry, M.D
Director of Surgery
Aucker Hospital
St. Paul, Minnesota

Dear John

I assume that we shall meet at OHW's "Fest" in May. I have a fair talk on Selective Cine' Coronary Angio - a small series but well documented as to patency of implants in the myocardium. You probably will cancel your staff-meeting for OHW, but if opening sometime would be glad to present. 40 selective angios - 12 patients with implants, 2 with ventricular aneurysms - 4 followup internal mammary implants with patency in 4; 6 - 12 months postoperative. Operative mortality - 0.

I was in contact with Kremen conc. Mt. Sinai; never got an answer, but now they must have enough prospective candidates from the U? Medically - economically things are fine over here but otherwise I reached a plateau.

Best regards!

Sincerely

Karel B. Absolon, M.D
