March 5, 1969

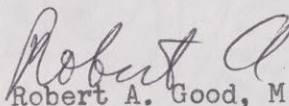

Karel B. Absolon, M.D.  
Diplomate American Board of Surgery  
2714 West 10th Street  
Amarillo, Texas 79102

Dear Karel:

It was good to hear from you. We have had little experience with using graft-versus-host reactions to treat malignancy. I am not surprised at the results you have experienced. I think George Moore, more than anyone in recent years, has had more experience along this line.

We have not yet received our reprints of the Lancet paper, but when we do, we will send one to you.

Sincerely yours,

Robert A. Good, M.D.  
American Legion Memorial Heart Research  
Professor of Pediatrics and Microbiology
