Adrian Kantrowitz, M.D.
4802 Tenth Avenue
Brooklyn, New York 11219

Dear Adrian

Thank you for your nice letter, I also hope that the New Year will be generous to your various endeavors.

I like to part with one of my little "book possessions," namely Stannius' reprint of his discovery of the cardiac conduction system. Even though in German, anyone interested in heart conduction and pacing, I thought must like this classical jewel. It is an example of good physiological thinking. I hope to be able to stimulate you to come from flying down to the must so far and equally relaxing hobby of reading on classical medicine.

Do send my greetings to your good wife!

Sincerely

Karel B. Absolon, M.D.
