June 21, 1968

Dear Doctor,

The medical staff at the general meeting in May voted to approve the hospital's purchase of the SMA 12/60 auto-analyzer for the laboratory. At that time the Technicon Company advised the hospital it would take nine to twelve months before the unit could be delivered. Due to a cancellation the company informed the purchasing agent that a unit was available and ready for delivery should the hospital wish to accept it. With some rapid deliberation the hospital administration decided to accept the unit based upon the fact that it had the approval of the medical staff.

Further information will be sent to you as this complicated piece of equipment is set up and ready for operation.

Sincerely,

Louis R. Devanney, M. D.
Chief of Staff
