

DD TERATSUKI CLASS

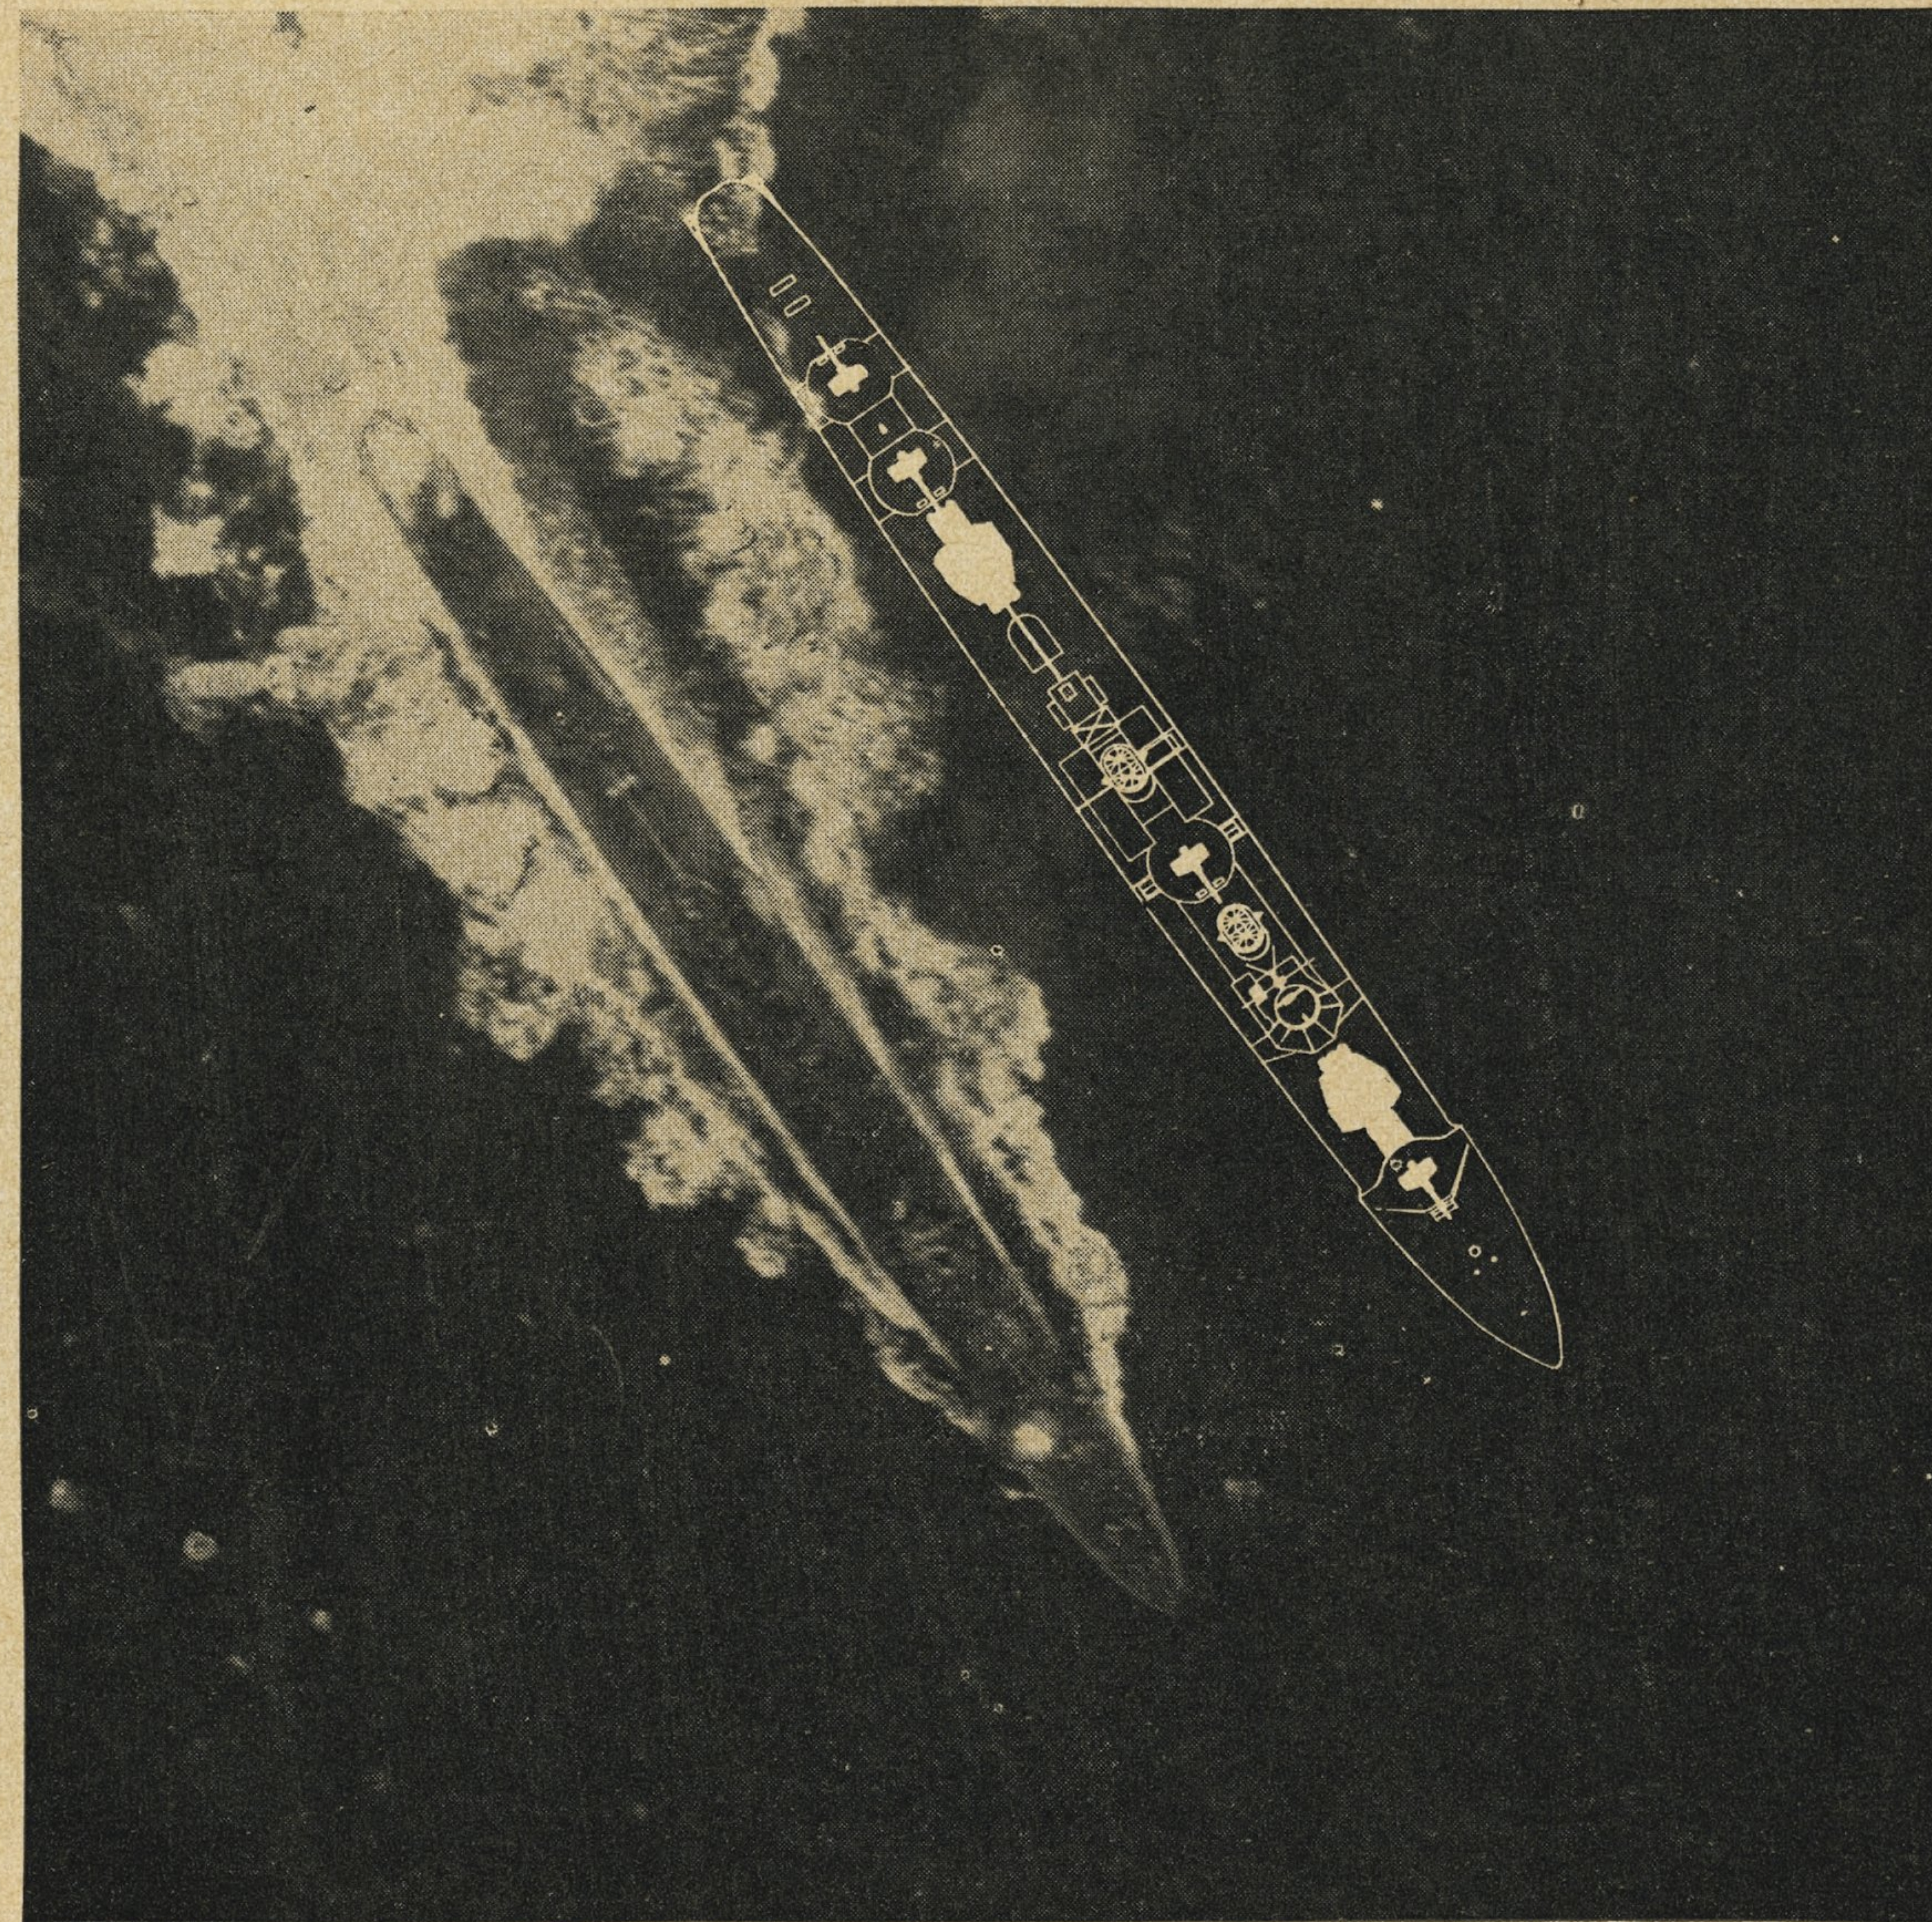

One of the new class of large Japanese destroyers, tentatively called TERATSUKI. A radical departure from previous Japanese ships of this type. Note the single raked stack and new type of "turtle-back" twin mounts.

DD MUTSUKI CLASS

[22]

A MUTSUKI Class destroyer. The broad stern, straight sides and two circular gun platforms at the foot of the mainmast characterize this type. One set of torpedo tubes is in the well-deck forward of the bridge.
