Division of Naval Intelligence—Identification and Characteristics Section 11-43

## TEMPTRESS Class—PG

A third type with short fore-castle, called the "Canadian" type, is found only in the Royal Navy (silhouette).

This class of gunboats is composed of Canadian-built corvettes procured by the Navy. They are sister ships of the British FLOWER Class ships, measure 205 feet overall, and displace 1,250 tons. Variations exist between the types in our service, as illustrated by the photos. A new group (PG 86-100), will have minor differences in superstructure and armament.

▼ PG 71—TENACITY. All ships are to be changed to this rig, new Radar installed.
