Identification and Characteristics Section

▲ PYc 3—AMETHYST. Length overall, 147 feet.

▲ PYc 35—FELICIA. Length overall, 147 feet.

▼ PYc 26—CYMOPHANE. Length overall, 158 feet.

PY • PYc • YP—ex-YACHTS

Smaller yachts of many types have been converted to minor combatant vessels in the Navy, Coast Guard, and Army, and are used extensively for coastal patrol or limited escort duty. Shown here are typical yachts of around 500 tons or less, usually assigned for general coastal patrol as PY, PYc, or YP. Many have retained their original names. Many ships of this type are being laid up or returned to their original owner.
