## SUBMARINE CHASERS-PC 173-foot Type

PC 451 and 452 (silhouette) are experimental ships. Others formerly classed as PC's are now reclassified as PY's. The PC 461 class design, after minor alterations, is now used extensively as a minesweeper, known as the ADROIT Class—AM. Both types are in service with the United Nations.

Inset above shows modified PC used as ADROIT Class—AM. ▶

▲ PC 451 Class, an experimental type.

This design along with the SC and Sub-busters, has often been mistaken for submarines, because of their low silhouette and peculiar wake at high speed.
