FLEET MINESWEEPERS—AM

Division of Naval Intelligence—Identification and Characteristics Section 11-43

The 220-foot, steel hulled, AUK Class Sweepers (improved RAVEN design) provide the fleet with fast mine sweeper/layers readily adaptable to various patrol details, including convoy escort over long distances. Standard displacement is 890 tons. The British AM-100 Class is of this type. Other AM classes include the ADMIRABLE Class, a PCE variation; the 173-foot ADROIT Class, a converted PC design; 2 World War I 187-foot BIRD Class types; and some of the larger steel-hulled converted trawlers, also used as YP's.
