OFFICE OF

HUGH MITCHELL,
PRESIDENT.

Port Tobacco, Md., March 23rd 1891

Dear Bro Carr:

I thank you kindly for the information furnished in regard to Tobacco curing, & shall avail myself of your kind offer to furnish me with an experienced man to teach the process of flour curing, if I can get some of my neighbors to join me in the undertaking. I should much prefer, before attempting to go into the business, to visit the tobacco sections of North Carolina & Virginia, & examine the soils, manner of cultivation & but cannot find time to do so this season, & shall feel at liberty to call upon you for further information should it be needed.

The Alliance is having quite a spurt in Maryland just now, & our membership is increasing in some parts of the State. In view of the fact that the next Legislature, which meets next winter will elect two U. S. Senators we are looking forward to the possibility of having the balance of power in that body, but I am afraid the politicians are too strong for us, & our City population too large.

Am you quite satisfied that we acted wisely in elect-
ing Bro Hall a member of the Nat. Legislative Committee?
I confess that I am not. While acknowledging his abil-
ity honesty & thorough fitness for the position, I am nevertheless
confronted with the fact, that his persistent & determined
opposition to the Sub-treasury plan, is generally known
& commended by our enemies, & his appointment may
have the effect to strengthen the opposition to that
measure, both within & out of the Order.

It seems to me that something should be done, & that
quickly to stop this Georgia quarrel which is doing
much injury to the Order both in & out of that State.
The thing is simply disgraceful, & those prominently
engaged in it should be expelled.

Hoping for a continuance of the correspondence
between us. I am with high regard

Truly & fraternally Yours
Hugh Mitchell
