Dear Sir.

I was in London last week and hoped to have seen you in regard to the acid Phosphoric matter. I learned from some of my friends there that Mr. Davis offended you which I very much regret. There was no occasion for it. I am confident that I could have made a settlement with you that would have been mutually satisfactory if I could have seen you in person. Please write me what the trouble is and what you are disposed to do. Davis seems to have forgotten your proposition. We are in need of all the funds we can raise now as collections were never so bad in the history of our business.

Very truly yours

F. S. Royster
