Dear Elias:

Yours are read.

I think a spade or shovel
factory in Fairbora, as
you suggest will pay. The
labor will be cheap, &
land, buildings, rent, taxes
etc as reasonable as any
where in the world I
guess. What will the
plant cost? I imagine
not very much, & that
you will find but lit-
tle trouble in getting the
stock taken. You are
wise in not talking

about it, & were I in
your place I would con-
tinue to pursue this course
of silence. When you have
the opportunity write me
something about the details,
whether you propose to
make the space entire, or
buy the metal portion &
furnish the hardware only.
What you say of the anti-
of suitable wood in sight
does not convey much to
my mind - that is, whether
the anti. will be sufficient
& run you one year or
less. It is very cold today
with high winds, & in con-
sequence of the summer
weather of the week previ-
ous, we are all feeling it
