TOBACCO

Warrenton, N.C. March 3 1896

Dear Gov. Carr,

I have no doubt I am
worrying you some in regard to the
Hedge, but I think the best thing for
you will be, either to have it cut down
when the fence is fixed, or give the
town the privilege to have it dug up.
I have no idea they will attempt to
do anything unpleasant about it, nor
do I think they wish even to do so. The dens-
port of it is now about the height of
a man's head & is pressing against the
fence, the trimming such is being left
on the hedge, has made the branches grow
more horizontally than they would otherwise.
So please instruct me so I will get
letter by Thursdays Mail, whether to have
it cut down near the ground so it can

grow out again or to allow the
town to grub it up (if they will.)
In regard to wire fence - What
kind of style wd you ~~prefer~~ prefer?
Simple barbed or netted? The barbed
wd not keep out chickens -

Lias was here yesterday looking
fat & well -

Best wishes
I am yr truly
H. J. White
