

# THE REFLECTOR

Greenville, N. C.

D. J. WICKARD, Editor and Proprietor

Entered at the post office at Greenville, N. C., as second class mail matter.

FRIDAY, MARCH 25, 1899

An exchange says Christopher Columbus did not know what trouble he was bringing to Spain when he discovered America.

The discovery of a new comet is announced. That is an apt diversion at this time when people have not wanted anything but war news. But the report does not say what kind of war signs the astronomer was looking for when he found the comet.

As will be seen from the call published elsewhere Chairman Manly, acting upon the suggestion of the Executive Committee, has named May 25th for the holding of the Democratic State Convention. Chairman Manly's call is brief and to the point. It requires no out test of allegiance, but invites all favorable to a white man's government and the white race to unite with the party in securing these County Committees should get to work at once calling conventions to elect delegates to the State convention.

W. E. Fountain, chairman of the Populist State Executive Committee, has called a meeting of the committee in Raleigh on the 5th of April. He ignores the evidence of pie hunting. Populists that met in Raleigh last week.

The Supreme Court of the United States has rendered a decision in the North Carolina Railroad Commission case that went on appeal to that body. The Court decided that as no Federal question was involved it had no jurisdiction in the matter. This decision sustains Governor Russell and recognizes that he had the right, under the act of 1891 creating the commission, to make removals and appoint successors. The two Wilsons, removed, will have to accept this as final against them. All the same it is an unjust law that gives the Governor such power.

## WASHINGTON LETTER.

(From our Regular Correspondent.)  
Washington, March 21st.  
This week will probably determine whether Mr. McKinley is sagacious enough to retain the undivided support of Congress in his Spanish policy. It will all depend upon the action he takes on the report of the Naval Court of Inquiry, which he now has. He acts promptly and properly on that report and then sends the report and a statement of what he has done to Congress. He will be squarely and unanimously supported by Congress to any extent. But if he plays into Spain's hand by making a weak demand and delays the matter by keeping the report away from Congress, there will be trouble right away. A large majority of both branches of Congress have made up their minds that Senator Proctor was right when he said that the settlement of the Cuban question could possibly be satisfactory that led the island under the Spanish flag, and if Mr. McKinley doesn't lay his policy along that line, he will probably find Congress taking the matter out of his hands. He can control the situation if he does the right thing; otherwise not. Much will depend upon his first move, which should be made this week.

A statement prepared at the Pension Office shows that more than \$10,000,000 have been legally paid by pensioners in pension offices during the last seven years. Just how much the attorneys have illegally gotten from the pensioners is more or less uncertain, but there is data enough in the Pension Office to show that the illegal exactions more than equal the legal fees. It is not surprising that the Pension attorneys should be able to maintain a powerful lobby.

It is a relief, in the midst of so much war talk, to read of the triumphs of peace, as shown in the greatness and progress of American industry through its association with the United States patent system. In an annual report

of thirty pages, Hon. A. S. Greeley, Acting Commissioner of Patents, has incorporated much valuable and important information for inventors, patentees, manufacturers, capitalists, publishers and in fact, for everybody who is interested in industrial progress, of which the press syndicate has been published gives a very faint idea. This pamphlet will be mailed free upon request, by the Commissioner of Patents, Washington, D. C.

Food talks as are plentiful in Washington as food is everywhere, but it need not catch anybody who chooses to use a little bit of common sense, in analyzing it. For instance, just see how absurd, when this test is applied is the story, one of the latest, that the five great European powers had united for the purpose of demanding that the Government of the United States should state whether it intended to annex Cuba, and if so, that it should provide a safe policy for all time that would not be affected by changes of administration. The absurdity of European nations demanding what any bright school child knows to be impossible under our form of government—namely, the binding of its successors by an administration—effectually disposes of this story, but others equally absurd are continually started.

Many Senators and Representatives are actively criticizing the administration for countenancing the presence in Washington of the three alleged Cuban Commissioners, who jointly with the Spanish minister form what they are pleased to call, "the reciprocity commission," and who have actually had the audacity to take the preliminary steps toward the negotiation of a reciprocity treaty with Spain, to include Cuba. What adds to the indignity is the fact that these so-called commissioners are not acting in good faith, are not what they claim to be, and are engaged in lobbying for a continuance of autonomy in Cuba, although to do so they have to practically call liars several United States Senators, Consul General Lee, and every intelligent newspaper correspondent who has recently been in Cuba, all of these have declared in unmistakable terms that autonomy has been from the first a first failure. It is thought by a number of gentlemen who are familiar with the game that these agents of Spain are trying to play that the administration would be justifiable in sending them home, but it is whispered that the administration wants them just where they are, and that notwithstanding the statement of Congress and of the public in favor of Cuba, six members of Mr. McKinley's Cabinet have a policy on the part of this government that will result in the continuation upon some terms of the force of autonomy in Cuba, and the use of the power of this government to compel the Cubans to accept it. This seems too monstrous for belief, and it is seriously talked about in Washington and is given to you for what it is.

Personally, your correspondent does not believe that Mr. McKinley would dare try to carry out such a policy, and is certain, if he did, that Congress would not allow it to be done under any circumstances.

Laws Touching Belligerents.  
Though this policy is not called for in this regard to Cuba, the Maine incident aside, there is a first step, or less general than the first step, to be taken would be the submission of Congress of all the facts in the possession of the administration in relation to the revolution and possibly a recommendation that the belligerency of the Cuban republic should be recognized.

There is more difference of opinion about this with the recognition of the belligerency of the insurgents means and what rights it would guarantee to them or give them than about any other question now before Congress. Here briefly told, is what the accepted books on international law says about it.  
A neutral nation shall not lend money to a belligerent. It shall not sell to it any munitions of war or any vessels. A nation is bound to use due diligence to prevent the fitting out, arming, or equipping within its jurisdiction of any vessel which has reasonable ground to believe is intended to cruise or carry on war with a power with which it is at peace, such vessel having been specially adapted in whole or in part within such jurisdiction to warlike use. It shall not suffer or permit either belligerent to make use of its ports or waters as the base of naval operations against the other, or for the purpose of renewal or augmentation of military supplies or arms, or the recruitment of men.

That is to say, if the United States recognizes the belligerency of the in-

terests of the United States, it cannot lend money to either of them, it cannot sell them arms, it cannot allow them to use its ports or waters as a base of operations against the other, and it cannot allow them to recruit men.

"No, madam," said Henry VIII. "I'm not duty from choice. I'm bound by honor. I wrote a testimonial for a soapmaker once and I promised for me no other." "Why not that?" "Because, madam, that firm failed during the war."

Secretary Long's intention to rechristen the rowing team Amaranth at the New Orleans will be a commendable tribute to the Crescent City. The Southern States and cities have not been given adequate representation in our nomenclature. The name of the country the first now celebrates Philadelphia, New York, Brooklyn, Chicago, Boston, New Orleans, Baltimore, Newark, Concord, Huntington, Olympia, Charleston, Raleigh, Atlanta and Montgomery, as well as historic Yorktown, Nantuxet, Marblehead, Nahant, Carthage, Machias, Passaic and Lowell.

It is worthy of remark that in calling the Amaranth after New Orleans the ship also serves in a measure to commemorate a famous American victory. Appropos of this practice of choosing battle names for naval vessels, the Parisian journalists have discovered herein another grievance against "Perle Albion." They regard names like Creay, Agincourt, Blenheim, Alcock and Trafalgar, which recall victories of the English over the French, as unnecessarily offensive, and suggest retaliation on the part of the French Ministry of Marine. The most interesting victory of the French over the English that these oft-quoted journalists have been able to take up was Fontenoy—which would look ridiculously insignificant alongside of Waterloo, or even Plancy or Quebec. It may be taken for granted that such names as Bennington, Yorktown and Saratoga in the American may give to offense to our British cousins, but as ex-Secretary Olney remarked in his recent Harvard lecture, "there is such a thing as patriotism for race as well as for country."—Philadelphia Record.

All Bryan Men.  
A drummer had some fun at one of the depots here a few nights ago at the expense of some colored men. As soon as he got off the train he saw a crowd of darkies and the traveling man proceeded at once to interview them on the controversy between the United States and Spain. He told the negroes that he had been sent down here by the government to take the names of volunteers for the war, adding that the President had requested him to take the names of his friends first. "Learning that all of you colored people voted for Mr. McKinley I have decided to take your names first," continued the drummer.

Taking out his book and pencil he asked the negro nearest to him to give his name and age. Stopping back the darkey exclaimed: "I swear fore God boss, I voted for Mr. Bryan."

"You are not wanted then," said the drummer who turned to his next man, but the response was about the same line—"I see a Bryan man too," exclaimed Sambo.

The traveling man said he was unable to find a single McKinley man in the big crowd of darkies gathered at the depot.—Winston Sentinel.

Increase Valuation.  
The State Auditor makes the announcement that the returns on which the taxes will be collected this year show an increase of \$5,747,874.40 over the preceding year, of which \$1,359,797.70 was made by the State Board of Equalization. This is the increase in the amount of taxable property.

The aggregate value of real and personal property for the year 1897 as reported from the various counties to the Auditor amounts to \$5,955,922,371.40. This is the respective valuation on which taxes will be collected this year. These figures will not appear until next year, when the Auditor's annual report is made.

The aggregate value of real and personal property for the year 1898, as will be shown in the Auditor's forthcoming report amount to \$229,854,498.—Raleigh post.

One Colored Constable.  
Cicero Urquhart, colored, was elected constable of Woodville township at the last election. In the interval between election and bonding time Cicero put in his nights stealing cotton from Wm. Hardy, colored. Cicero was indicted for larceny and while the jury was out Cicero ran away. The jury failed to agree—standing eleven on written report for conviction and one negro prosecutor for acquittal. Cicero went down to Norfolk. Mr. Joshua Brown, of Kelford, occasionally puts in a lick or two of good detective work, and as a result of that Cicero is now in jail waiting trial at the next term of the court. Mr. Brown did excellent work in locating his man.—Windsor Ledger.

After a close study of the spring habits of the summer girls, the Atelison (Kan.) Globe makes the following terse observation: "When a girl wants to go anywhere for the summer she commences in January to say that she wants to go. In February that she ought to be allowed to go. In March that she is going, and in April she begins to get her shirt holes ready." And leaving cotton for her shirt waists ready, she usually whistles her parents in to providing the necessary cash for her trip.

Notice of Dissolution.  
The firm of T. M. Moore & Co., doing business at Greenville, N. C., was dissolved by mutual consent, W. F. Morrill withdrawing from the firm. J. W. Higgs will continue the business under the same name and assumes all liabilities and all accounts are known to him.  
This Feb. 28, 1899.  
T. M. MOORE,  
W. F. MORRILL.

Having purchased an interest of T. M. Moore in the business, I wish to inform all persons and businesses of the fact that I will continue the stock of general merchandise, and especially select a course of retail patronage.  
W. M. MOORE.

How War is Declared.  
The Code of Nations, as Some Diplomats Understand It.  
"How is war declared?" some one asked a statesman this week. "By making by a cannon shot," was the reply. This country did go to war once by adopting a resolution. Most of the fighting had begun without legislative preliminaries. The civil war opened with the firing of Fort Sumter. Just how the war with Spain will begin, if there is one, cannot be forecast from anything in the rules of Congress. It may be that war with Spain has already started. That will be known when the court of inquiry on the Maine reports. If the ship was destroyed by a torpedo, that was an act of war, whether Blanco knew the torpedo was to be dragged against the bow of the ship or not. It only had a dozen Spanish officers were in the plot and toward the engine of destruction to its place, Spain has committed the error of war just as much as if a gun squad had wheeled one of the big guns of Moro Castle into position and shot into the magazine of the Maine.

All that the court must do is to report to the President that the Maine did not blow up but was blown up. That will mean the war has started. Uncle Sam must get ready to fight.—St. Louis Globe-Democrat.

The Post Office Department at Washington has decided that the printing of postal cards of the line of trade in which a business house is engaged, as well as its address, should be an advertisement, and that letter postage to be collected on all such cards. This renders valueless many thousands of postal cards already prepared, if it having for some time been the custom of business houses to supply their correspondents with self-addressed cards prepared in this style. Business men are protesting against the immediate enforcement of the order, but it has been suggested that they put pasted blank strips of paper over the objectionable line of the address.

This is to Certify  
That a few years since, while living in a malarial district, I suffered dreadfully with chills which it seemed impossible to break. A friend urged me to try Mrs. Joe Person's Remedy. I did so, and by the use of a few bottles they were entirely broken and I have not been troubled with them since. I also found it an excellent nervous.
