**What a Knot Is**

Probably there is no nautical term more frequently used during the present naval war than the word "knot." The word is synonymous with the nautical mile, or 6,080.27 feet, while, as every one knows, the geographical mile is 5,486 feet. This would make the knot equal to 1.15 of a geographical mile, and, therefore, in order to compare the speed of a boat expressed in knots with a railroad train it is necessary to multiply the speed in knots by 1.15. Another point to remember is that speed means a distance traveled in unit time, so that when one speaks of a boat having a speed of 20 knots it is not necessary to compare the speed of a boat expressed in knots with a railroad train it is necessary to multiply the speed in knots by 1.15. ## WASHINGTON LETTER.

From our Regular Correspondent.

Washington, May 16, '98

Spain fooled us good in that

with its *Caro Verde* fleet, and it is greatly feared that the fleet now has it in its power to choose whether it will fight Admiral Saupchen's fleet, which battered the forts in the Harbor of San Juan Porto Rico, a few days ago or Commodore Schley's flying-squadron, which is now for the first time acting up to its name enter a Cuban harbor without fighting, or make a dash for some of our coast cities. This state of affairs would be expending were it not for the satisfaction everyone feels in knowing that this Spanish fleet is actually in American waters. It may decide us to attack, but it is bound to be our game in the end. The end will be at once if the Spanish fleet dares to fight either of our fleets. One man's guess is about as good as another's about the intention of the Spanish fleet, but a few days will show them.

The postponement of the sending of troops to Cuba made necessary by the presence of the Spanish fleet in American waters is less aggravating than it appears to be. In fact, it is a good thing for us. Had the original plan of landing troops in Cuba last week been carried out, we should not have been able to land a sufficient number to capture Havana, which is defended by something like 80,000 Spanish soldiers, owing to the inability of the government to furnish equipments needed by the volunteer and any delay in whipping the Spaniards out of Cuba after our army goes over here will be calculated to lessen our prestige among the nations of the world. Dewey's men a Manila and the succession of brave and daring deeds performed by the men on the ship engaged in blockading Cuban ports have placed our navy among the foremost fighters of the world, and it would be very humiliating for our army not to make an equally creditable showing when it goes to Cuba. It is therefore absolutely necessary that a sufficient number of men properly equipped to accomplish what they go to do should be sent to Cuba. The delay will serve to place the army on a proper footing. Just to give an idea of the deficiency in army equipments, it may be mentioned that the government has purchased the entire visible supply of tenting canvass in the country and yet has only enough to make about half the tents the army will require; the rifles are working on the rest.

The war revenue bill reported to the Senate from its Finance Committee is in many respects a marked improvement upon what it was when it was sent over from the House. It now provides for the immediate issue of \$150,000,000 in greenbacks, and for issuing \$120,000,000 in silver certificates to represent the seigniorage on the silver bullion owned by the government, which it directs to be coined. It taxes all sorts of corporations, and strikes out the authority for issuing bonds.

A caucus of the democrats of the House may be held this week for the purpose of discussing the joint resolution providing for the annexation of Hawaii, which has been favorably reported to the House, and deciding upon the advisability of making it a party question. There are a number of democrats in the House who are opposed to annexation. It is the same in the Senate, but the democrats of the latter body long ago decided not to make annexation a party question, and the chances are that the same course will be followed in the

House To attempt to do otherwise would be to compel these Democrats to favor annexation to belt the action of the party caucus. It is, of course, in the power of a majority of the Democrats in the House to make opposition to annexation a party question, but it is not in their power to control democrats who have committed themselves to a resolution. There was no sign that the Democratic party as a whole endorsed President Cleveland's anti-annexation policy; on the contrary, there were many signs of opposition thereto. If there ever was a time that opposition to the annexation of Hawaii could wisely have been made party policy, it has long ago passed.

The fear that Mr. McKinley would give staff commissions in the volunteer army to incompetent men, because of his inability to stand the pressure of the political and social influence brought to bear upon him in their behalf, was fully realized. It would have been an impossibility to have found men more incompetent than many of the civilians named for positions on the staff. This incompetency was fully recognized by Mr. McKinley, as he selected enough officers from the regular army to do all the work that is likely to be required of the staff, which will leave the incompetents to do the ornamental.

**Failed to hold an Election**

The town of Lanesville is with trouble on account of negligence. No town election was held there last week and the question arises whether the old Board has right to hold over.

The Gazette argues that the old officers have no right to make arrests or to transact business for the town. It looks like the courts will be called upon to settle the matter.

To Emancipate the Senate

The House did a very sensible thing Wednesday. It voted by 184 to 11 to propose a constitutional amendment making Senators elective by the people.

An effort was made to leave the matter optional with the several States, but it was overwhelmingly voted down.

There is not the slightest doubt that this vote reflects public opinion. The purchase of Senatorships, directly and indirectly, and the corruption of Legislatures in that behalf, have become an intolerable scandal.

The Senate is no longer a securely representative body. To restore it to that condition and to save the country from the evils that inhere in the present constitution of the upper house is a pressing necessity.—New York World.

## Democratic Rule for good Government.

and Mrs. Joe Persons Remedy for the Blood.

So Tired, So Tired, Chronic Dyspepsia

For ten years I had been a sufferer from chronic dyspepsia, which was pronounced incurable. I was completely run down and in the summer season was not able to do anything and spend a great part of the time lying down. I could not touch meat of any kind, or any solid food whatever, as I could not digest it at all and had to live on crackers and light diet. I was very nervous, would have severe nervous spells, and could not get any natural sleep. I was so restless, I suffered all the time from chronic dyspepsia, which kept me weakened down. That was my condition, when I determined, as a last resort, to try Mrs. Persons's Remedy. I had tried so many treatments and so many potent medicines without benefit, that I had no faith in anything, and had almost made up my mind not to try another thing, when Mrs. Persons came to my house last April and induced me to try her Remedy. I bought half a dozen bottles. Felt no relief whatever until I was on the fourth bottle, when I knew I was getting better. I became strong, got so I could sleep well and there was no necessity for me to lie down in the day time. I took twenty-two bottles before I stopped. My digestion is now perfect, and I eat out meat, vegetables and anything else I want, and as much as I want. When I commenced the Remedy I weighed 98 pounds, now I weigh 115 pounds. Dyspepsia perfectly cured, and it is all owing to Mrs. Joe Persons's Remedy. It is everything claimed for it.

First to Die for the Flag.  
It is worth while also to remember that the South furnishes the first sacrifice of this war. Ensign Bagley was a native of North Carolina. With his blood he has sealed the union in arms of the North and South. A people who once fought against the Stars and Stripes sends one of their sons and the first sacrifice for the honor and glory of that flag. There is no North and no South after that. We are all North Bagley's countrymen.—New York Tribune.

The Paper Prints the News.  
The Reflector has been complained of the last day or two for not putting out more bulletins. This is the thanks a fellow sometimes gets for spending a lot of money for telegrams and bulletins in advance of the paper such as we are deemed of sufficient interest. But we are glad the comment are true. It is a matter of fact that the Reflector is losing money by giving them; the telegraph news, it looks like they should want to help the paper rather than complain at it.

Every American soldier who goes to Cuba will wear an aluminum tag for identification, bearing his name, command and home address. This precaution is taken against the possibility of sunburning graves down there. There is no North and no South after that. We are all North Bagley's countrymen.—New York Tribune.
