**undergraduate and

SENIORS**

You're in your last year of school. You're thinking about the future. Your career, your family, your goals. Life insurance, sure, but right now you have no way to finance a program.

Pilot will do it for you. The Senior Plan is designed specifically for the college senior and last-year graduate student. The plan is available in amounts of \$10,000, \$15,000, \$20,000, or \$25,000.

While in school, all you pay is a small portion of the annual Senior Plan premium. Pilot finances the balance of the first year premium for you.

At the end of the fourth year, a special cash payment (endowment) feature of the policy pays off the loan plus interest.

It's easy to start your life insurance program early with Pilot's Senior Plan.

Could you be a nuclear expert?

(If so, you could earn more than \$500 a month your Senior year.)

Even if you're a Junior engineering or physical science major, it's not too early to start thinking about your career. And if you think you've got what it takes to become an expert in nuclear power, the Navy has a special program you should look into right away.

Why right away? Because if you're selected, we'll pay you more than \$500 a month during your Senior year. (If you are presently a Senior, you can still join the program. We'll begin paying you \$500 a month as soon as you are selected.)

What then? After graduation and Officer Candidate School, you'll get nuclear training from the men who run more than 70% of America's nuclear reactors—Navy men. And an opportunity to apply that training in the Navy's nuclear-powered fleet.

Only about 200 men will be chosen for this program this year. So, if you're interested, call us

Learn to land a jet here and you can land one anywhere.

Bringing in a supersonic jet on a 10,000 ft. cement runway is tough enough. But landing one on a 500 ft. piece of a carrier deck, moving at 25 knots, is even tougher. Only a few men are good enough to do it. And they're all Navy trained. How can you become a member of the Naval Air team? One way is to join while you're still in college. One of the advantages of being part of the Aviation Reserve Officer Candidate (AVROC) Program is that it lets you continue working toward your degree.

Getting your Navy Wings isn't easy. The training is tough. The least that will be expected of you is the best that other pilots can do. Their limits are your starting blocks, their expertise your primer. But if you succeed, your future is assured whether you remain in the Navy or not.

For more information, talk to your local Navy Recruiter.

ENGINEER YOUR WAY TO THE TOP

If you're an outstanding engineering graduate like Will Frick, or someone who can master advanced technology, you may qualify for one of our top programs.

Nuclear engineering.

We're looking for men who have a solid foundation in math and physics. Men with superior ability. Men who want to work the energy of the future.

If that's you, look into our Nuclear Propulsion Officer Candidate Program—NUPOC.

You'll spend a year learning the many details of nuclear propulsion plant theory and operation. These details will enhance your ability to solve difficult problems through application of fundamental engineering principles.

Set your sights high. Go Navy.

**Be someone special.
Join the Nuclear Navy.**

For more information on how to take off, talk to your local Navy Recruiter in person. Or call him.
