

# THE DAILY REFLECTOR.

Vol. 2.

GREENVILLE, N. C., SEPTEMBER 3, 1895.

No. 228

## Local Trains and Boat Schedule.

Passenger and mail train going north, arrives 8:22 A. M. Going South, arrives 6:37 P. M.

North Bound Freight, arrives 9:50 A. M., leaves 10:10 A. M.

South Bound Freight, arrives 2:00 P. M., leaves 2:15 P. M.

Steamer Myers arrives from Washington Monday, Wednesday and Friday leaves for Washington Tuesday, Thursday and Saturday.

## Weather Bulletin.

Wednesday, generally fair.

## LOCAL NOTES AND TOBACCO JOTTINGS

BY O. L. JOYNER.

Mr. J. S. Jenkins returned Monday night from an extended trip to the various markets in this State and Virginia. He is now on the breaks and wants stacks of the weed.

The Secretary of the Greenville Tobacco Board of Trade handed us this morning the report of the sales of leaf tobacco on this market for the month ending Aug. 31st, 1895. The total sales in pounds amounted to 462,770 and sales did not commence until about Aug. 15.

Like some of our friends on some of the eastern markets, while we do not boast of selling more tobacco than all the other markets together, we claim that our tobacco thus far has averaged more money per pound than any market in the State of North Carolina or Virginia, and if any one doubts it, we can prove it.

At a meeting of the Tobacco Board of Trade last Monday the following officers were elected: President, P. H. Gorman; Vice President, B. E. Parham; Secretary and Treasurer, Geo. Harrison.

In order to prevent blocking of sales the Board enacted a new law making the sale hour 9:30 instead of 10 as heretofore, and forcing the auctioneers to sell not less than 200 pieces of tobacco an hour, but as much faster as they please.

The law relating to drumming tobacco while in transit to market was taken up and discussed. Right here, for the benefit of farmers who may not know how strict that law is, we copy a part of it: "Any member of this Association who shall attempt by any means to influence any planter, or other persons, who may have tobacco in transit to the Greenville market to carry the same to his, or that, or any particular warehouse in said town during such conveyance of the same to this market, shall be fined not less than \$25 nor more than \$50 for each load, and the terms in transit and conveyance to market shall be understood to embrace the whole time from the commencement to pack such tobacco upon the wagons or vehicles until the same has been deposited in some of the Greenville warehouses and sold." This law while it has not been rigidly enforced, has been pretty closely observed. But this season so much ungraded tobacco has been brought to market and offered for sale in the streets that in a great many instances the law has been grossly violated by purchasing the tobacco while in the open streets. This was discussed at the meeting Monday, and buying tobacco in this condition in the streets was thought to be a very direct way to induce tobacco to some particular house, so by general consent of the Board it decided to enforce the law, and to the reporter of every violation of this law and the conviction of the parties concerned, the sum of fifteen dollars of the minimum fine collected should be paid. No gentleman who is willing to recognize the rights of others, will knowingly violate this law, and while buying ungraded tobacco in the streets in the past had become so general that almost everyone engaged in it, but in the future, knowing that we have nothing but gentlemen, no trouble from this source need be feared, though the employees of some of the houses may sometimes forget.

iation who shall attempt by any means to influence any planter, or other persons, who may have tobacco in transit to the Greenville market to carry the same to his, or that, or any particular warehouse in said town during such conveyance of the same to this market, shall be fined not less than \$25 nor more than \$50 for each load, and the terms in transit and conveyance to market shall be understood to embrace the whole time from the commencement to pack such tobacco upon the wagons or vehicles until the same has been deposited in some of the Greenville warehouses and sold." ## Bethel Items.

BETHEL, N. C., Sept. 2, 1895.

Hon. C. M. Benard was in town Sunday on his way to Williamson Court.

Mr. M. O. Blount returned from New York Friday evening.

Messrs. J. R. Bunting, of Bethel and T. T. Cherry, of Conetoe, left for New York last Friday morning to purchase their fall and winter stock.

Mrs. J. L. Langley, of Greenville, who has been visiting her sister, Mrs. B. F. Whitehurst, returned home this evening.

# THANKS! To All for Waiting.

## I'm Back with a Big line of Stylish CLOTHING FRANK WILSON, The King Clothier.

Mrs. W. A. James, of Asheville, is visiting relatives here.

Charlie James, of Pactolus, spent a few days here last week.

Miss Minnie Davis, of Florence S. C., is spending a few weeks with Mrs. J. M. Lloyd.

Miss Cornelia Manning and sister, J. H. Manning and D. A. Moore returned from Ocracoke this morning.

Mr. J. S. Mooring passed through here Saturday morning on his way to Collinsville, Ala., where he will go to school to Prof. McWhorter.

Miss Sudie James, of Everetts, is visiting Miss Lula Peal.

Mr. Leon Whichard has taken a position with Staton, Cherry & Bunting.

Rev. E. J. Edwards filled his regular appointment in the Baptist church Sunday morning and night.

Little Katie, infant child of Mr. and Mrs. D. S. Legget died last night.

Mrs. Mc. G. Davenport, after a long and lingering illness, died yesterday about eleven o'clock.

Funeral services were conducted this afternoon at 1 o'clock by Rev. W. A. Forbes.

Prof. B. F. Hassell opened school today in the Academy with 45 pupils.

## THE AMERICAN MUTUAL BENEFIT SOCIETY.

A Friend in Adversity. Protects you when sick and unable to follow your business or occupation.

Benefits \$2.50 to \$25.00 per Week.

Average cost from about one to eight cents per day. No assessments. Exact cost stipulated.

For information apply to  
HERBERT A. WHITE, Cashier,  
ZENO MOORE, President.

## J. F. KING, LIVERY, SALE AND FEED STABLES.

On Fifth Street near Five Points.

Passengers carried to any point at reasonable rates. Good Horses. Comfortable Vehicles.

# DAILY REFLECTOR.

D. J. WHICHARD, Editor.

Subscription 25 cents per Month.

Entered as second-class mail matter.

EVERY AFTERNOON (EXCEPT SUNDAY)

The names most prominently mentioned as successors of the late Secretary, Coke are Thos. W. Mason, S. A. Ashe, N. B. Broughton and E. C. Smith. Their prospects are in the order of the names above.

There seems to be much dissension in Kentucky among the politicians. One faction declaring all appointments for joint discussions cancelled and the other still holding them. The Democrats seem hopelessly divided.

## THE EXPERIMENT STATION

AT RALEIGH, NORTH CAROLINA.  
Harvesting and Threshing Cowpeas by Machinery—Insect Pests of Shade Trees—Feeding Calves—Questions and Replies.

August 1895.

The Experiment Station Bulletin.

The standing offer is made to send the bulletins of the station to all in the state who really desire to receive them. They are specially prepared to be serviceable as far as possible to the practical farmer. Thousands of farmers have already taken advantage of this offer. Unless you really want to be benefited please do not apply for them as we have none to throw away. If you desire to read them, write on postal card to Dr. H. B. Battie, Director, Raleigh, N. C.

Harvesting and Threshing Cowpeas by Machinery.

The great need of southern planters is an efficient machine to gather and thresh cowpeas. This is now done by hand and at a cost too great for them to become very widely planted for both a renovating and money crops. Correspondents have called attention to this matter, among them being Judge Walter Clark of the North Carolina Supreme Court Bench, and Prof. W. F. Massey of the North Carolina Experiment Station. Four parties responded, and all were invited to send a machine to be tested by the North Carolina Experiment Station. Only one of these, Mr. J. H. Gardner of Dalton, Ga., accepted the proposition, and his machine was tested by Prof. F. E. Emery, Agriculturist of the North Carolina Experiment Station, first on the farm of Mr. T. B. Parker, Goldsboro, N. C., and again on the farm of the Agricultural College at Raleigh. The machine is a thresher and not a harvester, and only threshes the peas from the pods after they have been picked by hand from the vines. The machine is known as the "Success Pea Thresher." At the first trial of 15

minutes 31½ lbs. corresponding to 2½ bushels per hour, were threshed and fairly well cleaned. This required one man to feed the machine, while two turned the wheel. It was impossible for these two men to have continued with the same labor for more than half a day. At the second trial run for 44 minutes, the rate of 1.57 bushels per hour was secured. As compared with these results, three men were employed to whip out the peas by hand and to fan them clean also by hand. Occupied thus for 44 minutes, they secured the rate of 2.6 bushels per hour of cleaned peas. This is more than double the result from the Success Thresher in the second trial and nearly double from that in the first. The machine therefore cannot be recommended.

What is needed is a serviceable Pea Harvester, that will gather the peas from the vines in the field, and not merely a pea thresher. There have come to light two such machines in the investigation of the North Carolina Experiment Station upon the subject. These however need improvement and with some ingenuity and capital might be successfully placed on the market. Both of these are North Carolina inventions. One of them (the "Eureka") proposes to gather the crop from broadcast sowing, while the other picks from rows. This last (the Savage Pea and Bean Harvester) was shown in a test (North Carolina Experiment Station Press Bulletin No. 33) to gather 76 per cent. of all the peas when driven once over a row; with a second time, 86.86 per cent. were gathered, which was about as efficient as hand work.

A machine to gather peas from broadcast sowings, however, is the one most needed, and if proven successful, and can be placed on the market cheaply, is bound to prove of great value both to the inventor and to farmers generally.

Insect Pests of Shade-trees.

During the last few years there has arisen an ever increasing strain of complaint against the insects which have begun to ravage the shade-trees in southern cities and towns. The alarming damage arises partly from the unchecked introduction and spread of foreign species of insects, but is chiefly owing to the mischievous English sparrow, which is fast ejecting our native insectivorous birds, while itself preferring a different diet.

Among the most destructive shade-tree insects may be enumerated the following:

1—TENT CATERPILLAR—*Meteocampa distriata*.  
These worms form dome shaped nests in the crotches or among the branches of various trees, but more especially

## Educational

### Greenville Collegiate Institute.

GREENVILLE, N. C. S. D. Bagley, G. A. M. Principal. With full corps of Teachers. Next session will begin MONDAY, SEPTEMBER 2, 1895. All the English Branches, Ancient and Modern Languages. Music will be taught on the conservatory plan, by a graduate in music. Instruction thorough. Discipline firm, but kind. Terms reasonable. Art and Elocution will be taught, if desired, Calisthenics free. For particulars address the Principal, Greenville N. C.

## GREENVILLE

# Male Academy.

The next session of this School will begin on

MONDAY, SEPT., 2, 1895,

and continue for ten months.

The course embraces all the branches usually taught in an Academy.

Terms, both for tuition and board reasonable.

Boys well fitted and equipped for business, by taking the academic course alone. Where they wish to pursue a higher course, this school guarantees thorough preparation to enter, with credit, any College in North Carolina, or the State University. It refers to those who have recently left its walls for the truthfulness of this statement.

Any young man with character and moderate ability taking a course with us will be aided in making arrangements to continue in the higher schools.

The discipline will be kept at its present standard.

Neither time nor attention nor work will be spared to make this school all that parents could wish.

Send in your boys on the first day.

For further particulars see or address

July 30, 1895.

W. H. RAGSDALE, Principal.

### Experiment Station.

the oak and hickory. They also attack fruit trees. In some seasons, they devour the foliage over large areas in swampy regions, and then migrate in such swarms as to stop passing trains.

REMEDIES: Burn the nests out with a torch made by wrapping a rag saturated with kerosene around the end of a suitable pole. They may also be readily poisoned by spraying infested trees with Paris green.—1 lb. to 15 gallons of water.

2—FALL WEB-WORM—*Hyphantria textor*.

The webs of this insect become most painfully conspicuous in the late summer and fall months. The worms usually web together several leaves and eat the soft tissue, leaving the large veins and ribs. As fast as they consume the enclosed leaves they extend the web around others.

REMEDIES: The same as for the Tent Caterpillar. This worm feeds by preference upon the sycamore, poplar and white maple. It is also a pest in neglected orchards.

3—THE ELM-BEETLE—*Galeruca Xanthomelana*.

This insect is of foreign origin, only recently introduced and still chiefly found upon the European Elm. The worms are about 1/2 inch long yellowish with two black stripes on sides. The worms feed in swarms upon the leaves of the Elm, eating the green matter and leaving the ribs. They are most troublesome in July and August.

REMEDIES: Spray with Paris green. Gather up and destroy the pupa concealed under trash, boards, etc., under and near elm trees.

4—THE TUSsock CATERPILLAR—*Onygia Cucostigma*.

This worm is easily known by the four tufts of white hairs on its back resembling the dauber of a shoe brush.

This worm feeds upon the leaves of most shade and fruit trees, usually devouring the whole substance beginning at edge of leaf. It does not spin a web, but has a habit of suddenly dropping from the tree by a cable which it spins as it falls. It is most common on the maple, elm and fruit trees.

REMEDY: Same as for No. 3.

The above described insects are only a few of the most destructive species known to exist in this state. Lovers of beautiful trees are requested to watch for the first appearance of these pests and promptly notify the Experiment Station, sending at the same time specimens of the insects and the foliage they damage. Special remedies will be given such as each case requires. Bulletin No. 100, our common insects can be had gratis by applying to Director H. B. Battle, Raleigh, N. C.

Some species of trees are more exempt than others from insect attack. In setting out new trees these species should be given the preference. Among such and well adapted to our climate may be named, Red Mulberry, Tulip-tree, Sweet and Sour Gums, Sugar Maple and Red Maple.—Gerald McCarthy, Entomologist, Experiment Station.

Advanced Monthly Summary of Meteorological Reports for North Carolina, July 1895.

The North Carolina State Weather Service issues the following advanced summary of the weather for July 1895, as compared with the corresponding month of previous years:

Temperature.—The mean temperature for the month was 75.2 degrees, which is 2.6 degrees below the normal. The highest monthly mean was 80.2 at Lum-

berton; the lowest monthly mean, 64.6 at Linville. The highest temperature was 99 degrees at Littleton, Tarboro, Rockingham, Saxon and Salem on various dates; lowest temperature, 43 on the 8d and 6th at Linville. The warmest July during the past 22 years was in 1887, with mean of 80.3 degrees; the coldest, in 1891, mean 74.2.

Precipitation.—Average for the month, 5.25 inches, which is 0.19 inch below the normal. The greatest amount was 9.08 inches at Southport; least amount, 2.32 at Asheville. The wettest July occurred in 1889, average rainfall 7.75 inches; the driest in 1883, average, 3.12 inches.

Wind.—Prevailing direction, southwest, which is the normal direction for July. Average hourly velocity, 7.6 miles. Highest velocity 45 miles an hour from the southwest on the 24th at Kitty Hawk.

Miscellaneous.—Thunderstorms occurred at one or more places in the state on every day except, 12th, 17th, 26th, 29th and 31st. But few reports of hail during the month.

The month was on the whole very favorable to agriculture.

North Carolina Weather During 1894.

The North Carolina Experiment Station has issued an attractively bound work entitled "North Carolina Weather during the year 1894." It embodies the results of meteorological and other observations of the state weather service during that year. The volume embraces 256 pages and includes a carefully prepared index and table of contents. It describes the work of the state weather service and through its several agencies, how it benefits the people of the state. The agencies are, the meteorological observing stations, the signal display stations, and crop reporting systems. The latter distributed weekly the weather crop bulletin for twenty-six issues, the signal stations display flags to note the coming of cold wave and frost warnings and changes in the weather, while the observing stations furnished observations for securing a correct record of our climate and weather. Another branch of the service which will prove of value is the flood warning system, by which people living on the low grounds of certain rivers are warned of the approach of floods. The number of places supplied by weather forecasts is nearly 500. The crop correspondents reporting for the weekly weather crop bulletin numbered 350 from all of the 96 counties. The meteorological observing stations numbered 73 from all parts of state.

The volume will be sent free to those who apply, provided they really desire to preserve such records and to learn of the operations of this division of the North Carolina Experiment Station.

Mr. Walter Harding and sister Miss Martha went to Washington last Thursday.

Mr. E. N. Wilkerson returned to his home in Granville County last Saturday.

Messrs. L. J. Chapman, L. C. Quinerly and J. R. Harvey will leave tomorrow for Baltimore and New York to purchase their fall stock of goods.

Mr. Clarence Mewborn left this morning for Kinston to visit relatives.

DON'T BE DECEIVED.—The Electric Belt is sold on a positive guarantee. Best people everywhere endorse them. It has cured thousands and it will cure you. Why neglect your health when there is such relief at hand. Buy the genuine, the only Electric Belt that generates its own current. Ask your friends what it is doing for them.

C. J. ROGERS, Gen'l Ag't.

JOHN DOBSON, Special Agent.

The railroad authorities have had work commenced on a 60 feet addition to the freight warehouse at the depot. We expect it will be no great while before still further additions will have to be made to accommodate the increasing freight here.

Greenville opens wide her doors and extends a cordial welcome to the delegates and visitors to the Albemarle Presbytery. May the session be accompanied by such Divine presence as to prove a blessing to all who attend and a benediction to the community.

## OAKLEY ITEMS.

OAKLEY, N. C., Sept. 2, 95.

Miss Mary Highsmith is quite sick.

Capt J. E. Hines made a business trip to Pactolus Saturday.

Mr. J. E. Roberson, of Everetts was here Sunday.

Mr J. H. Taylor's school closed Friday.

Mr. W. W. Thomas and wife were here Sunday, the guests of Mr. W. H. Williams and family.

Mr. H. L. Williams and sisters, Misses Mollie and Alma, were here Saturday and Sunday.

Rev. John Rodgers of Williamston, was here Saturday night and preached a most excellent sermon.

## Guest and Host.

The following is a list of delegates to the Presbytery and by whom they will be entertained, so far as could be ascertained up to the hour of going to press:

### MINISTERS.

Dr. C. M. Payne, Washington, guest of W. B. Wilson.

Rev. C. N. Wharton, Warrenton, guest of F. G. James.

Rev. W. T. Walker, guest of J. L. Wooten.

Dr. F. H. Johnston, Elizabeth City, guest of Hotel Macon.

Rev. L. McLauren, Wilson and Ernest Wood, Newbern, guests of C. A. White.

Dr. W. D. Morton, Henderson and Rev. J. D. Morton, Tarboro, guests of Mrs. W. M. King.

Rev. C. G. Vardell, Newbern, guest of Mrs. Gay at College Hotel.

Dr. Eugene Daniel and Prof. Dinwidie, Raleigh, guests of Alfred Forbes.

Rev. F. D. Thomas, Rocky Mount, guest of D. J. Whichard at King House.

Rev. J. E. Thacker, Oxford, guest of J. R. Moore.

Rev. R. W. Hines, Parmele, guest of S. C. Hamilton at College Hotel.

### ELDERS.

J. R. Ross and R. C. Wharton, Washington, guests of J. K. Moore.

J. I. Foust, Goldsboro, guest of E. A. Moyer at King House.

Capt. O. Williams, Tarboro, guest of W. L. Brown.

Mr. McDonald, LaGrange, guest of J. L. Wooten.

Our people may expect their guests on the train this evening. The full list could not be made up in time to print today, but it is probable that all those who are to entertain delegates will have come whose names were not sent in advance to the committee.
