## ROCHDALE ITEMS.

Rochdale, N. C., Aug. 4, 1909.

I think we had about the biggest rain of the season last Tuesday.

Miss Mattie Little, of Wilson, came down Friday evening to visit her father, T. E. Little, and other relatives for some weeks.

Miss Agnes Smith went to Snow Hill Saturday to visit relatives for a week.

Miss Agnes Smith invited her neighbor friends Friday evening to meet at what we would call a tobacco barn party, and entertained the crowd for a few hours very nicely. The girls amused themselves with a game, but they were sitting flat on the green grass, and some of the boys with them, and seemed to enjoy the game very much. The older people enjoyed looking at them. Some of the boys amused themselves by running foot races, and last, but not least, Miss Agnes, her mother and sister spread a long table and filled it with dainties that consisted of watermelons, cantaloupes, apples and peaches and we all ate to the fill and very reluctantly started for home about eleven o'clock. It being such a beautiful moonlight night, we enjoyed the crowd and occasion hugely.

Mr. and Mrs. B. P. Willoughby and children, from near Farmville, spent the day at C. E. McLawhorn's Sunday and attended Sunday school at Smith's school house.

Rev. S. P. Speigle expects to commence a protracted meeting at Smith school house the third Sunday in this month.

I see in the Cross Roads items that the itemizer wants information as to where Hugh Smith and Cleveland Parker went, when they said they went to the unknown. The two first letters of the man's name that they went to the house of, is F. Marion Smith, of our Smith-town.

John Rouse, of Farnville township, living on the farm known as the Blaney Joyner farm, has a squash in his garden which he says will weigh 100 pounds. I don't think it will weigh more than 75 or 80 pounds, but it is a huge squash. It is 22 inches long, 18 1/2 inches in diameter and 4 feet and 7 inches in circumference. Those who know me can judge if there is any truth in this statement, but I will vouch for it all except the weight. Mr. Rouse says he is going to weigh it.

We had heavy rain again Sunday evening and nearly all day Monday.

Mrs. C. E. McLawhorn is on the sick list again with boils and sore throat.

## CHIEF SMITH WILL GET REWARD.

**Captures a Woman Wanted in Durham for Murder—\$50 Reward for Arrest.**

Police Sergeant A. R. Pendergrass, of Durham, came to Greenville Tuesday evening in response to a telegram from Chief of Police J. T. Smith advising him of the arrest here of a colored woman wanted in Durham for murder, and he left this morning with the prisoner taking her back to Durham.

The woman's name is Van Ray, who in October of last year killed another woman named Louvenia Harris. The Ray woman had since been a fugitive from justice until arrested here. Chief Smith, assisted by Mr. W. C. Hines, located the woman in a "joint" on the southern outskirts of the town and arrested her Monday night. After being taken in custody the woman confessed the crime and said she was glad to be arrested, as she had grown tired of running from officers. Sergeant Pendergrass easily identified her as being the right woman.

Sometime after the murder the governor offered a reward of \$50 for the arrest of the Ray woman, and Chief Smith has forwarded his claim for this reward.

## Tears Down Real Political Fence.

Governor Brown has demolished a real tangible fence of the last administration, says the Atlanta (Ga.) Constitution. By order of the governor, the famous wooden railing erected in the governor's reception room at the State Capitol, which, under the Hoke Smith administration, separated the governor's private secretary and stenographer from the public, has been torn down. The Hoke Smith fence had become an institution. It is now relegated to the woodpile. Private Secretary Hardy Ulm and Stenographer Williams are not set apart by any conceivable barriers. They work in full view of every man who comes into the reception room.

The door of the governor's private office is practically never closed, except possibly when delegations of visitors discuss important state matters of a private nature. The governor works in full view of the public.

## June and July Rainfall.

Mr. C. V. York, who keeps a record of rainfall here for the government weather bureau, tells us that for the month of June the rainfall was 11.85 inches and for July 9.45 inches, making a total of 21.30 inches for the two months.

August starts off like it was going to keep pace with the two preceding months, the first four days of this month giving 2.22 inches.

## In a Wreck.

Mr. C. T. Munford sent The Reflector a telegram from Chicago today stating that his party was in a slight wreck at DuBuque, Iowa, but no one was hurt. A short delay was the only inconvenience.

Prayer meeting in Christian church tonight.

## They Sew the Buttons on, No Doubt.

Discussing the extravagance of New York city's administration, a current magazine pictures a repair shop for the dummies used in testing the efficiency of the new fenders for electric cars and the motorman's presence of mind. It is said that these figures, life-size, are fully dressed, even to full suits of underwear. When they are smashed up by some motorman taken by surprise in his test, they are sent in for repairs. The account does not say if there are hose to be darned or whether the hats and cravats are kept just up to date.

WEDNESDAY, AUG. 4, 1909.

The farmers should be able to see that good roads would be a great blessing to them. Bad roads places a heavier tax on them than on any one else.

Two organizations that ought to get active, especially along at this time of the year, are the Chamber of Commerce and the Merchants' Association. Things ought to be doing to enlarge Greenville's trade during the fall, and these organizations could render good assistance in that direction. There is power in working together, but with every man pulling along by himself little is accomplished.

Now and then some paper talks about sheep raising in North Carolina. The intention is all right, for the subject is a good one, and sheep raising would be profitable under certain conditions. But you cannot do much at this industry in a State where dogs have so many privileges as in North Carolina. There are thousands of mangy dogs in this State whose owners think more of them than of their children. And every legislator is afraid of the man who owns dogs. Let dog killing precede sheep raising if the latter is to be made profitable.

### Good Roads a Heritage.

The people all over this entire section of country are becoming more enthusiastic each day on the matter of good roads, are rapidly becoming convinced of good roads' paramount importance and are demonstrating their earnestness in the matter by voting large sums of money for good roads construction. But while this general crusade against bad roads is being carried on there are some people to be found here and there who retard the good work by their opposition to bond issues for the purpose of the ground that they do not wish to saddle a debt on their children. Such persons look at only one side of the picture. They see the indebtedness created, but fail to take into account the offset thereto in the increased value of the inheritances they leave their children through the creation of that debt. Their children will liquidate the debt, but it is they also who will derive the greater part of the benefit which will result from its creation. No man who votes to put a bonded debt on his county for the purpose of building good roads need fear that his children in future years will complain of his action. To the contrary, they will rise up and call him blessed for the goodly heritage he has left them. It is more for the sake of coming generations than for themselves that the people, especially the owners of farms and the dwellers in the rural districts, are constructing good roads, and the children of those who refuse to follow this course will have just cause of complaint and they will deplore the short sighted policy of such ancestors, which prevented their section from keeping pace with others in progress and the development of farming interests. Every man who opposes good roads stands in the way of the advancement of his children, instead of doing them an injury; for the advantage of good roads will far outweigh the debt's inconvenience.

#### A New Back for an Old One. How it Can be Done in Greenville.

The back aches at times with a dull, indescribable feeling, making you weary and restless; piercing pains shoot across the region of the kidneys, and again the loins are so lame to stoop is agony. No use to rub or apply a plaster to the back in this condition. You cannot reach the cause. Exchange the bad back for a new and stronger one. Greenville residents would do well to profit by the following example.

Thomas Moseley, 109 East St., Kinston, N. C., says: "Several months ago I had a severe attack of kidney trouble, at which time Doan's Kidney Pills proved their merit. My back ached severely, I had pains through my hips and felt generally miserable. I heard so much in favor of Doan's Kidney Pills that I procured a box and used them according to directions. They soon dispelled the aches and pains and improved my health in every way. I have no hesitation in recommending Doan's Kidney Pills." For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

# HURRAH FOR SEWALL'S POINT

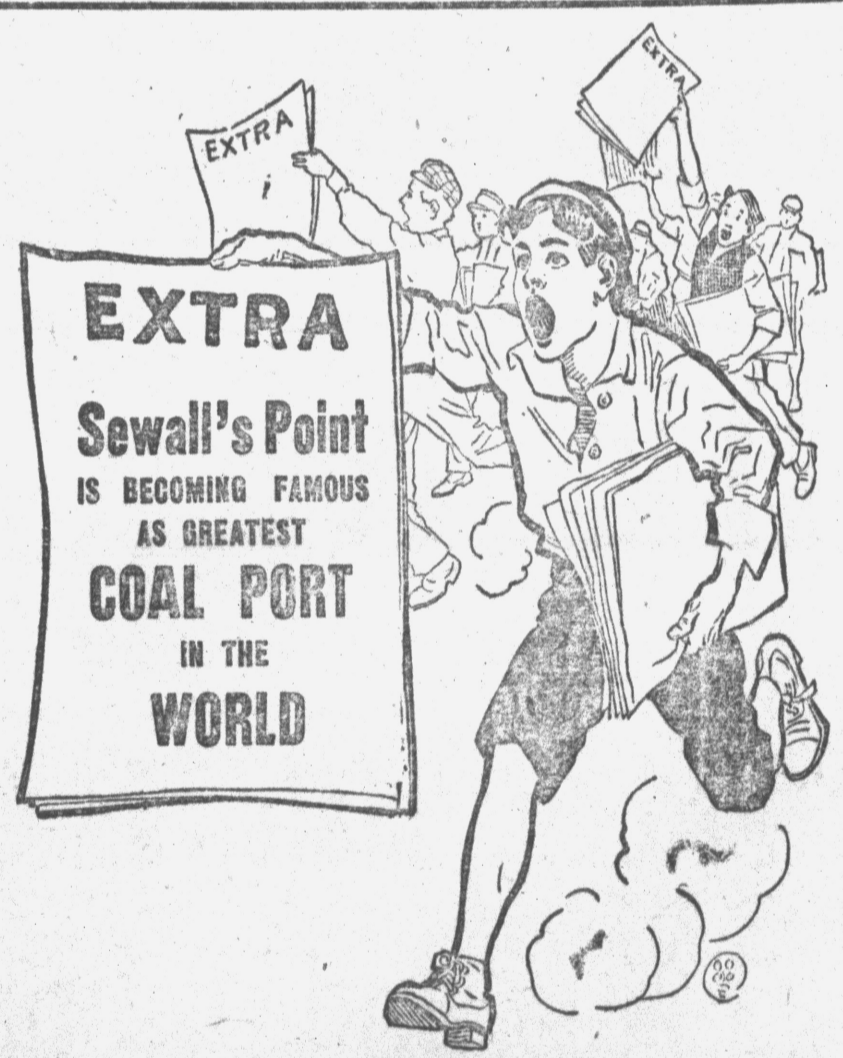

## NORFOLK FIRST COAL PORT NOW IN THE WORLD

Norfolk is beginning to take rank as the world's foremost coal port. Captain B. Bune, master of the German steamer Adelheid, who came to the Customs House to clear his ship, said that he arrived off the Virginian Railway coal pier here at six o'clock this morning, put the Adelheid under the chutes there at seven o'clock, took 286 tons of coal into his bunkers, finished at eight o'clock and was ready to sail.

If there is any other place in the world where coal can be put aboard ship so fast as it now may be at this port, men in the trade do not know of it.

At the general offices of the Virginian Railway today a letter from the Secretary of the Eastern Coal Company, of Providence, Rhode Island, James A. George, was shown. In this letter which related to the loading of cargo, not bunker coal, the writer said that he wished to congratulate the railway company upon their recent performance in loading the company's steamer Ravenscraig, which was, he said, "a record breaker," adding that the Virginian dumped into the Ravenscraig 3,447 tons of coal in four hours.

The Adelheid is from New Orleans and Pensacola and proceeded for West Hartlepool and Horsens. Her master cabled his owners from here reporting the wonderfully quick dispatch he got. The steamer came to C. J. McKee for coal.

Glenwood Park is the nearest high class resident property to the terminals of the great Virginian Railway and the approved location for homes of its best paid employes.

The Above Clipping appeared in the Ledger-Dispatch of last Saturday and refers to the largest and longest coal pier in the world, being that of the great Virginian Railway at Sewall's Point built at a cost of \$2,000,000.

The plans of the Virginian Railway show that 3 more piers costing \$2,000,000 each are to be built at Sewall's Point for the handling of coal, also 3 large merchandise piers and 2 large lumber piers are to be built on their terminals, thereby preparing for what will soon be the greatest industrial section in the South.

Many hundreds of high class and well paid employees at these terminals must have homes near to their work, and to meet this requirement

## GLENWOOD PARK LOTS

are offered on terms of \$5 cash and \$5 per month to enable the public who desire to invest in a high class section to share in the great development now going on. Over 200 lots have been sold to Norfolk people already and only those who act quick will be able to secure any of the few remaining lots.

We will be pleased to show you this property and you can then judge for yourself.

### Holidays.

The joys of our holidays—whom can measure them? The present pleasure of the days themselves is not the only nor the chief enjoyment. The schoolboy's anticipation of the sports of vacation is to be added to the pleasure of the vacation itself. And then the memory of it after it is past—how much more this memory adds to the total of the enjoyment which the vacation brings! The schoolboy remembers the afternoons at the swimming pool, the happy days in the woods or by the stream long after he has forgotten the irksome duties of school or farm. The same boy, older grown, remembers with pleasure the victories of the college athletic field long after he has forgotten how to conjugate use less Greek verbs, and the same man in later life, if he is a sportsman recalls more often and with more satisfaction the day when he caught his record breaking salmon or shot his first moose than he does the day when he was elected to office or when he cleared up a few thousand in a stock transaction.—Samuel Merrill in Forest and Stream.

### Rainbow Tinted Fishes.

The remarkable brilliancy of color in the fish living about the coral reefs in tropical regions has been often noticed. Brilliant blue with fins and tail of bright yellow, vivid crimson shading off into a more subdued hue, bright green spotted and banded with red, green with long parallel stripes of blue and red, green marked with red above and bright blue below—such are some of the colors displayed by the fish of the Great Barrier reef of Australia. In order to explain such brilliant hues on the principles of natural selection they have been described as "warning colors." The fish are thought to be nauseous or poisonous and to proclaim this by their bright colors. As regards those of the Australian coral reef, however, many of them are said to be excellent eating.
